Mr. John Kirtley, Board President
Star Sewer and Water District
P.O. Box 400
Star, Idaho 83669

RE: Notification of Stayed Permit Conditions National Pollutant Discharge Elimination System (NPDES) Permit, Permit No. ID0023591

Dear Mr. Kirtley:

The above-referenced NPDES Permit No. ID0023591 (Permit) was issued to the Star Sewer and Water District (SSWD) on March 26, 2015. The Permit authorizes discharges from the SSWD's wastewater treatment plant. On April 28, 2015, the SSWD filed a petition for review of the Permit (Appeal No. NPDES 15-07). This letter serves as notification pursuant to 40 CFR § 124.16(a)(2) of those Permit conditions that are stayed as a result of the petition for review.

The following contested conditions of NPDES Permit No. ID0023591 are stayed until final agency action under 40 CFR § 124.19(l):

- Section I.B.1, Table 1: The **interim and final** total ammonia as N concentration and mass loading effluent limits are stayed.
- Section I.B.1, Table 1: The **final** total residual chlorine concentration and mass loading effluent limits, applicable November 1, 2016, are stayed.
- Section I.C.2, Table 2: Task 4 of the compliance schedule, requiring achievement of compliance with the final total residual chlorine limits, is stayed.

The remainder of the Permit conditions are uncontested and severable from the contested conditions, thus, in accordance with 40 CFR § 124.16(a)(2), will become fully effective and enforceable thirty-three (33) days after the date this notice is mailed. Please feel free to contact Jill Nogi, of my staff, at (206) 553-1841, or nogi.jill@epa.gov, should you have questions regarding this letter.

Sincerely,

Daniel D. Opalski, Director
Office of Water and Watersheds
