Re: Windfall Oil & Gas, Inc.
PERMIT #PAS2D020BCLE
PERMITTED FACILITY: Class II-D injection well, Zelman #1

Dear Sirs:

I am writing this letter to ask you to deny the requested permit for an injection well In Brady Township, Clearfield County in Pennsylvania. I'm sure you have heard all the pros and cons on this subject. Those representing the interest in shale stand by their fiery pulpit and declare this procedure safe...safe...safe. You can believe that if you want but I ask you, if we are living in a country that is supposed to be transparent, why haven't they disclosed all the chemicals that are in this waste water?

Although I am sure that ever since William Penn came here there has been some corruption and much greed but it was never so obviously flagrant as it is today. Thanks to our governor, we have very little say (if any) in the process of drilling or disposing of waste.

As I enter my 84th year I wonder, when my generation passes, will we leave the pristine water supply Pennsylvania has and we inherited or will we kindly extend the sewage treated water that is guaranteed (?) to be clean. You are welcome to my glass. My last question is simple: How much money does it take to buy a person's conscience? Is it worth it????

Respectfully yours,

Norma Gregorio
