CONSENT AGREEMENT

A. PRELIMINARY STATEMENT

1. This is an administrative penalty assessment proceeding brought under Section 113(d) of the Clean Air Act (the "Act"), 42 U.S.C. § 7413(d), and Sections 22.13 and 22.18 of the Consolidated Rules of Practice Governing Administrative Assessment of Civil Penalties and the Revocation/Termination or Suspension of Permits ("Consolidated Rules"), as codified at 40 C.F.R. Part 22.
2. Complainant is the United States Environmental Protection Agency, Region 4 (the "EPA"). The Director of the Air, Pesticides and Toxics Management Division, EPA Region 4, is delegated the authority to settle civil administrative penalty proceedings under Section 113(d) of the Act.
3. Respondent is Blues City Brewery, LLC, a limited liability company doing business in the State of Tennessee. Respondent is a "person" as defined in Section 302(e) of the Act, 42 U.S.C. § 7602(e).
4. Complainant and Respondent, having agreed that settlement of this action is in the public interest, consent to the entry of this consent agreement ("Consent Agreement" or "Agreement") and the attached final order ("Final Order" or "Order") without adjudication of any issue of law or fact herein, and Respondent agrees to comply with the terms of this Consent Agreement and Final Order.

B. JURISDICTION

5. This Consent Agreement is entered into under Section 113(d) of the Act, as amended, 42 U.S.C. § 7413(d), and the Consolidated Rules, 40 C.F.R. Part 22. The alleged violations in this Consent Agreement are pursuant to Section 112(r)(7), 42 U.S.C. § 7412(r)(7).
6. The EPA and the United States Department of Justice jointly determined that this matter, although it involves alleged violations that occurred more than one year before initiation of this proceeding, is appropriate for an administrative penalty assessment. 42 U.S.C. § 7413(d); 40 C.F.R. § 19.4.

7. On July 14, 2015, the EPA issued to Respondent a Notice of Potential Violation (“NOPV”), providing Respondent an opportunity to confer with the EPA regarding potential violations. On October 13, 2015, March 9, 2016, and December 7, 2016, representatives of Respondent and the EPA discussed potential violations.

8. The Regional Judicial Officer is authorized to ratify this Consent Agreement which memorializes settlement between Complainant and Respondent. 40 C.F.R. § 22.4(b) and 22.18(b).

9. The issuance of this Consent Agreement and attached Final Order simultaneously commences and concludes this proceeding. 40 C.F.R. § 22.13(b).

C. GOVERNING LAW

10. Section 112(r) of the Act, 42 U.S.C. § 7412(r), addresses the prevention of releases of substances listed pursuant to Section 112(r)(3) of the Act, 42 U.S.C. § 7412(r)(3). The purpose of this section is to prevent the accidental release of extremely hazardous substances and to minimize the consequences of such releases. Pursuant to Section 112(r)(7) of the Act, 42 U.S.C. § 7412(r)(7), the EPA is authorized to promulgate regulations for accidental release prevention.

11. Pursuant to Sections 112(r)(3) and 112(r)(7) of the Act, 42 U.S.C. §§ 7412(r)(3) and 7412(r)(7), the EPA promulgated rules codified at 40 C.F.R. Part 68, Chemical Accident Prevention Provisions. These regulations are collectively referred to as the “Risk Management Program” (RMProgram) and apply to an owner or operator of a stationary source that has a threshold quantity of a regulated substance in a process. Pursuant to Sections 112(r)(3) and 112(r)(5) of the Act, 42 U.S.C. §§ 7412(r)(3) and 7412(r)(5), the list of regulated substances and threshold levels are codified at 40 C.F.R. § 68.130.

12. Pursuant to Section 112(r)(7)(B)(iii) of the Act, 42 U.S.C. § 7412(r)(7)(B)(iii), and 40 C.F.R. §§ 68.10 and 68.150, the owner or operator of a stationary source that has a regulated substance in an amount equal to or in excess of the applicable RMProgram threshold in a “process” as defined in 40 C.F.R. § 68.3, must develop an RMProgram accidental release prevention program, and submit and register a single Risk Management Plan (RMPlan) to the EPA.

D. FACTUAL ALLEGATIONS

13. Respondent operates a “stationary source” as that term is defined by Section 302(z) of the Act, 42 U.S.C. § 7602(z). Respondent’s stationary source is located at 5151 E. Raines Road, Memphis, Tennessee 38118 (stationary source).

14. Respondent has submitted and registered an RMPlan to the EPA for its stationary source and has developed an RMProgram accidental release prevention program for the stationary source.

15. EPA alleges for the purpose of this Agreement:

- (a) At its stationary source, Respondent operates a beverage production plant with the capacity to produce energy drinks, teas and beer. The production plant uses 160,300 pounds of anhydrous ammonia, an RMProgram regulated substance, in its refrigeration system to provide cooling capabilities for its beverage products.
- (b) At its stationary source, Respondent has one RMProgram level 3 covered process, which stores or otherwise uses anhydrous ammonia in an amount exceeding its applicable RMProgram threshold of 10,000 pounds.
- (c) On August 22, 2013, the EPA conducted an onsite inspection of Respondent's RMProgram related records and equipment for the purpose of assessing Respondent's compliance with the RMProgram requirements including applicable recognized and generally accepted good engineering practices (RAGAGEP) for its covered process at its stationary source.
- (d) As of the date of inspection, Respondent's accident prevention program documentation identified various accident prevention program individual responsibilities, but Respondent's documentation did not define the lines of authority through an organization chart or similar management system document.
- (e) As of the date of inspection, Respondent had not documented, and could not document, that the covered ammonia process equipment, including ammonia compressors and associated controls, high and control pressure ammonia receiver groups, and ammonia accumulator control groups, was in compliance with RAGAGEP. On October 31, 2016, Respondent notified EPA that the covered ammonia process equipment was "now in compliance with [RAGAGEP]" following the completion of improvement projects on that equipment.
- (f) As of the date of inspection, Respondent did not have the necessary training records for several employees involved in operating the covered ammonia process that included the identity of the employee, the date of the training, and the means used to verify that the employee understood the training.
- (g) As of the date of inspection, Respondent's process equipment inspection and test documentation for several compressor inspections and systems analyses on the ammonia process equipment did not include the date of the inspection or test or the name of the person who performed the inspection or test.

E. ALLEGED VIOLATIONS OF LAW

16. Based on EPA's compliance monitoring investigation, the EPA alleges that Respondent violated the codified rules governing the Act's Chemical Accident Prevention Provisions, because Respondent did not adequately implement provisions of 40 C.F.R. Part 68 when it:

- (a) Failed to define and document the lines of authority for persons responsible for implementing individual requirements of the risk management program through an organization chart or similar management system document as required by 40 C.F.R. § 68.15(c);

- (b) Failed to document that the ammonia process equipment complies with recognized and generally accepted good engineering practices as required by 40 C.F.R. § 68.65(d)(2);
- (c) Failed, for several training episodes required under 40 C.F.R. §§ 68.71(a) and (b), to prepare a record which contains the identity of the employee being trained, the date of the training, and the means used to verify that the employee understood the training as required by 40 C.F.R. § 68.71(c); and
- (d) Failed, for several process equipment inspections and tests, to document the date of the inspection or test or the name of the person who performed the inspection or test as required by 40 C.F.R. § 68.73(d)(4).
