Atlanta, GA 30303

Ms. Wilda Cobb,

As you well know, Bay Saint Louis, MS had taken a great beating by Hurricane Katrina. After trying to clean up and fix up what I had left down there in South Mississippi, my family and I have relocated because we had two minor children. We received 28 feet of water, and lost most of our paperwork for our properties.

My Construction business was closed down at the end of the year of 2005, and finished fixing up the few houses I had left by end of 2006.

The property in question was sold to another contractor, and to my understanding he has received approval from the Corp of Engineering for Construction.

At the time you have explained in your complaint, my company filled property that was already cleared and filled. Also, adjacent land that had been filled prior to my starting of construction.

- 1- Due to the lack of paperwork (to gather facts) because of Hurricane Katrina.
- 2- Due to the tragady of my family having to leave the area for my small children.
- 3- Due to the fact that someone else has owned this property for 3 years and has an approval from Corp of Engineers to build. (so I have been told)
- 4- Need time to gather facts, and consult my Attorney.
- 5- Need to Contact Head of Department of Environmental Quality on issuance of 3 permits
- 6- Need to get previous overhead pictures of property to show you that the property was previously filled and cleared.

Government, please give me the time necessary. I don't have the money. My family and I WILL gather the facts and will get back with you as soon as we can get everything together.

Thank You,

Rodney O. Corr
