Subject Ashuelot pictures

Jeanne,
Sorry for the delay, but Steve was out of town and I just got verification that the pictures I sent of the Ashuelot streambed were taken upstream and downstream of the Denman Thompson Bridge (not to be confused w/the Thompson Covered Bridge) in West Swanzey. This is downstream of the Homestead Woolen Mill and upstream of the West Swanzey WWTF outfall. They were taken by Stephen Stepenuck, member of ARLAC and chair of the Swanzey Conservation Commission.
Barbara
