**STATUS REPORT ON MEDIATION AND PERMIT MODIFICATION PROCEEDINGS**

The United States Environmental Protection Agency, New England Region ("Region") respectfully submits this status report with respect to the above-captioned matters.

**In re Town of Westborough Wastewater Treatment Plant**

The Town of Westborough and the Organization for the Assabet River ("OAR") have informed the Region that notices of voluntary dismissal of their respective petitions for review of NPDES Permit No. MA0100412 have been filed with the Environmental Appeals Board ("Board"). Upon receipt of orders from the Board dismissing the appeals, the Region will put the stayed portions of the permit into effect.

**In re City of Marlborough Westerly Wastewater Treatment Facility**

The Region prepared and had intended to issue a draft permit modification of NPDES Permit No. MA0100480 ("Westerly Permit") to the City of Marlborough ("Marlborough") on December 15, 2005. On December 12, 2005, the Massachusetts Department of Environmental Protection ("DEP") informed the Region that it had had very encouraging discussions with Marlborough regarding a specific proposal that would

resolve the instant appeals and that would avoid future litigation over the remanded Marlborough Easterly Wastewater Treatment Facility permit ("Easterly Permit"). See City of Marlborough Easterly Wastewater Treatment Facility, 12 E.A.D. \_\_\_, NPDES Appeal No. 04-13 (August 11, 2005). Since being informed of the settlement talks, the leadership and staff of the Region and DEP have been vigorously attempting to coordinate the litigation positions of Marlborough and OAR to retain the possibility of a mutual withdrawal of the Westerly Permit appeals and to forge consensus with Marlborough and Town of Sudbury over the terms of the modified Easterly Permit.

Marlborough has indicated that it intends to distribute a proposal for resolving the Westerly Permit appeals this week for OAR's review and comment. It is the Region's understanding that the proposal will not disturb the terms of the existing Westerly Permit, but will, in part, seek to outline a plan for collaboratively developing a flow trading scheme with other dischargers on the Assabet River that have unused flow capacity. If it becomes apparent that no settlement will result, the Region will proceed with the Westerly Permit modification as soon as possible. It is worth noting that Marlborough's decision making process, and the Region's consultations with the city, have been complicated by the fact that the city government is in transition and that the mayor-elect will not take office until January 3, 2006.

The Region is cognizant of the internal milestones for the permit modification process set forth in the Board's November 22, 2005 Order Staying Proceedings ("Stay Order"), and is departing from them with great reluctance. The Region is, in addition, aware of the challenges to resolution of the Westerly Permit appeal, including a decision by OAR's Board of Directors on December 21, 2005 to terminate its offer to withdraw and proceed with litigation. The Region understands the rationale behind OAR's decision, but strongly believes that settlement of the permit appeals is the preferred outcome and that conditions necessary for settling the dispute are unlikely to obtain after the modification process begins. The Region weighs the current prospects for settling the matter against the near certainty of protracted litigation, the result of which will very likely be to delay the construction of the upgraded Marlborough treatment facility for years and to delay the attendant environmental benefit to the Assabet River for years, an outcome which benefits no party. The Region will make best efforts, including to the

extent practicable shortening the time allotted it to prepare its response to comments, in order to ensure that the modification process is completed as close to April 1, 2006 as possible.

In accordance with the Stay Order, the Region will provide the Board with another status report on the progress of mediation and the permit modification process by January 13, 2006.

Respectfully Submitted,

---
