Cincinnati, OH 45227  
Mr. Mike Collins, President

August 14, 2007  
RE: Asbestos abatement work proposal  
20000 N. Oak Avenue, Tuckahoe, OH

Dear Mr. Collins:

Asbestek, Inc. proposes to remove and dispose of the 11,650 square feet of non-fibrous asbestos that is located at 20000 N. Oak Avenue, Tuckahoe, Ohio (the former Cleveland Director Company) and referenced in the asbestos sampling survey dated 4/24/07 performed by Asbestek Environmental Services Inc.

Asbestek, Inc. has registered with the Secretary of the State to perform work in Ohio as a Single Fee Profit Corporation. The initial work is non-regulated Category II, non-fibrous which we can begin A.E.A.Z.

The non-regulated Asbestos Division will support our efforts by removing any non-fibrous asbestos that we find that may reside on the ceiling as well as provide us with a laptop EM to match the abatement results and also provide us with a means of water and electricity. Provided for this activity, although not regulated by the State of Ohio, Department of Environmental Protection, will require us to maintain the integrity of the results by not breathing them and wearing them in because fibrous. We will document results that have potential increased costs and we will include and incorporate same that may break during abatement procedures. All results will be placed in double lined containers, sealed by the handler and recorded prior to departure, indicating type of material and quantity shipped per waste stream.

We further propose to remove and dispose of all the fibrous asbestos referenced in the same survey that includes 4,500 square feet of pipe as installed in the main entrance and approximately 1,500 square feet of asbestos covered pipe throughout the facility. These abatement activities will require a 30 day notification to the State of Ohio, Department of Environmental Protection, Division as well as double lined removal.

We will require a partial payment of \$20,000.00 dollars upon completion of the removal work as within two weeks from the start of the project, whichever comes first and the balance of \$20,000.00 dollars to be paid upon completion of the abatement of the fibrous portion of the project. Long term project total is \$100,000.00.

Accepted by Noteworthy Division / Mr. Mike Collins, President in company officer signature and title

Signature: Thomas Amodeo

**OHIO BUREAU OF WORKERS' COMPENSATION**

**REQUIRED POSTING**

Effective October 13, 2004, Section 4123.54 of the Ohio Revised Code requires notice of rebuttable presumption. Rebuttable presumption means that an employee may dispute or prove untrue the presumption (or belief) that alcohol or a controlled substance not prescribed by the employee's physician is the proximate cause (main reason) of the work-related injury.

The burden of proof is on the employee to prove that the presence of alcohol or a controlled substance was not the proximate cause of the work-related injury. An employee who tests positive or refuses to submit to chemical testing may be disqualified for compensation and benefits under the Workers' Compensation Act.

Regarding: Ohio application for business (Copy 4 pages) Certificate of Insurance and Indiana Contractors License (2 pages)			
<b>Comments:</b> Molly, We sent off a check today for the registration fee to do business in Ohio along with the application and a copy of our certificate of incorporation. I spoke with Mike today and told him we could probably start the manifests as soon as Friday. I contacted Allied waste and they are sending us a credit application for the waste dumpsters. They are also fixing us over a profile sheet from the landfill for the waste manifests and I.D.# Tammy McClood from the landfill said she could get the non-fragile waste profile form approved in one day, so if all goes well we should be able to get a delivery by Friday on the dumpsters. We are getting 4 workers set up to start out on Friday, and they will work the week end as well. I will need a copy of the asbestos report on the Euclid property. Mike said he was going to cover tonight, but we still have not received it so could you please look into getting us that info. Thanks, John Vadas My e-mail address is <a href="mailto:JPVFLange@comcast.net">JPVFLange@comcast.net</a> Web Site: <a href="http://WWW.JPVServices.com">WWW.JPVServices.com</a> JPV Services Call 219-808-1882 Fax 219-845-3074 (My office) ASBESTEK, INC. Regarding: Proposal / contract for Euclid, OH / Landfill and Hauling			
<b>Comments:</b> Molly, The following page is our proposal for the Euclid Ohio project. Could you send Mike please review it and get back to us so we can get the ball rolling. I spoke with Chris Parnell from Allied waste this morning and the landfill they use for asbestos is in Ottawa outside Spaulding, not Overland in Lorain County. This is where they take general debris. The landfill in Ottawa accepts both friable and non-friable waste. I will get you a copy of the waste profile information as soon as it is approved. Non-friable usually takes only one day to approve as we should have no problem on the manifest. The friable asbestos profile may take several days to approve and since we have two different types of materials it may require two separate profile numbers for the waste streams. I don't think they care as long as the friable is separate from the non-friable. Anyway please call me if you have any questions about the proposal or if you need a work plan. I am putting that together now just to C.Y.A. and the State may want to see something if they conduct a visit. This is open for the opportunity to work with your company. We will not call best to get this project completed quickly. If you could fax a copy of the proposal to both fax numbers I would appreciate it as I work out of my office as much as the office at Asbestek.  Thanks, John Vadas My e-mail address is <a href="mailto:JPVFLange@comcast.net">JPVFLange@comcast.net</a> Web Site: <a href="http://WWW.JPVServices.com">WWW.JPVServices.com</a> JPV Services Call 219-808-1882 Fax 219-845-3074 (My office) ASBESTEK, INC. Date: 8-23-07 Time: 11:00 A.M. Chicago			
Regarding: 10 Day notification for Demolition and Renovation / Ohio E.P.A.			
<b>Comments:</b> Mike & Molly, I sent off the 10 day E.P.A. Demolition notification via certified mail yesterday on the 22 <sup>nd</sup> . They go by date sent and the first original notification has to be mailed (or hand delivered). All subsequent revisions can be faxed i.e. when we start the friable asbestos or if any corrections need to be made to the original it will not change the 10 day time frame already established. I was told by Mark Needham from the Ohio Department of Public Health that the manifest removal prior to demolition did not require an asbestos contractor, licensed workers or any other forms except to register with the Secretary of State, which we did. We used Ohio licensed workers and an Ohio supervisor any way so they will be ready to do the friable when that 10 days goes through. I apologize for not getting this out sooner, but if you start before the 10 working days, our defense is going to be the information I was given by both Mark Needham and Jeff Gurnis, the office in charge of the asbestos program for work performed in the State of Ohio was incomplete and we were not aware of this notification or we would have sent it out when we applied for the Foreign Corporation certificate. At any rate the non-friable manifest will be complete and we will be off site by 2:00P.M. - 3:00P.M. Today with a total of 3 - 30 cubic yard boxes generated. (The survey indicated 11,499 S.F.) I think the Environmental specialists missed all the manifest on the roof areas and maybe some interior walls because it should have fit easily into 4 boxes. I will fax over copies of the waste manifests as soon as the crew gets back to Hammond. We will move on the friable A.S.A.P.  Thanks, John Vadas / My e-mail address is <a href="mailto:JPVFLange@comcast.net">JPVFLange@comcast.net</a> Web Site: <a href="http://WWW.JPVServices.com">WWW.JPVServices.com</a> JPV Services Call 219-808-1882 Fax 219-845-3074 (My office) ASBESTEK, INC. Date: 8-24-07 Time: 6:45 A.M. Chicago			
Regarding: Invoice for non-friable work in Euclid, OH			
<b>Mike &amp; Molly,</b> The following invoice is for the substantial completion of the non-friable work that we started on Saturday 8-18-07 and completed Thursday 8-23-07. We used a crew of 3 workers and 1 supervisor as well as my on site intervention to coordinate dumpsters, waste manifests and rental equipment. I will overnight you the waste manifests and a project log to detail the work up to this point as well as a copy of our certificate with the Secretary of State to work in Ohio and a proposed work schedule / plan for the next phase that includes the friable T.S.L. on the pipes and the spray-on insulation in the rest of the warehouse / manufacturing facility. If you could please send us a check for the work performed up to date, this will go a long way in helping us get the next phase of this project under way. We are looking into working with a business associate who has a license for environmental work in Ohio, which would mean we would not have to wait the 2-3 weeks for approval before we start in our 10 day. We are still going to get our license for Ohio, but this option will help expedite the friable portion of the project. Thomas Amaya, my partner has a very good relationship with this contractor and has supervised many projects for them. I was their Project Manager / Estimator as well.  P.S. If you could also overnight the survey for the Indianapolis job, we could start putting together a proposal for that as well. We are currently licensed in Indiana, Minnesota and Alabama and we are currently working on our Ohio and Illinois asbestos abatement licenses. <b>Regarding:</b> 10 Day notification to Ohio Dept. of Health / Ohio license and certificates			
Mike & Molly, The following pages are for your records. My partner, Tomax, is going to Euclid tomorrow late P.M. with a crew and equipment to take care of the pipe and any clean up you need done on Sunday. I am hoping the lifts are still there and working. He has enough materials to take care of a lot of clean up so you should be able to get it at the steel. His cell phone number is 773-544-4848 if you need to talk to him about anything. If you are still interested in getting us to put together a number for the Indianapolis project, please FedEx the survey. I am going down to Indianapolis on Tuesday night and can stay and look at the project all day Wednesday. If you have other bidders looking at the site I might be able to save you some time. Don't use Champion or Heritage for your own good. They both have a history of major violations. When I was an inspector I removed Heritage from the Mercury clean-up projects working for IT Corporation in the Chicago area. They took the gray area too far. As far as the EPA in Ohio, I do not foresee any problems. We will play it by the book on the friable containment and glove bag work. Don't let the dates on the notification scare you. I just have to put something that looks good to a regulator. We will probably knock out the friable in two days, 3 at the most. Thanks, John John Vadas My e-mail address is <a href="mailto:JPVFLange@comcast.net">JPVFLange@comcast.net</a> Web Site: <a href="http://WWW.JPVServices.com">WWW.JPVServices.com</a> Cell 219-808-1882 Fax 219-845-3074 (My office) ASBESTEK, INC. <b>Regarding:</b> Contact Information	
<b>Mr. Tomas Amaya</b> I received 3 phone calls from you yesterday at my residence. I was not at home for the first 2 and went to bed before the last one. You asked me to call you. I am not your legal council or your employee so any questions you have regarding Ohio I probably will not respond to any way. Since I no longer have a cell phone and I do not wish to upset my family members or myself when you call, I am asking that you only contact me if it is extremely important by e-mail, ( <a href="mailto:JPVFLange@comcast.net">JPVFLange@comcast.net</a> ) as my son is autistic and it upsets him very much and my wife does not want you to call here any more. She works nights and the phone wakes her up during the day. I have been physically sick over this situation and after seeing my doctor, my already high blood pressure is even higher and I am now on stronger medication to get it under control with his advise to avoid stress. The situation that Nationwide Demolition created between you and your workers is not my fight. I have lost a job because of my medical condition and I am not going to lose my wife or fight with my son any longer over this matter. I am not an attorney and I am not getting paid to provide you with my services or answer questions on your behalf. I suggest you respond to the EPA or ask for an extension to do so. I faxed them a statement on Friday, last week, expressing my position in this matter. I do not have to explain myself any further to them or anyone else. My credit with OHS is ruined and the phone calls from / to you, Nationwide, regulatory, waste haulers, etc. during the project also contributed to losing my phone service, since I could not pay either of them. Do your own homework and take care of your own business matters. I am not responsible for your company's actions or Nationwide Demolition and Mike Collins John Vadas / My e-mail address is <a href="mailto:JPVFLange@comcast.net">JPVFLange@comcast.net</a>

# ASBESTEK, INC. ENVIRONMENTAL SERVICES

Nationwide Demolition  
8405 State Road Route 13  
Greenwich, OH 44837  
Mr. Mike Collins, President

August 16, 2007

RE: Asbestos abatement work proposal  
20100 St. Clair Avenue, Euclid, OH

Dear Mr. Collins:

Asbestek, Inc. proposes to remove and dispose of the 11,400 square feet of non-friable transite that is located at 20100 St. Clair Avenue, Euclid, Ohio (the former Cleveland Trancher Company) and referenced in the asbestos sampling survey dated 8-08-07 performed by Affiliated Environmental Services Inc.

Asbestek, Inc. has registered with the Secretary of the State to perform work in Ohio as a foreign for Profit Corporation. The initial work is non-regulated Category II, non-friable which we can begin A.S.A.P.

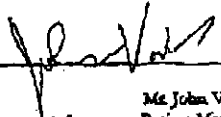

We understand Nationwide Demolition will support our efforts by removing any trees or other materials at the site that may impede the access to the siding as well as provide us with a boom lift to reach the elevated panels and also provide us with a source of water and electricity. Protocol for this activity, although not regulated by the State of Ohio, Department of Environmental, still requires we try to maintain the integrity of the panels by not heating them and causing them to become friable. We will document panels that have pre-existing structural cracks and use wet methods and encapsulate areas that may break during abatement procedures. All panels will be placed in double lined containers, profiled by the landfill and manifested prior to shipment, indicating type of materials and quantities shipped per waste stream.

We further propose to remove and dispose of all the friable asbestos referenced in the same survey that includes 6,700 square feet of spray on insulation in the maintenance shed and approximately 1,000 linear feet of asbestos covered pipe throughout the facility. These abatement activities will require a 10 day notification to the State of Ohio, Department of Environmental, Asbestos division as well as friable removal protocol.

We will require a partial payment of \$30,000.00 dollars upon completion of the main panels or within two weeks from the start of the project, whichever comes first and the balance of \$20,000.00 dollars to be paid upon completion of the remainder of the friable portion of the project. Lump sum project total is \$50,000.00.

RE: Asbestos abatement work proposal  
20100 St. Clair Avenue, Euclid, OH

Dear Mr. Collins:

Asbestek, Inc. proposes to remove and dispose of the 11,400 square feet of non-friable transit that is located at 20100 St. Clair Avenue, Euclid, Ohio (the former Cleveland Trancher Company) and referenced in the asbestos sampling survey dated 8-09-07 performed by Affiliated Environmental Services Inc.

Asbestek, Inc. has registered with the Secretary of the State to perform work in Ohio as a foreign for Profit Corporation. The initial work is non-regulated Category II, non-friable which we can begin ASAP.

We understand Nationwide Demolition will support our efforts by removing any trees or other materials at the site that may impede the access to the siding as well as provide us with a boom lift to reach the elevated panels and also provide us with a source of water and electricity. Protocol for this activity, although not regulated by the State of Ohio, Department of Environmental, will require we try to maintain the integrity of the panels by not heating them and causing them to become friable. We will document panels that have pre-existing structural cracks and use wet methods and encapsulate areas that may break during abatement procedures. All panels will be placed in double lined containers, provided by the landfill and manifested prior to shipment, indicating type of materials and quantities shipped per waste stream.

We further propose to remove and dispose of all the friable asbestos referenced in the same survey that includes 5,700 square feet of spray on insulation in the maintenance shed and approximately 1,900 linear feet of asbestos covered pipe throughout the facility. These abatement activities will require a 10 day notification to the State of Ohio, Department of Environmental, Asbestos division as well as friable removal protocol.

We will require a partial payment of \$30,000.00 dollars upon completion of the transit panels or within two weeks from the start of the project, whichever comes first and the balance of \$20,000.00 dollars to be paid upon completion of the remainder of the friable portion of the project. Lump sum project total is \$50,000.00.

**Comments:**

Molly:

The following page is our proposal for the Euclid Ohio project. Could you and Mike please review it and get back to us so we can get the ball rolling.

I spoke with Chris Parnell from Allied waste this morning and the landfill they use for asbestos is in Ottawa outside Sandusky, not Overland in Loraine County. That is where they take general debris.

The landfill in Ottawa accepts both friable and non-friable waste. I will get you a copy of the waste profile information as soon as it is approved. Non-Friable usually takes only one day to approve so we should have no problems on the transit. The friable asbestos profile may take several days to approve and since we have two different types of materials it may require two separate profile numbers for the waste streams. I don't think they care as long as the friable is separate from the non-friable. Anyway please call me if you have any questions about the proposal or if you need a work plan. I am putting that together now just to C.Y.A. and the State may want to see something if they audit a site. This is again has the opportunity to work with your company. We will do our best to get this project completed quickly. If you could fax a copy of the proposal to both fax numbers I would appreciate it as I work out of my office as much as the office at Asbestek.

Thanks;

John Vadas

Regarding: 10 Day notification for Demolition and Renovation / Ohio E.P.A.

### Comments:

Mike & Molly,

I sent off the 10 day E.P.A. Demolition notification via certified mail yesterday on the 22<sup>nd</sup>.

They go by date sent and the first original notification has to be mailed or hand delivered. All subsequent revisions can be faxed i.e. when we start the friable asbestos or if any corrections need to be made to the original it will not change the 10 day time frame already established. I was told by Mark Needham from the Ohio Department of Public Health that the transite removal prior to demolition did not require an asbestos contractor, licensed workers or any other forms except to register with the Secretary of State, which we did. We used Ohio licensed workers and an Ohio supervisor any way so they will be ready to do the friable when that 10 day goes through. I apologize for not getting this out sooner, but if you start before the 10 working days, our defense is going to be the information I was given by both Mark Needham and Jeff Gurnia, the office in charge of the asbestos program for work performed in the State of Ohio was incomplete and we were not aware of this notification or we would have sent it out when we applied for the Foreign Corporation certificate. At any rate the non-friable transite will be complete and we will be off site by 2:00P.M. - 3:00P.M. Today with a total of 5-30cubic yard boxes generated. (The survey indicated 11,400 S.F.) I think the Environmental specialist missed all the transite on the roof areas and maybe some interior walls because it should have fit easily into 4 boxes. I will fax over copies of the waste manifests as soon as the crew gets back to Hammond. We will move on the friable A.S.A.P.

Thanks,

Date: 8-24-07  
Time: 6:45 A.M. Chicago

Regarding: Invoice for non-friable work in Euclid, OH

Mike & Molly;

The following invoice is for the substantial completion of the non-friable work that we started on Saturday 8-18-07 and completed Thursday 8-23-07. We used a crew of 3 workers and 1 supervisor as well as my on site intervention to coordinate dumpsters, waste manifests and rental equipment.

I will overnight you the waste manifests and a project log to detail the work up to this point as well as a copy of our certificate with the Secretary of State to work in Ohio and a projected work schedule / plan for the next phase that includes the friable T.S.I. on the pipes and the spray-on insulation in the rest of the warehouse / manufacturing facility.

If you could please send us a check for the work performed up to date, that will go a long way in helping us get the next phase of this project under way. We are looking into working with a business associate who has a license for environmental work in Ohio, which would mean we would not have to wait the 2-3 weeks for approval before we put in our 10 day. We are still going to get our license for Ohio, but this option will help expedite the friable portion of the project.

Tomas Amaya, my partner has a very good relationship with this contractor and has supervised many projects for them. I was their Project Manager / Estimator as well.

P.S.

If you could also overnight the survey for the Indianapolis job, we could start putting together a proposal for that as well. We are currently licensed in Indiana, Minnesota and Alabama and we are currently working on our Ohio and Illinois asbestos abatement licenses.

Thanks, John
