RE: Freedom of Information Act Request for Records Associated with EPA Region I's Draft NPDES Permits for Exeter, NH, NPDES Permit No. NH0100871; Newmarket, NH, NPDES Permit No. NH0100196; and Dover, NH, NPDES Permit No. NH0101311

To Whom This May Concern:

This is a request for public records pursuant to the Freedom of Information Act ("FOIA"), 5 U.S.C. § 552, as implemented by the Environmental Protection Agency ("EPA") at 40 C.F.R. Part 2. This request is submitted by Hall & Associates on behalf of the Great Bay Municipal Coalition. For purposes of this request, the definition of "records" includes, but is not limited to, documents, letters, memoranda, notes, reports, e-mail messages, policy statements, data, technical evaluations or analysis, and studies.

Request

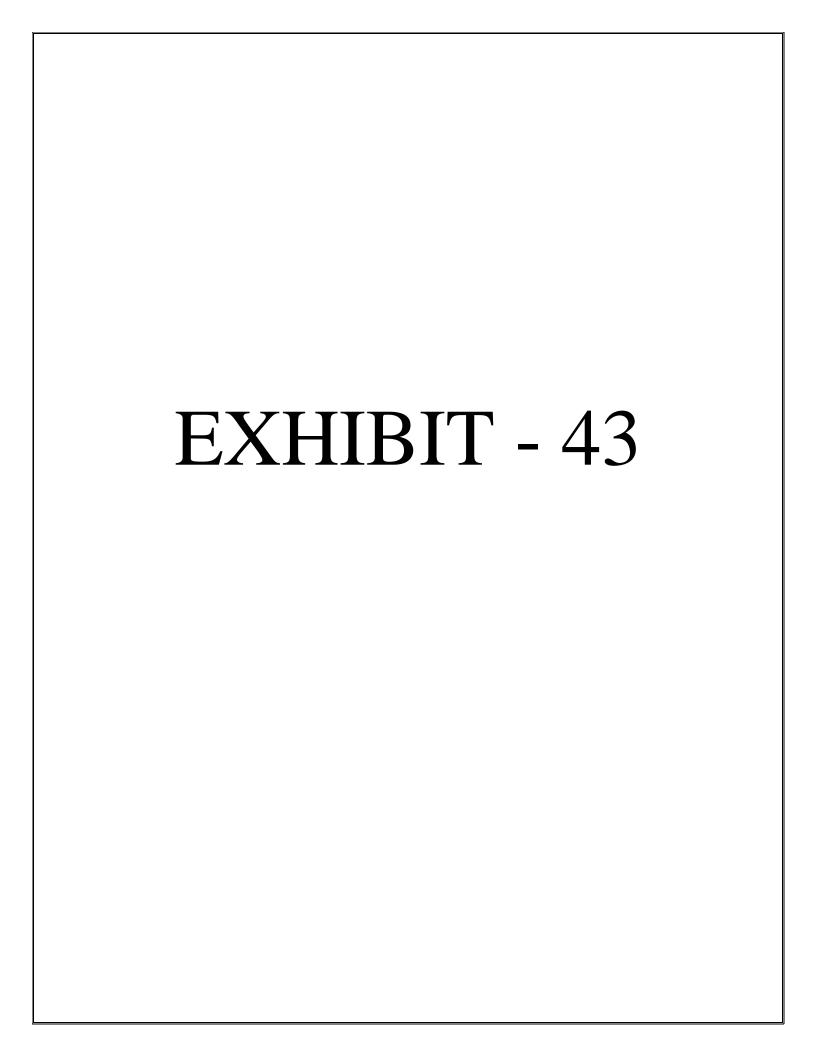

Generally, this request seeks EPA Region I's records associated with its proposed NPDES permits for Exeter, NH, NPDES Permit No. NH0100871; Newmarket, NH, NPDES Permit No. NH0100196; and Dover, NH, NPDES Permit No. NH0101311 regarding the need to achieve a transparency-based 0.3 mg/l TN instream requirement to allow recovery of eelgrass in the tidal rivers and Great Bay. Specifically, during the depositions of Mr. Philip Trowbridge and Dr. Fred Short the following acknowledgement was made:

There is no analysis of data from the Great Bay Estuary demonstrating transparency caused changes in the eelgrass population in (a) tidal rivers in the Great Bay Estuary or (b) Great Bay/Little Bay.

Please provide us with all <u>analyses of information from the Great Bay Estuary</u> that shows this statement is incorrect. Please note we are <u>only</u> seeking analyses of data collected from the Great Bay Estuary; <u>not</u> analyses from other estuaries that EPA may have relied upon.

Please contact the undersigned if the associated search and duplication costs are anticipated to exceed \$250.00. Please duplicate the records that are responsible to this request and send them to the undersigned at the above address. If any requested records are withheld based upon any asserted privilege, please identify the basis for the non-disclosure. If EPA asserts that it is relying on documents developed by the State of New Hampshire for any of these issues, simply identify the state report which is claimed to contain the relevant information. If the Agency lacks records responsible to a particular item, please not that in the response. If you have any questions regarding this request, please do not hesitate to contact this office so as to ensure that agency resources are conserved and only the necessary documents are reproduced.

RE: Freedom of Information Act Request for Records Associated with EPA Region I's Draft NPDES Permits for Exeter, NH, NPDES Permit No. NH0100871; Newmarket, NH, NPDES Permit No. NH0100196; and Dover, NH, NPDES Permit No. NH0101311

To Whom This May Concern:

This is a request for public records pursuant to the Freedom of Information Act ("FOIA"), 5 U.S.C. § 552, as implemented by the Environmental Protection Agency ("EPA") at 40 C.F.R. Part 2. This request is submitted by Hall & Associates on behalf of the Great Bay Municipal Coalition. For purposes of this request, the definition of "records" includes, but is not limited to, documents, letters, memoranda, notes, reports, e-mail messages, policy statements, data, technical evaluations or analysis, and studies.

Request

Generally, this request seeks EPA Region I's records associated with its proposed NPDES permits for Exeter, NH, NPDES Permit No. NH0100871; Newmarket, NH, NPDES Permit No. NH0100196; and Dover, NH, NPDES Permit No. NH0101311 regarding the need to achieve a transparency-based 0.3 mg/l TN instream requirement to allow recovery of eelgrass in the tidal rivers and Great Bay. Specifically, in a letter dated July 13, 2012 to Ms. Ellen Gilinsky, Senior Policy Advisor in EPA's Office of Water entitled "Confirmation of Major Scientific

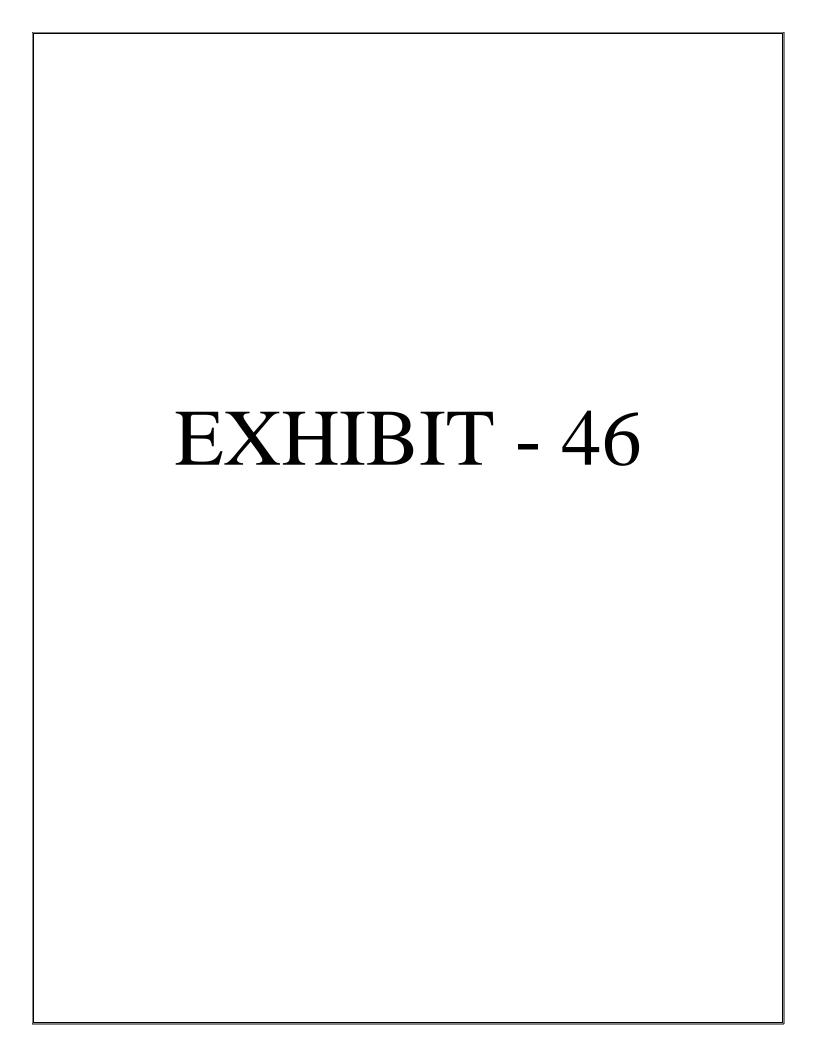

Errors/Uncertainties Regarding Proposed TN reduction for Great Bay Estuary in Depositions of Mr. Philip Trowbridge and Dr. Fred Short," the following statement was made:

The various DES analyses [submitted to EPA] that confirmed (1) TN increases did not cause changes in transparency, algal levels or DO and (2) a "cause and effect" relationship between TN and transparency/DO did not exist, were excluded from the technical information presented in the 2009 numeric nutrient criteria document and, therefore, were never presented to EPA's internal peer review panel.

To date, we have not received a response from EPA regarding the July 13, 2012 letter. Please provide us with all <u>documents in EPA's possession</u> that shows this statement is incorrect. Please note we are <u>only</u> seeking analyses of data collected from the Great Bay Estuary; <u>not</u> analyses from other estuaries that EPA may have relied upon.

Please contact the undersigned if the associated search and duplication costs are anticipated to exceed \$250.00. Please duplicate the records that are responsible to this request and send them to the undersigned at the above address. If any requested records are withheld based upon any asserted privilege, please identify the basis for the non-disclosure. If EPA asserts that it is relying on documents developed by the State of New Hampshire for any of these issues, simply identify the state report which is claimed to contain the relevant information. If the Agency lacks records responsible to a particular item, please not that in the response. If you have any questions regarding this request, please do not hesitate to contact this office so as to ensure that agency resources are conserved and only the necessary documents are reproduced.

Sincerely,	
/s/ John C. Hall

Specifically, during the depositions of Mr. Philip Trowbridge and Dr. Fred Short the following acknowledgement was made:

Dissolved nutrient concentrations (2009-2011) have returned to pre-1995 levels when eelgrass thrived in Great Bay. There is no information from the Great Bay Estuary showing this level of TIN will impair the eelgrass population.

Please provide us with all <u>analyses of information from the Great Bay Estuary</u> that shows this statement is incorrect. Please note we are <u>only</u> seeking analyses of data collected from the Great Bay Estuary; <u>not</u> analyses from other estuaries that EPA may have relied upon.
