

BIOPROTECT™ RTU

Attachment 3

BIOPROTECT™ RTU is an EPA registered, water-based, antimicrobial technology that provides continuous and persistent protection for up to 90 days. BIOPROTECT™ RTU is a preservative antimicrobial shield that can be applied to both porous and non-porous surfaces to inhibit the growth of odor causing, and stain causing bacteria.

PRODUCT HIGHLIGHTS:

- Patented water-based formula is non-flammable
- Provides persistent, continuous, antimicrobial protection against a broad range of microbes
- Non-leaching and non-migrating
- Prevents the mutation of adaptive microorganisms
- Colorless and odorless
- EPA registered technology (EPA Reg. # 87583-3)

BIOPROTECT™ RTU's patented antimicrobial technology uses self assembling monolayers to create a layer of spikes that mechanically kill microbes (bacteria, mold, mildew & algae) by piercing and rupturing their cell membrane. This kill method prevents microbes from mutating and adapting, inhibiting the ability for superbugs to grow.

- **Bound Technology** – Unlike conventional cleaning products, BIOPROTECT™ RTU forms a covalent bond to the applied surface and continues to work while in the dry state.
- **Residual Efficacy** – Unlike other antimicrobials, BIOPROTECT™ RTU's efficacy remains effective for up to 90 days; helping keep surfaces clean between cleanings.
- **Food Contact Surface Preservative** – BIOPROTECT™ RTU is approved for use as an antimicrobial preservative under EPA and FDA regulations to preserve food contact articles.
- **Large Spectrum Efficacy**- Effective against a broad spectrum of microbes.
- **Unmatched Versatility**- BIOPROTECT™ RTU can be applied on almost any surface (both porous and non-porous).
- **Water Based Formula**- BIOPROTECT™ RTU is a water-based formulation. It is easily used by field personnel using a basic spray bottle, electrostatic or ULV sprayer.
