Subject: Cape Wind OCD Modeling

Ida & Brian,

Attached are supplementary tables and figures which help summarize the air dispersion modeling analysis conducted for the Cape Wind Energy Project to demonstrate that the emissions from the Project OCS Sources will not cause or contribute to an exceedance of the recently promulgated 1-hour NAAQS. These tables and figures are intended to supplement the modeling report submitted for the analysis on November 4, 2010. We would be happy to walk you through them on our call scheduled for 9 AM tomorrow morning. Let me know if you have any questions.

Mike
