Subject: RE: data

Donna,
The two links below will bring up the .pdf files for the 2004 and 2005 data. The other appendices from 2005 you probably don't need as they are a glossary of river terms and a guide for the volunteers to interpret the data. If you need these data files in Excel instead of Adobe just let me know.

2004 Data:
<http://www.des.state.nh.us/wmb/VRAP/documents/Ashuelot/Data04.pdf>

2005 Data:
<http://www.des.state.nh.us/wmb/VRAP/documents/Ashuelot/Data05.pdf>

I have attached two files.

The file "200608118_DHanscomb Data Request" contains all of ARLAC's data for 2006 that has been submitted to DES thus far. I have not had time yet to do the QA/QC checks on the replicates so at this stage it is preliminary data.

The file "20060706 ASH Datalogger graphs" contains the preliminary results of the dataloggers that DES deployed at four locations in the Ashuelot River from July 7 -12. Again, all of the QA/QC checking has not been completed. The graphs are a first draft done by a DES intern in preparation for the annual reports so please excuse any formatting errors.

If you are in need for formal copies of any of the graphs we can get them together by the end of next week for you.

Hope this helps!

Ted

Subject: data

Hi Ted,

I downloaded the Ashuelot River local river advisory reports from the DES website, but they came without the appendices. Can you email the data appendices for 2004 and 2005? I need them before next Tuesday.

In addition, if you have any of the 2006 DO data from them, I'd like to receive that too. I have only May 2006. I've also emailed Barbara, but with her work schedule, it's sometimes hard to get a timely response.

Thanks.

Donna
