Dear Ores,

Please HELP US! Shasta County

Supervisors (who have since retired)
violated The Clean Air Act when they
permitted Knauf Fiberglass Inc. to build
and manufacture in this bioregion. We
are surrounded by mountain ranges and our
air has become increasingly polluted.

Depending on temperature and air-inversion
and wind direction, our once-beautiful views
of Mt. Shasta and Mt. Lassen are gone,
with only gray particulate matter visible.

Surely the respiratory deaths of the
elderly and the asthmatic attacks of the young,
the cardiac attacks caused by air pollution
and the respiratory illnesses that have
increased and been prolonged, are not
worth the amount of money Theo Knauf
breathes in Germany and France.

We do not need more fiberglass, more
jobs or more money. We need fresh, clean
air.

The Shasta County Air Resources ^{2,}
Board has not ~~performed~~ ^{recorded,} or has not
presented true, accurate data in over
two years. (We apparently were in
the dangerous ozone levels years ago, but now
"every thing's fine now" =

Will you please help the world,
California's Central Valley, the food and
water, the AIR, our children and
great-grandchildren, the Environment,
by closing, shutting-down, OUT-LAWING
the out-of-control-out-law Knaut Fiberglass?
Almost everyone will greatly appreciate it.

Joy Louise Newcom R.N. F.N.P. P.A.
