Subject: RE: Information Requested for Source Determinations

Claudia,

As discussed, attached is a generic example system flow diagram to assist you in sharing this type of requested information with other organizations. Additionally, in the interim, since the Florida and Wolf Point location information is already public information, well information should be available under COGCC's COGIS public online database on their website <http://cogcc.state.co.us/>.

I am working to follow up on our discussion today and will touch base with you soon to work through meeting your remaining document requests.

Thank you,

Rebecca Tanory
