Importance: High

Linda –

Recently, I forwarded notice to you of a public participation opportunity regarding a Draft Air Quality Plan Approval and a Proposed Prevention of Significant Deterioration (PSD) Permit that MassDEP proposes to issue for the proposed Footprint natural gas power plant in Salem. MassDEP has set up a webpage with the information we previously forwarded, at: <http://www.mass.gov/eea/agencies/massdep/news/comment/footprint-power-salem-harbor-development-lp-salem.html>

If you are interested, we can provide you with CD containing the application and supporting documents. A copy of the application and supporting materials was provided to Shanna Cleveland at her request late last week. Shanna indicated that you might also be interested in seeing these documents. If so, kindly respond to this email or call me, so we can arrange for you to receive a copy.

Best regards,

Susan Ruch

Susan Ruch, Deputy Regional Director
