Docket No.
CAA-04-2018-8013(b)

CONSENT AGREEMENT

A. PRELIMINARY STATEMENT

1. This is an administrative penalty assessment proceeding brought under Section 113(d) of the Clean Air Act (the "Act"), 42 U.S.C. § 7413(d), and Sections 22.13 and 22.18 of the Consolidated Rules of Practice Governing Administrative Assessment of Civil Penalties and the Revocation/Termination or Suspension of Permits ("Consolidated Rules"), as codified at 40 C.F.R. Part 22.
2. Complainant is the United States Environmental Protection Agency, Region 4 (the "EPA"). The Director of the Air, Pesticides and Toxics Management Division, EPA Region 4, is delegated the authority to settle civil administrative penalty proceedings under Section 113(d) of the Act.
3. Respondent is Vanderbilt Chemicals, LLC, a corporation doing business in the Commonwealth of Kentucky. Respondent is a "person" as defined in Section 302(e) of the Act, 42 U.S.C. § 7602(e).
4. Complainant and Respondent, having agreed that settlement of this action is in the public interest, consent to the entry of this consent agreement ("Consent Agreement" or "Agreement") and the attached final order ("Final Order" or "Order") without adjudication of any issue of law or fact herein, and Respondent agrees to comply with the terms of this Consent Agreement and Final Order.

B. JURISDICTION

5. This Consent Agreement is entered into under Section 113(d) of the Act, as amended, 42 U.S.C. § 7413(d), and the Consolidated Rules, 40 C.F.R. Part 22. The alleged violations in this Consent Agreement are of Section 112(r)(7) of the Act, 42 U.S.C. § 7412(r)(7).
6. The EPA and the United States Department of Justice jointly determined that this matter, although it involves alleged violations that occurred more than one year before initiation of this proceeding, is appropriate for an administrative penalty assessment. 42 U.S.C. § 7413(d).

7. On April 19, 2017, the EPA issued to Respondent a Notice of Potential Violation (“NOPV”), providing notice that the EPA found that Respondent potentially committed the alleged violations described in Section E of this Agreement and providing Respondent an opportunity to confer with the EPA. On July 20, 2017, representatives of Respondent and the EPA held a Show Cause meeting to discuss the April 19, 2017, NOPV.

8. The Regional Judicial Officer is authorized to ratify this Consent Agreement, which memorializes settlement between Complainant and Respondent. 40 C.F.R. § 22.4(b) and 22.18(b).

9. The issuance of this Consent Agreement and attached Final Order simultaneously commences and concludes this proceeding. 40 C.F.R. § 22.13(b).

C. GOVERNING LAW

10. Section 112(r) of the Act, 42 U.S.C. § 7412(r), addresses the prevention of releases of substances listed pursuant to Section 112(r)(3) of the Act, 42 U.S.C. § 7412(r)(3), and other extremely hazardous substances. The purpose of this section is to prevent the accidental release of extremely hazardous substances and to minimize the consequences of such releases. Pursuant to Section 112(r)(7) of the Act, 42 U.S.C. § 7412(r)(7), the EPA is authorized to promulgate regulations for accidental release prevention.

11. Pursuant to Sections 112(r)(3) and 112(r)(7) of the Act, 42 U.S.C. §§ 7412(r)(3) and 7412(r)(7), the EPA promulgated rules codified at 40 C.F.R. Part 68, Chemical Accident Prevention Provisions. These regulations are collectively referred to as the “Risk Management Program” (RMProgram) and apply to an owner or operator of a stationary source that has a threshold quantity of a regulated substance in a process. Pursuant to Sections 112(r)(3) and 112(r)(5) of the Act, 42 U.S.C. §§ 7412(r)(3) and 7412(r)(5), the list of regulated substances and threshold levels are codified at 40 C.F.R. § 68.130.

12. Pursuant to Section 112(r)(7)(B)(iii) of the Act, 42 U.S.C. § 7412(r)(7)(B)(iii), and 40 C.F.R. §§ 68.10 and 68.150, the owner or operator of a stationary source that has a regulated substance in an amount equal to or in excess of the applicable RMProgram threshold in a “process” as defined in 40 C.F.R. § 68.3, must develop an RMProgram accidental release prevention program, and submit and register a single Risk Management Plan (RMPlan) to the EPA.

D. FACTUAL ALLEGATIONS

13. Respondent operates a “stationary source” as that term is defined by Section 302(z) of the Act, 42 U.S.C. § 7602(z). The Respondent’s stationary source is located at 396 Pella Way, Murray, Kentucky (stationary source).

14. Respondent has registered an RMPlan with the EPA for its stationary source, and has developed an RMProgram accidental release prevention program for the stationary source.

15. For the purpose of this Agreement:

- (a) At its stationary source, the Respondent operates a specialty chemical manufacturing facility that includes aboveground storage tank, tanker truck, tanker car, tote and drum chemical storage areas.
- (b) At its stationary source, the Respondent has 500,000 pounds of carbon disulfide in onsite storage.
- (c) At its stationary source, the Respondent has one RMProgram level 3 covered process, which stores or otherwise uses carbon disulfide in an amount exceeding its applicable threshold of 20,000 pounds.
- (d) On March 2, 2016, the EPA conducted an onsite inspection of the RMProgram related records and equipment for the purpose of assessing the Respondent's compliance with the RMProgram requirements and the implemented recognized and generally accepted good engineering practices for its covered process at its stationary source.
- (e) At the time of the inspection, the EPA determined that Respondent had not inspected and tested process equipment consistent with applicable manufacturer's recommendations and good engineering practices. The Respondent conducts mechanical integrity inspections of equipment and piping per the American Petroleum Institute's (API's) Standard 653-Tank Inspection, Repair, Alteration, and Reconstruction. Per API 653, a five-year external inspection and a ten-year internal inspection is required for storage tanks containing toxic materials. The Respondent's last inspection of the West CS2 Storage Tank was performed on October 20, 2010. Per API 653, the next subsequent external inspection should have been completed by October 20, 2015, but no such external inspection had been performed prior to EPA's March 2, 2016, inspection.
- (f) At the time of the inspection, the EPA determined that the Respondent had not corrected deficiencies in equipment that are outside acceptable limits in a safe and timely manner.
 - (1) A pipe inspection completed on September 27, 2011, recommended that Respondent "monitor at a 30-day interval the mechanical gouge at TML #10 to determine the corrosion rate; to monitor TML #12 frequently to establish a corrosion rate; and to resolve the concrete-to-air interface between TML's #9 and #10 by installing a pipe sleeve to avoid contact with concrete." However, respondent took no further action to resolve these recommendations.
 - (2) A November 22, 2013, Vessel Inspection Summary recommended discontinuing the use of the East CS2 Storage Tank. Respondent completed an external visual and ultrasonic thickness examination of the tank on November 21, 2013, that was limited to the top exposed area of the tank due to its location inside a water-filled dike. The Vessel Inspection Summary recommended "removing the vessel from service" due to "coating failure with heavy corrosion and pitting on the shell." However, Respondent took no further action to resolve these recommendations, and the East Tank was still in service at the time of EPA's March 2, 2016, inspection.
- (g) At the time of the inspection, EPA determined that the Respondent's RMPlan did not accurately indicate the maximum amount of carbon disulfide in process. The Respondent's April 28, 2014, RMPlan of record at the time of EPA's March 2, 2016, inspection represented the maximum amount of carbon disulfide in process as 105,000

pounds. However, during EPA's inspection, Respondent representatives stated that up to 400,000 pounds of carbon disulfide could be in process. In its October 14, 2016, RMPlan five-year submittal, Respondent updated the maximum amount in process to 500,000 pounds of carbon disulfide.

- (h) At the time of the inspection, EPA determined that the Respondent had not previously updated its RMPlan emergency contact information within thirty days of prior emergency contact changes. While the Respondent did update its RMPlan emergency contact information on March 2, 2016, the day of the EPA inspection, prior to that update, the RMPlan listed Joe E. Curtis, a former Environmental Manager who retired in 2015, as the emergency contact.

E. ALLEGED VIOLATIONS OF LAW

16. Based on EPA's compliance monitoring investigation, the EPA alleges that the Respondent violated the codified rules governing the Act's Chemical Accident Prevention Provisions, because Respondent did not adequately implement provisions of 40 C.F.R. Part 68 when it:

Failed to inspect and test process equipment consistent with applicable manufacturer's recommendations and good engineering practices, and more frequently if determined to be necessary by prior operating experience as required by 40 C.F.R. § 68.73(d)(3);

Failed to correct deficiencies in equipment that are outside acceptable limits (defined by the process safety information in §68.65) before further use or in a safe and timely manner when necessary means are taken to assure safe operation as required by 40 C.F.R. § 68.73(e);

Failed to complete a single registration form that includes the maximum quantity of each regulated substance or mixture in the process (in pounds) to two significant digits as required by 40 C.F.R. § 68.160(b)(7); and

Failed to submit a RMPlan correction, as required by 40 C.F.R. § 68.195(b), for its emergency contact information within one month of any change to the RMPlan emergency contact information specified by 40 C.F.R. § 68.160(b)(6).
