  - d. Parts I.D.5 and I.D.8 of the Permit required Respondent to report monitoring data in discharge monitoring reports by the 28th day of the month following the previous quarterly reporting period.

- e. Parts II.B.1.c and II.B.3 of the Permit required Respondent to provide notification within 24-hours and a written report within five days to EPA after becoming aware of a violation of a maximum daily discharge limit for multiple pollutant parameters, including total petroleum hydrocarbons - diesel (TPH-DRO) and total petroleum hydrocarbons - residual (TPH-RRO).
  - f. Parts III.A and III.B of the Permit required Respondent to develop a Pollution Prevention Plan to identify potential sources of pollution that may affect the quality of effluent discharges from the Facility and describe pollution prevention measures and best management practices that it will implement to reduce the pollutants in effluent discharges from the Facility and assure compliance with the terms and conditions of the Permit.
  - g. Parts III.A.2(1), III.A.3(4), and C.5 of the Permit, required Respondent to properly operate and maintain systems of treatment and control which were installed or used to achieve compliance with the conditions of the permit.
