Re: Notice of Violation
DOCKET NO. : CAA-08-2009-0011

Dear Mr. Kjelden:

The United States Environmental Protection Agency (U.S. EPA) is issuing the enclosed Notice of Violation (NOV) to James Valley Ethanol, LLC ("James Valley Ethanol" or "you") pursuant to Section 113(a)(1) and (a)(3) of the Clean Air Act, 42 U.S.C. § 7413(a)(1) and (a)(3). We find that you are violating the regulations at your facility for New Source Performance Standards (NSPS), James Valley Ethanol's Title V Permit No. 28.0502-29, and the South Dakota State Implementation Plan. .

Section 113 of the Clean Air Act gives us several enforcement options. These options include issuing an administrative compliance order, issuing an administrative penalty order, and bringing a judicial civil or criminal action. The option(s) we select may depend on, among other things, the length of time you take to achieve and demonstrate continuous compliance with the requirements cited in the NOV.

We are offering you an opportunity to confer with us about the violations alleged in the NOV. If you choose to have such a conference, you may present information on the specific findings of violation, any efforts you have taken to comply, and the steps you will take to prevent future violations.

If you request a conference, please plan for your facility's technical and management personnel to attend to discuss compliance measures and commitments. You may have an attorney represent you at this conference if you choose.

The contacts in this matter are Albion Carlson, Environmental Scientist, and Marc Weiner, Air Enforcement Attorney. You may call Marc Weiner at (303) 312-6913 to request a conference.

You should make the request as soon as possible, but no later than 10 calendar days after you receive this letter. We should hold any conference within 30 calendar days of your receipt of this letter.

Sincerely,

A handwritten signature in black ink, appearing to read 'Andrew M. Gaydosh', with a long horizontal flourish extending to the right.

Andrew M. Gaydosh
Assistant Regional Administrator
Office of Enforcement, Compliance, and
Environmental Justice

Enclosure

NOTICE OF VIOLATION

DOCKET NO. : CAA-08-2009-0011

Statutory Authority

This Notice of Violation (NOV) is issued to James Valley Ethanol, LLC (James Valley Ethanol) (Respondent), pursuant to Section 113(a)(1) of the Clean Air Act (the Act), 42 U.S.C. Section 7413(a)(1), as amended. Section 113(a)(1) requires the Administrator of the United States Environmental Protection Agency (EPA) to notify a person in violation of a State Implementation Plan (SIP) or permit of the EPA's finding of a violation. The authority to issue this NOV has been delegated to the Assistant Regional Administrator for the Office of Enforcement, Compliance, and Environmental Justice.

Respondent

1. Respondent James Valley Ethanol is a South Dakota limited liability company that owns and operates a facility near Groton, South Dakota, for the manufacture of ethanol (the Facility). James Valley Ethanol began production of ethanol at the Facility in May 2003. James Valley Ethanol receives whole corn which is then milled, cooked, and fermented. After fermentation, the raw product is distilled to produce ethanol. Distillation separates the liquid ethanol from the corn meal which James Valley Ethanol dries or sells for animal feed.

2. Respondent is a “person” as defined in Section 302(e) of the Clean Air Act, 42 U.S.C. §7602(e), and the federal and state regulations promulgated pursuant to the Clean Air Act.

3. The ethanol manufacturing process at Respondent’s ethanol plant results in emissions of significant quantities of regulated air pollutants, including volatile organic compounds (VOCs) and hazardous air pollutants (HAPs). The primary sources of these emissions are the feed dryers, fermentation units, distillation units, fluid bed coolers, ethanol load-out systems, and fugitive VOC emissions from plant operations.

Statutory and Regulatory Background
CAA Requirements

4. The Clean Air Act establishes a regulatory scheme designed to protect and enhance the quality of the nation’s air so as to promote the public health and welfare and the productive capacity of its population. Section 101(b)(1) of the Clean Air Act, 42 U.S.C. § 7401(b)(1).

5. Section 110 of the Clean Air Act, 42 U.S.C. § 7410, requires each state to adopt and submit to EPA for approval a SIP that provides for the attainment and maintenance of the National Ambient Air Quality Standards (NAAQS).

6. Under Section 107(d) of the Clean Air Act, 42 U.S.C. § 7407(d), each state is required to designate those areas within its boundaries where the air quality is better or worse than the NAAQS for each criteria pollutant, or where the air quality cannot be classified due to insufficient data. These designations have been approved by EPA and are codified at 40 C.F.R. Part 81. An area that meets the NAAQS for a particular pollutant is classified as an “attainment” area; one that does not is classified as a “non-attainment” area.

7. Section 161 of the Clean Air Act, 42 U.S.C. § 7471, requires SIPs to contain emission limitations and such other measures as may be necessary, as determined under the regulations promulgated pursuant to these provisions, to prevent significant deterioration of air quality in attainment areas.

8. State operating permit programs. The Clean Air Act requires EPA to establish minimum elements for State operating permit programs pursuant to Section 502(b), 42 U.S.C. § 7661a(b). Section 502(a), 42 U.S.C. § 7661a, states that it is unlawful to operate a major source, except in compliance with a State operating permit (Title V permit or the permit). Pursuant to Section 502(b), 42 U.S.C. § 7661a(b), EPA promulgated general regulations applicable to State operating permit programs. Those general regulations are set forth at 40 C.F.R. Part 70.

9. Under Section 302(j) of the Clean Air Act, 42 U.S.C. § 7602(j), a source is a “major source” if it has the potential to emit, in the aggregate, 100 TPY or more of any air pollutant. Respondents’ ethanol plant is a “major source” because it has the potential to emit 100 TPY or more of VOCs.

10. Major sources of VOCs are required to obtain a Title V permit from the State, complete testing for compliance demonstration for VOC limits and maintain compliance with those limits. 42 U.S.C. § 7661a.

11. New Source Performance Standards. Section 111 of the Clean Air Act, 42 U.S.C. § 7411, requires EPA to promulgate standards of performance for certain categories of new air pollution sources (New Source Performance Standards or NSPS). Pursuant to Section 111(b), 42

U.S.C. § 7411(b), EPA promulgated general regulations applicable to all NSPS source categories. Those general regulations are set forth at 40 C.F.R. Part 60, Subpart A.

12. EPA's NSPS regulations applicable to Respondents' ethanol plant are contained in 40 C.F.R. Part 60, Subparts Kb and VV.

Violations

Title V

13. On or about October 16, 2002, Respondent obtained a Title V permit (Permit # 28.0501 03; amended October 9, 2007) to operate the Facility.

14. Section 21.6 of the permit requires that the internal floating roof shall rest or float on the liquid inside the storage vessel(s) at all times except during initial filling and when the tanks are emptied and subsequently refilled.

15. Respondent failed to maintain the internal floating roof on tanks #1, #2, #3, #4, and #5 in violation of the permit.

New Source Performance Standards **Standards of Performance for Volatile Organic** **Liquid Storage Vessels**

16. Respondent has storage vessels that are "affected facilities" under Subpart Kb, which are subject to the operational and emissions limits, testing, and recordkeeping and reporting requirements in 40 C.F.R. §§ 60.110b to 60-117b.

17. On one or more occasions since May 2003, Respondent failed to comply with the applicable requirements of Subpart Kb at tanks #1, #2, #3, #4, and #5, in violation of one or more

provisions of 40 C.F.R. §§ 60.110b to 60.117b, and Section 111 of the Clean Air Act, 42 U.S.C. § 7411.

Enforcement

Section 113(a)(1) of the Act provides that, at any time after 30 days following the date of the issuance of this NOV, the Administrator of the EPA may, without regard to the period of violation:

--issue an order requiring compliance with the requirements of the EPA-approved State Implementation Plan or permit, and/or

--issue an Administrative Penalty Order in accordance with Section 113(d), or

--bring a civil action pursuant to Section 113(b) of the Clean Air Act, 42 U.S.C.

§ 7413(b), for injunctive relief and civil penalties not to exceed \$25,000 per day of violation for violations of the Clean Air Act that occur before January 30, 1997. Section 113(b) of the Clean Air Act, 42 U.S.C. § 7413(b), pursuant to the Federal Civil Penalties Inflation Adjustment Act of 1990, 28 U.S.C. § 2461, as amended by The Debt Collection Improvement Act of 1996, 31 U.S.C. § 3701, authorizes EPA to commence an action to assess civil penalties of not more than \$27,500 per day per violation for violations occurring on or after January 30, 1997 through March 15, 2004; and \$32,500 per day for each violation that occurs after March 15, 2004 through January 12, 2009; and \$37,500 per day for each violation that occurs after January 12, 2009.

Penalty Assessment Criteria

Section 113(e)(1) of the Act states that the EPA Administrator or the court, as appropriate, shall, in determining the amount of penalty to be assessed, take into consideration

(in addition to such other factors as justice may require) the size of the business, the economic impact of the penalty on the business, the violator's full compliance history and good faith efforts to comply, the duration of the violation as established by any credible evidence (including evidence other than the applicable test method), payment by the violator of penalties previously assessed for the same violation, the economic benefit of noncompliance, and the seriousness of the violation.

Section 113(e)(2) of the Act allows the EPA Administrator or the court to assess a penalty for each day of violation. For purposes of determining the number of days of violation, where the EPA makes a *prima facie* showing that the conduct or events giving rise to these violations are likely to have continued or recurred past the date of this NOV, the days of violation shall be presumed to include those alleged in this NOV and each and every day thereafter, until Respondent demonstrates that continuous compliance has been achieved, except to the extent that Respondent can prove, by preponderance of evidence, that there were intervening days during which no violation occurred, or that the violations were not continuing in nature.

Opportunity for Conference

Respondent may confer with EPA, upon request to the EPA Region 8 Legal Enforcement Program. The conference will enable Respondent to present evidence bearing on the finding of violation, on the nature of violation, and on any efforts Respondent may have taken, or proposes to take, to achieve compliance. Respondent has the right to be represented by legal counsel. A request for a conference must be made within ten (10) calendar days after receipt of this NOV. The request for a conference, or any other inquiries concerning this NOV, should be addressed

to:

Marc Weiner, Enforcement Attorney
Legal Enforcement Program
Office of Enforcement, Compliance and Environmental Justice
U.S. Environmental Protection Agency, Region 8
1595 Wynkoop Street
Denver, CO 80202-1129
Tel. (303) 312-6913 Fax. (303) 312-7202

By offering the opportunity for a conference or participating in one, EPA does not waive or limit its right to any remedy available under the Act.

Effective Date

This NOV shall be effective immediately upon receipt.

Dated this 7th day of April, 2009.

Andrew M. Gaydosh
Assistant Regional Administrator
Office of Enforcement, Compliance, and
Environmental Justice
