**UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
REGION I**

IN THE MATTER OF:)

Daniel J. Lynch and)
Grace K. Lynch)
One Main Street,)
Foxboro, Massachusetts 02035)

Respondents.)

Proceeding under Section 16(a) of the)
Toxic Substances Control Act,)
15 U.S.C. § 2615(a).)
_____)

Docket Number:
TSCA-01-2008-0045

SEP COMPLETION REPORT

Complainant United States Environmental Protection Agency (“EPA”) filed the Complaint in this matter on March 14, 2008 against Daniel J. Lynch and Grace K. Lynch (“Respondents”). Complainant and Respondents agreed that settlement of the claims made in the Complaint is in the public interest, and entered into a Consent Agreement and Final Order on or about June 15, 2008 (“CAFO”). That CAFO required that Respondent conduct a Supplemental Environmental Project (“SEP”) and prepare a final report documenting completion of the SEP, all as set forth in the CAFO.

Respondent offers its final report as follows:

1. Description of the SEP

- a. The SEP required Respondents to replace 60 windows with lead-based paint with new, energy efficient windows pursuant to a detailed schedule contained in Appendix A to the CAFO.
- b. The SEP required that Respondent expend not less than \$37,267.00 in conducting the SEP.
- c. The SEP required that Respondent issue a final report including detail of project expenditures, lead inspection tests, and inspector's report.

2. SEP Report

(i) Detailed description of the SEP as implemented;

This is a lead safe renovation project pursuant to which Respondent agreed to expend at least \$37,267.00 to replace 60 windows at One Main Street, Foxboro MA (Centennial Court), a 12 unit apartment building. Respondent actually replaced 64 windows.

The existing windows were known to contain lead based paint. The estimated cost included approximately \$33,082 for windows, parts, and labor and approximately \$4,185 for required inspections.

Actual costs are detailed in Appendix A and substantially exceeded the required amount, as Respondents have expended \$43,083.62 to date; there will be additional invoices for final inspections and testing, which will add to the total.

The process generally consisted of causing a unit to be vacant, removing existing windows, replacing them with new, vinyl windows, cleaning the unit, conducting an inspection, and obtaining test results establishing the absence of lead in window wells and on unit floors.

More particularly, Respondent replaced all existing window sash at Centennial Court as follows:

- Remove existing window stops
- Remove existing sash, counterweights, and cables
- Fill inside void with expanding foam insulation
- Seal exposed areas inside window opening

- Install replacement windows per manufacturer’s specifications and applicable building codes and install new window stops.

Respondents performed the SEP in accordance with the Massachusetts standards for moderate risk deleading. See 454 CMR 22.12(3) and applicable sections of 454 CMR 22.00 and 105 CMR 460.000 and in the state-approved training materials for moderate risk deleading, which materials are consistent with the United States Department of Housing and Urban Development Guidelines for Evaluation and Control of Lead-Based Paint Hazards in Housing (June 1995, as revised in 1997).

All of the work was conducted by Scott McCauley, a general contractor (K & S Remodeling, 790 Read Street, Attleboro MA 02703), who obtained certification as a “Lead-Safe Renovator Contractor” pursuant to 454 CMR 22.00.

(ii) A description of any operating problems encountered and the solutions thereto;

The primary operating issue arose from the need to relocate tenants temporarily during the window replacement process. This was accomplished by moving the tenants into vacant, previously tested units at Centennial Court during the process.

A secondary issue resulted from initial test failures for several units. In each instance, the units were cleaned and retested as necessary to obtain satisfactory test results.

(iii) Itemized Costs: Respondent incurred costs of \$43,083.62 in conducting the SEP. (See Appendix A.) There will be additional costs incurred.

(iv) Certification that the SEP has been fully implemented pursuant to the provisions of this Consent Agreement and Order.

See below.

(v) A description of the environmental and public health benefits resulting from implementation of the SEP (with a quantification of the benefits and pollutant reductions, if feasible).

Older windows such as those replaced at Centennial Court are known to contribute to lead poisonings in residential settings because (1) opening and closing windows can abrade lead-based paint, creating lead-contaminated dust that can be ingested; and (2) the paint around the windows is exposed to the elements, causing paint to flake and chip. Accordingly, the replacement of windows finished with lead-based paint can help reduce the risk of lead poisonings in residential housing.

Further, the replacement windows are substantially greater in energy efficiency than the single glazed windows in place at the commencement of the project and have the following characteristics:

- Double glazed
- Low-E glass
- Argon filled
- Energy Star Certified
- National Fenestration Rating Council (NFRC) U Rating =.32

(v) Inspection and clearance sampling reports as described more particularly in the SEP.

See **Appendix B—Inspection Results**

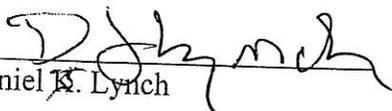

See **Appendix C—Inspector’s Letter Report Pursuant to CAFO Appendix A Par.**

3(c).

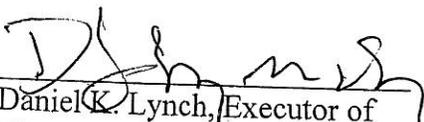

Certification

I certify under penalty of law that I have examined and am familiar with the information submitted in this document and all attachments and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fines and imprisonment.

I further certify that to my knowledge, and in accordance with this report and its attachments, the SEP has been fully implemented pursuant to the provisions of the CAFO.

Jeffrey M. Lovely, Esq.

APPENDIX A

COSTS INCURRED

Respondent established and used a Citizen's Bank Account, #130821-959-5, to pay costs associated with the SEP. True copies of the subject bank records and check register are attached.

Through December 17, 2008, Respondent had expended:

\$15,000.00	to purchase replacement windows and stock (check no. 120)
\$23,800.00	for labor (Kim Correia is a principal in K & S Remodeling) (check nos. 122, 123, 124, 125, 126, 127, and 130).
\$ 4,283.62	for environmental inspections and testing.

Total expended through 12/17/2008:	\$43,083.62
------------------------------------	-------------

K&S REMODELING

"Your Complete Home Remodel Inside and Out"

Attleboro, MA 02703

(774)306-1117

8/4/2008

Dear Tenant,

K &S Remodeling will be installing new vinyl replacement windows in each unit. Work is scheduled to start Monday, August 11th. Every tenant will be notified 3 days prior, to us entering the unit to perform the work.

Each tenant will be relocated to an empty unit down stairs that will be furnished by Foxboro Realestate.

These units will already have new vinyl replacement windows and passed dust swab testing. Each unit will take a few days to complete.

Please remove all valuables from your home i.e., money, credit cards, watches, jewelry, portable computer devices or any other personal items.

Due to Massachusetts regulations NO ONE is allowed into the unit where work is being performed except authorized persons.

Everything must be moved away from windows and remove any items on the wall surrounding the window area, such as pictures, shelves ect.

All moveable furniture such as sofas, beds, tables, chairs, lamps ect. must be placed in center of room.

We will be covering everything in plastic that will be taped down to the floor to ensure that all of your belongings are protected.

K&S Remodeling will not be responsible for broken or damaged furniture.

We will be removing the old windows and the sashes, taking out counter weights and filling voids with expanding foam to help with efficiency.

Then we will install new vinyl replacement windows that are substantially more energy efficient and contain low E and argon gas. The unit will be cleaned of any mess occurred by K&S.

Once everything is cleaned and dust swabs have passed, K&S will notify tenant when they can be allowed to return to their unit.

We apologize for any inconvenience this may cause, but if everyone complies with these terms, we can get in and out of your unit quickly.

Thank you for your cooperation,

Sincerely,

K&S Remodeling

Foxboro Realestate

Telephone Number 774-306-1117

K&S REMODELING
"Your Complete Home Remodel Inside And Out"
(774)306-1117

Work to be performed at:
1 Main St. Foxboro, Ma

DESCRIPTION OF PROJECT:

Daniel Lynch has been fined by the EPA for \$20,800 for disclosion. Mr.Lynch's attorney, Jeff Lovely and the attorney for the EPA, have all come to the conculsin that Mr.Lynch will change out ALL windows at 1 Main St., "Cononial Court", to mitigate the EPA fine. This is a 12 unit building with 60 windows that are assumed to contain lead- based paint. The opening and closing of lead-based paint windows can abrade, creating lead contaminated dust that can be ingested. The replacement of the windows can reduce the risk of lead poisonings in residential housing.

TENANTS:

All tennants have/or will receive a notice of the proceedings prior to work. No tenant or any of their animals, *i.e. cats,dogs,birds ect.*, will be present in the unit at any time during window project.

Work will start at 8 a.m and end at 6p.m. Tenents may return after unit is cleaned.

Tenents will also be notified to remove all furniture away from windows. Any pictures, glass, nic-nacs ect. must be removed and placed in center for room.

Mr. Lynch will supply us with all keys to nessicary units.

WINDOWS:

The old windows will be replaced with 'Simmington 5500 Series' replacement windows. They are more energy effcent than the current windows. (A detailed list is enclosed)

We will be incompilance with Massachusetts standard for deleading ,105.C.M.R. 460.000, 454 C.M.R.22.00

The only authorized persons certified in moderate to low- risk deleading CMR460.020. , will be Scott Macauley and William Macauley.

CONTAINING UNIT:

All materials used will meet deleading protocol.

The task of containing the unit will start by covering all entry doors into the unit with 6mil plastic. The plastic will be taped off all around to avoid the spreading of lead dust. HVACR registers will be sealed. Belongings of the apatment will be put in middle of room, covered with 6. mil. plastic and taped to perimiter of floor. Then the remaining perimiter of floor will be covered in 6 mil. plastic and taped.

DESCRIPTION OF WINDOW REPLACEMENT:

- Once containment is made window will be sprayed down with water, stops on

inside of window will come off, sashes taken out.

- Remove old window.
- All debris will be put into double 6mil. bags.
- Debris will be scraped off, cleaned up with EPA approved HEPA vacuums.
- Allow casing to dry.
- Apply EPA approved encapsulant to window well, sill and header trim.
- After dry, install 'Simmington 5500 series' windows, then seal all gaps and crevases with approved sealants.
- Reapplying new window stops for inside.
- All debris will be placed in sealed 6 mil. bags, and is considered and will be disposed of as construction debris.

CLEAN UP OF UNITS:

- The final clean up will be performed in accordance with 105 CMR 460.160 by authorized persons.
- Let all dust settle for regulation time.
- Containment will be broken down, placed into 6 mil plastic bags.
- Then proceed to clean walls, window, floor with HEPA VACUUM , wet moped and vacuumed again.
- Everything will meet the requirements of 105 C.M.R. 460.760 before reoccupancy.
- Required lead-dust testing.

Estimate of Job Cost

Payments as followed:

ALL of stock upon signing of contract.

1/3 of labor due on first day of work.

Payment of \$3,600 per week, until total is reached

Supplies for deleading:	\$2,032
Windows:	\$13,050
Cost of Labor:	\$23,800
TOTAL:	\$38,882

APPENDIX B
TESTS AND RESULTS

Attached are true copies of test and inspection reports for each unit at the subject property with the exception of the unit known as 2 Bird Street, Unit 6, in which windows had previously been replaced (documents attached), and the unit used exclusively as Respondent's business office.

There are 13 units in total—the office (not tested), Unit 6 (previous window replacement; not tested) and the following units:

- | | |
|-----------------------------|--|
| 1 Main Street #1 (4 pages) | Unit passed retest on September 13, 2008. |
| 1 Main Street #2 (1 page) | Unit passed test on August 23, 2008. |
| 1 Main Street #3 (2 pages) | Unit passed test on November 14, 2008. |
| 1 Main Street #4 (1 page) | Unit passed test on September 15, 2008. |
| 1 Main Street #5 (1 page) | Unit passed test on September 13, 2008. |
| 1 Main Street #8 (4 pages) | Unit passed test on November 18, 2008. |
| 1 Main Street #10 (3 pages) | Unit passed test on August 25, 2008. |
| 1 Main Street #11 (4 pages) | Unit passed initial test on November 14, 2008. |
| 1 Main Street #12 (2 pages) | Unit passed test on January 29, 2008. |
| 1 Main Street #14 (2 pages) | Unit passed test on September 30, 2008. |
| 1 Main Street #15 (pages) | Unit passed test on November 14, 2008. |
| 2 Bird Street Unit 6: | See attached correspondence. |

The Federal lead guidelines for leaded dust clearance levels by wipe sampling; Floors (FL) - 40 µg/ft², Interior Window Sills (SL) - 250 µg/ft², Window Wells (WW) - 400 µg/ft². The Reporting Limit (RL) is 10 µg Total Pb. Reported results are not corrected for field blanks. Dust wipe area and results are calculated based on area measurements determined by the client. All internal quality control requirements associated with this batch were met, unless otherwise noted.

Analytical results and reports are generated by Environmental Hazards Services, LLC at the request of and for the exclusive use of the person or entity (client) named on this report. Results, reports or copies of same will not be released by Environmental Hazards Services, LLC to any third party without the prior express written consent from the client named in this report. This report applies only to those samples taken at the time, place and location referenced by the client. This report makes no express or implied warranty or guarantee as to the sampling methodology used by the individual performing the sampling. The client is solely responsible for the use and interpretation of these test results and Environmental Hazards Services, LLC makes no express or implied warranties as to such use or interpretation. Environmental Hazards Services, LLC is not able to make and does not make a determination as to the environmental soundness, safety or health of a property from only the samples sent to their laboratory for analysis. Unless otherwise specified by the client, Environmental Hazards Services, LLC reserves the right to dispose of all samples after the testing of such samples is sufficiently completed or after a five day period, whichever is greater.

The Federal lead guidelines for leaded dust clearance levels by wipe sampling; Floors (FL) - 40 µg/ft², Interior Window Sills (SL) - 250 µg/ft², Window Wells (WW) - 400 µg/ft². The Reporting Limit (RL) is 10 µg Total Pb. Reported results are not corrected for field blanks. Dust wipe area and results are calculated based on area measurements determined by the client. All internal quality control requirements associated with this batch were met, unless otherwise noted.

Analytical results and reports are generated by Environmental Hazards Services, LLC at the request of and for the exclusive use of the person or entity (client) named on this report. Results, reports or copies of same will not be released by Environmental Hazards Services, LLC to any third party without the prior express written consent from the client named in this report. This report applies only to those samples taken at the time, place and location referenced by the client. This report makes no express or implied warranty or guarantee as to the sampling methodology used by the individual performing the sampling. The client is solely responsible for the use and interpretation of these test results and Environmental Hazards Services, LLC makes no express or implied warranties as to such use or interpretation. Environmental Hazards Services, LLC is not able to make and does not make a determination as to the environmental soundness, safety or health of a property from only the samples sent to their laboratory for analysis. Unless otherwise specified by the client, Environmental Hazards Services, LLC reserves the right to dispose of all samples after the testing of such samples is sufficiently completed or after a five day period, whichever is greater.

The Federal lead guidelines for leaded dust clearance levels by wipe sampling; Floors (FL) - 40 µg/ft², Interior Window Sills (SL) - 250 µg/ft², Window Wells (WW) - 400 µg/ft². The Reporting Limit (RL) is 10 µg Total Pb. Reported results are not corrected for field blanks. Dust wipe area and results are calculated based on area measurements determined by the client. All internal quality control requirements associated with this batch were met, unless otherwise noted.

Analytical results and reports are generated by Environmental Hazards Services, LLC at the request of and for the exclusive use of the person or entity (client) named on this report. Results, reports or copies of same will not be released by Environmental Hazards Services, LLC to any third party without the prior express written consent from the client named in this report. This report applies only to those samples taken at the time, place and location referenced by the client. This report makes no express or implied warranty or guarantee as to the sampling methodology used by the individual performing the sampling. The client is solely responsible for the use and interpretation of these test results and Environmental Hazards Services, LLC makes no express or implied warranties as to such use or interpretation. Environmental Hazards Services, LLC is not able to make and does not make a determination as to the environmental soundness, safety or health of a property from only the samples sent to their laboratory for analysis. Unless otherwise specified by the client, Environmental Hazards Services, LLC reserves the right to dispose of all samples after the testing of such samples is sufficiently completed or after a five day period, whichever is greater.

LEGEND	Pb = lead	µg = microgram	ppm = parts per million
	ml = milliliter	ft ² = square foot	µg/ft ² = micrograms per square foot

LETTER OF FULL DELEADING COMPLIANCE

Daniel Lynch
C/O Foxboro Real Estate
1 Main Street
Foxborough, MA 02035

Date: December 14, 2006

To Whom It May Concern:

This letter is to certify that I re-inspected your property located at **2 Bird Street, Apartment #6** and relevant common areas in the City or Town of **Foxborough, MA 02035** for full deleading compliance on **12/18/06**. On that date those surfaces cited in the initial inspection report of **06/05/06** were found to be in full compliance with Massachusetts General Laws, Chapter 111, Section 197, and 105 CMR 460.000: Regulations for Lead Poisoning Prevention and Control. Dust samples were taken and found to be within acceptable limits.

Massachusetts's law does not require the abatement or containment of all residential lead paint. The residential premises or dwelling unit and relevant common areas shall remain in compliance only as long as there continues to be no peeling, chipping or flaking lead paint or other accessible leaded materials, as long as coverings and/or encapsulants forming an effective barrier over such paint or other leaded materials remain in place, and as long as surfaces reversed to correct lead hazards remain reversed and securely in place. The law grants you a 30-day maintenance period to repair deteriorated lead paint or detached coverings over such paint, and to clean up, during which time this Letter remains valid.

The reverse side of this letter indicates the authorized person(s) who performed deleading on the property and a general summary of the methods used. A complete reinspection report is attached to this letter, which specifies how and on what date each surface was brought into compliance. Do not lose these documents.

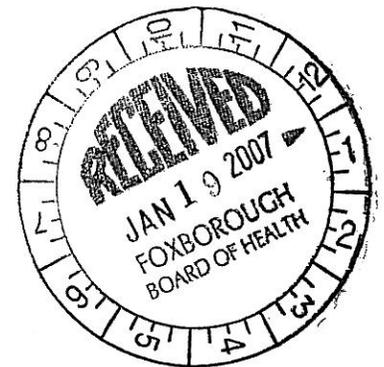

To the best of my knowledge, the cost of the legally required deleading is **\$59,400.00.**

Sincerely,

John Maclaasac
Inspector

APPENDIX C
INSPECTOR'S LETTER REPORT

Harvard Environmental Services

Jeffrey M. Lovely, Esq.
6 Railroad Avenue
Foxboro, MA 02035

Re: One Main Street, Foxboro, MA

February 3, 2009

Mr. Lovely,

This is to confirm that all is work has been satisfactorily completed at One Main Street, Foxboro.

The work was consistent with the requirements listed in the Supplemental Environmental Project Scope of Work specified in the EPA Consent Agreement and Final Order, as clarified in your email of 12/16/08.

The Standard of Care was that of a lead-safe renovation project, performed in accordance with the Massachusetts standards for moderate risk Deleading. Specific standards are those contained in 454 CMR 22.12(3), applicable sections of 454 CMR 22.00 and 105 CMR 460.0, and the state-approved training materials for deleading.

Dust wipe tests were performed in each apartment. In several cases lead dust levels exceeded the regulatory limits. In each of those cases the apartments were recleaned, retested, and passed, prior to Reoccupancy.

All dust wipe reports and chain-of-custody forms have been previously supplied. Please let me know if you are missing any.

Please call at any time if you have questions.

Sincerely,

Gary Kellner
