## **LIST OF FIGURES**

Figure K-1      Average Annual Discharge for Water Years 1973 to 2007

## K1. SURFACE WATER QUALITY CRITERIA

---

Surface water COCs include:

- Aldrin
- Arsenic
- BEHP
- Chlordanes
- Chromium
- Copper
- DDD, DDE, DDT, and DDx
- Ethylbenzene
- Hexachlorobenzene
- MCPP
- Pentachlorophenol
- PCBs
- cPAHs
- PAHs [benzo(a)anthracene, benzo(a)pyrene, naphthalene]
- TBT
- 2,4,7,8-TCDD eq

Surface water quality criteria for these COCs are based on protection of human health or the aquatic environment. The water quality criteria for these COCs are presented in **Table K1-1**.

Since the presence of some of these COCs are due to upland or upriver sources, they were not included in this evaluation. These include: chromium, ethylbenzene, hexachlorobenzene, MCPP, and pentachlorophenol. Aldrin was not able to be evaluated due to insufficient data. Other COCs were not evaluated due to insufficient detections. These include: BEHP, PAHs, and TBT. Lastly, some COCs do not exceed water quality criteria on a Site-wide scale. These include: arsenic, chlordanes, copper, DDx, PCBs (aquatic life only), and zinc. The remaining COCs are all related to protection of human health; thus, protection of aquatic life cannot be evaluated with the existing data set. Therefore, this analysis was performed for the following COCs: DDE, DDD, DDT, PCBs, cPAHs, and 2,3,7,8-TCDD eq.

## **K2. SURFACE WATER DATA**

---

Surface water transect data was used to determine reductions in Site-wide surface water expected from reductions in sediment concentrations from construction of each of the alternatives. Based on the methodology used to collect and analyze surface water samples on a smaller spatial scale, it is not possible to conduct an analysis of future reductions in surface water from construction of each of the alternatives.

The transect data were collected during three flow events: low flow, storm water-influenced flow, and high flow. Surface water samples used in this evaluation were collected during the Round 3A RI sampling event at six transect locations: RM 16, RM 11, RM 6.3, RM 4, RM 2 and at the entrance to Multnomah Channel because only this data set analyzed all COCs at all transects. Therefore, this evaluation is limited by a single sampling event conducted over three seasons.

Two different sampling approaches were utilized to collect the surface water transect samples. At RM 2 and 11, transects were subdivided into three lateral segments across the river – east shoreline, navigation channel and west shoreline – and vertically integrated surface water samples collected. At RM 16, RM 6.3, RM 3.9 and the entrance to Multnomah Channel, cross-sectional near-bottom and near-surface surface water samples were collected. Surface water data utilized in this analysis were collected using an Infiltrax 300 system connected to XAD-2 resin columns to collect hydrophobic organic compounds for analysis by ultra-low analytical methods. The total surface water concentrations was used in this analysis.

The three specific flow conditions used for this analysis include:

**September 2006 Low-flow Event:** Low flow conditions were monitored in September 2006. Willamette River flow as measured at the Morrison Bridge USGS gauge was 8730 cfs. Surface water samples were collected September 4–13.

**November 2006 Storm water Event:** A water runoff monitoring event was conducted November 2006 evaluate the contribution of storm water to surface water during relatively low flow Willamette River conditions (23,000 cfs as measured at the Morrison Bridge). Surface water samples were collected between Surface water samples were collected November 2–5 during a storm water runoff event.

**Winter 2007 High-flow Event:** High flow conditions were monitoring in January and February 2007. Willamette River flow conditions were 59,800 cfs in January and 60,900 cfs in February as measured at the Morrison Bridge. The high-flow surface water sampling event was split into two phases because of a sudden drop in precipitation after the first 3 days of sampling. The first phase took place January 15–18, 2007 while the second phase took place February 21 through March 10, 2007.

Surface water sampling for each event is described further in Section 2.1.4.1.1 of the RI Report and the field sampling reports. The data used in the analysis is provided in **Tables K1-1 through K1-3**.

### **K3. REDUCTIONS IN SURFACE WATER CONCENTRATIONS**

---

The evaluation of estimate reductions in surface water concentrations following remediation (t=0) was conducted only on a Site-wide scale. Reductions on smaller spatial scales or associated with watershed efforts or source control were not included for the purpose of this analysis, although current watershed (upstream) and upriver (downtown) contributions are conducted as part of this analysis.

#### **K3.1 APPROACH**

---

The approach was to determine the reductions in Site-wide sediment concentrations and apply that reduction to the surface water concentrations for each COC.

#### **K3.2 REDUCTION IN SITE-WIDE SEDIMENT CONCENTRATIONS**

---

The approach used to develop weighted Site-wide sediment SWACs in Appendix J was used to determine the current Site-wide sediment SWAC (PreSWAC) for each COC. This approach was also used to determine the post remedial sediment SWAC (Post SWAC) for each COC by alternative. These values are provided in **Table K3-1**. The percent SWAC reduction was calculated using these values in the following equation:

$$\text{Percent SWAC Reduction} = \left[ 1 - \left( \frac{\text{Post SWAC}}{\text{Pre SWAC}} \right) \right] \quad \text{Equation K1-1}$$

The resulting percent SWAC reduction for each COC by alternative is presented in **Table K3-2**.

#### **K3.3 INITIAL SURFACE WATER CONCENTRATIONS**

---

The current upstream surface water concentration for each COC was calculated from weighted transect surface water data at RM 16. A weight of 3 was given to the low flow, 1 was given to stormwater-influenced flow, and 8 was given to high flow. This weighting was developed from the average annual hydrograph for the lower Willamette River (**Figure K3-1**). This average annual flow represents the surface water concentration from the broader watershed (**Tables K3-3a-f** and **K3-4a-f**).

In order to calculate the contribution of contamination in the downtown reach, the current surface water concentrations at RM 11W and RM 11M for all three flow conditions were used since transect data is not available immediately above the upper Site boundary. RM 11E was not used since there is a known source in that area and sediment concentrations are elevated; thus, it is not representative of concentrations entering the Site. The current surface water concentration for each COC entering the Site was also calculated as a weighted average (**Tables K3-3a-f**). The concentration from upstream was then subtracted from the concentration entering the site to obtain the average annual

concentration from the downtown reach. These values are all presented in **Tables K3-4a-f**.

The current Site-wide weighted surface water concentration (**Tables K3-3a-f**) was calculated using the weighted transect surface water concentration for each COC using the data from transects RM 11, 6.3, 3.9, 2 and Multnomah Channel in each river flow event (**Tables K3-5a-f**). The same weighting was given to each flow event as was used for upstream and entering the Site. The weighted transect data was then averaged to obtain the total annual average Site-wide surface water concentration (**Tables K3-4a-f**). The concentration entering the Site was then subtracted from the average Site concentration to obtain the average annual concentration from the downtown reach. These values are all presented in **Tables K3-4a-f**.

The water quality criterion for each COC is also presented in these tables for comparative purposes.

### **K3.4 POST-CONSTRUCTION SURFACE WATER CONCENTRATIONS**

---

This analysis assumed that the upstream and downtown surface water concentrations would remain unchanged following implementation of the sediment remediation. For the reduction in surface water concentration associated with construction of each alternative it is assumed that the remedy only addresses Site surface water contributions (Site minus upstream and downtown).

The Site surface water contribution is assumed to be reduced by a percentage equal to the Site-wide surface sediment SWAC reduction for each alternative (**Table K3-2**). These percentage reduction values were applied to current Site surface water contributions to estimate the reduction in surface water concentrations within the Site for each alternative. Thus, the estimated post-construction surface water concentration for each alternative was obtained using the following equation:

$$C_{post-const} = C_{Siteinitial} (1 - \%SWAC\ reduction) \quad \text{Equation K3-1}$$

The net reduction was then calculated using the following equation:

$$Net\ Reduction\ (\%) = \left[ 1 - \frac{C_{post-const}}{C_{Siteinitial}} \right] \quad \text{Equation K3-2}$$

where:

$C_{post-cont}$  = post-construction contaminant concentration ( $\mu\text{g/L}$ )

$C_{initial}$  = initial contaminant concentration ( $\mu\text{g/L}$ )

## **P1. FLOOD RISE EVALUATION**

---

An assessment of impacts on water surface elevation during high flow events was conducted to evaluate compliance with ARARs. Balancing the amount of material dredged and placed in the river was considered during the development and evaluation alternatives to minimize the potential for unacceptable flood rise following remedy implementation and comply with federal and state floodplain management ARARs.

The Executive Order for Floodplain Management (Executive Order 11988) requires federal agencies carrying out their responsibilities to take action to reduce the risk of flood loss, to minimize the impact of floods on human safety, health, and welfare, and to restore and preserve the natural and beneficial values served by floodplains. Agencies are to evaluate the potential effects of any actions they may take in a floodplain to ensure that their planning programs and budget requests reflect consideration of flood hazards and floodplain management, including the restoration and preservation of such land areas as natural, undeveloped floodplains. The order emphasizes the importance of evaluating alternatives to avoid impacts and incompatible development in floodplains, minimizing the potential harm to floodplains if the only practicable alternative requires siting an action in a floodplain, and providing early and adequate opportunities for public review of plans and proposals involving actions in floodplains. Under this concept, the special flood hazard area (commonly referred to as the 100-year flood plain) is divided into floodway and floodway fringe. If a proposed channel modification affects the floodway such that the river stage is increased for the base flood condition, such a conveyance reduction would constitute a floodway encroachment. If a proposed floodway action such as construction of a sediment cap results in a regulatory floodway encroachment, then either:

- The encroachment must be mitigated (offset) such that there is no net increase in river stage; or
- The floodway is realigned or adjusted in consultation with the requisite authorities.

A simplified evaluation was conducted for each alternative by comparing estimated volumes of capping and dredging throughout the site. This evaluation did not consider uncertainties associated with changes in waterway use, changes in management of reservoirs within the Willamette River watershed and the effects of global climate change that may result in changes to the flood rise elevation. Uncertainties associated with potential channel deepening were also not considered. In addition, this evaluation does not consider construction of an in-water CDF. While a CDF could impact flood rise on a local scale, it would be designed to minimize potential impacts, and it is excluded from this simplified evaluation.

Although there are uncertainties associated with the extent of contamination in the riverbanks that will lessen excavation and capping volumes, this evaluation assumed removal and capping over the full extent of riverbank. Volumes of material to be removed during dredging were calculated on a site-wide basis. Estimated volumes of materials placed are based on the total volume of the following:

- Sand
- Armor material
- AquaGate
- AquaBlok™
- Beach mix
- Organoclay

Quantities of fill materials and dredged volumes are summarized in **Table P-1**. Evaluated on a Site-wide scale, the volume of fill for each alternative is less than the total volume removed, resulting in a net cut volume. In addition, the volume of material removed relative to the volume of fill placed increases as the size of the remedial footprint increases. While this is not entirely balanced with respect to dredging and placement of fill material, it does indicate that there is no net increase in channel depth, minimizing potential increase to flood rise levels due to the application of technology assignments, fulfilling the requirements for protection of human health and the environment and compliance with ARARs with respect to flood rise. In addition, the uncertainty of flood rise impacts on a site-wide scale is lessened with increasing net dredged volumes.

Beachmix Material Volume <sup>a, c</sup>	(CY)	18,563	32,441	48,189	69,511	69,510	90,647	49,511
Organoclay Mat Material Volume <sup>a, c, f</sup>	(CY)	496	496	496	502	496	496	496
<b>TOTAL FILL</b>	<b>(CY)</b>	<b>495,931</b>	<b>727,153</b>	<b>957,629</b>	<b>1,339,587</b>	<b>1,565,246</b>	<b>2,257,356</b>	<b>900,270</b>
<b>DIFFERENCE (CUT-FILL)</b>	<b>(CY)</b>	<b>131,721</b>	<b>454,085</b>	<b>1,066,593</b>	<b>1,677,602</b>	<b>3,020,155</b>	<b>5,139,242</b>	<b>852,104</b>

Notes:

<sup>a</sup> Total Quantities above are rounded up to the nearest whole number. In addition a portion of the excavated volume and/or capping or restoration materials attributed to the upper river bank may not directly contribute to flood rise impacts if above the base flood elevation but for purposes of this cursory evaluation are assumed to negligible.

<sup>b</sup> Dredge volumes represent an average of the estimated Low and High Volumes with Overdredge. Neat volumes are multiplied by an overdredge factor of 1.5 to estimate the "Low Volume with Overdredge" and multiplied by an overdredge factor of 2.0 to estimate the "High Volume with Overdredge".

<sup>c</sup> Volume includes Riverbank material quantities.

<sup>d</sup> Volume of sand for mixing of the AquaGate reactive layers is not included.

<sup>e</sup> Volume includes sand for mixing. Per Vendor Information provided on 7/21/2015, AquaGate+PAC10% constitutes 48.6% of the total volume.

<sup>f</sup> Assumes 1" Organoclay Mat for Significantly Augmented Reactive Cap.

<sup>g</sup> Difference is fill volume subtracted from cut volume. If cut volumes exceed fill volumes, they are indicated in bold black font. If fill volumes exceed cut volumes, they are indicated in bold red font.

U. S. Environmental Protection Agency Region 10  
1200 Sixth Avenue, Suite 900  
Seattle, Washington 98101-3140

**RE: State Concurrence with EPA's Record of Decision for the Portland Harbor Superfund Site**

Dear Mr. McLerran:

The Oregon Department of Environmental Quality (DEQ), on behalf of the State of Oregon (State), has reviewed the United States Environmental Protection Agency (EPA) Record of Decision (ROD) for the Portland Harbor Superfund Site (the Harbor) located in Portland, Oregon to determine whether to concur with the ROD. EPA's decision comes after 16 years of work to identify contamination, assess risks to people and the environment, and develop cleanup options for this important stretch of the lower Willamette River.

The State believes strongly that it is time for action. The risks to human health are too great for further delay in issuing the ROD and work must begin to protect people from exposure to contamination in resident fish and sediment in the lower Willamette River. Further, with every year of delay, the Portland metropolitan region loses opportunities for economic, social and cultural revitalization in this key part of the region.

EPA's ROD selects a modified version of the "preferred" alternative described in EPA's Proposed Plan that was issued earlier this year. EPA received thousands of public comments on the Proposed Plan during the 90-day public comment period. The overwhelming majority of the comments raised concerns about whether the Proposed Plan would meet cleanup objectives within a reasonable timeframe. Many comments requested that EPA select a remedy that more aggressively targets the primary risk drivers – polychlorinated biphenyls (PCBs), polycyclic aromatic hydrocarbons (PAHs), pesticides and dioxins/furans – through active remediation instead of relying so heavily on monitored natural recovery. Other comments provided suggestions concerning ways to ensure that the remedy is cost-effective and that it is feasible to implement. Based on all of these comments, EPA has developed a modified version of Alternative F as its selected remedy for the Harbor.

The selected remedy applies Alternative B remedial action levels (RALs) in the federal navigation channel, Alternative F RALs landward of the navigation channel, and actively remediates all Principal Threat Waste (PTW) through capping or dredging. The selected remedy more aggressively targets contamination in nearshore areas of the Harbor where fish and other ecological receptors are more likely to feed and reside, where bioaccumulation is more likely to occur, and where people are more likely to encounter contaminated sediments. The ROD requires that all excavated wastes be disposed of offsite and eliminates the option for waste to be disposed of at an onsite confined disposal facility. The ROD also provides greater flexibility in applying cleanup technologies during remedial design, states a preference

for transport of wastes by barge or rail instead of trucking, and encourages use of offsite landfills with the shortest haul distance from the Site.

In order to help ensure successful implementation of the selected remedy, DEQ and EPA have memorialized key expectations in a letter from EPA dated December 7, 2016. These expectations are important to the State in its decision regarding whether to concur with EPA's ROD. Several of these key expectations are described below.

- Controlling sources of contamination to the river will remain a priority for DEQ. EPA acknowledges the significant progress that the DEQ Source Control Program has made in removing or otherwise controlling upland and upriver sources of contamination, including implementation of removal and control measures at most upland sites, abatement of combined sewer overflows, comprehensive stormwater evaluation and treatment, and in-river sediment cleanup in the Downtown Reach. Final achievement of the remedial action objectives identified in the ROD relies upon timely and successful completion of upland and upstream source control actions. The State recognizes that EPA retains the discretion to use its federal authorities to complete those actions.
- EPA and DEQ are committed to developing a comprehensive strategy for identifying and addressing additional sources of toxics within the Willamette River watershed, upstream of the Harbor. This approach is intended to build upon existing, ongoing efforts to achieve broader environmental improvements beyond the actions specified in the ROD. EPA and DEQ will engage the Tribes and other key stakeholders in compiling watershed data, identifying data gaps, and identifying new strategies to reduce contaminant loading in the watershed. Our goal is to work together with EPA to prepare and implement a program for the Willamette Basin that is modeled on EPA's toxics reduction effort in the Columbia Basin (the Columbia River Basin Toxics Reduction Action Plan). DEQ and EPA will continue cross-program coordination between our agencies to ensure the success of these efforts.
- EPA anticipates managing the in-river cleanup by dividing the Harbor into work areas for purposes of design and construction activities based on factors such as prioritization of significant source areas, logistics, and efficiency. Additionally, in order to maximize resources and achieve cleanup as soon as possible, DEQ may perform certain oversight functions, in coordination with EPA, at specified areas of the in-river portion of the Site. Any oversight functions performed, whether performed by EPA or DEQ, will comply with the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), the National Contingency Plan (NCP), the ROD, any CERCLA agreements reached between the agencies and performing parties, and EPA policy and guidance regarding CERCLA cleanup actions.

DEQ and the State readily acknowledge that implementation of the selected remedy presents financial, technical, and administrative challenges. To minimize delays in getting cleanup actions underway, EPA should provide legal and administrative incentives to encourage potentially responsible parties to promptly enter into performance agreements consistent with CERCLA, the NCP, and EPA policy and guidance. EPA must also support innovative engineering solutions and flexibility during remedy design and construction. A comprehensive long-term monitoring plan and data management system will be necessary to assess remedy effectiveness, which may not be measureable for some time. Recognizing that people are at risk now and that it may take many decades before all remedial action objectives are achieved, EPA must implement a comprehensive (updated) fish advisory and community outreach program immediately following issuance of the ROD.

The remedy will be implemented in large part on land held by the State in trust for the public. It is the State's expectation that EPA will recognize and uphold the State's proprietary land management authority and responsibilities and further recognize the importance of protecting public trust values and public infrastructure improvements in the Harbor, to the greatest extent possible, during remedy implementation.

Implementing this complex remedy will require significant Federal and State agency resources and close coordination with Tribal governments, key stakeholders, and the community in order to meet the construction schedule, efficiently manage project costs, and secure support of all actions taken consistent with the remedy.

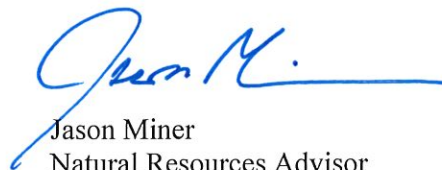

The State, on behalf of the citizens of Oregon and as a performing party, intends to work closely with EPA and other partners to identify and implement time-critical elements of the ROD. These may include developing the long-term performance monitoring plan, evaluating potential infrastructure needs such as transload or local disposal facilities, and initiating remedial design at one or more work areas within the Harbor.

With these understandings, the State of Oregon concurs with EPA's selected remedy for the Harbor. We look forward to a continued partnership with EPA in addressing the risks to people and the environment, and restoring the Harbor to its fullest potential.

Sincerely,

Richard Whitman  
Interim Director  
Oregon Department of Environmental Quality

Jason Miner  
Natural Resources Advisor  
Office of Governor Kate Brown

100016219	10/21/2008	Draft Agenda for Human Milk Pathway Meeting On October 21, 2008.	51	2	MTG / Meeting Document	R10: (Unknown)	R10: (Unknown)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016488	10/21/2008	Data Regarding Evaluation of PCB Congeners in Fish Tissue, Poulsen BM Congeners Vesus PH Bass Congeners.	33	1	CHT / Chart/Table	R10: (Unknown)	R10: (Unknown)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016489	10/21/2008	Data Regarding Evaluation of PCB Congeners in Fish Tissue, Poulsen Dioxin Like Only BM Congeners.	34	1	CHT / Chart/Table	R10: (Unknown)	R10: (Unknown)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100015124	10/30/2008	Email Regarding RI Resolutions.	19	1	EML / Email	R10: Wyatt, Bob (Northwest Natural Gas Company)	R10: Blischke, Eric, L (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100015125	10/30/2008	Figure Regarding Proposed bioassay reference stations.	375	1	FIG / Figure/Map/ Drawing	R10: (Windward Environmental, LLC.)		ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100015126	10/30/2008	Memorandum Regarding Review of benthic behavioral studies and acceptance/rejection criteria.	147	3	MEMO / Memorandum	R10: (Lower Willamette Group)	R10: Blischke, Eric, L (EPA), R10: Humphrey, Chip (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100015127	10/30/2008	Memorandum Regarding Criteria for Identifying Reference Sediment Samples.	128	2	MEMO / Memorandum	R10: (Lower Willamette Group)	R10: Blischke, Eric, L (EPA), R10: Humphrey, Chip (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100017322	10/30/2008	REDACTED Email regarding 2:00 PM Call (PDT).	21	1	EML / Email	R10: Chappell, Richard (Camp, Dresser & McKee, Incorporated)	R10: Blischke, Eric, L (EPA), R10: Koch, Kristine, M (EPA), R10: Humphrey, Chip (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016228	10/31/2008	DRAFT Memo Regarding Risk Assessment Approach for Evaluating Potential Risks From Consuming Human Milk (With Redline Edits).	67	3	MEMO / Memorandum	R10: Cox, Michael, W (EPA)	R10: (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016283	10/31/2008	DRAFT Memo Regarding Risk Assessment Approach for Evaluating Potential Risks From Consuming Human Milk.	67	3	MEMO / Memorandum	R10: Cox, Michael, W (EPA)	R10: (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016285	10/31/2008	DRAFT Memo Regarding Risk Assessment Approach for Evaluating Potential Risks From Consuming Human Milk.	230	19	MEMO / Memorandum	R10: (EPA)	R10: (Unknown)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
4940680459	10/31/2008	Email regarding reply to RI Resolutions.	28	4	EML / Email	R10: Wyatt, Robert, J (NW Natural)	R10: Blischke, Eric, L (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
4940680460	10/31/2008	Email regarding reply to RI Resolutions.	27	4	EML / Email	R10: Wyatt, Robert, J (NW Natural)	R10: Blischke, Eric, L (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
4940680461	10/31/2008	Email regarding reply to RI Resolutions.	24	2	EML / Email	R10: Wyatt, Robert, J (NW Natural)	R10: Blischke, Eric, L (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
4940680462	10/31/2008	Email regarding reply to RI Resolutions.	23	2	EML / Email	R10: Wyatt, Robert, J (NW Natural)	R10: Blischke, Eric, L (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
4940680463	10/31/2008	Email regarding reply to RI Resolutions.	24	2	EML / Email	R10: Wyatt, Robert, J (NW Natural)	R10: Blischke, Eric, L (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100008731	11/3/2008	Email regarding report summarizing the Round 3B bioassay data.	17	1	EML / Email	R10: Blischke, Eric, L (EPA)	R10: Wyatt, Robert, J (NW Natural)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100015128	11/3/2008	Email Regarding R3B Bioassay Sampling FSR.	19	1	EML / Email	R10: Wyatt, Bob (Northwest Natural Gas Company)	R10: Blischke, Eric, L (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016230	11/14/2008	Email Regarding Web Site for Chemical Data.	69	1	EML / Email	R10: Bailey, Marcia, L (EPA)	R10: Davoli, Dana (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100012675	11/17/2008	Email regarding Portland Harbor Management Team Schedule Discussion.	18	1	EML / Email	R10: Neely, Robert (NOAA)	R10: Blischke, Eric, L (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100014924	11/18/2008	Notes from Gasco Source Control Meeting - November 18, 2008.	71	6	MTG / Meeting Document	R10: Unknown, Unknown (Unknown)	R10: Unknown, Unknown (Unknown)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100012571	11/19/2008	Email regarding Reference Stations.	26	2	EML / Email	R10: Field, Jay (NOAA)	R10: Blischke, Eric, L (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization

4940680061	11/21/2008	Email regarding reply to Benthic Evaluation Reference Envelope and Stormwater Loading Methods.	21	1 EML / Email	R10: Wyatt, Bob (Northwest Natural Gas Company)	R10: Blischke, Eric, L (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
4940680349	11/21/2008	Email regarding reply to Benthic Evaluation Reference Envelope and Stormwater Loading Methods.	21	1 EML / Email	R10: Wyatt, Robert, J (NW Natural)	R10: Blischke, Eric, L (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100012669	11/23/2008	Email regarding reference stations.	31	2 EML / Email	R10: Field, Jay (NOAA)	R10: Blischke, Eric, L (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100012701	11/23/2008	PH Tox Refstations.	30	2 CHT / Chart/Table	R10: (NOAA)		ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100013632	11/23/2008	Email regarding reference stations.	24	2 EML / Email	R10: Field, Jay (NOAA)	R10: Blischke, Eric, L (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100013633	11/23/2008	Portland Harbor Toxicity Reference Stations.	40	1 CHT / Chart/Table	R10: Unknown, Unknown (Unknown)	R10: Unknown, Unknown (Unknown)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100010928	11/25/2008	Email regarding Nov. 18 Meeting Notes - NWN, DEQ, EPA Gasco Meeting.	31	1 EML / Email	R10: Wyatt, Robert, J (NW Natural)	R10: Stivers, Carl (Anchor Environmental, LLC), R10: Bayuk, Dana (Oregon Dept. of Environmental Quality)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100010937	11/26/2008	Email regarding Nov. 18 Meeting Notes - NWN, DEQ, EPA Gasco Meeting.	56	2 EML / Email	R10: Wyatt, Robert, J (NW Natural)	R10: Stivers, Carl (Anchor Environmental, LLC), R10: Bayuk, Dana (Oregon Dept. of Environmental Quality)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
4940680425	11/26/2008	Email regarding reply to Nov. 18 Meeting Notes - NWN, DEQ, EPA Gasco Meeting.	56	2 EML / Email	R10: Wyatt, Robert, J (NW Natural)	R10: Stivers, Carl (Anchor Environmental, LLC), R10: Bayuk, Dana (Oregon Dept. of Environmental Quality)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100010936	12/2/2008	Email regarding Nov. 18 Meeting Notes - NWN, DEQ, EPA Gasco Meeting.	28	2 EML / Email	R10: Wyatt, Robert, J (NW Natural)	R10: Stivers, Carl (Anchor Environmental, LLC), R10: Koch, Kristine, M (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100014913	12/8/2008	Email regarding Nov. 18 Meeting Notes - NWN, DEQ, EPA Gasco Meeting.	22	2 EML / Email	R10: Bayuk, Dana (Oregon Dept. of Environmental Quality)	R10: Stivers, Carl (Anchor Environmental, LLC), R10: Koch, Kristine, M (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016415	12/16/2008	Attachment 1, Modified Final 2, Breast Feeding Summary, Fish Contaminant Level.	18	1 CHT / Chart/Table	R10: (Unknown)	R10: (Unknown)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
4940680063	12/16/2008	Email regarding reply to 2005 EPA letter to LWG chairs regarding dive safety.	27	1 EML / Email	R10: Mckenna, Jim (Port of Portland)	R10: Longoria, Rose (Yakama Nation)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
4940680339	12/16/2008	Email regarding reply to 2005 EPA letter to LWG chairs regarding dive safety.	27	1 EML / Email	R10: Mckenna, James (Port of Portland)	R10: Sheldrake, Sean, A (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016490	12/17/2008	Slide: Summary of Risks from Consuming Human Milk.	23	1 RPT / Report	R10: (Unknown)	R10: (Unknown)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100010702	12/19/2008	Email regarding Gasco SOW Revised Draft.	27	2 EML / Email	R10: Wyatt, Robert, J (NW Natural)	R10: Stivers, Carl (Anchor Environmental, LLC), R10: Sheldrake, Sean, A (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100010705	12/19/2008	Email regarding Gasco SOW Revised Draft.	28	3 EML / Email	R10: Wyatt, Robert, J (NW Natural)	R10: Stivers, Carl (Anchor Environmental, LLC), R10: Sheldrake, Sean, A (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100010706	12/19/2008	Email regarding Gasco SOW Revised Draft.	29	3 EML / Email	R10: Wyatt, Robert, J (NW Natural)	R10: Sheldrake, Sean, A (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016222	1/1/2009	DEQ Human Health Risk Assessment Guidance Appendix B: Risk Assessment Approach for Evaluating Potential Risks From Consuming Human Milk.	257	22 OTH / Other	R10: (Oregon Dept. of Environmental Quality)	R10: (Unknown)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100017375	1/7/2009	REDACTED Email regarding Initial review of EPA's response to fish tissue TRVs.	25	2 EML / Email	R10: Mckenna, James (Port of Portland)	R10: Blischke, Eric, L (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
4940680447	1/14/2009	Email regarding reply to Quote for Chemical Analysis of Osprey Eggs Collected at Portland Harbor.	21	1 EML / Email	R10: Wyatt, Robert, J (NW Natural)	R10: Blischke, Eric, L (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
4940680378	1/21/2009	Email regarding reply to EPA Comments on the LWG response to EPA Comments on Table 5.1-2.	23	2 EML / Email	R10: Wyatt, Robert, J (NW Natural)	R10: Blischke, Eric, L (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
4940680379	1/21/2009	Email regarding reply to EPA Comments on the LWG response to EPA Comments on Table 5.1-2.	21	1 EML / Email	R10: Wyatt, Robert, J (NW Natural)	R10: Blischke, Eric, L (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016286	1/22/2009	Comparison Between the Yang Model and Our Results.	79	1 OTH / Other	R10: (Unknown)	R10: (Unknown)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100012587	1/23/2009	Email regarding Portland Harbor Sample Disposal Letter.	23	3 EML / Email	R10: Neely, Robert (NOAA)	R10: Blischke, Eric, L (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016278	1/23/2009	DRAFT DEQ Human Health Risk Assessment Guidance Appendix B: Risk Assessment Approach for Evaluating Potential Risks From Consuming Human Milk (With Changes).	263	22 OTH / Other	R10: (Oregon Dept. of Environmental Quality)	R10: (Unknown)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
4940680372	1/23/2009	Email regarding reply to EPA Comments and Direction on Groundwater Pathway Outline and Fish Tissue-Residue TRVs.	22	1 EML / Email	R10: Wyatt, Robert, J (NW Natural)	R10: Blischke, Eric, L (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
4940680470	1/29/2009	Email regarding reply to Sediment and Tissue Disposal.	21	1 EML / Email	R10: Wyatt, Robert, J (NW Natural)	R10: Blischke, Eric, L (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100014926	2/1/2009	Risk Assessment Basics: February 2009 Presentation to the Portland Harbor Community Advisory Group.	173	2 MTG / Meeting Document	R10: Unknown, Unknown (EPA), R10: Unknown, Unknown (Oregon Dept. of Environmental Quality)	R10: Unknown, Unknown (Portland Harbor Community Advisory Group)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100014968	2/6/2009	Email Regarding LWG (Lower Willamette Group) Response to Comments on Comprehensive Round 2 Report, Table 5.1-2.	81	1 EML / Email	R10: Woronets, Jennifer (Anchor QEA, LLC)	R10: Blischke, Eric, L (EPA), R10: Humphrey, Chip (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100014969	2/6/2009	Response to EPA Comments on Comprehensive Round 2 Report, Table 5.1-2.	35	2 CORR / Correspondence	R10: Wyatt, Bob (Lower Willamette Group)	R10: Blischke, Eric, L (EPA), R10: Humphrey, Chip (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100014970	2/6/2009	Response to EPA Comments on Round 2 Report, Table 5.1-2 (EPA Letter Dated 01/21/2009).	48	11 CORR / Correspondence	R10: (Lower Willamette Group)	R10: (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100014915	2/10/2009	Email regarding Handouts for CAG meeting next Wednesday.	18	1 EML / Email	R10: Poulsen, Mike (Oregon Dept. of Environmental Quality)	R10: Smith, Judy, R (EPA), R10: Davoli, Dana (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016542	2/11/2009	REDACTED Draft GIS Mapping Tool Meeting - February 17th.	303	2 CORR / Correspondence	R10: Woronets, Jennifer (Anchor QEA, LLC)	R10: Huber, Audie (Confederated Tribes of the Umatilla Indian Reservation), R10: Wyatt, Robert (Lower Willamette Group), R10: Blischke, Eric, L (EPA), R10: Anderson, Jim, M (Oregon Dept. of Environmental Quality)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100011301	2/12/2009	Email regarding Reducing Level of Validation for SBLT Mobility Tests for EPA.	35	4 EML / Email	R10: Wyatt, Robert, J (NW Natural)	R10: Mckenna, Jim (Port of Portland), R10: Humphrey, Chip (EPA), R10: Woronets, Jennifer (Anchor Environmental, LLC), R10: Applegate, Rick (City of Portland)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100017324	2/12/2009	REDACTED Email regarding reply to Reservation at Stoel Rives, Portland - Room availability for 5/27-28/09.	96	3 EML / Email	R10: Woronets, Jennifer (Anchor QEA, LLC)	R10: Humphrey, Chip (EPA), R10: Anderson, James, M (Oregon Dept. of Environmental Quality)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100017327	2/12/2009	REDACTED Email regarding reply to Room availability for 5/27-28/09.	92	2 EML / Email	R10: Woronets, Jennifer (Anchor QEA, LLC)	R10: Humphrey, Chip (EPA), R10: Anderson, James, M (Oregon Dept. of Environmental Quality)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
4940680687	2/13/2009	Email regarding reply to Web Meeting Details.	22	1 EML / Email	R10: Woronets, Jennifer (Anchor QEA, LLC)	R10: Blischke, Eric, L (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100011794	2/18/2009	Email regarding EPA determination about invertebrate tissue residue TRVs.	25	1 EML / Email	R10: Wyatt, Robert (Lower Willamette Group)	R10: Blischke, Eric, L (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
4940680380	2/18/2009	Email regarding reply to EPA Determination Regarding Invertebrate Tissue Residue TRVs.	21	1 EML / Email	R10: Wyatt, Robert, J (NW Natural)	R10: Blischke, Eric, L (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100018194	3/2/2009	REDACTED Email regarding reply to reminder of PH Managers call today.	46	2 EML / Email	R10: Mckenna, James (Port of Portland)	R10: Oster, Valerie (Anchor Environmental, LLC), R10: Pine, Keith, A (Integral Consulting, Inc.), R10: Humphrey, Chip (EPA), R10: Anderson, James, M (Oregon Dept. of Environmental Quality), R10: Lewis, Mark, D (NewFields), R10: Livesay, Dave (GSI Groundwater Solutions, Inc.), R10: Lee, Jean, H (Environment International, Ltd.), R10: Longoria, Rose (Yakama Nation), R10: Wyatt, Robert, J (NW Natural), R10: Applegate, Rick (City of Portland)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100012713	3/3/2009	Email regarding Willamette River Database - Pending Additions.	21	3 EML / Email	R10: Neely, Robert (NOAA)	R10: Blischke, Eric, L (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100012716	3/3/2009	Email regarding Willamette River Database - Pending Additions.	19	1 EML / Email	R10: Neely, Robert (NOAA)	R10: Blischke, Eric, L (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100012727	3/3/2009	Email regarding Your LWG Database Questions.	20	3 EML / Email	R10: Neely, Robert (NOAA)	R10: Blischke, Eric, L (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization

100012704	3/12/2009	Email regarding Tissue Samples.	19	1 EML / Email	R10: Neely, Robert (NOAA)	R10: Zylstra, Stephen, J (U. S. Fish and Wildlife Service)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100012717	3/17/2009	Email regarding Willamette River Updates - Remaining Question.	19	1 EML / Email	R10: Neely, Robert (NOAA)	R10: Severn, Corinne, G (Premier Environmental Services)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100012747	3/17/2009	Email regarding US Moorings Data Chem Classification.	21	4 EML / Email	R10: Neely, Robert (NOAA)	R10: Blischke, Eric, L (EPA), R10: Severn, Corinne, G (Premier Environmental Services)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
4940680010	3/26/2009	Email regarding LWG Stormwater Check-ins and Path Forward.	142	4 EML / Email	R10: Woronets, Jennifer (Anchor QEA, LLC)	R10: Koch, Kristine, M (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100013382	3/30/2009	Email regarding archived LWG samples.	19	1 EML / Email	R10: Neely, Robert (NOAA)	R10: Revelas, Gene (Integral Corporation), R10: Pine, Keith (Anchor QEA, LLC)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100010970	4/2/2009	Email regarding NW Natural, Treatment System Discharge Limitations and Monitoring Requirements.	56	2 EML / Email	R10: Wyatt, Robert, J (NW Natural)	R10: Bayuk, Dana (Oregon Dept. of Environmental Quality)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
4940680429	4/2/2009	Email regarding NW Natural, Treatment System Discharge Limitations and Monitoring Requirements.	56	2 EML / Email	R10: Wyatt, Robert, J (NW Natural)	R10: Bayuk, Dana (Oregon Dept. of Environmental Quality)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100015809	4/3/2009	REDACTED Portland Harbor NRDA and RI/FS Coordination, Preparing for Successful Habitat Restoration.	20	1 MTG / Meeting Document	R10: (Unknown)		ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016957	4/7/2009	REDACTED E-Mail Regarding GIS Tool and Training Session.	2,309	6 EML / Email	R10: Smith, Carrie, A (Parametrix, Inc.)	R10: Blischke, Eric, L (EPA)	PAPER DOCUMENT	053-REMEDIAL/0531-Remedy Characterization
100012991	4/8/2009	Email regarding archived LWG samples.	24	1 EML / Email	R10: Neely, Robert (NOAA)	R10: Humphrey, Chip (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
4940680345	4/10/2009	Email regarding reply to Agneda for Monday ARAR Meeting.	20	1 EML / Email	R10: Wyatt, Robert, J (NW Natural)	R10: Blischke, Eric, L (EPA), R10: Woronets, Jennifer (Anchor Environmental, LLC)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
4940680457	4/13/2009	Email regarding reply to Revised RAOs for Portland Harbor.	21	1 EML / Email	R10: Wyatt, Robert, J (NW Natural)	R10: Blischke, Eric, L (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100012467	4/14/2009	Email regarding Archived LWG Samples.	22	2 EML / Email	R10: Neely, Robert (NOAA)	R10: Peers, Jennifer (Stratus Consulting, Inc.), R10: Downey, Tom (Confederated Tribes of the Siletz Indians), R10: Dexter, Robert (Ridolfi, Inc.), R10: Buck, Jeremy (U. S. Fish & Wildlife Service)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization

100016532	REDACTED Email regarding Reply to Wednesday, August 5th 1 - 3 pm - LWG HST Modeling Meeting.	307	4 CORR / Correspondence	R10: Woronets, Jennifer (Anchor QEA, LLC)	R10: Huber, Audie (Confederated Tribes of the Umatilla Indian Reservation), R10: Wyatt, Robert (Lower Willamette Group), R10: Blischke, Eric, L (EPA), R10: Anderson, Jim, M (Oregon Dept. of Environmental Quality)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100012729	Email regarding Ref Envelope Values/Calculations.	21	1 EML / Email	R10: Field, Jay (NOAA)	R10: Shephard, Burt (EPA), R10: Gensemer, Robert, W (Parametrix, Inc.)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016540	REDACTED Email regarding Reply to 8/5 LWG HST Modeling Meeting - Presentation.	312	5 CORR / Correspondence	R10: Woronets, Jennifer (Anchor QEA, LLC)	R10: Huber, Audie (Confederated Tribes of the Umatilla Indian Reservation), R10: Wyatt, Robert (Lower Willamette Group), R10: Blischke, Eric, L (EPA), R10: Anderson, Jim, M (Oregon Dept. of Environmental Quality)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
4940680352	Email regarding reply to Benthic Interpretation.	29	3 EML / Email	R10: Mckenna, James (Port of Portland)	R10: Blischke, Eric, L (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016148	Email Regarding DRAFT DEQ Breastfeeding Guidance.	44	1 EML / Email	R10: Davoli, Dana (EPA), R10: Poulsen, Mike (Oregon Dept. of Environmental Quality)	R10: Davoli, Dana (EPA), R10: Farrer, David, G (Oregon Dept. of Human Services)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100011907	Email regarding management goals and programmatic consultation(1).	27	2 EML / Email	R10: Munn, Nancy (NOAA)	R10: Blischke, Eric, L (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016541	REDACTED Email regarding Tuesday, August 18th - August Portland Harbor Managers Meeting NEW LOCATION.	300	2 CORR / Correspondence	R10: Woronets, Jennifer (Anchor QEA, LLC)	R10: Huber, Audie (Confederated Tribes of the Umatilla Indian Reservation), R10: Wyatt, Robert (Lower Willamette Group), R10: Blischke, Eric, L (EPA), R10: Anderson, Jim, M (Oregon Dept. of Environmental Quality)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100017405	REDACTED Email regarding Thursday, August 20th 9:00 - 10:00 am - Conference call to discuss EPA request for Round 3 data.	90	1 EML / Email	R10: Woronets, Jennifer (Anchor QEA, LLC)	R10: Browning, Sandy (Integral Consulting, Inc.), R10: Blischke, Eric, L (EPA), R10: Ryals, Cindy (Kennedy Jenks Consultants), R10: Revelas, Gene (Integral Corporation)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100010919	Email regarding Neoprene Clad RSS Divers Near Steel Bridge.	26	1 EML / Email	R10: Wyatt, Robert, J (NW Natural)	R10: Sheldrake, Sean, A (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016149	Email Regarding Simulation Results.	85	2 EML / Email	R10: Davoli, Dana (EPA), R10: Farrer, David, G (Oregon Dept. of Human Services)	R10: Bailey, Marcia, L (EPA), R10: Davoli, Dana (EPA), R10: Poulsen, Mike (Oregon Dept. of Environmental Quality), R10: Welsh, Clem (ATSDR), R10: Moffett, Daphne (State of Oregon)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016150	Data Regarding Simulation Results.	23	2 CHT / Chart/Table	R10: (Unknown)	R10: (Unknown)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016525	REDACTED Email regarding T4 removal action letter requesting discussion of coordination of the CDF design process with harbor-wide FS and ROD.	23	2 EML / Email	R10: Mckenna, Jim (Port of Portland)	R10: Sheldrake, Sean, A (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100018203	REDACTED Email regarding reply to T4 Removal Action Letter re Request to Discuss Coordination of the CDF Design Process with the Harborwide. FS and ROD.	24	2 EML / Email	R10: Mckenna, James (Port of Portland)	R10: Sheldrake, Sean, A (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016524	REDACTED Email regarding T4 removal action letter requesting discussion of coordination of the CDF design process with harbor-wide FS and ROD.	25	3 EML / Email	R10: Mckenna, Jim (Port of Portland)	R10: Sheldrake, Sean, A (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016526	REDACTED Email regarding T4 removal action letter requesting discussion of coordination of the CDF design process with harbor-wide FS and ROD.	28	4 EML / Email	R10: Mckenna, Jim (Port of Portland)	R10: Sheldrake, Sean, A (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100018206	REDACTED Email regarding reply to T4 Removal Action Letter re Request to Discuss Coordination of the CDF Design Process with the Harborwide. FS and ROD.	27	3 EML / Email	R10: Mckenna, James (Port of Portland)	R10: Sheldrake, Sean, A (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization

4940680448	8/20/2009	Email regarding reply to RAO Extension Request.	21	1 EML / Email	R10: Wyatt, Robert, J (NW Natural)	R10: Blischke, Eric, L (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100008770	8/21/2009	Email regarding Request for Nature and Extent of Contamination Information.	19	1 EML / Email	R10: Blischke, Eric, L (EPA)	R10: Wyatt, Robert, J (NW Natural) R10: Buck, Jeremy (U. S. Fish & Wildlife Service)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100010971	8/26/2009	Email regarding NWP-2007-195 SAP Draft Tech Memo.	29	3 EML / Email	R10: Gambetta, Daniel (NOAA)	R10: Parkinson, Stephen, T (Groff Murphy, PLLC)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100013686	8/27/2009	Letter regarding Portland Harbor Round 1 Tissue Samples.	111	2 CORR / Correspondence	R10: Pease, Katherine (NOAA)		ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016153	8/27/2009	Yang Lactation Model Results.	80	6 CHT / Chart/Table	R10: (Unknown)	R10: (Unknown)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016154	8/27/2009	Yang Mother Loading Model Results.	52	2 CHT / Chart/Table	R10: (Unknown)	R10: (Unknown)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016155	9/1/2009	Data Regarding DRAFT Risk Assessment Model, Calculation of Potential Risks from Consumption of Human Milk, BF Exposure and Risk 09/2009.	43	1 CHT / Chart/Table	R10: (Unknown)	R10: (Unknown)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016157	9/1/2009	Model Results.	26	2 CHT / Chart/Table			ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016160	9/10/2009	Data Regarding Breastfeeding Results.	240	8 CHT / Chart/Table	R10: (Unknown)	R10: (Unknown) R10: Bailey, Marcia, L (EPA), R10: Davoli, Dana (EPA), R10: Poulsen, Mike (Oregon Dept. of Environmental Quality), R10: Welsh, Clem (ATSDR)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016151	9/11/2009	Email Regarding Simulation Results.	43	1 EML / Email	R10: Davoli, Dana (EPA), R10: Farrer, David, G (Oregon Dept. of Human Services)	R10: Bailey, Marcia, L (EPA), R10: Davoli, Dana (EPA), R10: Poulsen, Mike (Oregon Dept. of Environmental Quality)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016152	9/11/2009	Email Regarding Yang Model Results.	53	1 EML / Email	R10: Davoli, Dana (EPA), R10: Farrer, David, G (Oregon Dept. of Human Services)	R10: Bailey, Marcia, L (EPA), R10: Davoli, Dana (EPA), R10: Farrer, David, G (Oregon Dept. of Human Services)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016156	9/11/2009	Email Regarding BF Exposure and Risk and Results Spreadsheets.	33	1 EML / Email	R10: Davoli, Dana (EPA), R10: Poulsen, Mike (Oregon Dept. of Environmental Quality)	R10: Bailey, Marcia, L (EPA), R10: Davoli, Dana (EPA), R10: Farrer, David, G (Oregon Dept. of Human Services)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016158	9/11/2009	Email Regarding PCB Concentration in Milk Fat and Body Fat.	43	2 EML / Email	R10: Davoli, Dana (EPA), R10: Poulsen, Mike (Oregon Dept. of Environmental Quality)	R10: Bailey, Marcia, L (EPA), R10: Davoli, Dana (EPA), R10: Farrer, David, G (Oregon Dept. of Environmental Quality), R10: Welsh, Clem (ATSDR), R10: Haddad, Sami (University of Quebec), R10: Moffett, Daphne (State of Oregon)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016159	9/11/2009	Email Regarding Half-Life Used for Simulation.	62	1 EML / Email	R10: Davoli, Dana (EPA), R10: Farrer, David, G (Oregon Dept. of Human Services)	R10: Bailey, Marcia, L (EPA), R10: Davoli, Dana (EPA), R10: Farrer, David, G (Oregon Dept. of Human Services), R10: Poulsen, Mike (Oregon Dept. of Environmental Quality), R10: Welsh, Clem (ATSDR), R10: Haddad, Sami (University of Quebec), R10: Moffett, Daphne (State of Oregon)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016161	9/11/2009	Email Regarding Half-Life and Test Results.	37	1 EML / Email	R10: Davoli, Dana (EPA), R10: Poulsen, Mike (Oregon Dept. of Environmental Quality)	R10: Bailey, Marcia, L (EPA), R10: Davoli, Dana (EPA), R10: Poulsen, Mike (Oregon Dept. of Environmental Quality), R10: Welsh, Clem (ATSDR), R10: Moffett, Daphne (State of Oregon)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016162	9/11/2009	Email Regarding Half-Life and Test Results.	27	1 EML / Email	R10: Davoli, Dana (EPA), R10: Farrer, David, G (Oregon Dept. of Human Services)	R10: Bailey, Marcia, L (EPA), R10: Davoli, Dana (EPA), R10: Farrer, David, G (Oregon Dept. of Human Services), R10: Poulsen, Mike (Oregon Dept. of Environmental Quality), R10: Welsh, Clem (ATSDR), R10: Haddad, Sami (University of Quebec), R10: Moffett, Daphne (State of Oregon)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
100016163	9/11/2009	Abstract with Edits, Comparison of Estimated PCB-153 Concentrations in Human Milk Using Various Pharmacokinetic Models (With Highlighted and Strikethrough Text).	55	1 NOTE / Notes	R10: Bailey, Marcia, L (EPA), R10: Davoli, Dana (EPA), R10: Farrer, David, G (Oregon Dept. of Human Services), R10: Poulsen, Mike (Oregon Dept. of Environmental Quality), R10: Welsh, Clem (ATSDR), R10: Haddad, Sami (University of Quebec), R10: Moffett, Daphne (State of Oregon), R10: Yang (ATSDR)	R10: (Unknown)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
4940680334	9/16/2009	Email regarding RAO Response Extension.	21	1 EML / Email	R10: Wyatt, Robert, J (NW Natural)	R10: Humphrey, Chip (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
4940680390	9/21/2009	Email regarding reply to Formatting of Electronic Deliverables (Draft BERA).	24	1 EML / Email	R10: Wyatt, Robert, J (NW Natural)	R10: Blischke, Eric, L (EPA)	ELECTRONIC RECORD	053-REMEDIAL/0531-Remedy Characterization
