Re: Notification of Order Denying Review, City of Homedale, National Pollutant Discharge Elimination System (NPDES) Permit No. ID-002042-7

Dear Mr. Bauer:

The above-referenced NPDES permit (Permit) was issued to the City of Homedale (City) on August 28, 2013. On September 30, 2013, the Idaho Conservation League (ICL) filed a petition for review of certain provisions of the Permit, before the Environmental Appeals Board (EAB), Appeal No. NPDES 13-10. By letter dated November 4, 2013, the U.S. Environmental Protection Agency Region 10 notified you that the following contested conditions of the Permit were stayed until final agency action under 40 C.F.R. § 124.19(f):

- Section I.B.1, Table 1: The final total phosphorus mass limits, May 1- September 30, in Table 1. These mass limits are an average monthly effluent limit of 11 lbs/day and an average weekly effluent limit of 16.5 lbs/day

This letter serves as notification that the EAB has denied review of the appeal. As a result, the stayed conditions are now in effect.

Please feel free to contact John Drabek at (206) 553-8257 should you have questions regarding this letter.

Sincerely,

Daniel D. Opalski, Director
Office of Water and Watersheds
