Statutory and Regulatory Background

9. Subchapter VI of the Act, 42 U.S.C. § 7671 et seq., provides for the protection of stratospheric ozone. Section 608(b) of the Act, 42 U.S.C. § 7671g(b), provides EPA with the authority to regulate the safe disposal of Class I and II substances. Class I and II substances include refrigerants containing chlorofluorocarbons (CFCs) and hydrochlorofluorocarbons (HCFCs). EPA promulgated such regulations covering the safe disposal of CFCs and HCFCs from small appliances and motor vehicle air conditioners (MVACs) at 58 Fed. Reg. 28660 (May 14, 1993). These regulations for protection of the stratospheric ozone, recycling and emissions reduction are found in 40 C.F.R. Part 82, Subpart F.

10. Section 608(c)(1) of the CAA, 42 U.S.C. § 7671g(c)(1), provides that effective July 1, 1992, it shall be unlawful for any person, in the course of maintaining, servicing, repairing, or disposing of an appliance or industrial process refrigeration, to knowingly vent or otherwise knowingly release or dispose of any class I or class II substance used as a refrigerant in such appliance (or industrial process refrigeration) in a manner which permits such substance to enter the environment.

11. Section 608(c)(2) of the CAA, 42 U.S.C. § 7671g(c)(2), provides that effective 5 years after November 15, 1990, it shall be unlawful for any person maintaining, servicing, repairing, or disposing of an appliance or industrial process refrigeration to knowingly vent or otherwise knowingly release or dispose of any substitute substance for a class I or class II substance unless the Administrator determines that venting, releasing, or disposing of such substance does not pose a threat to the environment.

12. Effective July 13, 1993, persons who take the final step in the disposal process (including but not limited to scrap recyclers) of small appliances and MVACs must either recover the refrigerant in accordance with specific procedures or verify with signed statements that the refrigerant was properly recovered prior to receipt of the small appliance or MVAC. See 40 C.F.R. § 82.156(f). If verification statements or contracts are used, the scrap recycler must notify the suppliers of the small appliance or MVAC of the need to properly recover the refrigerant. See 40 C.F.R. § 82.156(f)(3). The scrap recycler must keep verification statements and contracts on-site for a minimum of three years. See 40 C.F.R. § 82.166(i) and (m).

13. Effective June 13, 2005, no person maintaining, servicing, repairing, or disposing of appliances may knowingly vent or otherwise release into the environment any refrigerant or substitute from such appliances. Several substitutes, not applicable to this action, are excluded from this prohibition. See 40 C.F.R. § 82.154(a)(1).

14. The Administrator of EPA (the Administrator) may assess a civil penalty of up to \$37,500 per day of violation up to a total of \$295,000 for violations that occurred after January 12, 2009, through December 6, 2013; and may issue assess a civil penalty of up to \$37,500 per day of violation up to a total of \$320,000 for violations occurring after December 6, 2013 under Section 113(d)(1) of the CAA, 42 U.S.C. § 7413(d)(1), and 40 C.F.R. Part 19.

15. Section 113(d)(1) limits the Administrator's authority to matters where the first alleged date of violation occurred no more than 12 months prior to initiation of the administrative action, except where the Administrator and the Attorney General of the United States jointly determine that a matter involving a longer period of violation is appropriate for an administrative penalty action.

16. The Administrator and the Attorney General of the United States, each through their respective delegates, have determined jointly that an administrative penalty action is appropriate for the period of violations alleged in this CAFO.
