RE: 2015 Idaho Recreational Mining Authorization (LETTER PERMIT)

Dear Recreational Miner:

The Idaho Department of Water Resources (IDWR) hereby issues an expedited LETTER PERMIT. This LETTER PERMIT authorizes the Permit Holder to operate recreational mining equipment to alter a stream channel in accordance with the Stream Channel Alteration Rules (IDAPA 37.03.07 – Rule 64) and the 2015 IDWR Instructions for "Stream Channel Alteration by Recreational Mining Activities" (IDWR Instructions).

This LETTER PERMIT must include information requested on page 2.

Rule 64 (attached), "Standards for Suction Dredges and Non-Powered Sluice Equipment," lists minimum standard conditions for this LETTER PERMIT. The authorized holder of this LETTER PERMIT may operate recreational mining equipment in stream channel segments of the state designated as "OPEN" in the 2015 IDWR Instructions available at IDWR's website: idwr.idaho.gov → Forms → Stream Channel/Recreational Mining Forms. Special Conditions listed below also apply. Failure to adhere to these requirements can result in legal action in accordance with Idaho Code §42-3809 and 42-1701B. The US Environmental Protection Agency (EPA) now requires an NPDES general permit for small scale suction dredging in Idaho. The EPA should be contacted on their requirements in Idaho (see pg. 1 of the IDWR Instructions for EPA contact information).

SPECIAL CONDITIONS – IDWR LETTER PERMIT:

1. Permit holder will only work on a stream segment listed as OPEN in the 2015 IDWR Instructions.
2. This permit does not serve in lieu of other permits that may be required by federal or other state government agencies or in any way constitute an exemption of other permit requirements.
3. Permit holder shall obtain authorization from the land owner or land manager to access the property where the mining operation is located and determine if other permits are required. A copy of this Permit should be submitted to the appropriate federal, state or tribal land manager if the mining operation is located on federal, state or tribal land.
4. This permit may be canceled at any time to minimize adverse impact on the stream channel.
5. Each permit holder must have a copy of his/her permit when operating equipment and evidence that the required fee has been paid. Permit holder shall make this permit, including page 2, available for inspection at all times.
6. This permit does not constitute any of the following:
 - a. An easement or right-of-way to trespass or work upon property or mining claims belonging to others.
 - b. Responsibility of the IDWR for damage to any properties due to operations of Permit Holder.
7. All fuel, oil, and other hazardous materials shall be stored outside of the stream channel. The Permit holder shall not operate any equipment that leaks fuel, hydraulic fluid, or other pollutants. The Permit Holder shall use a funnel when pouring fuel and place absorbent material, sufficient to absorb a spill, under and around the fuel tank. A petroleum absorbent spill kit shall be onsite in case of accidental spills and no petroleum products shall enter the stream when servicing the equipment.
8. This permit shall expire March 31, 2016.

Sincerely,

Aaron Golart, State Coordinator, Stream Protection Program
