Hi Kathy,

My holidays were great. I hope you enjoyed a little vacation time as well!

We are working to provide you with the requested pipeline map. To answer your second question below, the green stars on the map are offices. Please let me know if you have any further questions.

Thanks,

Rebecca Tanory

Subject: Re: Florida Gas Flow Description - Clarification to 12-17-09 Attachment A and Proximity Map

Rebecca,

We received your clarified description of the operations in the field and the blow-up version of the system location map on December 21, 2009. Thank you! This has been a huge help.

Can you confirm that we will be seeing some kind of redacted pipeline map (it only needs to be the same area that you provided on the system map)? ----or something hand sketched to show the diverse gas flow capabilities. If I remember correctly, you couldn't talk with your attorneys until some time after the first week in January. This final piece of information will help confirm the statements made in your process description.

Finally, can you remind me what the green stars on the map are? I think you said they weren't process facilities, but I can't remember.

Hope you have a great holiday,

Kathy
