RE: Docket No. SDWA-03-2017-0173DS

Dear Mr. Suckow

In September 2017, Red Jacket Energy was found to be in violation of C.F.R. § 144.22 for failure to maintain oil and gas production in conjunction with the injection of produced fluids consistent with rule authorized, enhanced-recovery wells. Red Jacket was also found to be operating as an unpermitted Class II disposal facility given that fluids were still being injected, resulting in a violation of 40 C.F.R. § 144.28. Subsequently, Red Jacket reworked production wells 083-23805, 083-22129, and 083-25839 and put those wells back into production.

Red Jacket was also found to be out of compliance with 40 C.F.R. § 144.28 (f)(2) for failing to maintain mechanical integrity of W2 and W14 and for failing to properly plug and abandon W5 pursuant to 40 C.F.R. § 146.10. On March 7, 2018, EPA received a Pennsylvania Department of Environmental Protection's "Certificate of Well Plugging" for W5 which indicated that W5 was plugged and abandoned in accordance with Red Jacket's Plugging and Abandonment Plan. In addition, mechanical integrity tests (MITs) were conducted for W2 and W14 on April 23, 2018 and observed by EPA Inspector Dave Rectenwald. These wells passed the MITs.

Therefore, Red Jacket has returned to compliance for all violations listed in Administrative Order Docket No SDWA-03-2017-0173DS and the Administrative Order is considered closed. Please contact Kevin Rowsey at 215-814-5463 or rowsey.kevin@epa.gov for additional questions regarding the Administrative Order.

Sincerely,

James C. Bennett, Jr., Chief
Ground Water & Enforcement Branch
