

OBJECTION TO FOSSIL FUEL FIRED POWER PLANT(S)

We the undersigned customers of Pacific Gas and Electric Company (PG&E) and citizens wish to file a complaint against PG&E's for causing the development of fossil fuel fired electricity generation without satisfying at least the 20% renewable energy portfolio requirements. We object to further generation that produces un sequestered carbon dioxide.

We ratepayers dispute the Application for Expedited Approval of the Amended Power Purchase Agreement for Calpine's Hayward planned plant. We request Public Participation Hearings be held in Hayward California on this Application. (U39E) under Application 08-09-007 filed September 10, 2008.

We object to the proposed site of the Plant next to the Federally protected Endangered Species of the San Francisco Bay without a Formal Biological Opinion from the United Sates Department of Fish and Wildlife.

We object to the proposed site and the propensity to site plants in neighborhoods of color and/or low income.

We object to the Bay Area Air Quality Management District (BAAQMD) or United States Environmental Protection Agency issuing Air pollution permits for this project. The U.S. Environmental Protection Agency (EPA) rescinded a pollution permit issued for Calpine Corp.'s Russell City Energy Center by BAAQMD and ordered the air district to re-notice and re-open a public comment period before it makes a new decision on the permit. In its 42-page remand order issued July 29, 2008 the three-judge environmental appeals board of the EPA delivered a stern rebuke to the air district over the way it complied with public notice and outreach regulations for the Hayward plant's pollution permit.

We object to the California Energy Commission approving an extension of the operation date without environmental review.

We object to the City of Hayward accepting \$10,000,000 from Calpine and approving the project without environmental review or consistency with Hayward laws. The City of Hayward is requested to participate in all proceedings regarding this matter to protect the people of Hayward and the laws of the city.

We wish to have public notice of all actions and have the opportunity to participate.

We dispute the subjective projections of increased demand to justify ratepayers funding this development despite the fact that actual use in today's economy is not increasing per the projections.
