CLERK OF THE BOARD EPA APPEALS  
BOARD (MC1105 B)  
ADIBL RIOS BLDG  
1200 PENNSYLVANIA, NW  
WASHINGTON, DC 20460-0001

Dear Sirs:

I own the quarter section of land directly south of the refinery.

Another group of farmers and I, built a legal drain that runs thru my land & the land the proposed refinery is located on.

Our drain is a flat drain from the Ward-Mounttrail county line to the east fork of Shell creek about  $\frac{3}{4}$  of a mile north of there.

The concern we have is that the water could flow back into the large slough at the county line.

We would hope there would be a gate on the quarter line to prevent this when waste water is released.

The Mounttrail County Water Board thru the state water board is trying to address this issue also.

This is our petition.

Sincerely

James Stafalen
