) Docket Nos. FIFRA-07-2008-0035

) FIFRA-07-2008-0036

) FIFRA-07-2009-0041

) FIFRA-07-2009-0042

COMPLAINANT'S PREHEARING EXCHANGE

Comes now the Complainant and makes the following pre-hearing exchange as directed by the order dated December 2, 2009. This pre-hearing exchange supplements and supersedes the pre-hearing exchange filed in the matter of Advanced Products Technology, Inc., FIFRA-07-2008-0036, on October 9, 2009.

I. Place of Hearing and Estimated Duration

Complainant requests that the hearing be held in St. Louis, Missouri. Complainant estimates that it needs four days to present its case.

II. Intended Witnesses and Summary of Expected Testimony

1. Mark Leshar
Case Review Officer
U.S. Environmental Protection Agency
Region 7
901 North 5th Street
Kansas City, Kansas 66101

Mr. Leshner will testify as to his review of the evidence compiled during multiple investigations of the pesticide producing facility at 50 and 60 Highline Drive in Union, Missouri, and the collection of information regarding sales or distribution of the pesticides STERI-DINE DISINFECTANT, EPA Reg. No. 48211-70-10366 and FRM CHLOR 1250, to multiple entities, and the factual basis for the Agency's determination that the Respondents violated the FIFRA statute and regulations as charged in the several Complaints. Mr. Leshner will also testify as to the published policy of the Agency in assessing penalties for such violations and the application of that policy to the instant cases.

2. Mark Nachreiner
Pesticide Use Investigator
Missouri Department of Agriculture
Division of Plant Industries
Bureau of Pesticide Control
P.O. Box 630
Jefferson City, Missouri 65102

Mr. Nachreiner will testify regarding his inspection of the pesticide producing facility at 50 and 60 Highline Drive in Union, Missouri in December 2005, and again in October 2008. He will also testify regarding his communications with company officials and employees of Advanced Products Technology, Inc.; FRM Chem, Inc.; Custom Compounders, Inc.; Synisys, Inc.; and Industrial Specialties, Inc., as well as regarding documents received during the course of his investigation and the contents of the inspection reports on this matter.

3. Walter Roachell
EPA Missouri Project Officer
U.S. EPA - Region 7
1103 Southwest Boulevard, Suite B1
Jefferson City, Missouri 65109

Mr. Roachell will testify regarding the inspection of the pesticide producing facility at 50 and 60 Highline Drive in Union, Missouri in October 2008. He will also testify regarding his communications with company officials and employees of Advanced Products Technology, Inc.; FRM Chem, Inc.; Custom Compounders, Inc.; Synisys, Inc.; and Industrial Specialties, Inc., as well as regarding documents received during the course of his investigation and the contents of the inspection reports on this matter.

III. Exhibits

1. Missouri Department of Agriculture Inspection Report for FRM Chem, Inc. dated

12/21/2005

- 1a. Narrative from 2005 Inspection Report
- 1b. Notices of Inspection for FRM Chem signed by Karlan C. Kastendieck
- 1c. Receipts for samples collected from FRM Chem, Inc. in 2005
- 1d. Copy of label STERI-DINE DISINFECTANT
- 1e. Photo of STERI-DINE DISINFECTANT
- 1f. Copy of label for FRM CHLOR 1250
- 1g. Photo of FRM CHLOR 1250
- 1h. Second photo of FRM CHLOR 1250
- 1i. Statements of Karlan C. Kastendieck
2. Missouri Department of Agriculture Inspection Report for FRM Chem, Inc., Advanced Products Technology, Inc., Industrial Specialties, Inc., Custom Compounders, Inc., and Synisys, Inc., dated 10/08/2008
 - 2a. Narrative from 2008 Inspection Report
 - 2b. Notices of Inspection from 2008 Inspection
 - 2c. Statements of Keith Kastendieck dated October 8 and 15, 2008 (4 pages)
3. Cancellation Order for Section 3 Pesticide Product Registrations dated 7/19/1995
4. Statement from Jeff Bucholz, store manager, McFleeg, Inc., dated 6/04/2008
5. Bill of Lading dated 11/21/2005 recording shipment to McFleeg, Inc.
6. McFleeg, Inc., Inventory Control Report dated 6/2/2008
7. Affidavit of Jeff Bucholz
8. Bill of Lading dated 5/18/2005 recording shipment to Allen's Sales & Service

9. Statement from Allen Hibbert, owner, Allen's Sales & Service, dated 6/02/2008
10. Invoice No. 35332 – sale to Funk Sales & Service 1/3/2006
11. Invoice No. 35417 – sale to Funk Sales & Service dated 6/19/2006
12. Invoice No. 35438 – sale to Funk Sales & Service dated 7/26/2006
13. Invoice No. 35504 – sale to Funk Sales & Service dated 12/12/2006
14. Invoice No. 35335 – sale to Dairy Concepts dated 1/09/2006
15. Invoice No. 35355 – sale to Dairy Concepts dated 2/14/2006
16. Invoice No. 35432 – sale to Dairy Concepts dated 7/10/2006
17. Invoice No. 35459 – sale to Dairy Concepts dated 9/15/2006
18. Invoice No. 35505 – sale to Dairy Concepts dated 12/13/2006
19. Affidavit of Leonard Weiss
- 19a. Statement of Leonard Weiss, dated 5/27/2008
- 19b. Bill of Lading dated 12/27/2002 recording shipment to LW Chemical
- 19c. Invoice No. 34953 – sale to LW Chemical, dated 8/03/2004
- 19d. Invoice No. 35006 – sale to LW Chemical, dated 10/04/2004
- 19e. Invoice No. 35024 – sale to LW Chemical, dated 10/28/2004
- 19f. Invoice No. 35082 – sale to LW Chemical, dated 1/04/2005
- 19g. Invoice No. 35267 – sale to LW Chemical, dated 10/04/2005
- 19h. Invoice No. 35282 – sale to LW Chemical, dated 10/25/2005
- 19i. Invoice No. 35385 – sale to LW Chemical, dated 4/04/2006

- 19j. Invoice No. 35469 – sale to LW Chemical, dated 10/03/2006
- 19k. Invoice No. 35483 – sale to LW Chemical, dated 10/30/2006
20. Statement from Harry Baumann, owner of Preston Dairy Supply, dated 5/29/2008
21. Bill of Lading dated 3/30/2005 recording shipment to Preston Dairy Supply
22. Bill of Lading dated 7/05/2005 recording shipment to Preston Dairy Supply
23. Statement from Victor Turner, Plant Manager, Equity Group
24. Affidavit of Victor Turner
25. Invoice No. 35336 – sale to Charles Rademacher, dated 1/11/2006
26. Invoice No. 35354 – sale to Riegel Farms, dated 2/13/2006
27. Invoice No. 35373 – sale to Riegel Farms, dated 3/10/2006
28. Invoice No. 35384 – sale to Riegel Farms, dated 4/04/2006
29. Invoice No. 35414 – sale to Riegel Farms, dated 6/02/2006
30. Invoice No. 35424 – sale to Riegel Farms, dated 6/23/2006
31. Invoice No. 35443 – sale to Riegel Farms, dated 7/31/2006
32. Invoice No. 35456 – sale to Riegel Farms, dated 9/14/2006
33. Invoice No. 35475 – sale to Riegel Farms, dated 10/09/2006
34. Invoice No. 35490 – sale to Riegel Farms, dated 11/22/2006
35. Statement from Victor Turner, Plant Manager, Equity Group
36. Statement from Billy Palmer, Sanitation Manager, Equity Group
37. Invoice No. 35361 – sale to Weir Farm Supply, dated 2/22/2006
38. Invoice No. 35393 – sale to Weir Farm Supply, dated 4/25/2006

39. Invoice No. 35464 – sale to Weir Farm Supply, dated 9/22/2006
 40. Invoice No. 35501 – sale to Weir Farm Supply, dated 12/11/2006
 41. Stop Sale, Use, or Removal Order dated 10/03/2008
 42. Affidavit of Nick Graber
 43. Invoice No. 35762 – sale to Graber Equipment, dated 10/13/2008
 44. Invoice No. 35782 – sale to Graber Equipment, dated 11/26/2008
- Exhibits 45-51 pertain to the counts in the Matter of Synisys, Inc.,
FIFRA-07-2009-0041
45. EPA Questionnaire returned from McFleeg, Inc., dated 7/15/2009
 46. Invoice No. 35522 – sale to McFleeg, Inc., dated 1/08/2007
 47. Invoice No. 35567 – sale to McFleeg, Inc., dated 3/28/2007
 48. Invoice No. 35684 – sale to McFleeg, Inc., dated 1/21/2008
 49. Invoice No. 35813 – sale to McFleeg, Inc., dated 2/16/2009
 50. Invoice No. 35539 – sale to Graber Equipment, dated 2/06/2007
 51. Invoice No. 35690 – sale to Graber Equipment, dated 2/13/2007
 52. FRM.CHLOR 1250 5-gallon container label photograph
 53. FRM CHLOR 1250 5-gallon container label photograph
 54. FRM CHLOR 1250 1-gallon container label photograph
 55. Cir-Clean container photograph
 56. FRM-X Teat Dip container photograph
 57. Gain SVP container photograph

Exhibits 58-62 pertain to the counts in the Matter of Custom Compounds, Inc.,
FIFRA-07-2009-0042

- 58. Invoice No. 22129 – sale to Humane Society, dated 11/14/2007
- 59. Invoice No. 22329 – sale to Humane Society, dated 5/22/2008
- 60. Invoice No. 22342 – sale to Humane Society, dated 6/19/2008
- 61. Invoice No. 22361 – sale to Humane Society, dated 7/24/2008
- 62. Invoice No. 22395 – sale to Humane Society, dated 9/29/2008

Exhibits 63-66 pertain to the counts in the Matter of Advanced Products Technology, Inc.,
FIFRA-07-2008-0036

- 63. Invoice No. 21965 – sale to LW Chemicals, Inc. dated 8/27/2007
- 64. Invoice No. 22011 – sale to LW Chemicals, Inc. dated 9/28/2007
- 65. Invoice No. 22015 – sale to LW Chemicals, Inc. dated 10/03/2007
- 66. Invoice No. 22119 – sale to LW Chemicals, Inc. dated 12/19/2007

IV. Penalty Calculation Memoranda

Penalty calculation narratives for the four Respondents prepared by Mark Leshner, EPA Case Review Officer, are attached to this prehearing exchange.

V. Paperwork Reduction Act

After review, Complainant has ascertained that the Paperwork Reduction Act of 1990 (PRA), 44 U.S.C. §§ 3501 *et seq.*, does not apply to this proceeding, that there is not a current Office of Management and Budget control number involved herein, and the provisions of Section 3512 of the PRA are not applicable to this case.

VI. Other Matters

In establishing its case, Complainant requests the right to call all witnesses called by Respondent and to use all documentary evidence submitted by Respondent.

Complainant requests that, after reasonable notice and opportunity for review, the Presiding Officer admit into evidence any additional testimonial or documentary evidence that is relevant or material to the case.

Respectfully submitted,

U.S. ENVIRONMENTAL PROTECTION AGENCY

ATTORNEY FOR COMPLAINANT

CERTIFICATE OF SERVICE

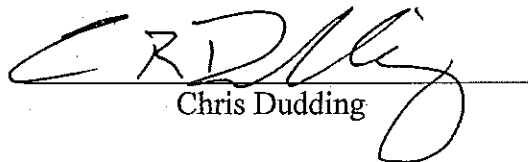

I certify that on January 15, 2010 I hand delivered the original and one copy of Complainant's Prehearing Exchange to the Regional Hearing Clerk, EPA Region 7, 901 N. 5th Street, Kansas City, Kansas 66101.

I further certify that on the date noted below I sent a copy of Complainant's Prehearing Exchange, via certified mail, return receipt requested, to:

Ronald Jenkins
Jenkins & Kling, P.C.
10 South Brentwood Boulevard
Suite 200
St. Louis, MO 63105

and a copy via Federal Express to:

Honorable Barbara A. Gunning
Office of Administrative Law Judges
1099 14th Street, NW
Suite 350
Washington, DC 20005

SUBJECT: Penalty Calculation for FRM Chem, Inc.
Docket No. FIFRA-07-2008-0035

FROM: Mark K. Lesher
Case Review Officer
Pesticides Branch

TO: Chris R. Dudding
Attorney, Office of Regional Counsel

The following information supports the appropriateness of the U.S. Environmental Protection Agency, Region 7's assessment of a civil penalty in regard to the subject administrative action. The proposed penalty was calculated based on the facts of the case, on the size of FRM Chem, Inc's (FRM's) business, the effect on FRM's ability to continue in business and the gravity of the violation, and pursuant to the July 2, 1990, Enforcement Response Policy for the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA).

Section 14(a)(1) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) provides for the assessment of a civil penalty of not more than \$5,000 for each violation against any commercial applicator who violates any provisions of said Act. The Civil Monetary Penalties Inflation Adjustment Rule, 40 C.F.R. Part 19, increased the maximum civil monetary penalties under FIFRA to \$6,500 for all violations which take place after March 15, 2004 through January 12, 2009. In determining the amount of the civil penalty, Section 14(a)(4) of FIFRA requires the Agency to consider the appropriateness of such penalty to the size of the business of the person charged, the effect on the person's ability to continue in business, and the gravity of the violation.

The Enforcement Response Policy (ERP) is designed to provide fair and equitable treatment of the regulated community by ensuring that similar enforcement responses and comparable penalty assessments will be made for comparable violations. Furthermore, the policy aims to serve as a deterrent from future violations of FIFRA. The ERP states that a civil penalty is the preferred enforcement remedy for most violations. A civil penalty is appropriate where the violation (1) presents an actual or potential risk of harm to humans or the environment; (2) was apparently committed as a result of ordinary negligence (as opposed to criminal negligence), inadvertence, or mistake; and the violation involves a violation under the Act by any registrant, commercial applicator, "for hire" applicator, wholesaler, dealer, retailer, or other distributor (no prior warning is required by FIFRA for violators in this category).

The ERP states that the determination of the penalty amount is made according to a five stage process in consideration of the FIFRA Section 14(a)(4) criteria. These steps are (1) determination of the gravity or "level" of the violation using Appendix A of the ERP; (2) determination of the size of business category for the violator, found in Table 2 of the ERP; (3) use of the FIFRA civil penalty matrices found in Table 1 of the ERP to determine the dollar

amount associated with the gravity level of violation and the size of business category of the violator; (4) further gravity adjustments of the base penalty in consideration of the specific characteristics of the pesticide involve, the actual or potential harm to human health and/or the environment, the compliance history of the violator, and the culpability of the violator, using the "Gravity Adjustment Criteria" found in Appendix B, and (5) consideration of the effect that payment of the total civil penalty will have on the violator's ability to continue in business.

Respondent Information

FRM (Respondent) is a Missouri corporation incorporated on October 28, 1968, and administratively dissolved by the state of Missouri as of July 1, 2008. According to our review of Respondent's publicly available financial information, Respondent's present annual sales are unknown. Therefore, in accordance with the ERP, the Respondent's size of business is determined to be unknown and was placed in Category I.¹

Summary of Alleged Violations

Respondent violated Section 12(a)(1)(A) of FIFRA, 7 U.S.C. § 136(a)(1)(A), by holding for sale or distribution or actual sale or distribution of a unregistered pesticide. Two counts for holding for sale or distribution of an unregistered pesticide were documented in December of 2005, and fifty-four counts for sales or distribution of an unregistered pesticide were documented on sales to multiple customers on multiple occasions in the years 2004-2008. In addition, Respondent violated Section 12(a)(2)(I) of FIFRA, 7 U.S.C. § 136(a)(2)(I), on two occasions, by selling or distributing a pesticide in violation of an order issued under Section 13 of FIFRA, 7 U.S.C. § 136k.

Penalty Calculations

Gravity Level: The gravity of the violation and the size of the business are considered in the FIFRA Civil Penalty Matrices shown in Table 1. Each cell of the matrix represents the Agency's assessment of the appropriate civil penalty, within the statutory maximum, for each gravity level of a violation and for each size of business category.

Size of Business: In order to provide equitable penalties, the civil penalties generally decrease as the size of the business decreases, and vice versa. Size of business is determined from a company's gross revenues from all sources during the prior calendar year. If the revenue data for the previous year appears to be unrepresentative of the general performance of the business, an average of the gross revenues for the three previous years may be used. Further, the size of business and gross revenue figures are based on the entire corporation rather than a specific subsidiary or division of the company which is involved with the violation. According to our review of Respondent's publicly available financial information, Respondent's annual sales were unknown. Therefore, in accordance with the ERP, the Respondent's size of business

¹ From ERP: "When information concerning an alleged violator's size of business is not readily available, the penalty is to be calculated using the Category I size of business. The Category I size of business will remain the base penalty value unless the violator can establish, at their expense and to the Agency's satisfaction, that it should be considered in a smaller size of business category."

is determined to be unknown and was placed in Category I.

Determination of Dollar Amount Associated with Gravity Level and Size of Business:

Ability to Continue in Business/Ability to Pay: Section 14(a)(4) of FIFRA requires the Agency to consider the effect of the penalty on Respondent's ability to continue in business when determining the amount of the civil penalty. EPA will generally not collect a total civil penalty which exceeds a violator's ability to pay. The Enforcement Response Policy (ERP) states that it can be assumed that the respondent has the ability to pay at the time the complaint is issued if information concerning the alleged violator's ability to pay is not readily available. The Respondent has been notified in the civil complaint of its right under the statute to have its ability to continue in business considered in the issue of ability to pay/ability to continue in business in his answer to the civil complaint, or during the course of settlement negotiations. Respondent's violation was not identified as the result of Respondent seeking compliance assistance.

Summary of Proposed Penalties

Statutory Violation - Section 12(a)(1)(A) & Section 12(a)(2)(I) - It shall be unlawful for any person to violate any of the provisions of section 12 of FIFRA. A penalty calculation was done for fifty-six counts of the Section 12(a)(1)(A) violation for sales or holding for sale on multiple occasions of two different unregistered pesticide products and for two counts of Section 12(a)(2)(I) violation of a Stop Sale, Use or Removal Order.

Level of Violation - Level 2 – (Counts 1-56), Level 1 – (Counts 57-58)

Violator Category - Section 14(a)(1) - Respondent is a producer of pesticides.

Size of Business- Category I (unknown)

Base Penalty - \$6,500 (based on above criteria, the Civil Penalty Matrix and the Civil Monetary Inflation Adjustment Rule)

Gravity Adjustments

Pesticide Toxicity - Value is 2. The pesticide contains the active ingredient iodine which puts the pesticide into the Toxicity Category I and should bear the signal word "Danger".

Harm to Human Health - Value is 3. There is a potential for harm to human health. Active ingredient can cause skin, eye, and respiratory damage, and it is corrosive.

Environmental Harm - Value is 3. There is a potential for harm to the environment. The active ingredient is toxic to fish.

Violative History - Value is 2. FRM Chem, Inc. has one prior violation of FIFRA.

Culpability - Value is 2. Violation resulting from negligence.

No other gravity adjustments are appropriate.

The base penalty for the administrative Complaint is \$6,500 and the total gravity points add up to 12. Following the Gravity Adjustment Criteria, a value of 12 results in the issuance of the base penalty, with no adjustments. Since no gravity adjustments are appropriate, Respondent was assessed a proposed penalty of \$377,000 for the Administrative Civil Complaint.

January 15, 2010

SUBJECT: Penalty Calculation for Advanced Products Technology, Inc.
Docket No. FIFRA-07-2008-0036

FROM: Mark K. Leshner
Case Review Officer
Pesticides Branch

TO: Chris R. Dudding
Attorney, Office of Regional Counsel

The following information supports the appropriateness of the U.S. Environmental Protection Agency, Region 7's assessment of a civil penalty in regard to the subject administrative action. The proposed penalty was calculated based on the facts of the case, on the size of Advanced Products Technology's (APT's) business, the effect on APT's ability to continue in business and the gravity of the violation, and pursuant to the July 2, 1990, Enforcement Response Policy for the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA).

Section 14(a)(1) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) provides for the assessment of a civil penalty of not more than \$5,000 for each violation against any commercial applicator who violates any provisions of said Act. The Civil Monetary Penalties Inflation Adjustment Rule, 40 C.F.R. Part 19, increased the maximum civil monetary penalties under FIFRA to \$6,500 for all violations which take place after March 15, 2004 through January 12, 2009. In determining the amount of the civil penalty, Section 14(a)(4) of FIFRA requires the Agency to consider the appropriateness of such penalty to the size of the business of the person charged, the effect on the person's ability to continue in business, and the gravity of the violation.

The Enforcement Response Policy (ERP) is designed to provide fair and equitable treatment of the regulated community by ensuring that similar enforcement responses and comparable penalty assessments will be made for comparable violations. Furthermore, the policy aims to serve as a deterrent from future violations of FIFRA. The ERP states that a civil penalty is the preferred enforcement remedy for most violations. A civil penalty is appropriate where the violation (1) presents an actual or potential risk of harm to humans or the environment; (2) was apparently committed as a result of ordinary negligence (as opposed to criminal negligence), inadvertence, or mistake; and the violation involves a violation under the Act by any registrant, commercial applicator, "for hire" applicator, wholesaler, dealer, retailer, or other distributor (no prior warning is required by FIFRA for violators in this category).

The ERP states that the determination of the penalty amount is made according to a five stage process in consideration of the FIFRA Section 14(a)(4) criteria. These steps are (1) determination of the gravity or "level" of the violation using Appendix A of the ERP; (2) determination of the size of business category for the violator, found in Table 2 of the ERP; (3)

use of the FIFRA civil penalty matrices found in Table 1 of the ERP to determine the dollar amount associated with the gravity level of violation and the size of business category of the violator; (4) further gravity adjustments of the base penalty in consideration of the specific characteristics of the pesticide involve, the actual or potential harm to human health and/or the environment, the compliance history of the violator, and the culpability of the violator, using the "Gravity Adjustment Criteria" found in Appendix B, and (5) consideration of the effect that payment of the total civil penalty will have on the violator's ability to continue in business.

Respondent Information

APT (Respondent) is a Missouri corporation incorporated on December 29, 2003, and is active and in good standing. According to our review of Respondent's publicly available financial information, Respondent's annual sales were unknown. Therefore, in accordance with the ERP, the Respondent's size of business is determined to be unknown and was placed in Category I.¹

Summary of Alleged Violations

Respondent violated Section 12(a)(1)(A) of FIFRA, 7 U.S.C. § 136(a)(1)(A), by distribution or sales of a unregistered pesticide. Four counts were documented on sales to a customer on four different occasions in August, September, October, and December 2007.

Penalty Calculations

Gravity Level: The gravity of the violation and the size of the business are considered in the FIFRA Civil Penalty Matrices shown in Table 1. Each cell of the matrix represents the Agency's assessment of the appropriate civil penalty, within the statutory maximum, for each gravity level of a violation and for each size of business category.

Size of Business: In order to provide equitable penalties, the civil penalties generally decrease as the size of the business decreases, and vice versa. Size of business is determined from a company's gross revenues from all sources during the prior calendar year. If the revenue data for the previous year appears to be unrepresentative of the general performance of the business, an average of the gross revenues for the three previous years may be used. Further, the size of business and gross revenue figures are based on the entire corporation rather than a specific subsidiary or division of the company which is involved with the violation. According to our review of Respondent's publicly available financial information, Respondent's annual sales were unknown. Therefore, in accordance with the ERP, the Respondent's size of business is determined to be unknown and was placed in Category I.

Determination of Dollar Amount Associated with Gravity Level and Size of Business:

¹ From ERP: "When information concerning an alleged violator's size of business is not readily available, the penalty is to be calculated using the Category I size of business. The Category I size of business will remain the base penalty value unless the violator can establish, at their expense and to the Agency's satisfaction, that it should be considered in a smaller size of business category."

Ability to Continue in Business/Ability to Pay: Section 14(a)(4) of FIFRA requires the Agency to consider the effect of the penalty on Respondent's ability to continue in business when determining the amount of the civil penalty. EPA will generally not collect a total civil penalty which exceeds a violator's ability to pay. The Enforcement Response Policy (ERP) states that it can be assumed that the respondent has the ability to pay at the time the complaint is issued if information concerning the alleged violator's ability to pay is not readily available. The Respondent has been notified in the civil complaint of its right under the statute to have its ability to continue in business considered in the issue of ability to pay/ability to continue in business in his answer to the civil complaint, or during the course of settlement negotiations. Respondent's violation was not identified as the result of Respondent seeking compliance assistance.

Summary of Proposed Penalties

Statutory Violation - Section 12(a)(1)(A) - It shall be unlawful for any person to violate any of the provisions of section 12 of FIFRA. A penalty calculation was done for four counts of this violation for sales on four different dates of an unregistered pesticide product.

Level of Violation - Level 2

Violator Category - Section 14(a)(1) - Respondent is a producer of pesticides.

Size of Business- Category I (unknown)

Base Penalty - \$6,500 (based on above criteria, the Civil Penalty Matrix and the Civil Monetary Inflation Adjustment Rule)

Gravity Adjustments

Pesticide Toxicity - Value is 2. The pesticide contains the active ingredient iodine which puts the pesticide into the Toxicity Category I and should bear the signal word "Danger".

Harm to Human Health - Value is 3. There is a potential for harm to human health. Active ingredient can cause skin, eye, and respiratory damage, and it is corrosive.

Environmental Harm - Value is 3. There is a potential for harm to the environment. The active ingredient is toxic to fish.

Violative History - Value is 0. Respondent had no prior violations.² (Prior violations are assessed a point value).

Culpability - Value is 2. Violation resulting from negligence.

² Note, in assessing the violative history for Advanced Products Technology, Inc., EPA Region 7 did not attribute to the company prior violations by FRM Chem., Inc., a corporation owned/operated by the same principals, from the same physical place of business, and selling some of the same products, including the product at issue in this matter.

No other gravity adjustments are appropriate.

The base penalty for the administrative Complaint is \$6,500 and the total gravity points add up to 10. Following the Gravity Adjustment Criteria, a value of 10 results in the issuance of the base penalty, with no adjustments. Since no gravity adjustments are appropriate, Respondent was assessed a proposed penalty of \$26,000 for the Administrative Civil Complaint.

TO: Chris R. Dudding
Attorney, Office of Regional Counsel

The following information supports the appropriateness of the U.S. Environmental Protection Agency, Region 7's assessment of a civil penalty in regard to the subject administrative action. The proposed penalty was calculated based on the facts of the case, on the size of Synisys's business, the effect on Synisys's ability to continue in business and the gravity of the violation, and pursuant to the July 2, 1990, Enforcement Response Policy for the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA).

Section 14(a)(1) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) provides for the assessment of a civil penalty of not more than \$5,000 for each violation against any commercial applicator who violates any provisions of said Act. The Civil Monetary Penalties Inflation Adjustment Rule, 40 C.F.R. Part 19, increased the maximum civil monetary penalties under FIFRA to \$6,500 for all violations which take place after March 15, 2004 through January 12, 2009. In determining the amount of the civil penalty, Section 14(a)(4) of FIFRA requires the Agency to consider the appropriateness of such penalty to the size of the business of the person charged, the effect on the person's ability to continue in business, and the gravity of the violation.

The Enforcement Response Policy (ERP) is designed to provide fair and equitable treatment of the regulated community by ensuring that similar enforcement responses and comparable penalty assessments will be made for comparable violations. Furthermore, the policy aims to serve as a deterrent from future violations of FIFRA. The ERP states that a civil penalty is the preferred enforcement remedy for most violations. A civil penalty is appropriate where the violation (1) presents an actual or potential risk of harm to humans or the environment; (2) was apparently committed as a result of ordinary negligence (as opposed to criminal negligence), inadvertence, or mistake; and the violation involves a violation under the Act by any registrant, commercial applicator, "for hire" applicator, wholesaler, dealer, retailer, or other distributor (no prior warning is required by FIFRA for violators in this category).

The ERP states that the determination of the penalty amount is made according to a five stage process in consideration of the FIFRA Section 14(a)(4) criteria. These steps are (1) determination of the gravity or "level" of the violation using Appendix A of the ERP; (2) determination of the size of business category for the violator, found in Table 2 of the ERP; (3) use of the FIFRA civil penalty matrices found in Table 1 of the ERP to determine the dollar

amount associated with the gravity level of violation and the size of business category of the violator; (4) further gravity adjustments of the base penalty in consideration of the specific characteristics of the pesticide involve, the actual or potential harm to human health and/or the environment, the compliance history of the violator, and the culpability of the violator, using the "Gravity Adjustment Criteria" found in Appendix B, and (5) consideration of the effect that payment of the total civil penalty will have on the violator's ability to continue in business.

Respondent Information

Synisys (Respondent) is a Missouri corporation incorporated on December 29, 2003, and is active and in good standing. According to our review of Respondent's publicly available financial information, Respondent's annual sales were unknown. Therefore, in accordance with the ERP, the Respondent's size of business is determined to be unknown and was placed in Category I.¹

Summary of Alleged Violations

Respondent violated Section 12(a)(1)(A) of FIFRA, 7 U.S.C. § 136(a)(1)(A), by distribution or sales of a unregistered pesticide. Seven counts were documented on sales to multiple customers on seven different occasions in 2007 and 2008.

Penalty Calculations

Gravity Level: The gravity of the violation and the size of the business are considered in the FIFRA Civil Penalty Matrices shown in Table 1. Each cell of the matrix represents the Agency's assessment of the appropriate civil penalty, within the statutory maximum, for each gravity level of a violation and for each size of business category.

Size of Business: In order to provide equitable penalties, the civil penalties generally decrease as the size of the business decreases, and vice versa. Size of business is determined from a company's gross revenues from all sources during the prior calendar year. If the revenue data for the previous year appears to be unrepresentative of the general performance of the business, an average of the gross revenues for the three previous years may be used. Further, the size of business and gross revenue figures are based on the entire corporation rather than a specific subsidiary or division of the company which is involved with the violation. According to our review of Respondent's publicly available financial information, Respondent's annual sales were unknown. Therefore, in accordance with the ERP, the Respondent's size of business is determined to be unknown and was placed in Category I.

Determination of Dollar Amount Associated with Gravity Level and Size of Business:

Ability to Continue in Business/Ability to Pay: Section 14(a)(4) of FIFRA requires the

¹ From ERP: "When information concerning an alleged violator's size of business is not readily available, the penalty is to be calculated using the Category I size of business. The Category I size of business will remain the base penalty value unless the violator can establish, at their expense and to the Agency's satisfaction, that it should be considered in a smaller size of business category."

Agency to consider the effect of the penalty on Respondent's ability to continue in business when determining the amount of the civil penalty. EPA will generally not collect a total civil penalty which exceeds a violator's ability to pay. The Enforcement Response Policy (ERP) states that it can be assumed that the respondent has the ability to pay at the time the complaint is issued if information concerning the alleged violator's ability to pay is not readily available. The Respondent has been notified in the civil complaint of its right under the statute to have its ability to continue in business considered in the issue of ability to pay/ability to continue in business in his answer to the civil complaint, or during the course of settlement negotiations. Respondent's violation was not identified as the result of Respondent seeking compliance assistance.

Summary of Proposed Penalties

Statutory Violation - Section 12(a)(1)(A) - It shall be unlawful for any person to violate any of the provisions of section 12 of FIFRA. A penalty calculation was done for seven counts of this violation for sales on seven different occasions of an unregistered pesticide product.

Level of Violation - Level 2

Violator Category - Section 14(a)(1) - Respondent is a producer of pesticides.

Size of Business- Category I (unknown)

Base Penalty - \$6,500 (based on above criteria, the Civil Penalty Matrix and the Civil Monetary Inflation Adjustment Rule)

Gravity Adjustments

Pesticide Toxicity - Value is 2. The pesticide contains the active ingredient iodine which puts the pesticide into the Toxicity Category I and should bear the signal word "Danger".

Harm to Human Health - Value is 3. There is a potential for harm to human health. Active ingredient can cause skin, eye, and respiratory damage, and it is corrosive.

Environmental Harm - Value is 3. There is a potential for harm to the environment. The active ingredient is toxic to fish.

Violative History - Value is 0. Respondent had no prior violations.² (Prior violations are assessed a point value).

Culpability - Value is 2. Violation resulting from negligence.

No other gravity adjustments are appropriate.

² Note, in assessing the violative history for Synisys, Inc., EPA Region 7 did not attribute to the company prior violations by FRM Chem., Inc., a corporation owned/operated by the same principals, from the same physical place of business, and selling some of the same products, including the product at issue in this matter.

The base penalty for the administrative Complaint is \$6,500 and the total gravity points add up to 10. Following the Gravity Adjustment Criteria, a value of 10 results in the issuance of the base penalty, with no adjustments. Since no gravity adjustments are appropriate, Respondent was assessed a proposed penalty of \$45,500 for the Administrative Civil Complaint.

January 15, 2010

SUBJECT: Penalty Calculation for Custom Compounders, Inc.
Docket No. FIFRA-07-2009-0042

FROM: Mark K. Leshner
Case Review Officer
Pesticides Branch

TO: Chris R. Dudding
Attorney, Office of Regional Counsel

The following information supports the appropriateness of the U.S. Environmental Protection Agency, Region 7's assessment of a civil penalty in regard to the subject administrative action. The proposed penalty was calculated based on the facts of the case, on the size of Custom Compounders, Inc's (CCI's) business, the effect on CCI's ability to continue in business and the gravity of the violation, and pursuant to the July 2, 1990, Enforcement Response Policy for the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA).

Section 14(a)(1) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) provides for the assessment of a civil penalty of not more than \$5,000 for each violation against any commercial applicator who violates any provisions of said Act. The Civil Monetary Penalties Inflation Adjustment Rule, 40 C.F.R. Part 19, increased the maximum civil monetary penalties under FIFRA to \$6,500 for all violations which take place after March 15, 2004 through January 12, 2009. In determining the amount of the civil penalty, Section 14(a)(4) of FIFRA requires the Agency to consider the appropriateness of such penalty to the size of the business of the person charged, the effect on the person's ability to continue in business, and the gravity of the violation.

The Enforcement Response Policy (ERP) is designed to provide fair and equitable treatment of the regulated community by ensuring that similar enforcement responses and comparable penalty assessments will be made for comparable violations. Furthermore, the policy aims to serve as a deterrent from future violations of FIFRA. The ERP states that a civil penalty is the preferred enforcement remedy for most violations. A civil penalty is appropriate where the violation (1) presents an actual or potential risk of harm to humans or the environment; (2) was apparently committed as a result of ordinary negligence (as opposed to criminal negligence), inadvertence, or mistake; and the violation involves a violation under the Act by any registrant, commercial applicator, "for hire" applicator, wholesaler, dealer, retailer, or other distributor (no prior warning is required by FIFRA for violators in this category).

The ERP states that the determination of the penalty amount is made according to a five stage process in consideration of the FIFRA Section 14(a)(4) criteria. These steps are (1) determination of the gravity or "level" of the violation using Appendix A of the ERP; (2) determination of the size of business category for the violator, found in Table 2 of the ERP; (3) use of the FIFRA civil penalty matrices found in Table 1 of the ERP to determine the dollar

amount associated with the gravity level of violation and the size of business category of the violator; (4) further gravity adjustments of the base penalty in consideration of the specific characteristics of the pesticide involve, the actual or potential harm to human health and/or the environment, the compliance history of the violator, and the culpability of the violator, using the "Gravity Adjustment Criteria" found in Appendix B, and (5) consideration of the effect that payment of the total civil penalty will have on the violator's ability to continue in business.

Respondent Information

CCI (Respondent) is a Georgia corporation incorporated on November 5, 1986, and is active and in good standing. According to our review of Respondent's publicly available financial information, Respondent's annual sales were unknown. Therefore, in accordance with the ERP, the Respondent's size of business is determined to be unknown and was placed in Category I.¹

Summary of Alleged Violations

Respondent violated Section 12(a)(1)(A) of FIFRA, 7 U.S.C. § 136(a)(1)(A), by distribution or sales of a unregistered pesticide. Five counts were documented on distribution to a customer on five different occasions in November 2007 and May, June, July, and September 2008.

Penalty Calculations

Gravity Level: The gravity of the violation and the size of the business are considered in the FIFRA Civil Penalty Matrices shown in Table 1. Each cell of the matrix represents the Agency's assessment of the appropriate civil penalty, within the statutory maximum, for each gravity level of a violation and for each size of business category.

Size of Business: In order to provide equitable penalties, the civil penalties generally decrease as the size of the business decreases, and vice versa. Size of business is determined from a company's gross revenues from all sources during the prior calendar year. If the revenue data for the previous year appears to be unrepresentative of the general performance of the business, an average of the gross revenues for the three previous years may be used. Further, the size of business and gross revenue figures are based on the entire corporation rather than a specific subsidiary or division of the company which is involved with the violation. According to our review of Respondent's publicly available financial information, Respondent's annual sales were unknown. Therefore, in accordance with the ERP, the Respondent's size of business is determined to be unknown and was placed in Category I.

Determination of Dollar Amount Associated with Gravity Level and Size of Business:

¹ From ERP: "When information concerning an alleged violator's size of business is not readily available, the penalty is to be calculated using the Category I size of business. The Category I size of business will remain the base penalty value unless the violator can establish, at their expense and to the Agency's satisfaction, that it should be considered in a smaller size of business category."

Ability to Continue in Business/Ability to Pay: Section 14(a)(4) of FIFRA requires the Agency to consider the effect of the penalty on Respondent's ability to continue in business when determining the amount of the civil penalty. EPA will generally not collect a total civil penalty which exceeds a violator's ability to pay. The Enforcement Response Policy (ERP) states that it can be assumed that the respondent has the ability to pay at the time the complaint is issued if information concerning the alleged violator's ability to pay is not readily available. The Respondent has been notified in the civil complaint of its right under the statute to have its ability to continue in business considered in the issue of ability to pay/ability to continue in business in his answer to the civil complaint, or during the course of settlement negotiations. Respondent's violation was not identified as the result of Respondent seeking compliance assistance.

Summary of Proposed Penalties

Statutory Violation - Section 12(a)(1)(A) - It shall be unlawful for any person to violate any of the provisions of section 12 of FIFRA. A penalty calculation was done for five counts of this violation for sales on five different dates of an unregistered pesticide product.

Level of Violation - Level 2

Violator Category - Section 14(a)(1) - Respondent is a producer of pesticides.

Size of Business- Category I (unknown)

Base Penalty - \$6,500 (based on above criteria, the Civil Penalty Matrix and the Civil Monetary Inflation Adjustment Rule)

Gravity Adjustments

Pesticide Toxicity - Value is 2. The pesticide contains the active ingredient iodine which puts the pesticide into the Toxicity Category I and should bear the signal word "Danger".

Harm to Human Health - Value is 3. There is a potential for harm to human health. Active ingredient can cause skin, eye, and respiratory damage, and it is corrosive.

Environmental Harm - Value is 3. There is a potential for harm to the environment. The active ingredient is toxic to fish.

Violative History - Value is 0. Respondent had no prior violations.² (Prior violations are assessed a point value).

Culpability - Value is 2. Violation resulting from negligence.

² Note, in assessing the violative history for Custom Compounders, Inc., EPA Region 7 did not attribute to the company prior violations by FRM Chem., Inc., a corporation owned/operated by the same principals, from the same physical place of business, and selling some of the same products, including the product at issue in this matter.

No other gravity adjustments are appropriate.

The base penalty for the administrative Complaint is \$6,500 and the total gravity points add up to 10. Following the Gravity Adjustment Criteria, a value of 10 results in the issuance of the base penalty, with no adjustments. Since no gravity adjustments are appropriate, Respondent was assessed a proposed penalty of \$32,500 for the Administrative Civil Complaint.

STATEMENT

I, Keith Kastendieck under affirmation say:

Raymond Kastendieck is still the owner of the businesses located at 60 + 50 Hillside Drive Union, MO. I am part owner and the person responsible for the information collected this day. FRM CHEM has had no production in two years and the company ceased operation on Dec 31, 2006. APT Inc, Industrial Specialties Inc, Custom Compounds Inc and Synisys all operate from this location. These businesses all operate out of this building. APT sells speciality cleaners, Industrial Specialties sells industrial chemicals, supplies and equipment to industrial companies. Custom Compounds (CCI) sells ultrasonic cleaners and Synisys has some speciality chemicals and cleaners. CCI has a supplemental agreement with STEPAN. SYNISYS is a contract manufacturer for this product. We have 6 x 1 gal Brite Son 75 in stock. We no longer produce the STEP-DINE Disinfectant or the FRM CHLOR 1250. I do not have the Supplemental Registration Agreement from Entreecon but have provided related EPA documents for it's production. We never received anything about any cancellation from Entreecon.

I hereby affirm that the above is true to the best of my knowledge.

STATEMENT

I, Keith Kasterdieck under affirmation say:

We do not have any inventory for STERI-DINE or FRM CHLOR 1250. I have provided available production and shipping records for these. The products were produced until we ran out of the Tech/Basic used to produce them. We no longer have any of the Basic on site to make these. There is no production or distribution of these products. We last produced STERI-DINE April 06 and we last produced FRM CHLOR 1250 Dec 06. We are not presently producing, labeling, selling or distributing these products. FRM CHEM produced the Britesun products until the end of 06 through a supplemental agreement with STEPPAN. We do not have any legal counsel at this time.

I hereby affirm that the above is true to the best of my knowledge.

STATEMENT

I, Keith Kastendiek, under affirmation say:

Today I have provided all available shipping documents for STERI-DONE and FRM CHLOR 1250. I spoke to Intrac Chemical this last week who said they didn't know of any supplemental agreement with us. We did not get any cancellation from Intrac for these products. We do not have any labels left for these products. The STEPPAN basis we have on site is the only one used to manufacture the Bride Ser 75. The corporate office or parent for CCI is located PO Box 2094 Woodstock, GA 30188 and Synisis is located here and is an independent company. The Bride Ser 75 sampled was taken from inventory packaged, labeled and released for shipment.

I hereby affirm that the above is true to the best of my knowledge.

Subject: BTC @ 1010
EPA Registration No. 1839-152
Amendment dated: May 13, 2003
EPA Received date: May 13, 2003

Dear: Mr. Thomas W. Isaac,

The following amendment submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, is acceptable with the following conditions.

Proposed Amendment

- Update the First Aid Statement consistent with PR Notice 2001-1
- Update precautionary Statements consistent with the Label Review Manual
- Addition of expanded, specific environmental surfaces: stainless steel, metal and plastic surfaces
- Addition of Environmental Hazards Statement
- Addition of TERMINAL STERILANT STATEMENT consistent with PR Notice 94-4 and optional line statement
- Replace "mechanical sprayer" mode of delivery with "hand pump trigger sprayer" and "low pressure coarse spray".
- Addition of directions for disinfection of food service establishment or restaurant food contact surfaces and disinfection of food-processing premises.
- Expanded Fungicidal Activity section with specific environmental surfaces.
- Change the trade name to BTC @1010 7.5% Solution

Conditions

• Revise the label as follows:

1. Qualify the phrase hard surfaces as hard *non-porous* surfaces which appears in the second paragraph and Disinfection directions on page two.
2. Add the following statement to the **To disinfect food service establishment or restaurant food contact surfaces**

Do not use on glasses, dishes and utensils

3. Revise the Disinfection of Poultry Equipment, Animal Quarters and Kennels per DIS/TSS 19

For disinfection of pre-cleaned poultry equipment (Brooders, watering founts, and feeding equipment) and other animal quarters (such as stalls and kennel areas) apply a solution of 2 ounces of this product per 4 gallons of water with a mop cloth or brush. Remove all poultry and feeds from premises, trucks, coops, and crates. Remove all litter and droppings from floors, walls and surfaces of facilities occupied or traversed by poultry. Empty all troughs, racks and other feeding and watering appliances. Thoroughly clean all surfaces with soap or detergent and rinse with water. Saturate surfaces with the recommended disinfecting solution for a period of 10 minutes. Ventilate buildings, coops, and other closed spaces. Do not house poultry or employ equipment until treatment has been absorbed, set or dried. Thoroughly scrub treated feed racks, troughs, automatic feeders, fountains, and waterers with soap or detergent, and rinse with potable water before reuse.

4. Add the following statement to the FUNGICIDAL ACTIVITY directions for use

Follow disinfection directions

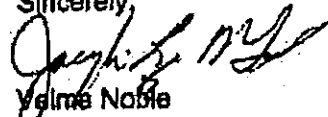

5. On page 2 of the proposed label Sanitization directions modify the last paragraph as follows:

Udders, flanks, and Teats of Dairy Cows: sanitize by washing with a solution of 1 ounce of this product per 4 gallons of warm water.....

General Comments

A stamped label is enclosed for your records. Please submit three copies (3) copies of your final printed label before distributing or selling the product bearing the revised labeling. If the above condition is not complied with, the registration will be subject to cancellation in accordance with FIFRA section (e). Your release for shipment of the product bearing the amended labeling constitutes acceptance of the condition. Should you have any questions concerning this letter please contact me at (703) 308-6233.

Sincerely,

Valma Noble
Product Manager (31)

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

BTC® 1010 7.5% Solution is designed specifically for hospitals, nursing homes, and other health care institutions, schools, food processing plants, dairies, restaurants, bars, animal quarters, poultry equipment, kennels and institutions where disinfection, sanitization and deodorization is of prime importance.

NON-POROUS

When used as directed, this product is formulated to disinfect pre-cleaned inanimate, hard surfaces: walls, floors, sink tops, tables, countertops, bathing areas, lavatories, bed frames, chairs, garbage pails, stainless steel surfaces, plastic surfaces, metal surfaces and telephones.

This product deodorizes those areas which generally are hard to keep fresh smelling, such as garbage storage areas, empty garbage bins and cans, pet areas, and other areas which are prone to odors caused by microorganisms.

In addition, this product will sanitize previously cleaned and rinsed non-porous food contact surfaces such as food processing equipment, dairy equipment, food utensils, dishes, silverware, glasses, sink tops, countertops, and refrigerated storage and display equipment. This product can also be used to sanitize the udders, flanks, and teats of dairy cows.

(For labels that list medical premises and metal and/or stainless steel surfaces, one of the following statements must be used.)

This product is not to be used as a terminal sterilant/high-level disinfectant on any surface or instrument that (1) is introduced directly into the human body either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body.

OR

This product is not for use on medical device surfaces.

NON-POROUS

DISINFECTION - To disinfect pre-cleaned, inanimate, hard surfaces, apply this product with a cloth, mop, hand pump trigger sprayer or low pressure coarse spray device so as to wet all surfaces thoroughly. Allow treated surfaces to remain wet for 10 minutes. Prepare a fresh solution for each use or when the use solution becomes visibly dirty.

GENERAL DISINFECTION - Add 2 ounces of this product per 4 gallons of water for effective disinfection against *Staphylococcus aureus* and *Salmonella choleraesuis*.

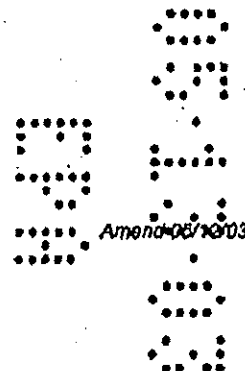

HOSPITAL DISINFECTION - Add 3.5 ounces of this product per 4 gallons of water for effective disinfection against *Pseudomonas aeruginosa*.

To disinfect food service establishment or restaurant food contact surfaces: countertops, outside of appliances and tables, add 3.5 ounces of this product per 4 gallons (0.88 ounce per gallon) of water. For heavily soiled areas, a pre-cleaning step is required. Apply solution with a cloth, sponge, or hand pump trigger sprayer so as to wet all surfaces thoroughly. Allow the surface to remain wet for 10 minutes, then remove excess liquid and rinse the surface with potable water. For sprayer application use a coarse spray. Before using this product, food products and packaging materials must be removed from the area or carefully protected.

To disinfect food-processing premises: floors, walls and storage areas, add 3 ounces to 4.5 gallons of water (0.88 ounce per gallon). For heavily soiled areas, a pre-cleaning step is required. Apply solution with a mop, cloth, sponge or hand pump trigger sprayer so as to wet all surfaces thoroughly. For sprayer application use a coarse spray. Allow to remain wet for 10 minutes, then remove excess liquid. Before using this product, food products and packaging materials must be removed from area or carefully protected. After use, all surfaces must be thoroughly rinsed with potable water.

EPA Reg. No. 1839-152

(left panel-1)

6/7

DISINFECTION OF POULTRY EQUIPMENT, ANIMAL QUARTERS AND KENNELS - For disinfection of pre-cleaned poultry equipment (brooders, watering fountains, and feeding equipment) and other animal quarters (such as stalls and kennel areas) apply a solution of 2 ounces of this product per 4 gallons of water with a mop, cloth or brush. Small utensils should be immersed in this solution. Prior to disinfection, all poultry, other animals and their feeds must be removed from the premises. This includes emptying all troughs, racks, and other feeding and watering appliances. Remove all litter and droppings from floors, walls, and other surfaces occupied or traversed by poultry or other animals. After disinfection, ventilate building, coops, and other closed spaces. Do not house poultry or other animals nor employ equipment until treatment has been absorbed, set or dried.

ALL TREATED EQUIPMENT THAT WILL CONTACT FEED OR DRINKING WATER MUST BE RINSED WITH POTABLE WATER BEFORE USE.

FUNGICIDAL ACTIVITY - At 2 ounces per gallon of water, this product is fungicidal against the pathogenic fungi, *Trichophyton mentagrophytes* (Athlete's Foot Fungus), when used as directed on hard surfaces found in bathrooms, shower stalls, locker rooms, exercise facilities or other clean, non-porous, hard surfaces commonly contacted by bare feet.

SANITIZATION - Recommended for use in restaurants, dairies, food processing plants, and bars. When used as directed, this product is an effective sanitizer against *Escherichia coli* and *Staphylococcus aureus*.

Remove all gross food particles and soil from areas which are to be sanitized with a good detergent, pre-flush, pre-soak or pre-scrape treatment. Rinse with a potable water rinse. To sanitize pre-cleaned and potable water-rinsed, non-porous, food contact surfaces, prepare a 150 ppm active quaternary solution by adding 1 ounce of this product per 4 gallons of water. Surfaces should remain wet for at least 1 minute followed by adequate draining and air drying. Fresh solution should be prepared daily or when the solution becomes visibly dirty. For mechanical application, use solution may not be reused for sanitizing applications.

To sanitize immobile items such as tanks, chopping blocks, counter tops, sink tops, refrigerated storage and display equipment, flood the area with a 150 ppm active quaternary solution for at least 60 seconds making sure to wet all surfaces completely, followed by adequate draining and air drying.

To sanitize mobile items such as drinking glasses, eating and cooking utensils, and other similarly sized food processing equipment, immerse in a 150 ppm active quaternary solution for at least 60 seconds, making sure to immerse completely, followed by removing from use dilution, adequate draining, and air drying.

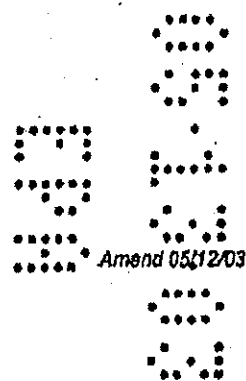

When used for sanitization of previously cleaned food equipment or food contact items, limit the active quaternary to 150 ppm. **NO POTABLE WATER RINSE IS REQUIRED.**

This product is an effective sanitizer when diluted in water up to 1000 ppm hardness (as $CaCO_3$).

The udders, flanks, and teats of dairy cows ~~can be~~ sanitized by washing with a solution of 1 ounce of this product per 4 gallons of warm water. No potable water rinse is required. Use a fresh towel for each cow. Avoid contamination of sanitizing solution by dirt and soil. Do not dip used towel back into sanitizing solution. When solution becomes visibly dirty, discard and provide a fresh solution.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS DANGER

KEEP OUT OF REACH OF CHILDREN. CORROSIVE. Causes irreversible eye damage and skin burns. May be fatal if absorbed through skin. Harmful if swallowed. Harmful if inhaled. Avoid breathing spray mist. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield, rubber gloves and protective clothing when handling. Wash thoroughly with soap and water after handling and before eating, drinking or using tobacco. Remove contaminated clothing and wash before reuse.

FIRST AID

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. If in Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call poison control center or doctor for treatment advice.

If on Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

If Swallowed: Call a poison control center or doctor immediately for treatment advice. Have a person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

If Inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

(OPTIONAL): You may contact XXX/XXX-XXX for emergency medical treatment information.

NOTE TO PHYSICIAN

Probable mucosal damage may contraindicate the use of gastric lavage.

(Note: If container size is 5 gallons or greater, the following Environmental Hazards statement must be used.)

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

STORAGE AND DISPOSAL

DO NOT CONTAMINATE WATER, FOOD, OR FEED BY STORAGE OR DISPOSAL.

PESTICIDE STORAGE - Store in a dry place no lower in temperature than 50°F or higher than 120°F.

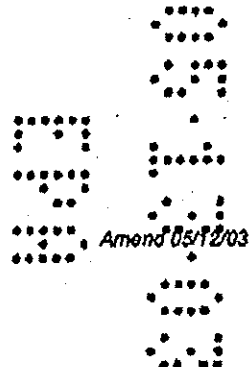

CONTAINER DISPOSAL - Do not reuse empty container. Triple rinse empty container with water. Return metal drum then offer for reconditioning or puncture and dispose of in a sanitary landfill, or by other procedures approved by State and local authorities. Plastic containers may be disposed of in a sanitary landfill, incinerated, or if allowed by local authorities, by burning. If burned stay out of smoke.

For containers 1 gallon or less: Do not reuse empty container. Rinse thoroughly before discarding in trash.

PESTICIDE DISPOSAL - Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. BRITE SAN 75 is designed specifically for hospitals, nursing homes, and other health care institutions, schools, food processing plants, dairies, restaurants, bars, and institutions where sanitation, disinfection and deodorization is of prime importance. When used as directed, BRITE SAN 75 is formulated to disinfect pre-cleaned inanimate hard non-porous surfaces: walls, floors, sink tops, tables, countertops, bathing areas, lavatories, bed frames, chairs, garbage pails, garbage pails, stainless steel surfaces, plastic surfaces, metal surfaces and telephones. BRITE SAN 75 deodorizes those areas which generally are hard to keep fresh smelling, such as garbage storage areas, empty garbage bins and cans, pet areas, and other areas prone to odors caused by microorganisms. In addition BRITE SAN 75 will sanitize previously cleaned and rinsed non-porous food contact surfaces such as food processing equipment, dairy equipment, food utensils, dishes, silverware, glasses, sink tops, countertops and refrigerated storage and display equipment.

BRITE SAN 75 is not for use on medical device surfaces.

DISINFECTANT - To disinfect pre-cleaned, inanimate, hard, non-porous surfaces, apply BRITE SAN 75 with a cloth, mop, hand pump, trigger sprayer or low pressure coarse spray device so as to wet all surfaces thoroughly. Allow treated surfaces to remain wet for 10 minutes. Prepare a fresh solution for each use or when use solution becomes visibly dirty.

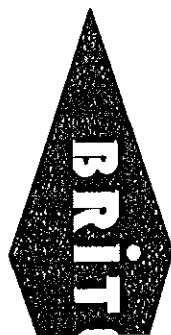

GENERAL DISINFECTANT - Add 2 ounces BRITE SAN 75 per 4 gallons of water for effective disinfection against *Staphylococcus aureus* and *Salmonella choleraesuis*.

HOSPITAL DISINFECTANT - Add 3.5 ounces BRITE SAN 75 per 4 gallons of water for effective disinfection against *Pseudomonas aeruginosa*.

FUNGICIDAL ACTIVITY - Follow DISINFECTANT directions. At the 2 ounces per gallon of water BRITE SAN 75 is fungicidal against the pathogenic fungi, *Trichophyton mentagrophytes* (Athlete's Foot Fungus) when used as directed on hard surfaces found in bathrooms, shower stalls, locker rooms, exercise facilities or other clean, hard, non-porous surfaces commonly contacted by bare feet.

SANITIZATION - Recommended for use in restaurants, dairies, food processing plants and bars. When used as directed BRITE SAN 75 is an effective sanitizer against *Escherichia coli* and *Staphylococcus aureus*. Remove all gross food particles and soil from areas which are to be sanitized with a good detergent, pre-rinse, pre-soak or pre-scrub treatment. Rinse with a potable water rinse. To sanitize pre-cleaned and potable water rinsed, non-porous, food contact surfaces, prepare a 150 ppm active quaternary solution by adding 1 ounce of BRITE SAN 75 per 4 gallons water. Surfaces should remain wet for at least 1 minute followed by adequate draining and air drying. Fresh solution should be prepared daily or when solution becomes visibly dirty. For mechanical application, used solution may not be reused for sanitizing applications. To sanitize immobile items such as tanks, chopping blocks, and counter tops, sink tops, refrigerated storage and display equipment, flood the area with a 150 ppm active quaternary solution for at least 60 seconds making sure to wet all surfaces completely, followed by adequate draining and air drying. To sanitize mobile items such as drinking glasses, eating and cooking utensils, and other similarly sized food processing equipment, immerse in a 150 ppm active quaternary solution for at least 60 seconds making sure to immerse completely, followed by removal from use dilution, adequate draining and air drying. When used for sanitization of previously cleaned food equipment or food contact items, limit the active quaternary to 150 ppm.

NO POTABLE WATER RINSE IS REQUIRED. BRITE SAN 75 is an effective sanitizer when diluted in water up to 1000 ppm hardness (as CaCO₃).

Registration changes

Dear Mr. Albers:

Subject: Transfer of Pesticide Registrations From
Company Number 10366 to 48211

Pursuant to your request in your letter of February 17, 1989 we have approved the transfer of the following registrations from Frm Chem Incorporated, company number 10366, to Intercon Chemical Company, company number 48211.

The effective date of these changes is January 31, 1990.

Registered Products	Common Chemical Name	Old EPA Reg. No.	New EPA Reg. No.
Frm Chem Frm-Chlor	Sodium dichloro-isocyanurate dihydrate	10366-6	48211-69
Steri-Dine Disinfectant	Nonylphenoxy-polyethoxyethanol		
	Phosphoric acid	10366-7	48211-70
Frm Chlor 1250	Sodium hypochlorite	10366-20001	48211-20001
Frm Chlor 525	Sodium hypochlorite	10366-20004	48211-20004

pgs

The effective date of issuance of the new EPA registration number is January 31, 1990. You should indicate the new company designation and new EPA Reg. No. on the labeling at the next printing. If you intend to use the labels which currently appear on the transferor's product after the effective date of the transfer, you must maintain complete and accurate records which identify by batch number, lot number or other suitable description the quantities of such product bearing the transferor's label. Each container or package bearing the transferor's label which is released after the effective date of product registration transfer, must be clearly and accurately marked with the batch number, lot number or other descriptive designation used to identify the product in your records.

You are required to contact your local EPA Regional Office to determine what effect this transfer of pesticide registrations has on the pesticide production establishment registration.

It will not be necessary to submit labeling for review if the only changes are in the company designation and the EPA Reg. No. Other changes in the product and/or labeling may require EPA review and approval prior to initiation. In any correspondence on these products always refer to the U.S. EPA Reg. No. listed above.

The transferred registration will have the same status under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, 7 USC 136 et seq., as they had prior to the approval of this transfer.

When registrations are transferred from one company to a second company, all restrictions, data requirements, conditions (suspensions), and deadlines existing on the registrations are transferred with the registrations. The new company is responsible for adhering to or complying with all such restrictions, etc. on the acquired products.

In regard to deadlines, the transferee company is responsible for submitting all required data according to the schedules already established for the acquired products. Failure to do so will result in the issuance of a Notice of Intent to Suspend. Requests from transferee companies for additional time to submit because they acquired the registration(s) after the 3(c)(2)(B) request was issued will not be granted. If a transferee company has other valid reasons for delays in the testing which were clearly outside

100808184401 Doc.
mfr
10/8/08

3/3 pgs

of their control, then such requests for time extensions will be considered in accordance with the established procedures. Transfers occurring while a 3(c)(2)(B) request is being issued or during the 90-day response time are subject to the same conditions expressed above.

Registration is in no way to be construed as an endorsement or approval of these products by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with FIFRA.

Furthermore, the transfer of the subject registrations is approved under the condition that the annual maintenance fee obligation has been fully satisfied. The marginal maintenance fee is determined based solely on the total number of active sec. 3 and sec. 24(c) registrations held by the transferor. If the annual maintenance fee has not been fully satisfied, the transferee and transferor will be notified to comply within a specified time period or the affected registrations may be cancelled.

By copy of this letter we are informing Frm Chem, Incorporated of these changes.

Sincerely,

Arthur Donner, Head
Administrative Processing Section
Registration Support Branch
Registration Division

NOTICE OF SUPPLEMENTAL REGISTRATION OF DISTRIBUTOR

(Please read instructions before completing)

INSTRUCTIONS

After a registrant has obtained final registration for the basic product, the registrant may then supplementally register and distribute his/her product. One form must be submitted for each distributor brand and must be signed by the distributor involved. The form must state the basic registration number and the distributor company number.

If a registrant has a potential distributor who does not have a company number assigned, she/he should have the distributor apply, on letterhead stationery, to the Registration Division to have a number assigned prior to submitting a Distributor Notification to the Agency.

Notification forms must be submitted by the basic registrant. They must have the concurrence and signature of both the registrant and the distributor.

When submitting several forms for the same basic product, submitting them together will facilitate processing.

NOTE: DO NOT submit distributor product labels.

CONDITIONS

1. The distributor product must have the same composition as the basic registered product.
2. The distributor brand product must be manufactured and packaged by the same person who manufactures and packages the registered basic product.
3. The labeling for the distributor product must bear the same claims as the basic product provided, however, that specific claims may be deleted if by doing so no other changes are necessary.
4. The product must remain in the manufacturer's unbroken container.
5. The label must bear the EPA registration number of the basic registered product, followed by a hyphen and the distributor's company number.
6. Distributor products must bear the name and address of the distributor qualified by such terms as "packed for . . ." "distributed by . . ."; or "sold by . . ." to show that the name is not that of the manufacturer.
7. All conditions of the basic registration apply equally to distributor brand products. It is the responsibility of the basic registrant to see that all distributor labeling is kept in compliance with requirements placed on the basic product.

PERSONS INTERVIEWED AND INDIVIDUAL RESPONSIBILITIES

On 10/03/08 I received an EPA request from MDA to conduct a Federal For Cause Producer Establishment inspection at FRM Chem Inc. and associated companies regarding suspected production and distribution of cancelled pesticides. Recent shipping and sales indicated distribution of two cancelled pesticides STERI-DINE EPA #48211-70-10366 and FRM CHLOR EPA # 48211-20001-10366. Information was to be collected concerning each company's connection to the production, holding for sale and distribution of these products. EPA determined these registrations were cancelled 7/19/05 by the registrant, Intercon Chemical Company, St. Louis, Mo. Agreements/contracts,

labels, inventory/production records, shipping documents/invoices and statements were collected to determine how these products were produced and distributed. Accompanying me on the inspection was Walter Roachell, EPA Project Officer for Missouri.

INSPECTION

On October 8, 2008 at 9:16 AM I presented credentials and a Notice of Inspection to Cindy Carey, secretary, Keith Kastendieck, owner and person most responsible, and Ann Kastendieck then explained the purpose of the inspection. I took a statement from Mr. Kastendieck who said Raymond Kastendieck is the primary owner of the businesses located at 50 and 60 Hi-Line Drive Union, Mo. It was explained that all the fore mentioned businesses are located under one roof at this location and a PO Box was used before the physical address for mail delivery. Keith Kastendieck explained FRM Chem has ceased production for two years and the company ceased operation on December 31, 2006. He said Advanced Products Technologies Inc. (APT), Industrial Specialties Inc., Custom Compounds Inc. (CCI); and Synisys all operate from this location. Mr. Kastendieck explained APT sells speciality cleaners while Industrial Specialties sells industrial chemicals/supplies/equipment to industrial companies. CCI sells ultrasonic cleaners and Synisys sells speciality chemicals and cleaners. He explained CCI has a supplemental agreement with STEPAN and Synisys is a contract manufacturer for the product Brite San 75. Mr. Kastendieck said they no longer produce STERI-DINE or FRM CHLOR 1250 and hold no inventory for such. He also said he does not have a supplemental registration agreement from Intercon however provided EPA related documents for their production. He said FRM Chem transferred the registrations to Intercon so they would not have to pay the registration fees. He further said they never received a cancellation for these registrations from Intercon. Mr. Kastendieck said they continued to produce these products until they ran out of the basic to make them. STERI-DINE was said to be last produced April 2006 and FRM CHLOR 1250 December 2006. Mr. Kastendieck said they are no longer producing, labeling, selling or distributing these products.

Keith Kastendieck provided documentation from EPA regarding registration changes from FRM Chem to Intercon Chemical Company and the supplemental agreement from Stepan granted to CCI to produce Brite San 75. He said the Brite San products were produced by FRM Chem until the end of 2006 through a supplemental agreement with Stepan. Six, one gallon Brite San 75 in inventory were said to have been contract manufactured by Synisys for CCI who has a supplemental agreement with Stepan. Ann Kastendieck provided sales invoices for this product. I also collected a certified label as well as photos of inventory and the basic used for production of Brite San 75. Keith Kastendieck provided a cover letter regarding the production of pesticides from FRM Chem and associated companies. Production records and customers for STERI-DINE and FRM CHLOR 1250 were also collected. I requested all shipping records relating to the two cancelled products and told Mr. Kastendieck I would return in one week for any

additional documentation he could provide. He said the businesses do not retain any legal counsel.

Walter Roachell delivered EPA Region VII prepared SSUROs for the two cancelled products to both Keith Kastendieck and Ann Kastendieck.

INSPECTOR'S COMMENTS

There was no inventory of STERI-DINE or FRM CHLOR 1250. Walter Roachell and I toured the warehouse and Mr. Kastendieck pointed out inventory for Brite San 75 and the basic used to produce it. It was noted the basic is registered as STEPAN #1839-63 and did not display net contents. The Brite San 75 final product is registered #1839-152-9645. Mr. Kastendieck said about 100 gallons are produced a year.

On 10/15/08 at 10:30 am I presented credentials and a Notice of Inspection for the purpose of collecting shipping documents for the cancelled pesticides and an additional statement. Mr. Kastendieck said he provided all available shipping documents relating to the two cancelled pesticides. He said he spoke to Intercon regarding a supplemental agreement and said Intercon did not know of any agreement with Frm Chem. He also said Frm Chem did not receive any cancellation for these two registrations. I also collected more digital photographs, a physical sample #100808184401-01 and provided a duplicate of Brite San 75#1839-152-9645. \$38.50 was billed to MDA PO #377759 for the sample taken. Mr. Kastendieck said the Stepan basic on site is the only one used to manufacturer the Brité San 75. I issued Mr. Kastendieck a Receipt for Samples and he was very cooperative. The physical address for all the businesses is 50 or 60 Hi-Line Drive Union, Mo. 63084 located south of Washington, Mo.

STATEMENT

I, Keith Kastendieck under affirmation say:

Raymond Kastendieck is still the owner of the businesses located at 60 + 50 Hillside Drive Union, MO. I am part owner and the person responsible for the information collected this day. FRM CHEM has had no production in two years and the company ceased operation on Dec 31, 2006. APT Inc, Industrial Specialties Inc, Custom Companders Inc and Synisys all operate from this location. These businesses all operate out of this building. APT sells speciality cleaners. Industrial Specialties sells industrial chemicals, supplies and equipment to industrial companies. Custom Companders (CCI) sells ultrasonic cleaners and Synisys has some speciality chemicals and cleaners. CCI has a supplemental agreement with STEPAN. SYNISYS is a contract manufacturer for this product. We have 6 x 1 gal Brite San 75 in stock. We no longer produce the STEP-DINE Disinfectant or the FRM CHLOR 1250. I do not have the Supplemental Registration agreement from Entrecan but have provided related EPA documents for its production. We never received anything about any cancellation from Entrecan.

I hereby affirm that the above is true to the best of my knowledge.

STATEMENT

I, Keith Kastendiet under affirmation say:

We do not have any inventory for STERI-DINE or FRM CHLOR 1250. I have provided available production and shipping records for these. The products were produced until we ran out of the Tech/Basic used to produce them. We no longer have any of the Basic on site to make these. There is no production or distribution of these products. We last produced STERI-DINE April 06 and we last produced FRM CHLOR 1250 Dec 06. We are not presently producing, labeling, selling or distributing these products. FRM CHEM produced the Brit Son products until the end of 06 through a supplemental agreement with STEPAN. We do not have any legal counsel at this time.

I hereby affirm that the above is true to the best of my knowledge.

STATEMENT

I, Keith Kastendiek, under affirmation say:

Today I have provided all available shipping documents for STERI-DINE and FRM CHLOR 1250. I spoke to Entecor Chemical this last week who said they didn't know of any supplemental agreement with us. We did not get any cancellation from Entecor for these products. We do not have any labels left for these products. The STEPAN basic we have on site is the only one used to manufacture the Bride Ser 75. The corporate office or parent for CCI is located PO Box 2094 Woodstock, GA 30188 and Synisis is located here and is an independent company. The Bride Ser 75 sampled was taken from inventory packaged, labeled and released for shipment.

I hereby affirm that the above is true to the best of my knowledge.

PREVENTION, PESTICIDES AND
TOXIC SUBSTANCES

Dear Sir or Madam:

SUBJECT: Cancellation Order for Section 3 Pesticide Product
Registration(s)

This letter is a final cancellation order, advising you that under Section 4(i)(5)(D) of the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended, EPA hereby cancels the registrations listed on the enclosure for non-payment of the annual registration maintenance fee due January 15, 1995. The effective date of this cancellation order is the date of this letter.

As the registrant of the listed product(s) you may legally distribute or sell existing stocks of the cancelled products until January 15, 1996, the due date for the next annual registration maintenance fee. Existing stocks are defined as those stocks of a registered pesticide product which are currently in the United States and which have been packaged, labeled, and released for shipment prior to the effective date of this cancellation order.

Some registrations listed on the enclosure may actually have been cancelled in the past for reason other than non-payment of the maintenance fee. If this is true for any of your registrations, the effective date of cancellation, the disposition date for existing stocks, and all other provisions of any earlier cancellation order are controlling.

It would be a violation of FIFRA for you or any supplemental distributor of your product(s) to distribute or sell any stocks currently in the United States which have been produced, packaged, labeled or released for shipment after the effective date of cancellation or to distribute or sell any existing stocks after the indicated disposition date. The Agency also expressly reserves the right to amend the existing stocks provisions of this Order if events should so warrant.

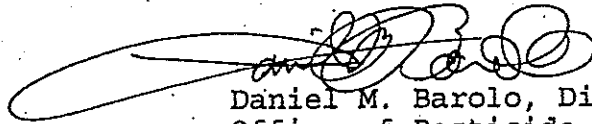

It is your responsibility as the registrant to notify any and all supplemental distributors of your product(s) that this cancellation order also applies to their distributor product(s). You may be held liable for violations committed by such distributors.

Recycled/Recyclable
Printed with Soy/Canola Ink on paper that
contains at least

Unless the provisions of an earlier order apply, dealers and users may continue to legally distribute, sell or use existing stocks of the listed pesticide(s) on hand until their supply is exhausted, provided that such further sale and use comply with the EPA-approved label and labeling of the affected product(s).

Sincerely,

A handwritten signature in black ink, appearing to read 'Daniel M. Barolo', written in a cursive style. The signature is positioned above the typed name and title.

Daniel M. Barolo, Director
Office of Pesticide Programs

AFFIDAVIT OF JEFF BUCHHOLZ

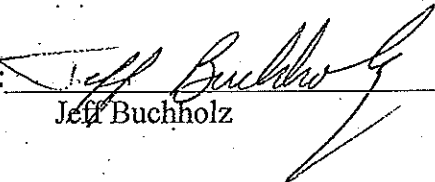

1. My name is Jeff Buchholz, and I am the store manager for McFleeg, Inc., located in Watertown, South Dakota.
2. I understand the product FRM Chem 1250 to be a 12.5% sodium hypochlorite solution used in the dairy industry to disinfect and sanitize surfaces.
3. On or about June 1, 2008, I filled out and returned a questionnaire from EPA Region 7 confirming the following purchases of FRM Chlor 1250 and attached a McFleeg, Inc. "Item Transaction Inventory Report" which documents the approximate dates that the products entered McFleeg's inventory.
 - a. On or about November 21, 2005, McFleeg, Inc. purchased a quantity of the product FRM Chlor 1250 from FRM Chem Inc., as documented by the bill of lading provided by EPA with PO # 32787.
 - b. On or about July 5, 2006, McFleeg, Inc. purchased a quantity of the product FRM Chlor 1250 from FRM Chem, Inc.
 - c. On or about April 1, 2007, McFleeg, Inc. purchased a quantity of the product FRM Chlor 1250 from FRM Chem, Inc.
 - d. On or about January 21, 2008, McFleeg, Inc. purchased a quantity of the product FRM Chlor 1250 from FRM Chem, Inc.
4. On or about July 15, 2009, I filled out and returned a second questionnaire from EPA Region 7 regarding further sales of FRM Chlor 1250, and provided further documentation to EPA Region 7, including copies of four invoices from FRM Chem, Inc. for the following purchases:
 - a. On or about January 8, 2007, McFleeg, Inc. purchased a quantity of the product FRM Chlor 1250 from FRM Chem, Inc, as documented by invoice No. 35522. Also documented on that invoice were purchases of Cir-Clean, Gain, and Wintercoat.
 - b. On or about March 28, 2007, McFleeg, Inc. purchased a quantity of the product FRM Chlor 1250 from FRM Chem, Inc, as documented by invoice No. 35567. Also documented on that invoice were purchases of Cir-Clean and Mech II.
 - c. On or about January 21, 2008, McFleeg, Inc. purchased a quantity of the product FRM Chlor 1250 from FRM Chem, Inc. as documented by

invoice No. 35684. Also documented on that invoice were purchases of Cir-Clean, Mech II, Gain SVP, Wintercoat, and FRM Dine.

- d. On or about February 16, 2009, McFleeg, Inc. made a purchase from FRM Chem, Inc. of several products, including Cir-Clean, Gain SVP, and Wintercoat, as documented by invoice No. 35813.
- e. All four invoices I provided to EPA in August were on FRM Chem, Inc. letterhead and included the typed statement at the bottom "Please make check payable to Synisys, Inc."

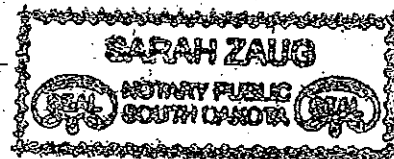

5. On July 30, 2009 and August 7, 2009, I provided to EPA Region 7 (via email) multiple photographs I took of several containers of FRM Chlor 1250 purchased by McFleeg from FRM Chem, Inc., including one with an expiration sticker dated March 2009, and one with an expiration sticker dated January 2010.

6. On July 30, 2009, I provided to EPA Region 7 (via email) multiple photographs of various products purchased from FRM Chem, including Cir-Clean, Mech II, FRM-X Teat Dip, Udderway, FRM Dine Teat Dip, and Prevent, all of which are identified on the label as produced by FRM Chem, Inc., and Gain SVP, identified on the label as produced by Advanced Products Technology.

AFFIDAVIT OF LEONARD WEISS

1. My name is Leonard Weiss, and I am the Vice-President for LW Chemicals, Inc. in Mt. Olive, Illinois.
2. On or about May 30, 2008, I provided information to EPA Region 7 confirming sales by FRM Chem, Inc. to LW Chemicals, Inc. of a product called STERI-DINE DISINFECTANT, and provided further documentation to EPA Region 7, including copies of 9 invoices from FRM Chem, Inc. for the following purchases:
 - a. On or about August 3, 2004, LW Chemicals, Inc. purchased a quantity of the product STERI-DINE DISINFECTANT from FRM Chem, Inc, as documented by invoice No. 34953.
 - b. On or about October 4, 2004, LW Chemicals, Inc. purchased a quantity of the product STERI-DINE DISINFECTANT from FRM Chem, Inc, as documented by invoice No. 35006.
 - c. On or about October 28, 2004, LW Chemicals, Inc. purchased a quantity of the product STERI-DINE DISINFECTANT from FRM Chem, Inc, as documented by invoice No. 35024.
 - d. On or about January 4, 2005, LW Chemicals, Inc. purchased a quantity of the product STERI-DINE DISINFECTANT from FRM Chem, Inc, as documented by invoice No. 35082.
 - e. On or about October 4, 2005, LW Chemicals, Inc. purchased a quantity of the product STERI-DINE DISINFECTANT from FRM Chem, Inc, as documented by invoice No. 35267.
 - f. On or about October 25, 2005, LW Chemicals, Inc. purchased a quantity of the product STERI-DINE DISINFECTANT from FRM Chem, Inc, as documented by invoice No. 35282.
 - g. On or about April 4, 2006, LW Chemicals, Inc. purchased a quantity of the product STERI-DINE DISINFECTANT from FRM Chem, Inc, as documented by invoice No. 35385.
 - h. On or about October 3, 2006, LW Chemicals, Inc. purchased a quantity of the product STERI-DINE DISINFECTANT from FRM Chem, Inc, as documented by invoice No. 35469.

- i. On or about October 30, 2006, LW Chemicals, Inc. purchased a quantity of the product STERI-DINE DISINFECTANT from FRM Chem, Inc, as documented by invoice No. 35483.

- 3. On or about May 30, 2008, I provided information to EPA Region 7 confirming sales by Advanced Products Technology, Inc. to LW Chemicals, Inc. of a product called STERI-DINE DISINFECTANT™ and provided further documentation to EPA Region 7, including copies of 4 invoices from Advanced Products Technology, Inc. for the following purchases:
 - a. On or about August 27, 2007, LW Chemicals, Inc. purchased a quantity of the product STERI-DINE DISINFECTANT from Advanced Products Technology, Inc, as documented by invoice No. 21965.
 - b. On or about September 28, 2007, LW Chemicals, Inc. purchased a quantity of the product STERI-DINE DISINFECTANT from Advanced Products Technology, Inc, as documented by invoice No. 22011.
 - c. On or about October 03, 2007, LW Chemicals, Inc. purchased a quantity of the product STERI-DINE DISINFECTANT from Advanced Products Technology, Inc, as documented by invoice No. 22015.
 - d. On or about December 19, 2007, LW Chemicals, Inc. purchased a quantity of the product STERI-DINE DISINFECTANT from Advanced Products Technology, Inc, as documented by invoice No. 22119.

PLEASE ANSWER THESE QUESTIONS FULLY AND TO THE BEST OF YOUR ABILITY AND RETURN IN THE ENVELOPE PROVIDED TO:

U.S. Environmental Protection Agency, Region 7

Attn: Mark K. Leshner,
FIFRA Enforcement Officer
901 N. 5th Street
Kansas City, KS 66101

(1) On December 27, 2002, L W Chemical purchased 13 units consisting of 573 pounds of product identified as "Cleaning Compound Liquid or Dry" from FRM Chem, Inc. as documented by Shipping Order No. 25572. Was the product purchased labeled or marketed as "STERI-DINE DISINFECTANT"? (Y) N If not, then please identify the product.

(2) On September 29, 2003, L W Chemical purchased 8 units consisting of 369 pounds of product identified as "Cleaning Compound Liquid or Dry" from FRM Chem, Inc. as documented by Shipping Order No. 26054. Was the product purchased labeled or marketed as "STERI-DINE DISINFECTANT"? (Y) N If not, then please identify the product.

(3) On October 31, 2003, L W Chemical purchased 10 units consisting of 423 pounds of product identified as "Cleaning Compound Liquid or Dry" from FRM Chem, Inc. as documented by Shipping Order No. 26130. Was the product purchased labeled or marketed as "STERI-DINE DISINFECTANT"? (Y) N If not, then please identify the product.

(4) On July 29, 2002, L W Chemical purchased 10 units consisting of 427 pounds of product identified as "Cleaning Compound Liquid or Dry" from FRM Chem, Inc. as documented by Shipping Order No. 26739. Was the product purchased labeled or marketed as "STERI-DINE DISINFECTANT"? (Y) N If not, then please identify the product.

(5) Has L W Chemical purchased the above mentioned product STERI-DINE DISINFECTANT from FRM Chem, Inc. on any other occasion(s)? (Y) N

(6) If the answer to question 5 above is "yes," please list dates of purchase and amount purchased (be as specific as you can – attach a copy of invoices or records if available, and use additional sheets of paper if needed):

See Attached

(7) Has L W Chemical purchased from FRM Chem, Inc. a product labeled or marketed as "FRM CHLOR 1250"? (Y/N)

If yes, please list dates of purchase and amount purchased (be as specific as you can – attach a copy of invoices or records if available, and use additional sheets of paper if needed):

(8) What other products, if any, has L W Chemical purchased from FRM Chem, Inc., and when were these purchases made? (Please list amounts, and be as specific as you can – attach a copy of invoices or records if available, and use additional sheets if needed):

N/A

(9) Please list other products, if any, that L W Chemical has purchased from FRM Chem, Inc., and when these purchases were made. (In addition to the name and registration number of the product(s), please list amounts purchased, and be as specific as you can – attach a copy of invoices or records if available, and use additional sheets if needed):

N/A

(10) Has L W Chemical purchased products from any of the following businesses: Advanced Products Technol ~~o~~ Inc., Industrial Specialties, Inc., Custom Compounders, Inc., or SYNISYS Inc.? Yes No

If yes, please list the products and dates purchased and name and address of Company from which the product or products were purchased. (Please list amounts, and be as specific as you can – attach a copy of invoices or records if available, and use additional sheets if needed):

RECEIVED, subject to the classifications and liability (and tariffs in effect on the date of issue of this Bill of Lading). The property described below in apparent good order, except as noted (contents and condition of contents of packages unknown), marked, consigned, and destined as indicated below which said carrier (the word carrier being understood throughout this contract as meaning a person or corporation in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. It is mutually agreed as to each carrier of all or any of said property over all or any portion of said route to destination, and as to each party at any time interested in all or any said property, that every performance hereunder shall be subject to all the terms and conditions of the Uniform Domestic Straight Bill of Lading set to (1) in Uniform Freight Classifications in effect on the date hereof, if this is a rail or a rail-water shipment, or (2) in the applicable motor carrier classification if this is a motor carrier shipment. Shipper hereby certifies that he is familiar with all the terms and conditions of the said bill of lading the classification or tariff which governs the transportation of this shipment, and the said terms and conditions are hereby agreed to by the shipper and accepted for himself and his assigns.

*If the shipment moves between two ports by a carrier by water the law requires that the bill of lading shall state whether it is "carrier's or shipper's weight".

NOTE: Where the rate is dependent on value, shippers are required to state specifically in writing the agreed or declared value of the property.

Subject to Section 7 of conditions, if this shipment is to be delivered to the consignee without recourse on the consignor, the consignor shall sign the following statement:

Freight charges are prepaid unless marked collect.

†Shipper's imprint in lieu of stamp: not a part of bill of lading approved by the Interstate Commerce Commission.

The agreed or declared value of the property is hereby specifically stated by the shipper to be not exceeding \$ _____ per _____

The carrier shall not make delivery of this shipment without payment of freight and all other lawful charges.

Check box if charges are collect.

PLEASE ANSWER THESE QUESTIONS FULLY AND TO THE BEST OF YOUR ABILITY AND RETURN IN THE ENVELOPE PROVIDED TO:

U.S. Environmental Protection Agency, Region 7
Attn: Mark K. Leshner,
FIFRA Enforcement Officer
901 N. 5th Street
Kansas City, KS 66101

(1) On or about July 5, 2005, Preston Dairy Supply purchased 12 units consisting of 504 pounds of Hypochlorite Solution from FRM Chem, Inc. as documented by Shipping Order No. 26726 (attached). Was the product purchased labeled or marketed as "FRM CHLOR 1250"? Y N If not, then please identify the product.

Thinking back about 3-years - I'm quite sure it was 12cc 4/1 gal of FRM Chlor 1250

(2) On or about July 5, 2005, Preston Dairy Supply purchased 103 units consisting of 3,355 pounds of a product identified as "Cleaning Compound Liquid or Dry" from FRM Chem, Inc. as documented by Shipping Order No. 26726. Was the product purchased labeled or marketed as "STERI-DINE DISINFECTANT"? Y N If not, then please identify the product. *I had never ordered*

It was Cir Clean and Heavy Duty Cir Clean and powdered Heavy Duty Form Clean

*CIP
all soap
cleaners for
Dairies*

(3) On or about March 30, 2005, Preston Dairy Supply purchased 4 units consisting of 168 pounds of Hypochlorite Solution from FRM Chem, Inc. as documented by Shipping Order No. 26677 (attached). Was the product purchased labeled or marketed as "FRM CHLOR 1250"? Y N If not, then please identify the product.

(4) On or about March 30, 2005, Preston Dairy Supply purchased 49 units consisting of 2,480 pounds of a product identified as "Cleaning Compounds Liquid or Dry" from FRM Chem, Inc., as documented by Shipping Order No. 26677. Was the product purchased labeled or marketed as "STERI-DINE DISINFECTANT"? Y N If not, then please identify the product.

It was Cir Clean, Heavy Duty Cir Clean and powdered Heavy Duty Form Clean

*all CIP soap
cleaners for
Dairies*

(5) How did Preston Dairy Supply use or dispose of the products referenced above? Please attach additional sheets if more room is needed.

All product was sold to milk plant, dairies

(6) Has Preston Dairy Supply purchased either STERI-DINE DISINFECTANT or FRM CHLOR 1250 from FRM Chem, Inc. on any other occasion(s)? (Y / N)

(7) If the answer to question 6 above is "yes," please list dates of purchase and amount purchased (be as specific as you can – attach a copy of invoices or records if available, and use additional sheets if needed):

(8) Please list other products, if any, that Preston Dairy Supply has purchased from FRM Chem, Inc., and when these purchases were made. (In addition to the name and registration number of the product(s), please list amounts purchased, and be as specific as you can – attach a copy of invoices or records if available, and use additional sheets if needed):

(9) Has Preston Dairy Supply purchased products from any FRM Chem, Inc. location other than the Highway 47 South, Washington, MO 63090 address? (Y / N)

If yes, please list amounts, dates, and addresses, – attach a copy of invoices or records if available, and use additional sheets if needed:

(10) Has Preston Dairy Supply purchased products from any of the following businesses: Advanced Products Technology, Inc., Industrial Specialties, Inc., Custom Compounders, Inc., or SYNISYS, Inc.? (Y/N)

If yes, please list the products and dates purchased and name and address of Company from which the product or products were purchased. (Please list amounts, and be as specific as you can - attach a copy of invoices or records if available, and use additional sheets if needed):

Fm Chem had stopped selling Fm Chlor 1250
some years back (about 2005?) ^{date in 2005} I am nearly 74 years old
and therefore not current on all the latest, or do much business.

Thank you for your time and efforts in filling out this questionnaire and providing EPA with additional information.

Subject to the classifications and lawfully filed tariffs in effect on the date of issue of this Bill of Lading. The carrier shall be liable for the loss of or damage to the contents of packages unknown, marked, consigned, and destined as indicated below which said carrier (the word carrier being understood throughout this contract as meaning the carrier or carriers who are performing the transportation of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. It is mutually agreed as to each carrier of all or any of the property under the contract that every performed hereunder shall be subject to all the terms and conditions of the Uniform Domestic Freight Bill of Lading set to (1) in effect at any time or (2) in the applicable motor carrier classification if this is a motor carrier shipment. The carrier shall not be liable for loss of or damage to the property if the carrier is a rail or rail-water shipment, or (2) in the applicable motor carrier classification if this is a motor carrier shipment. The carrier hereby certifies that he is familiar with all the terms and conditions of the said bill of lading the classification or tariff which governs the transportation of this shipment, and the said terms and conditions are hereby agreed to by the shipper and accepted for himself or herself.

K. KASTENDIECK

Complainant's Exhibit 22

PLEASE ANSWER THESE QUESTIONS FULLY AND TO THE BEST OF YOUR ABILITY AND RETURN IN THE ENVELOPE PROVIDED TO:

U.S. Environmental Protection Agency, Region 7
Attn: Mark K. Leshner,
FIFRA Enforcement Officer
901 N. 5th Street
Kansas City, KS 66101

(1) On January 1, 2005, Tony Howell Equity Group purchased 10 units consisting of 440 pounds of product identified as "Cleaning Compound Liquid or Dry" from FRM Chem, Inc. as documented by Shipping Order No. 26641. Was the product purchased labeled or marketed as "STERI-DINE DISINFECTANT"? (Y) / (N) If not, then please identify the product.

(2) Has Tony Howell Equity Group purchased the above mentioned product STERI-DINE DISINFECTANT from FRM Chem, Inc. on any other occasion(s)? (Y) / (N)

(3) If the answer to question 2 above is "yes," please list dates of purchase and amount purchased (be as specific as you can – attach a copy of invoices or records if available, and use additional sheets of paper if needed):

(4) Has Tony Howell Equity Group purchased from FRM Chem, Inc. a product labeled or marketed as "FRM CHLOR 1250"? (Y) / (N)

If yes, please list dates of purchase and amount purchased (be as specific as you can – attach a copy of invoices or records if available, and use additional sheets of paper if needed):

(5) What other products, if any, has Tony Howell Equity Group purchased from FRM Chem, Inc., and when were these purchases made? (Please list amounts, and be as specific as you can – attach a copy of invoices or records if available, and use additional sheets if needed):

(6) Please list other products, if any, that Tony Howell Equity Group has purchased from FRM Chem, Inc., and when these purchases were made. (In addition to the name and registration number of the product(s), please list amounts purchased, and be as specific as you can – attach a copy of invoices or records if available, and use additional sheets if needed):

(7) Has Tony Howell Equity Group purchased products from any of the following businesses: Advanced Products Technology, Inc., Industrial Specialties, Inc., Custom Compounders, Inc., or SYNISYS Inc.? (Y / N)

If yes, please list the products and dates purchased and name and address of Company from which the product or products were purchased. (Please list amounts, and be as specific as you can – attach a copy of invoices or records if available, and use additional sheets if needed):

Thank you for your time and efforts in filling out this questionnaire and providing EPA with additional information.

AFFIDAVIT OF VICTOR TURNER

1. My name is Victor Turner, and I am Plant Manager for Equity Group in East Gadsden, Alabama.
2. On or about June 2, 2008, I provided information to EPA Region 7 confirming sales or distributions by FRM Chem, Inc. to Equity Group of a product called STERI-DINE DISINFECTANT, regarding the following sales:
 - a. On or about July 7, 2004, FRM Chem, Inc. distributed to Equity Group 40 gallons of the product STERI-DINE DISINFECTANT, as documented in the Tony Howell questionnaire response.
 - b. On or about August 4, 2004, FRM Chem, Inc. distributed to Equity Group 80 gallons of the product STERI-DINE DISINFECTANT, as documented in the Tony Howell questionnaire response.
 - c. On or about October 4, 2004, FRM Chem, Inc. distributed to Equity Group 80 gallons of the product STERI-DINE DISINFECTANT, as documented in the Tony Howell questionnaire response.
 - d. On or about November 1, 2004, FRM Chem, Inc. distributed to Equity Group 60 gallons of the product STERI-DINE DISINFECTANT, as documented in the Tony Howell questionnaire response.
 - e. On or about January 4, 2005, FRM Chem, Inc. distributed to Equity Group 40 gallons of the product STERI-DINE DISINFECTANT, as documented in the Tony Howell questionnaire response.
 - f. On or about July 31, 2004, FRM Chem, Inc. distributed to Equity Group 20 units of the product STERI-DINE DISINFECTANT, as documented in the Billy Palmer questionnaire response.
 - g. On or about January 4, 2005, FRM Chem, Inc. distributed to Equity Group 40 gallons of the product STERI-DINE DISINFECTANT, as documented in the Billy Palmer questionnaire response.
 - h. On or about August 3, 2005, FRM Chem, Inc. distributed to Equity Group 40 gallons of the product STERI-DINE DISINFECTANT, as documented in the Billy Palmer questionnaire response.
 - i. On or about October 6, 2005, FRM Chem, Inc. distributed to Equity Group 160 gallons of the product STERI-DINE DISINFECTANT, as documented in the Billy Palmer questionnaire response.

- j. On or about April 5, 2006, FRM Chem, Inc. distributed to Equity Group 40 gallons of the product STERI-DINE DISINFECTANT, as documented in the Billy Palmer questionnaire response.
- k. On or about October 5, 2006, FRM Chem, Inc. distributed to Equity Group 40 gallons of the product STERI-DINE DISINFECTANT, as documented in the Billy Palmer questionnaire response.
- l. On or about November 2, 2006, FRM Chem, Inc. distributed to Equity Group 40 gallons of the product STERI-DINE DISINFECTANT, as documented in the Billy Palmer questionnaire response.
- m. On or about September 4, 2007, FRM Chem, Inc. distributed to Equity Group 20 gallons of the product STERI-DINE DISINFECTANT, as documented in the Billy Palmer questionnaire response.
- n. On or about October 3, 2007, FRM Chem, Inc. distributed to Equity Group 40 gallons of the product STERI-DINE DISINFECTANT, as documented in the Billy Palmer questionnaire response.
- o. On or about December 20, 2007, FRM Chem, Inc. distributed to Equity Group 40 gallons of the product STERI-DINE DISINFECTANT, as documented in the Billy Palmer questionnaire response.
- p. In January of 2008, FRM Chem, Inc. distributed to Equity Group 40 gallons of the product STERI-DINE DISINFECTANT, as documented in the Billy Palmer questionnaire response.

**FROM: BILLY PALMER SANITATION MANAGER
EQUITY GROUP ALABAMA
507 INDUSTRIAL PARKWAY
EAST GADSDEN, AL. 35903**

DEAR SIR OR MADAM;

THE PRODUCT STERI-DINE DISINFECTANT MANUFACTURED BY FRM-CHEM, INC., P.O. BOX 207, WASHINGTON, MO. 63090, EPA REG. NO. 48211-70-10366 AND EPA EST. NO. 10366-MO-1 IS PURCHASED FROM L.W. CHEMICAL COMPANY, P.O. BOX 205, MT. OLIVE, ILLINOIS 62069. THE PRODUCT STERI-DINE DISINFECTANT IS THEN DROP SHIPPED TO US FROM FRM-CHEM. THIS PRODUCT IS USED AS AN EXTRA SANITIZER TO AID IN CONTROL OF MICROORGANISMS. THE DATES FOR ORDERS MAY NOT COINCIDE EXACTLY DUE TO THE TIME LOST FROM DEPARTMENT ORDER, PURCHASE REQUISITION, TO LW CHEMICAL AND THEN REQUISITIONED FROM FRM-CHEM TO SHIP TO EQUITY GROUP ALABAMA. TO THE BEST OF MY KNOWLEDGE AND ABILITY LISTED BELOW ARE THE DATES AND AMOUNTS OF STERI-DINE DISINFECTANT ORDERED.

1 CASE = 4 GALLONS

JANUARY 2008 RECEIVED 10 CASES----- 40 GALLONS

SEPTEMBER 4 / 2007 RECEIVED 5 CASES----- 20 GALLONS

OCTOBER 3 / 2007 RECEIVED 10 CASES----- 40 GALLONS

DECEMBER 20 / 2007 RECEIVED 10 CASES----- 40 GALLONS

APRIL 5 / 2006 RECEIVED 10 CASES----- 40 GALLONS

Dear Mr. Kastendieck:

STOP SALE, USE, OR REMOVAL ORDER

Enclosed is a **STOP SALE, USE, OR REMOVAL ORDER** which directs you to immediately halt all distribution and use of FRM CHLOR 1250, EPA Reg. No. 48211-20001-10366, and STERI-DINE DISINFECTANT, EPA Reg. No. 48211-70-10366. Paragraph 3 of the Order informs you why this action is being taken.

Please contact Mark K. Leshar at 913-551-7054 if you have any questions regarding this matter.

Sincerely,

A handwritten signature in cursive script that reads "Jamie Green".

Jamie Green, Chief

I. AUTHORITIES AND BACKGROUND

1. Section 13(a) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), 7 U.S.C. § 136k(a), authorizes the Administrator of the U.S. Environmental Protection Agency (EPA) to issue an order prohibiting the sale, use, or removal of any pesticide or device by any person who owns, controls, or has custody of such pesticide or device whenever there is reason to believe that the pesticide or device is in violation of any provision of FIFRA, or the pesticide or device has been or is intended to be distributed or sold in violation of any provision of FIFRA.

This authority has been delegated from the Administrator of the EPA to the Regional Administrator, Region VII, and then to the Director of the Water, Wetlands and Pesticides Division, Region VII. Further delegation has been made to the Chief, Toxics and Pesticides Branch.

2. On December 21, 2005, and December 28, 2005, a representative of the Missouri Department of Agriculture (MDA) inspected your FRM Chem, Inc. facility located at Highway 47 South, Washington, Missouri, and collected samples of the following pesticides that were being held for distribution or sale, and which bore the EPA Registration Numbers:

FRM CHLOR 1250

EPA Reg. No. 48211-20001-10366

STERI-DINE DISINFECTANT

EPA Reg. No. 48211-70-10366

Further investigation of this case revealed that the STERIDINE DISINFECTANT pesticide was being sold to customers as an Advanced Products Technology, Inc. (APT) product. APT is located at 50 Highline Industrial Drive, Washington, MO. Sales were documented by invoices and statements from various customers.

3. Intercon Chemical Company, St. Louis, Missouri, was the registrant for the above-named pesticides. On July 19, 1995, the registrant requested the cancellations for the pesticides known as CHLOR 1250, EPA Reg. No. 48211-20001, and STERI-DINE DISINFECTANT, EPA Reg. No. 48211-70. The cancellation notice for both pesticides was published in the Federal Register Volume 60, Number 148, on August 2, 1995. No attempt was made to reregister the products by the registrant.

Section 2(t) of FIFRA, 7 U.S.C. § 136(t), defines the term "pest" to mean (1) any insect, rodent, nematode, fungus, weed, or (2) any other form of terrestrial or aquatic plant or animal life or virus, bacteria, or other micro-organism (except viruses, bacteria, or other micro-organism on or in living man or other living animal) which the Administrator declares to be a pest under Section 25(c)(1). Section 2(u) of FIFRA, 7 U.S.C. § 136(u), defines the term "pesticide" to mean any substance or mixture of substances intended for preventing, destroying, repelling, or mitigating any pest. The label of the FRM CHLOR 1250 product states: "SANITATION OF NON-POROUS FOOD CONTACT SURFACES" and "FARM PREMISES." This statement is a pesticidal claim and thus identifies FRM CHLOR 1250 as a pesticide. The label of the STERI-DINE DISINFECTANT product states: "For udderwashing; for cleaning, disinfecting, and sanitizing animal housing and equipment; for sanitizing poultry drinking water; for use as a shoe bath prior to entering barns and poultry houses; for use as a deodorant; for sanitizing food processing equipment." This statement is a pesticidal claim and thus identifies STERI-DINE DISINFECTANT as a pesticide.

As defined at Section 2(q)(1)(A) of FIFRA, 7 U.S.C. § 136(q)(1)(A), and Section 2(q)(1)(E) of FIFRA, 7 U.S.C. § 136(q)(1)(E), a pesticide is misbranded if its labeling bears any statement which is false or misleading and a pesticide is misbranded if any word, statement, or other information required by or under authority of this Act to appear on the label or labeling is not prominently placed thereon with such conspicuousness and in such terms as to render it likely to be read and understood by the ordinary individual under customary conditions of purchase and use. The FRM CHLOR 1250 product bears an EPA Reg. No. 48211-20001-10366 which is false and misleading. The STERI-DINE DISINFECTANT product is misbranded in that labels and photographs of the label on the product collected during the December 21, 2005, MDA inspection do not compare to the EPA accepted label dated September 10, 1991. The label on the STERI-DINE DISINFECTANT product collected by the MDA representative bears an EPA Registration Number 48211-70-10366 which is false and misleading.

4. Section 12(a)(1)(A) of FIFRA, 7 U.S.C. § 136j(a)(1)(A) provides that it is unlawful for any person in any state to hold for sale or distribution or to distribute or sell to any person any pesticide whose registration has been canceled.

5. Section 12(a)(1)(E) of FIFRA, 7 U.S.C. § 136j(a)(1)(E) provided that it is unlawful for any person in any state to hold for sale or distribution or to distribute or sell to any person a misbranded pesticide.

II. ORDER

6. Respondent is hereby ordered NOT to distribute, sell, use, or remove the pesticides FRM CHLOR 1250, EPA Reg. No. 48211-20001-10366, and STERI-DINE DISINFECTANT, EPA Reg. No. 48211-70-10366.

7. This Order shall pertain to all quantities and sizes of the products listed above which are within the ownership, control or custody of Respondent, wherever these pesticides are located. The products shall not be sold, offered for sale, held for sale, shipped, delivered for shipment,

received and, having been so received, delivered, offered for delivery, or removed from the premises, for any reason. This Order extends to the offering for sale, or sale, of pesticides from an Internet web site or any other source of advertising.

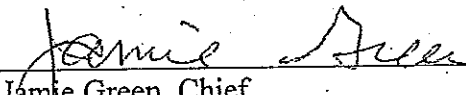

8. Respondent is further ordered to notify this office in writing, within ten days of your receipt of the Order, regarding alternatives to address the products subject to the Order. You should contact Mark K. Leshar of this office at 93-551-7054 to discuss your options.

9. Violation of the terms or provisions of this Order may subject the violator to civil or criminal penalties as prescribed in Section 14 of FIFRA, 7 U.S.C. § 136l.

10. The issuance of this Order shall not act as a waiver by EPA of any enforcement or other authority available to EPA under FIFRA.

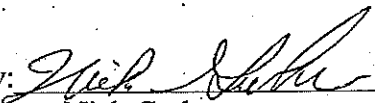

11. This Order shall be EFFECTIVE IMMEDIATELY upon receipt by Respondent.

Date

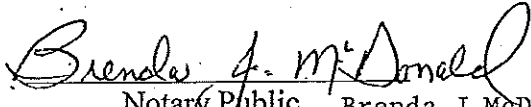

Jamie Green, Chief
Toxics and Pesticides Branch

AFFIDAVIT OF NICK GRABER

1. My name is Nick Graber, and I am employed by Graber Equipment in Oden, Indiana.
2. On or about August 10, 2009, I filled out and returned a questionnaire from the U.S. Environmental Protection Agency about the distribution of a product labeled or advertised as 12.5% Sodium Hypochlorite Solution.
3. In response to the questionnaire, I provided multiple invoices from FRM Chem, Inc. to the U.S. EPA, including four that documented sales of products labeled "FRM Chlor 1250" or "Sodium Hypochlorite Solution." Those four invoices were as follows:
 - a. On or about February 6, 2007, Graber Equipment purchased a quantity of the product FRM Chlor 1250 from FRM Chem, Inc, as documented by invoice No. 35539.
 - b. On or about February 13, 2008, Graber Equipment purchased a quantity of the product FRM Chlor 1250 from FRM Chem, Inc, as documented by invoice No. 35690.
 - c. On or about October 13, 2008, Graber Equipment purchased a quantity of the product FRM Chlor 1250 from FRM Chem, Inc. as documented by invoice No. 35762.
 - d. On or about November 26, 2008, Graber Equipment purchased a quantity of the product "Sodium Hypo 5 Gal Drum," as documented by invoice No. 35782.
 - e. All four of the above invoices were provided to EPA, and were on FRM Chem, Inc. letterhead and included the typed statement at the bottom "Please make check payable to Synisys, Inc."
4. I understand the products "FRM Chlor 1250" and "Sodium Hypo" on the FRM Chem, Inc. invoices referenced above to be 12.5% sodium hypochlorite solutions used to disinfect and sanitize food contact surfaces in the dairy industry.

PLEASE MAKE CHECK PAYABLE TO SYNISYS INC.

PLEASE ANSWER THESE QUESTIONS FULLY AND TO THE BEST OF YOUR ABILITY AND RETURN IN THE ENVELOPE PROVIDED TO:

U.S. Environmental Protection Agency, Region 7
Attn: Mark K. Leshner,
FIFRA Enforcement Officer
901 N. 5th Street
Kansas City, KS 66101

(1) Since January 1, 2007, has McFleeg, Inc., purchased a product labeled or advertised as 12.5% Sodium Hypochlorite solution, from any of the following companies: FRM Chem., Inc.; Advanced Products Technology; Custom Compounders; V L Clark Chemical; or Synisys, Inc.? Y N

(2) If yes, please list the products and dates purchased and name and address of company from which the product or products were purchased. Please include a copy of the product label(s) if available, and list amounts purchased on each date, being as specific as you can – attach copies of invoices or records if available.

Cir Clean

FRM Chlor 1250

(3) If the answer to question 1 above is "yes", please explain in detail the intended use of the product as marketed to you by the seller (for example, is it intended as a "cleaner"? a "sanitizer"? a "bleaching agent"? another use?).

milk lines sanitizer and cleaner

Thank you for your time and efforts in filling out this questionnaire and providing EPA with additional information.

FRAM CHLOR 1250

ACTIVE INGREDIENT:

Sodium Hypochlorite 12.5%

INERT INGREDIENTS

..... 87.5%

**KEEP OUT OF REACH OF CHILDREN
DANGER**

STATEMENT OF PRACTICAL TREATMENT (FIRST AID)

IF CONTACT WITH EYES OCCURS, flush with water for at least 15 minutes. Get prompt medical attention.

IF CONTACT WITH SKIN OCCURS, wash with plenty of soap and water.

IF SWALLOWED, drink large quantities of milk or gelatin solution, if these are not available, drink large quantities of water. **DO NOT** give vinegar or other acids. **DO NOT** induce vomiting. Get prompt medical attention.

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: corrosive, may cause severe skin and eye irritation or chemical burns to broken skin. Causes eye damage. Wear safety glasses or goggles and rubber gloves when handling this product. Wash after handling. Avoid breathing vapors. Vacate poorly ventilated areas as soon as possible. Do not return until strong odors have dissipated.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds or public water-ways unless in accordance with a NPDES permit. For guidance, contact the regional office of the U.S. Environmental Protection Agency.

PHYSICAL AND CHEMICAL HAZARDS:

STRONG OXIDIZING AGENT: Mix only with water according to label directions. Mixing this product with chemicals (e.g. ammonia, acids, detergents, etc.) or organic matter (e.g. urine, feces, etc.) will release chlorine gas which is irritating to eyes, lungs and mucous membranes.

Manufactured by:

FRAM CHEM, INC.

**CAUTIONARY STATEMENTS
HAZARDS TO HUMANS
AND DOMESTIC ANIMALS**

Irritant to skin and severe irritation of chemical. Avoid contact with eyes, nose, mouth, and skin. Wash thoroughly with soap and water. Avoid breathing vapors. Vapors poorly absorbed through skin. Avoid contact with clothing.

PRECAUTIONS: This product is toxic to fish. Do not use in areas where fish are present. Use only in accordance with all NPD labels and instructions. See the Environmental Protection Agency.

PHYSICAL AND CHEMICAL HAZARDS:

FLAMMABLE LIQUID: Flammable liquid, Category 2. May be ignited by sparks, flames, or other sources of ignition. May form flammable or explosive mixtures with air. May be incompatible with oxidizing agents. May react with acids, bases, or other chemicals. May be incompatible with certain materials. May be incompatible with certain materials. May be incompatible with certain materials. May be incompatible with certain materials.

DISPOSAL:

Store in a cool, dry area away from direct sunlight. Do not mix with water. Rinse empty container thoroughly with water. Do not reuse. Do not pour into drains. Do not mix with water and dispose of in a sanitary sewer. Do not mix with other chemicals. Do not mix with other chemicals. Do not mix with other chemicals.

Circlean

Chlorine Bleach Alternative Cleaner
FOR DAIRY FARMS & BULK MILK TANKS, PIPELINES AND BULK TANKS
CAUTION: KEEP OUT OF REACH OF CHILDREN

WARNING: DO NOT MIX WITH ACID
NOT FOR HAND BRUSHING OF EQUIPMENT - CAUSES SEVERE BURNS

- PRECAUTIONS:**
1. Rinse pipeline or bulk tank with warm water.
 2. Use CIRCLEAN - use with warm hot water. It may be necessary to increase usage depending upon hardness and soil load conditions.
 3. Rinse with cold water - use 1/2 oz. to 12 gallons water for acid rinse.

CONTAINS POTASSIUM HYDROXIDE, PHOSPHATES AND SODIUM HYPOCHLORITE
Contains not more than 6.5% Phosphorus, 92 grams per gallon of average recommended use concentration, biodegradable.

DANGER: Avoid contact with skin, eyes and clothing. Causes skin and eye irritation.
FIRST AID:
Eye Contact: Flush continuously for at least 15 minutes. CALL A PHYSICIAN.
Skin Contact: Immediately flush with plenty of water and wash with vinegar.
CALL A PHYSICIAN.
If Swallowed: Immediately give large volumes of water. Do not induce vomiting.

Mr. Walter Roachell
U.S. EPA-Region VII
1103 Southwest Blvd. Suite B1
Jefferson City, MO 65109

Dear Walter:

Please find enclosed a Routine (Neutral Scheme) Producer Establishment Inspection conducted by Mr. Mark Nachreiner, Pesticide Use Investigator. The Producer Establishment Inspection was conducted at FRM CHEM Inc. in Washington, MO. Two physical samples were collected at FRM CHEM Inc.

This inspection report is being referred to EPA Region 7 for review and enforcement action.

If you have any questions, please let me know.

Sincerely,

Paul Bailey
Enforcement Program
Coordinator

PERSONS INTERVIEWED AND INDIVIDUAL RESPONSIBILITIES

On December 21, 2005 at 10:30 AM Paul Bailey, The Bureau of Pesticide Control's Enforcement Coordinator, and I presented credentials and a Notice of Inspection to Karlan C. Kastendieck, Sales Manager of Advanced Products Technology located in Washington, Mo. The inspection was at the request of the EPA Regional office in Kansas City, Kansas and was to be a routine Producer Establishment Inspection. Karlan Kastendieck said he was the person responsible for the daily operations of FRM CHEM INC. He supplied all the information for this report and was the only person interviewed.

HISTORY

Karlan Kastendieck stated that FRM CHEM INC. hereafter referred as FRM CHEM was incorporated in St. Louis in 1969. He said FRM CHEM is a sister company of Advanced Products Technologies (Box 1656 Washington, Mo.) and FRM CHEM still operates under the FRM CHEM name. FRM CHEM is a family owned business dealing primarily with soaps, detergents and sanitizers. Mr. Kastendieck said FRM CHEM subregisters and formulates for Custom Compounders Inc., Steelcote Manufacturing and Industrial Specialties.

Corporate officers are;

President, Ray Kastendieck
Vice President, Kieth Kastendieck
Secretary, Ann Kastendieck
Treasurer, Ann Kastendieck
Legal counsel: The firm does not retain any legal counsel at this time.

LABEL AGREEMENTS AND GUARANTEES

FRM CHEM has supplemental label agreements with Stepan and Intercon of St. Louis. #1839 represents Stepan Co. and #048211 represents Intercon. There are no other label agreements or guarantees.

CONSUMER COMPLAINT FILE

A consumer complaint file is kept at the facility however there have been no complaints concerning efficacy. Mr. Kastendieck said the only complaint has been the size of the letters or wording on the labels.

EXPERIMENTAL USE PERMITS

FRM CHEM does not have any EUP permits with EPA.

MANUFACTURING CODES

Karlan Kastendieck said the manufacturing code is product number followed by date (month, day, year) and expire date. For example #2012215 indicates product #20 December 21, 2005. He also provided me the manufacturing code explanation.

RECORDS INSPECTION

The firm retains records of production. No Devices are produced. Receiving, shipping and inventory records are maintained. No RUP's are produced. The firm uses a two year expiration date. All shipments are within the US. No disposal records are maintained however Mr. Kastendieck said FRM CHEM has their own approved sewer treatment facility that is inspected regularly by DNR and there have been no disposal problems. There are no tests on humans and FRM CHEM is not a registrant. Mr. Kastendieck said some products packed in less than one gallon containers have CRP caps. He said no CRP file is maintained. Samples collected on this day were in one gallon containers and did not have CRP caps.

PROMOTION AND DISTRIBUTION

FRM CHEM products are primarily industrial use and related to the Dairy Industry. There are five sales representatives for 400 products. No advertising is done other than word of mouth.

STORAGE

This site has 20,000 square feet of storage in one warehouse and at this time 500 square feet is pesticide storage. The warehouse was clean and there were no spills or stains.

DISPOSAL

Karlan Kastendieck said they use a vacuum system for mixing and/or production and they do not have any problems with spills. He said in the event of a spill, soda ash would be used to react on the floor and large amounts of water would be used to flush the spill down the drain to their own approved sewer treatment facility that is inspected regularly by DNR.

There are no outdated products or unwanted pesticides on site. No disposal records are maintained.

TOTAL ANNUAL SALES

Total annual sales for the company is approximately \$750,000.00 and pesticide sales assume \$5,000.00 of that total.

PESTICIDE DEVICES

The firm does not produce any pesticide devices.

CHILD RESISTANT PACKAGING

Mr. Kastendieck said only containers less than one gallon have CRP caps and have production records to show they are filled with CRP. Products are primarily for industrial use. Products sampled today do not have CRP.

QUALITY CONTROL SAMPLES

Quality control samples are also taken, maintained on site for two years and eventually reworked.

INSPECTOR'S COMMENTS

Two samples were taken from salable inventory packed, labeled and released for shipment;

Sample #122105F447101-

01-one one gallon STERI-DINE Disinfectant EPA #48211-70-10366

02-one one gallon FRM-CHLOR-1250 EPA#48211-20001-10366

FRM CHEM is also a contract manufacturer for Custom Compounders Inc., Steelcote Manufacturing and Industrial Specialties. Mr. Kastendieck said FRM CHEM formulates for others and puts the other company's label on the product. EPA #'s ending in -009645 indicate Custom Compounders Inc. Finished product is shipped back then distributed by the other company. Mr. Kastendieck mentioned they may drop the Brite San 45 and combine registrations once the company restructures. A PO#357989 was obtained from MDA for 39.80 to purchase samples. Duplicate samples were provided. I left Mr. Kastendieck a USEPA Small Business form.

37 digital photos were taken to document the inspection. I issued Karlan Kastendieck a Receipt for Samples.

I returned to FRM CHEM on December 28, 2005 and once again presented credentials and a Notice of Inspection to Mr. Kastendieck for cover letters and shipping records. I once again issued him a Receipt for Samples.

All samples will be transported to UHL Iowa City for analysis and all chain of custody procedures were followed.

STERI-DINE DISINFECTANT

**FOR UNDERWASHING; FOR CLEANING, DISINFECTING,
AND SANITIZING ANIMAL HOUSING AND EQUIPMENT;
FOR SANITIZING POULTRY DRINKING WATER; FOR USE AS A
SHOE BATH PRIOR TO ENTERING BARN AND POULTRY HOUSES;
FOR USE AS A DEODORANT; FOR SANITIZING FOOD-PROCESSING EQUIPMENT.**

STERI-DINE DISINFECTANT is TUBERCULOCIDAL at a dilution of 3 ounces of STERI-DINE DISINFECTANT to five gallons of water. STERI-DINE DISINFECTANT destroys hog cholera virus. STERI-DINE DISINFECTANT is not adversely affected by water hardness or low-temperature water. STERI-DINE DISINFECTANT has its own built-in indicator of germicidal activity. (When the amber color disappears a fresh solution should be prepared.)

ACTIVE INGREDIENTS:

Iodine	1.75%
Inert Ingredients	98.25%
*From Nonylphenoxypolyethoxyethanol-iodine complex	Total 100.00%

Manufactured by: **FRM-CHEM, INC.**, P.O. Box 207, Washington, MO. 63090
EPA REG. NO. 48211-70 - 10366 EPA EST. NO. 10366-MO-1 NET CONTENTS: 1 GALLON

Keep Out of The Reach of Children

DANGER: CORROSIVE. CAUSES EYE DAMAGE AND SKIN IRRITATION

Do not get in eyes, on skin, or on clothing. Protect eyes and skin when handling. Harmful if swallowed. See side panel for FIRST AID.

STERI-DINE DISINFECTANT

DIRECTIONS FOR USE:

Underwashing:

Use a clean towel for each cow. Wet in STERI-DINE DISINFECTANT solution, one-half ounce in 10 qts. (2 - 2½ gal.) warm water (100° F.) which provides 25 ppm titratable iodine.

Sanitizing Buildings and Equipment on the Farm:

To sanitize surfaces of buildings, equipment, or utensils which have previously been thoroughly cleaned, use 1 ounce of STERI-DINE DISINFECTANT in 5 gallons of water. Spray or swab solution on surfaces to be sanitized. Allow to drain dry without rinsing.

Sanitizing Poultry Drinking Water:

Add 1 ounce of STERI-DINE DISINFECTANT to every 10 gallons of drinking water. The regular use in the drinking water also keeps the waterers free of slime and mineral deposits.

Food Plant Sanitization:

Use 1 ounce of STERI-DINE DISINFECTANT in each 5 gallons of water as the final sanitizing rinse on previously-cleaned food-processing equipment and utensils. Drain, but do not rinse. When used at this dilution (1:640), STERI-DINE DISINFECTANT does not require a final potable water rinse, as prescribed in Federal Food Additive Regulation 121.2547.

Shoe Bath:

To help prevent tracking disease organisms into poultry houses, farrowing houses, and hog barns, place a shoe bath inside the doorway, containing 3 ounces of STERI-DINE DISINFECTANT per gallon of water. After scraping shoes outside doorway, stand in shoe bath for 30 seconds prior to entering building interior. Change shoe bath daily.

Deodorant:

STERI-DINE DISINFECTANT destroys many odors as it sanitizes and disinfects. For general deodorant applications (garbage pails, refuse containers, etc.), swab or spray on a solution of 1 ounce of disinfectant per gallon of water.

Cleaning and Disinfecting Buildings and Equipment on the Farm:

BEFORE PROCEEDING AS INDICATED BELOW, remove all animals and feeds from premises, cars, boats, trucks, and other equipment. Remove all litter and manure from floors, walls, and surfaces of barns, pens, stalls, chutes, and other facilities and fixtures occupied or traversed by animals. Empty all troughs, racks, and other feeding and watering appliances, saturating all surfaces with STERI-DINE DISINFECTANT solution. Immerse all halters, ropes, and other types of equipment used in handling and restraining animals, as well as forks, shovels, and scrapers. Ventilate buildings, cars, boats and other closed spaces. Do not house livestock or employ equipment until treatment has been absorbed, set, or dried. All treated feed racks, mangers, troughs, automatic feeders, fountains, and waterers must be thoroughly rinsed with potable water prior to reuse.

THEN, clean and disinfect in one easy step with STERI-DINE DISINFECTANT. Use ½ ounce STERI-DINE DISINFECTANT per gallon water. Scrub surfaces to be cleaned and disinfected with a good brush or with a power sprayer. Start at the highest point of the building or equipment being cleaned, and work down. Let solution drain dry without rinsing.

STORAGE AND DISPOSAL

Storage:

Keep container closed when not in use. Do not store below 25° F. or above 100° F. for extended periods.

Disposal:

Do not contaminate water, food, or feed by storage or disposal, or cleaning of equipment. In case of spill, flood area with large quantity of water, washing to sewer, or collection vessel.

Wastes resulting from use of this product may be disposed of on site or at an approved waste disposal facility.

Do not reuse empty container. Triple rinse, puncture, and dispose of container in a sanitary landfill or by incineration.

FIRST AID:

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse.

If swallowed, drink promptly a large quantity of milk, egg whites gelatin solution or if these are not available, drink large quantities of water. Call a physician immediately.

NOTE TO PHYSICIAN:

Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression, and convulsions may be needed.

RINSE EMPTY CONTAINER THOROUGHLY WITH WATER AND DISCARD IT.

KEEP OUT OF REACH OF CHILDREN

DANGER

STATEMENT OF PRACTICAL TREATMENT (FIRST AID)

IF CONTACT WITH EYES OCCURS, flush with water for at least 15 minutes. Get prompt medical attention.

IF CONTACT WITH SKIN OCCURS, wash with plenty of soap and water.

IF SWALLOWED, drink large quantities of milk or gelatin solution, if these are not available; drink large quantities of water. DO NOT give vinegar or other acids. DO NOT induce vomiting. Get prompt medical attention.

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Corrosive, may cause severe skin and eye irritation or chemical burns to broken skin. Causes eye damage. Wear safety glasses or goggles and rubber gloves when handling this product. Wash after handling. Avoid breathing vapors. Vacate poorly ventilated areas as soon as possible. Do not return until strong odors have dissipated.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds or public water-ways unless in accordance with a NPDES permit. For guidance, contact the regional office of the U.S. Environmental Protection Agency.

PHYSICAL AND CHEMICAL HAZARDS:

STRONG OXIDIZING AGENT: Mix only with water according to label directions. Mixing this product with chemicals (e.g. ammonia, acids, detergents, etc.) or organic matter (e.g. urine, feces, etc.) will release chlorine gas which is irritating to eyes, lungs and mucous membranes.

STORAGE AND DISPOSAL: Store in a cool, dry area away from direct sunlight. In case of spill, flood area with large quantities of water. Rinse empty container thoroughly with water and discard by placing in trash collection or burying in an approved landfill. Product or rinsate that cannot be used, should be diluted with water and disposed of in a sanitary sewer. Do not contaminate food or feed by storage, disposal or cleaning of equipment.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling. Note: This product degrades with age. Use a chlorine test kit and increase dosage as necessary, to obtain the required level of available chlorine.

SANITATION OF NON-POROUS FOOD CONTACT SURFACES

RINSE METHOD- A solution of 100 ppm available chlorine may be used in the sanitizing solution if a chlorine test kit is available. Solutions containing an initial concentration of 100 ppm available chlorine must be tested and adjusted periodically to insure that the available chlorine does not drop below 50 ppm. Prepare a 100 ppm sanitizing solution by thoroughly mixing 1 oz. of the product with 10 gallons of water. If no test kit is available, prepare a sanitizing solution by thoroughly mixing 2 oz. of this product with 10 gallons of water to provide approximately 200 ppm available chlorine by weight.

Clean equipment surfaces in the normal manner. Prior to use, rinse all surfaces thoroughly with the sanitizing solution, maintaining contact with the sanitizer for at least 2 minutes. If solution contains less than 50 ppm available chlorine, as determined by a suitable test kit, either discard the solution or add sufficient product to reestablish a 200 ppm residual. Do not rinse equipment with water after treatment and do not soak equipment overnight.

Sanitizers used in automated systems may be used for general cleaning but may not be re-used for sanitizing purposes.

CLEAN-IN-PLACE METHOD- Thoroughly clean equipment after use. Prepare a volume of 200 ppm available chlorine sanitizing solution equal to 110% of volume capacity of the equipment by mixing the product in a ratio of 2 oz. product with 10 gallons of water. Pump solution through the system until the full flow is obtained at all extremities, the system is completely filled with the sanitizer and all air is removed from the system. Close drain valves and hold under pressure for at least 10 minutes to insure contact with all internal surfaces. Remove some cleaning solution from drain valve and test with a chlorine test kit. Repeat entire cleaning/sanitizing process if effluent contains less than 50 ppm available chlorine.

FARM PREMISES- Remove all animals, poultry, and feed from premises, vehicles, and enclosures. Remove all litter and manure from floors, walls and surfaces of barns, pens, stalls, chutes and other facilities occupied or transversed by animals or poultry. Empty all troughs, racks and other feeding and watering appliances. Thoroughly clean all surfaces with soap or detergent and rinse with water. To disinfect, saturate all surfaces with a solution of at least 1000 ppm available chlorine for a period of 10 minutes. A 1000 ppm solution can be made by thoroughly mixing 12 1/2 oz. of this product with 10 gallons of water. Immerse all halters, ropes and other types of equipment used in handling and restraining animals or poultry, as well as the cleaned forks, shovels and scrapers used for removing litter and manure. Ventilate building, cars, boats and other closed spaces. Do not house livestock or poultry or employ equipment until chlorine has been dissipated.

The sales manager said it is the same label.

FRM-CHLOR

Active Ingredient

Sodium dichloro-s-triazinetriene dihydrate..... 28%
(provides 15.8% available chlorine)

Inert Ingredients 72%

DANGER

KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. May cause severe eye irritation. Do not get in eyes or on skin. Do not breathe dust.

FIRST AID: If swallowed: feed gruel or cooked cereal followed by olive oil or cooking oil. Call physician. In case of personal contact: remove excess material and flush skin or eyes with fresh water for at least 15 minutes. For eyes get medical attention.

Rinse empty container thoroughly with water and discard it. See side panel for use directions.

SOLUBLE CHLORINE BEARING POWDER

EPA Reg. No. 48211-69-10366 • EPA Est. No. 10366-Mo-1

Sold by:

FRM CHEM, INC.

P. O. Box 207, Washington, MO. 63090

DIRECTIONS

"It is a violation of Federal Law to use this product in a manner inconsistent with its labeling."

FRM-CHLOR WASH SANITIZER is recommended for use in sanitizing dairy equipment, dishes, glasses, food processing equipment and utensils.

Dissolve 1 oz. of FRM-CHLOR WASH SANITIZER per 10 gal. of warm (125° F) water. This provides 100 ppm of available chlorine respectively. Clean and rinse items prior to sanitizing. Then dip the items to be sanitized in solution and hold for 2 or 3 minutes. LET AIR DRY. DO NOT RINSE. The same solution may be used in the feed tank in immersion or spray type machines providing 2 to 5 minutes contact time for sanitizing dishes, glasses, and food processing equipment and utensils.

The sanitizing solution should be used promptly after mixing. If the solution is allowed to stand or is reused and tests show the level of chlorine has not been maintained, additional FRM-CHLOR WASH SANITIZER should be added, to maintain a minimum concentration of 100 ppm available chlorine.

STORAGE AND DISPOSAL:

Storage:

Store in a cool, dry, well ventilated area. Moisture contamination may liberate irritating and hazardous chlorine containing gases. Oxidizing material: Do not mix with other chemicals. Contact with organic matter may cause fire.

Decomposes at 350-475° F with liberation of harmful gases. In case of decomposition, if possible isolate container in open air or well ventilated area. Flood with large volume of water if necessary.

Disposal:

Do not reuse empty container. Rinse empty container thoroughly. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public water. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product as specified on this label.

Net Weight 25 Lbs.

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. BRITE SAN 75 is designed specifically for hospitals, nursing homes, and other health care institutions, schools, food processing plants, dairies, restaurants, bars, and institutions where sanitization and deodorization is of prime importance. When used as directed, BRITE SAN 75 is formulated to disinfect pre-cleaned non-porous surfaces; walls, floors, sink tops, countertops, bathing areas, lavatories, bed frames, chairs, garbage pails, garbage pails, stainless steel surfaces, plastic surfaces, metal surfaces and telephones. BRITE SAN 75 deodorizes those areas which generally are hard to keep fresh smelling, such as garbage storage areas, empty garbage bins and cans, pet areas, and other areas prone to odors caused by microorganisms. In addition BRITE SAN 75 will sanitize previously cleaned and rinsed non-porous food contact surfaces such as food processing equipment, dairy equipment, food utensils, dishes, silverware, glasses, sink tops, countertops and refrigerated storage and display equipment.

BRITE SAN 75 is not for use on medical device surfaces.

DISINFECTANT - To disinfect pre-cleaned, non-porous surfaces, apply BRITE SAN 75 with a cloth, mop, hand pump, trigger sprayer or low pressure coarse spray device so as to wet all surfaces thoroughly. Allow treated surfaces to remain wet for 10 minutes. Prepare a fresh solution for each use or when use solution becomes visibly dirty.

GENERAL DISINFECTION - Add 2 ounces BRITE SAN 75 per 4 gallons of water for effective disinfection against *Staphylococcus aureus* and *Salmonella choleraesuis*.

HOSPITAL DISINFECTION - Add 3.5 ounces BRITE SAN 75 per 4 gallons of water for effective disinfection against *Pseudomonas aeruginosa*.

FUNGICIDAL ACTIVITY - Follow DISINFECTION directions. At the 2 ounces per gallon of water BRITE SAN 75 is fungicidal against the pathogenic fungi, *Trichophyton mentagrophytes* (Athlete's Foot fungus) when used as directed on hard surfaces found in bathrooms, shower stalls, locker rooms, exercise facilities or other clean, hard, non-porous surfaces commonly contacted by bare feet.

SANITIZATION - Recommended for use in restaurants, dairies, food processing plants and bars. When used as directed BRITE SAN 75 is an effective sanitizer against *Saccharicola coli* and *Staphylococcus aureus*. Remove all gross food particles and soil from areas which are to be sanitized with a good detergent, pre-rinse, pre-soak or pre-scrub treatment. Rinse with a potable water rinse. To sanitize pre-cleaned and potable water rinsed, non-porous, food contact surfaces, prepare a 150 ppm active quaternary solution by adding 1 ounce of BRITE SAN 75 per 4 gallons water. Surfaces should remain wet for at least 1 minute followed by adequate draining and air drying. Fresh solution should be prepared daily or when solution becomes visibly dirty. For mechanical application, used solution may not be reused for sanitizing applications. To sanitize immobile items such as tanks, chopping blocks, and counter tops, sink tops, refrigerated storage and display equipment, flood the area with a 150 ppm active quaternary solution for at least 60 seconds making sure to wet all surfaces completely, followed by adequate draining and air drying. To sanitize mobile items such as drinking glasses, eating and cooking utensils, and other similarly sized food processing equipment, immerse in a 150 ppm active quaternary solution for at least 60 seconds making sure to immerse completely, followed by removal from use dilution, adequate draining and air drying. When used for sanitization of previously cleaned food equipment or food contact items, limit the active quaternary to 150 ppm.

NON-POTABLE WATER RINSE IS REQUIRED. BRITE SAN 75 is an effective sanitizer when diluted in water up to 1000 ppm hardness (as CaCO₃).

DIRECTIONS FOR USE

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER

KEEP OUT OF REACH OF CHILDREN

CORROSIVE. Causes irreversible eye damage and skin burns. May be fatal if absorbed through skin. Harmful if swallowed. Harmful if inhaled. Avoid breathing spray mist. Do not get in eyes, on skin or on clothing. Wear goggles or face shield, rubber gloves and protective clothing when handling. Wash thoroughly with soap and water after handling and before eating, drinking or using tobacco. Remove contaminated clothing and wash before reuse.

FIRST AID

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

NOTE TO PHYSICIAN

Probable mucosal damage may contraindicate the use of gastric lavage.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

STORAGE AND DISPOSAL

DO NOT CONTAMINATE WATER, FOOD, OR FEED BY STORAGE OR DISPOSAL.

PESTICIDE STORAGE - Store in a dry place no lower in temperature than 50 F or higher than 120 F.

CONTAINER DISPOSAL - Do not reuse empty bottle. Wrap bottle and put in trash.

PESTICIDE DISPOSAL - Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or residue is a violation of Federal Law. If these wastes cannot be disposed of according to label instructions contact your State Pesticide or Environmental Control Agency, or the Hazardous waste representative at the nearest EPA Regional Office for guidance.

CLEANS, DEODORIZES, DISINFECTS

ON THE SPOT

JOHNNY

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Johnny On The Spot is designed to clean, disinfect, and deodorize toilet bowls and urinals. When used as directed, this formulation exhibits effective disinfection against *Salmonella choleraesuis*, *Staphylococcus aureus* and *Pseudomonas aeruginosa* in addition to preventing odors caused by microorganisms.

DISINFECTION-For gross filth or heavy soil, a pre-cleaning step is required for disinfecting.

To disinfect toilet bowls, flush toilet and direct 4 ounces of Johnny On The Spot on the sides of the bowl and under the rim, letting it run down into the water. Let stand a few minutes, then swab bowl completely using a scrub brush or toilet mop, making sure to get under the rim. Let stand for 10 minutes and flush.

For badly stained toilet bowls, flush toilet and use a toilet mop to push water from the bowl over the tap. Press swab mop against bowl to remove excess water. Direct 4 ounces of Johnny On The Spot on to the sides of the bowl and under the rim, letting it run down. Allow sufficient time for product to cover entire surface of bowl for maximum cleaning. Swab bowl completely using a scrub brush or toilet mop, making sure to get under the rim. Let stand for 10 minutes and flush.

To disinfect urinals, flush urinal and direct 4 ounces of Johnny On The Spot on to the sides, allowing enough time for complete coverage of the surfaces. Using a scrub brush or toilet mop, scrub urinal surfaces completely. Let stand for 10 minutes and flush.

EFFICACY TESTS HAVE DEMONSTRATED THAT JOHNNY ON THE SPOT IS AN EFFECTIVE BACTERICIDE, IN WATER UP TO 400 PPM HARDNESS (AS CaCO3) IN THE PRESENCE OF ORGANIC SOIL (5% BLOOD SERUM).

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER

KEEP OUT OF REACH OF CHILDREN. CORROSIVE. Causes reversible eye damage and protective eye damage and skin irritation. Harmful if absorbed through skin or inhaled. Do not get in eyes, on skin or on clothing. Wear safety glasses, rubber gloves and protective clothing. Avoid breathing vapors. Remove contaminated clothing and wash clothing before reuse. Wash thoroughly with soap and water after handling.

FIRST AID

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

IF IN EYES: Hold eye open and rise slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

NOTE TO PHYSICIAN Probable mucosal damage may contraindicate the use of gastric lavage.

This pesticide is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

STORAGE AND DISPOSAL

DO NOT CONTAMINATE WATER, FOOD, OR FEED BY STORAGE OR DISPOSAL.

CONTAINER DISPOSAL - Do not reuse empty container. Triple rinse empty container with water. Return metal drum then offer for reconditioning or puncture and dispose of in a sanitary landfill, or by other procedures approved by State and Local Authorities. Plastic containers may be disposed of in a sanitary landfill, incinerated, or if allowed by local authorities, by burning. If burned, stay out of smoke.

For containers 1 gallon or less: Do not reuse empty container (bottle, can, bucket, spray mixture, or rinse as a violation of Federal Law. If these wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinse is a violation of Federal Law. If these wastes cannot be disposed of according to label instructions contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

PESTICIDE DISPOSAL - Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinse is a violation of Federal Law. If these wastes cannot be disposed of according to label instructions contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Brite San 32 is a phosphate free formulation designed to provide effective cleaning, deodorizing and disinfection for nursing homes, schools, hotels and restaurants, where housekeeping is of prime importance in controlling cross contamination from treated surfaces. Brite San 32 when used as directed, is formulated to disinfect the following hard, non-porous, inanimate, environmental surfaces: floors, walls, metal surfaces, glazed porcelain, glazed ceramic tile, plastic surfaces, vanity tops, shower stalls, bathtubs and cabinets. For larger areas such as operating rooms and patient care facilities, this product is designed to provide both general cleaning and disinfecting. Brite San 32 deodorizes those areas which generally are hard to keep fresh smelling, such as garbage storage areas, empty garbage bins and cans, toilet bowls, and other areas which are prone to odors caused by microorganisms.

Brite San 32 is not for use on medical device surfaces.

Brite San 32 is formulated to a neutral pH and will not dull high-gloss floor finishes with repeated use.

GENERAL CLEANING - Apply Brite San 32 to soiled area with a mop, cloth, sponge, or hand pump trigger sprayer. Brite San 32 can be diluted at 4 ounces per gallon or applied at full strength. Thoroughly wet soiled surfaces and scrub as necessary. Rinse surface with potable water and wipe dry with a dry paper towel or lint-free cloth.

DISINFECTION - For heavily soiled areas, a pre-cleaning step is required. Prepare a fresh solution for each use. To disinfect inanimate, hard, non-porous surfaces add 4 ounces Brite San 32 per gallon of water. Apply solution to mop, cloth, sponge, or hand pump trigger sprayer so as to wet all surfaces thoroughly. Allow to remain wet for 10 minutes, then remove excess liquid.

TO DISINFECT TOILET BOWLS - Remove gross filth or soils from surfaces with bowl brush. Add 4 ounces Brite San 32 to the bowl water. Swab the bowl completely using a scrub brush or toilet mop, making sure to get under the rim. Let stand for 10 minutes and flush.

DEODORIZATION - To deodorize, apply Brite San 32 as indicated under the heading **DISINFECTION**.

BACTERICIDAL ACTIVITY - At the 4 ounces per gallon dilution Brite San 32 demonstrates effective disinfectant activity against the organisms: *Salmonella choleraesuis* subsp. *choleraesuis*, *Salmonella choleraesuis* subsp. *choleraesuis* serotype typhi, *Salmonella choleraesuis* subsp. *choleraesuis* serotype typhimurium, *Salmonella choleraesuis* subsp. *choleraesuis* serotype pullorum, *Staphylococcus aureus* (clinical isolate), *Bordetella bronchiseptica*, *Corynebacterium ammoniagenes*, *Escherichia coli*, *Escherichia coli* (clinical isolate), *Pseudomonas aeruginosa* RD 10, *Klebsiella pneumoniae* subsp. *pneumoniae*, *Shigella flexneri* Type 2B *Shigella dysenteriae*, *Enterobacter cloacae*, *Enterobacter cloacae* (clinical isolate), *Enterobacter aerogenes*, *Enterococcus faecalis*, *Enterococcus faecalis* (clinical isolate), *Fusobacterium necrophorum*, *Lactobacillus casei* subsp. *rhamnosus*, *Listeria monocytogenes*, *Pasteurella multocida*, *Proteus vulgaris*, *Proteus mirabilis* ATCC 9921, *Proteus mirabilis* ATCC 25933, *Serratia marcescens*, *Staphylococcus aureus* subsp. *aureus*, *Staphylococcus epidermidis*, *Staphylococcus pyogenes* Group A, *Xanthomonas malleophilia* (clinical isolate), *Vancomycin resistant Enterococcus faecalis* (VRE), *tetracycline resistant Staphylococcus aureus* (MRSA) and *Vancomycin intermediate resistant Staphylococcus aureus* (VISA).

EFFICACY TESTS HAVE DEMONSTRATED THAT BRITE SAN 32 IS AN EFFECTIVE BACTERICIDE, AND VIRUCIDE IN WATER UP TO 400 PPM HARDNESS (AS CaCO3) IN THE PRESENCE OF ORGANIC SOIL (5% BLOOD SERUM)

VIRUCIDAL ACTIVITY - Brite San 32 when used on environmental, inanimate, hard non porous surfaces exhibits effective virucidal activity against HIV-1, HIV-2, Hepatitis B Virus (HBV), Hepatitis C Virus (HCV), Influenza A/Hong Kong, Vaccinia, Rotavirus, Pseudorabies, Herpes Simplex Type 1 (causative agent of fever blisters), Herpes Simplex Type 2 (genital disease), Bovine Rhinotracheitis, Feline Leukemia, Feline Plicoravirus, and Canine Distemper. Add 4 ounces of this product per gallon of water. For heavily soiled areas, a pre-cleaning step is required. Apply solution with a cloth, mop, sponge or hand pump trigger sprayer so as to wet all surfaces thoroughly. Allow the surface to remain wet for 10 minutes, the remove excess liquid.

KILLS HIV-1, HIV-2, HBV, AND HCV ON PRE-CLEANED ENVIRONMENTAL SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS in health care settings (hospitals, Nursing Homes) or other settings in which there is a likelihood of soiling of inanimate surfaces/objects with blood or body fluids, and in which the surfaces/objects likely to be soiled with blood or HIV-2 (associated with AIDS), Hepatitis B virus (HBV), and Hepatitis C virus (HCV).

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1, HIV-2, HBV, AND HCV OR SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS, PERSONAL PROTECTION: When handling items soiled with blood or body fluids use disposable latex gloves, gowns, masks, or eye coverings. **CLEANING PROCEDURES:** Blood and other body fluids must be thoroughly cleaned from surfaces and objects before application of Brite San 32. **CONTACT TIME:** Allow surface to remain wet for 10 minutes.

DISPOSAL OF INFECTIOUS MATERIALS: Blood and other body fluids should be autoclaved and disposed of according to local regulations for infectious waste disposal.

This product is not to be used as a terminal sterilant/high-level disinfectant on any surface or instrument that (1) is introduced directly into the human body either in contact with the bloodstream or normally sterile areas of the body, or (2) contact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

FIRST AID

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

If swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person. If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

NOTE TO PHYSICIAN

Probable mucosal damage may contraindicate the use of gastric lavage.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

DO NOT CONTAMINATE WATER, FOOD, OR FEED BY STORAGE OR DISPOSAL

PESTICIDE STORAGE - Store in a dry place no lower in temperature than 50 F or higher than 120 F.

CONTAINER DISPOSAL - Do not reuse empty container. Triple these empty container with water. Return metal drum or other reconditioning containers, by burning, if burned, stay out of smoke.

For containers 1 gallon or less: Do not reuse empty container (bottle, can, bucket). Wrap in newspaper and discard in trash.

PESTICIDE DISPOSAL - Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or residue is a violation of Federal law. If these wastes cannot be disposed of according to label instructions contact your State Pesticide or Environmental Control Agency, or the hazardous waste representative at the nearest EPA Regional Office for guidance.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with the labeling. Brite San 90 Detergent/Disinfectant cleaner is a phosphate free formulation designed to provide effective cleaning, deodorizing, sanitizing, and disinfection specifically for hospitals, nursing homes, schools, food processing plants, food service establishments, transportation terminals, office buildings, manufacturing facilities, lodging establishments, retail businesses and athletic/recreational facilities where housekeeping is of prime importance in controlling the hazard of cross contamination. Brite San 90 when used as directed, is formulated to disinfect/inactivate hard surfaces: floors, sink tops, toilet bowls, tubs, chairs, and telephones. For larger areas such as operating rooms, patient care facilities and restrooms, this product is designed to provide both general cleaning and disinfection. Brite San 90 deodorizer those areas which generally are hard to keep fresh smelling, such as garbage storage areas, empty garbage bins and cans, toilet bowls, and other areas prone to odors caused by microorganisms. In addition this product sanitizes previously cleaned and rinsed non-porous food contact surfaces such as tanks, chopping blocks, counter tops, draining glasses, and eating utensils. Brite San 90 is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body.

DISINFECTANT - To disinfect/inactivate hard, non-porous surfaces add 1 ounce Brite San 90 per gallon of water. Apply solution with a mop, cloth, sponge, or mechanical sprayer so as to wet all surfaces then remove excess liquid. For heavily soiled areas, a pre-cleaning step is required. Prepare a fresh solution for each use. To disinfect toilet bowls: flush toilet, add 1 ounce Brite San 90 directly to the bowl water. Swab the bowl completely using a scrub brush or toilet mop, making sure to get under the rim. Let stand for 10 minutes and flush. To disinfect food processing facilities: floor, walls, and storage areas, add 1 ounce Brite San 90 per gallon of water. For heavily soiled areas, a pre-cleaning step is required. Apply solution with a mop, cloth, sponge, or hand pump trigger sprayer so as to wet all surfaces thoroughly. Allow to remain wet for 10 minutes then remove excess liquid. Before using this product, food products and packaging materials must be removed from the area or carefully protected. After use, all surfaces in the area must be thoroughly rinsed with potable water.

Sanitization - To sanitize previously cleaned and rinsed non-porous food contact surfaces prepare a 200 ppm active quarternary solution by adding 1 ounce Brite San 90 to 2.5 gallons of water. To sanitize immobile items such as tanks, chopping blocks, and counter tops, flood the area with a 200 ppm active quarternary solution or apply with a cloth or sponge making sure to wet all surfaces completely for at least 60 seconds. Let air dry. Prepare a fresh solution for each use. To sanitize mobile items such as drinking glasses, and eating utensils, immerse in a 200 ppm active quarternary solution for at least 60 seconds making sure to immerse completely. Let air dry. Prepare a fresh solution daily or more frequently as soil organisms: salmonella choleraesuis, staphylococcus aureus, Escherichia coli, Pseudomonas aeruginosa, P. fluorescens, Klebsiella pneumoniae, Shigella dysenteriae, Enterobacter aerogenes, Staphylococcus aureus, Salmonella choleraesuis, Streptococcus pyogenes (Clinical Fresh eating Strain B120 M3) Broth/citric acid amphoteric, amphoteric amphoteric, Venocococcus faecalis, Streptococcus faecalis, Bacillus pasteurianus, Shigella

Bactericidal Activity - When diluted at the rate of 1 ounce per gallon of water, Brite San 90 exhibits effective disinfectant activity against the POTABLE WATER BACTERIA. Brite San 90 is an effective sanitizer when diluted in water up to 250 ppm hardness (as CaCO₃). When used for sanitation of previously cleaned food equipment or food contact items, Brite San 90 exhibits a quaternary to 200 ppm. NO

Mildewstat - To control mold and mildew on pre-cleaned, hard non-porous surfaces add 1 ounce of Brite San 90 per gallon of water. Apply solution with a cloth, mop, or sponge making sure to wet all surfaces completely. Let air dry, prepare a fresh solution for each use. Repeat application at weekly intervals or when mildew growth appears. At the 1 ounce per gallon dilution this product is also fungicidal against the xanthophyllon, Tichophyton mentitiphilae.

LACTIC TESTS HAVE DEMONSTRATED THAT BRITE SAN 90 IS AN EFFECTIVE BACTERICIDE, FUNGICIDE AND VIRUCIDE IN WATER UP TO 400 HARDNESS (AS CaCO₃) IN THE PRESENCE OF ORGANIC SOIL (5% BLOOD SERUM)
Virucidal Activity - Brite San 90 when used on environmental, inanimate hard non-porous surfaces at 1 ounce per gallon of water exhibits effectively virucidal activity against Influenza A2/Japan, Herpes Simplex Type 1 (causative agent of fever blisters), Adenovirus Type 2 (causative agent of upper respiratory infections), and Vaccinia virus (representative of the pox virus group).

PRECAUTIONARY STATEMENTS

DANGER, KEEP OUT OF REACH OF CHILDREN, CORROSIVE. Causes reversible eye damage and skin burns. Do not get in eyes, on skin or on clothing. Wear goggles or face shield, rubber gloves and protective clothing. Harmful or fatal if swallowed. Remove and wash contaminated clothing before re-use. Wash thoroughly with soap and water after handling.

FIRST AID
Have the product container or label with you when calling a poison control center or doctor, or going for treatment.
If in eyes: Hold eye open and rinse slowly and gently for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call poison control center or doctor for treatment advice.
If on skin or clothing: Take off contaminated clothing. Rinse skin with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
If swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by poison control center or doctor. Do not give anything by mouth to an unconscious person.
If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and aquatic invertebrates. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

NOTE TO PHYSICIAN
Probable mucosal damage may contraindicate the use of gastric lavage.

STORAGE AND DISPOSAL
DO NOT CONTAMINATE WATER, FOOD, OR FEED BY STORAGE OR DISPOSAL.
CONTAINER DISPOSAL - Do not reuse empty container. Trim trace empty container with water. Plastic containers may be disposed of in a sanitary landfill, incinerated, or allowed by local authorities, by burning. If burned, stay out of smoke.
STORAGE - Store in a dry place no lower in temperature than 50 F or higher than 120 F.

HAZARD STATEMENTS

HAZARD STATEMENTS: Blood and other body fluids should be uncloaked and disposed of according to local regulations for infectious waste disposal.
DISPOSAL OF EFFECTIVE MATERIALS: Blood and other body fluids should be uncloaked and disposed of according to local regulations for infectious waste disposal.
REMAIN WET FOR 10 MINUTES.
BLOOD AND OTHER BODY FLUIDS MUST BE THOROUGHLY CLEANED FROM SURFACES AND OBJECTS BEFORE APPLICATION OF BRITE SAN 90. CONTACT TIME: ALLOW SURFACE TO REMAIN WET FOR 10 MINUTES.
SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1 OR SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS: PERSONAL PROTECTION: When handling items soiled with blood or body fluids use disposable latex gloves, gowns, masks, or eye coverings. CLEANING PROCEDURES: (HIV-1) (associated with AIDS). Surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of human immunodeficiency virus Type 1 (HIV-1) (associated with AIDS).
Nursing Homes) or other settings in which there is a likelihood of contact of inanimate surfaces/objects with blood or body fluids, and in which the

BIG PINEY is a broad spectrum bactericide and fungicide for use in homes, schools, lodging establishments, transportation terminals, office buildings, manufacturing facilities, retail businesses and athletic/recreational facilities where housekeeping is of prime importance. This formulation provides effective cleaning, deodorization and disinfection of walls, floors, sink tops, toilet bowls, tables, chairs and telephones. When used as directed, this product will also deodorize those areas which generally are hard to keep fresh smelling, such as garbage pails, sink tops, and bathroom areas, including toilet bowls and urinals which are prone to odors caused by the growth of microorganisms. BIG PINEY may also be used as a general cleaner for areas where a fresh pine scent is desirable.

DISINFECTION - To disinfect previously cleaned inanimate, hard surfaces add 2 ounces of BIG PINEY per gallon of water. Apply solution with mop, cloth, sponge, or hand pump trigger sprayer so as to wet all surfaces thoroughly. Allow to remain wet for 10 minutes and then let air dry. For heavily soiled areas, a pre-cleaning step is required. Prepare a fresh solution for each use. To disinfect toilet bowls: pre-clean the bowl, flush toilet, add 2 ounces of BIG PINEY directly to the bowl water. Swab the bowl completely using a scrub brush or toilet mop, making sure to get under the rim. Let stand for 10 minutes and flush.

BACTERICIDAL ACTIVITY - When diluted at the rate of 2 ounces per gallon of water, BIG PINEY exhibits effective disinfectant activity against the organisms: Salmonella choleraesuis, Staphylococcus aureus, and Escherichia coli. **FUNGICIDAL ACTIVITY** - When diluted at the rate of 2 ounces per gallon of water, BIG PINEY is effective against the pathogenic fungi, Trichophyton mentagrophytes (Athlete's Foot Fungus), on hard surfaces found in bathrooms, shower stalls, locker rooms, exercise facilities or other clean, non-porous hard surfaces commonly contacted by bare feet.

DIRECTIONS FOR USE

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING

KEEP OUT OF REACH OF CHILDREN. Causes substantial but temporary eye injury and skin irritation. Do not get in eyes, on skin or on clothing. Wear protective eyewear (safety glasses). Harmful if swallowed. Wash thoroughly with soap and water after handling. Remove contaminated clothing before reuse.

FIRST AID

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

ENVIRONMENTAL HAZARDS

Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

STORAGE AND DISPOSAL

DO NOT CONTAMINATE WATER, FOOD, OR FEED BY STORAGE OR DISPOSAL.

PESTICIDE STORAGE - Store in a dry place no lower in temperature than 50 F or higher than 120 F. Do not reuse empty container. Triple rinse empty container with water. Plastic containers may be disposed of in a sanitary landfill, incinerated, or if allowed by local authorities, by burning. If burned, stay out of smoke.

PESTICIDE DISPOSAL - Do not reuse empty container (bottle, can, bucket). Wrap container and put in trash. For containers 1 gallon or less: Do not reuse empty container. Improper disposal of excess pesticide, spray mixture, or rinseate is a violation of Federal Law. If these wastes cannot be disposed of according to label instructions contact your State Pesticide or Environmental Control Agency, or the Hazardous waste representative at the nearest EPA Regional Office for guidance.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Brite San 45 Detergent/Disinfectant is a phosphate free formulation designed to provide effective cleaning, deodorizing and disinfection specifically for hospitals, nursing homes, schools, food processing plants, food service establishments and other institutions where housekeeping is of prime importance in controlling the hazards of cross contamination. Brite San 45 Detergent/Disinfectant when used as directed, is formulated to disinfect inanimate hard surfaces such as walls, floors, sink bowls, toilet bowls, tables, chairs, telephones, and bed frames. For larger areas such as operating rooms, patient care facilities and restrooms, Brite San 45 Detergent/Disinfectant is designed to provide both general cleaning and disinfecting. Brite San 45 Detergent/Disinfectant deodorizes those areas which generally are hard to keep fresh smelling, such as garbage storage areas, empty garbage bins and cans, toilet bowls, and other areas prone to odors caused by microorganisms. **DISINFECTION** - To disinfect hard inanimate surfaces add 2 ounces Brite San 45 Detergent/Disinfectant per gallon of water. Apply solution to mop, cloth, sponge, or mechanical sprayer so as to wet all surfaces thoroughly. Allow to remain wet for 10 minutes and then let air dry. For heavily soiled areas, a pre-cleaning step is required. Prepare a fresh solution for each use. To disinfect toilet bowls, flush toilet, add 2 ounces Brite San 45 Detergent/Disinfectant directly to the bowl water. Swab the bowl completely using a scrub brush or toilet mop, making sure to get under the rim. Let stand for 10 minutes and flush. **BACTERICIDAL ACTIVITY** - When diluted at the rate of 2 ounces per gallon of water, Brite San 45 Detergent/Disinfectant exhibits disinfectant activity against the organisms: *Salmonella choleraesuis*, *Staphylococcus aureus*, *Escherichia coli*, *Pseudomonas aeruginosa* PRD 10, *Klebsiella pneumoniae*, *Salmonella schottmulleri*, *Streptococcus salivarius*, *Brevibacterium ammonioligens*, *Streptococcus faecalis*, *Shigella dysenteriae*, *Enterobacter aerogenes* and meets all requirements for hospital use. **MILDEWSTAT** - To control mold and mildew on pre-cleaned, hard, non-porous surfaces add 2 ounces of Brite San 45 Detergent/Disinfectant per gallon of water. Apply solution with a cloth, mop, or sponge making sure to wet all surfaces completely. Let air dry, prepare a fresh solution for each use. Repeat application at weekly intervals or when mildew growth appears. **FUNGICIDAL ACTIVITY** - At the 2 ounces per gallon dilution Brite San 45 Detergent/Disinfectant is also fungicidal against the pathogenic fungi, *Trichophyton mentagrophytes*. **EFFICACY TESTS HAVE DEMONSTRATED THAT BRITE SAN 45 DETERGENT/DISINFECTANT IS AN EFFECTIVE BACTERICIDE, AND FUNGICIDE IN THE PRESENCE OF ORGANIC SOIL (5% BLOOD/SEBUM)** **VIROCIDAL* ACTIVITY** - Brite San 45 Detergent/Disinfectant when used on environmental, inanimate hard surfaces at 2 ounces per gallon of water exhibits effective virucidal activity against influenza A2/Japan (representative of the common flu virus), Herpes Simplex Type 1 (causative agent of fever blisters), Adenovirus Type 2 (causative agent of upper respiratory infections), and Vaccinia virus (representative of the pox virus group).

PRECAUTIONARY STATEMENTS

HAZARD TO HUMANS AND DOMESTIC ANIMALS
DANGER
KEEP OUT OF REACH OF CHILDREN. CORROSIVE. Causes severe eye and skin damage. Do not get in eyes, on skin or on clothing. Wear goggles of face shield and rubber gloves when handling. Harmful if swallowed. Avoid contamination of food.
STATEMENT OF PRACTICAL TREATMENT
In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse. If swallowed, drink egg whites or gelatin solution, or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.
NOTE TO PHYSICIAN
Probable mucosal damage may contraindicate the use of gastric lavage.
STORAGE AND DISPOSAL
STORAGE - Store in a dry place no lower in temperature than 59°F or higher than 129°F.
CONTAINER DISPOSAL - Do not reuse empty container. Triple rinse empty container with water. Plastic containers may be disposed of in a sanitary landfill, incinerated, or if allowed by local authorities, by burning. If burned, stay out of smoke.

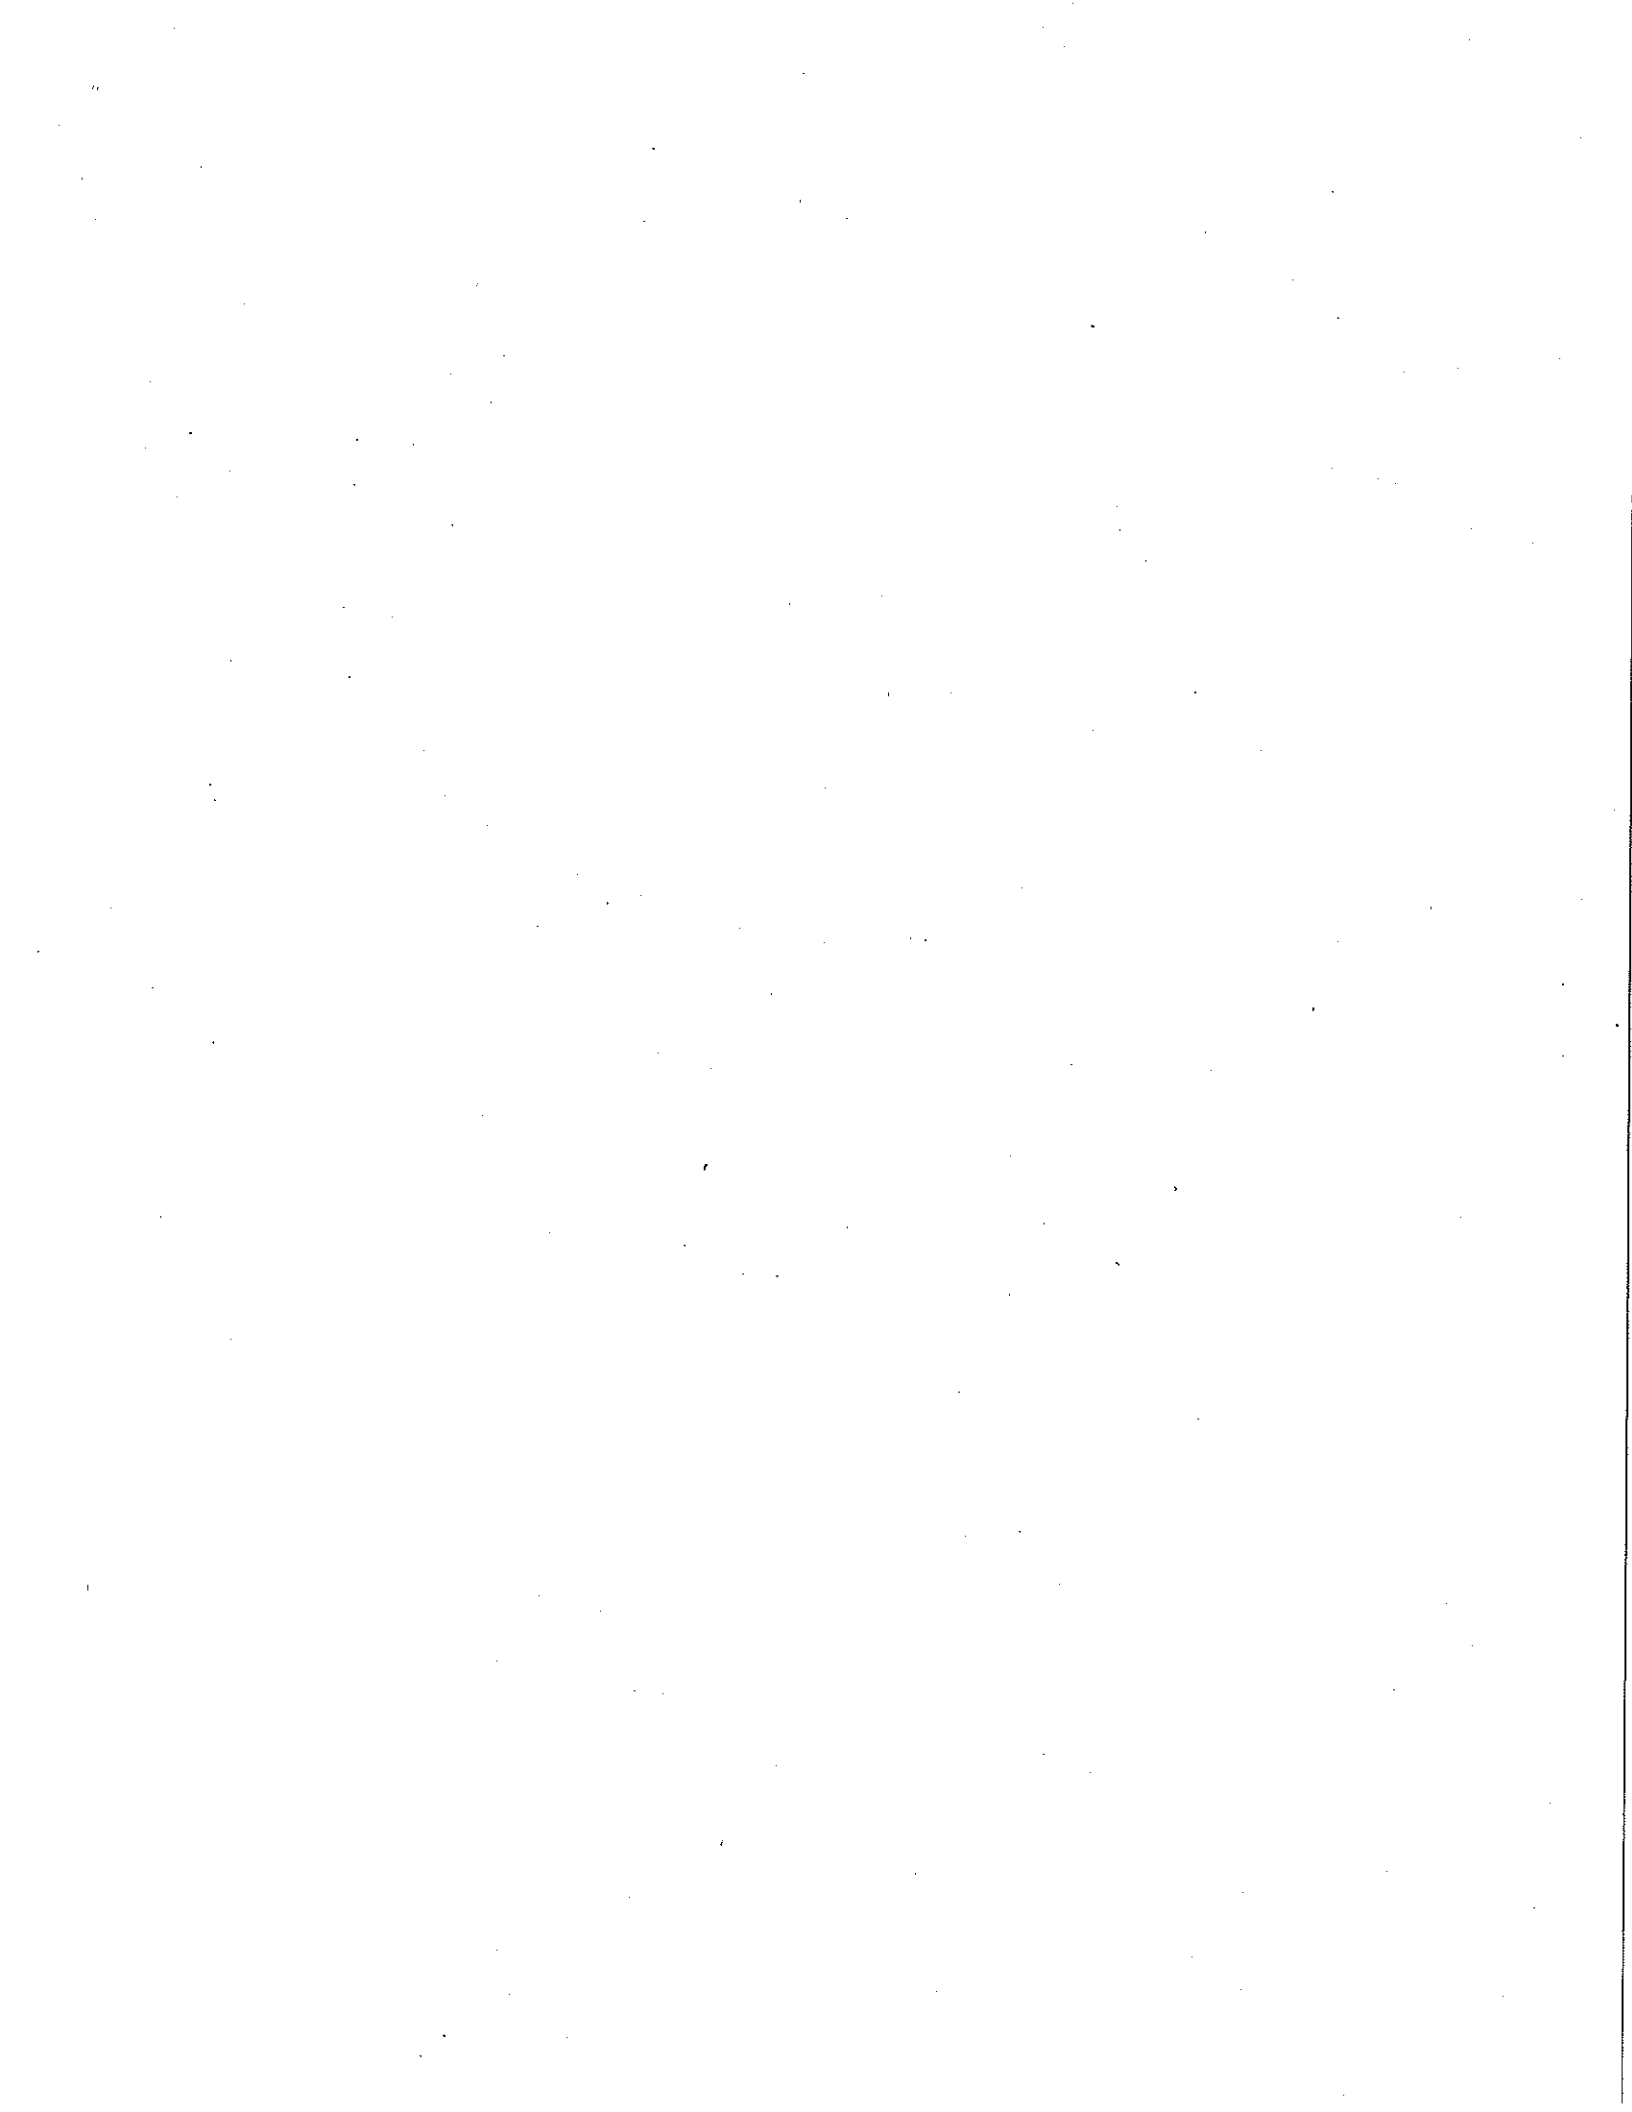

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1 OF SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS.
PERSONAL PROTECTION: When handling items soiled with blood or body fluids use disposable latex gloves, gowns, masks, or eye coverings.
CLEANING PROCEDURES: Blood and other body fluids must be thoroughly cleaned from surfaces and objects before application of Brite San 45 Detergent/Disinfectant.
CONTACT TIME: Allow surface to remain wet for 10 minutes.
DISPOSAL OF INFECTIOUS MATERIALS: Blood and other body fluids should be autoclaved and disposed of according to local regulations for infectious waste disposal.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Brite San 45 Detergent/Disinfectant is a phosphate free formulation designed to provide effective cleaning, deodorizing and disinfection specifically for hospitals, nursing homes, schools, food processing plants, food service establishments and other institutions where housekeeping is of prime importance in controlling the hazard of cross contamination. Brite San 45 Detergent/Disinfectant when used as directed, is formulated to disinfect inanimate hard surfaces such as walls, floors, sink tops, toilet bowls, tables, chairs, telephones, and bed frames. For larger areas such as operating rooms, patient care facilities and restrooms, this product is designed to provide both general cleaning and disinfecting. Brite San 45 Detergent/Disinfectant deodorizes those areas which generally are hard to keep fresh smelling, such as garbage storage areas, empty garbage bins and cans, toilet bowls, and other areas prone to odors caused by microorganisms.

DISINFECTION - To disinfect hard inanimate surfaces add 2 ounces Brite San 45 Detergent/Disinfectant per gallon of water. Apply solution to mop, cloth, sponge, or mechanical sprayer so as to wet all surfaces thoroughly. Allow to remain wet for 10 minutes and then let air dry. For heavily soiled areas, a pre-cleaning step is required. Prepare a fresh solution for each use. To disinfect toilet bowls, flush toilet, add 2 ounces Brite San 45 Detergent/Disinfectant directly to the bowl water. Swab the bowl completely using a scrub brush or toilet mop, making sure to get under the rim. Let stand for 10 minutes and flush. **BACTERICIDAL ACTIVITY** - When diluted at the rate of 2 ounces per gallon of water, Brite San 45 Detergent/Disinfectant exhibits disinfectant activity against the organisms: *Salmonella choleraesuis*, *Staphylococcus aureus*, *Escherichia coli*, *Pseudomonas aeruginosa*, *PRD 10*, *Klebsiella pneumoniae*, *Salmonella schottmuelleri*, *Streptococcus salivarius*, *Brevibacterium ammoniagenes*, *Streptococcus faecalis*, *Shigella dysenteriae*, *Enterobacter aerogenes*, and meets all requirements for hospital use.

MILDEWSTAT - To control mold and mildew on pre-cleaned, hard non-porous surfaces add 2 ounces of Brite San 45 Detergent/Disinfectant per gallon of water. Apply solution with a cloth, mop, or sponge making sure to wet all surfaces completely. Let air dry, prepare a fresh solution for each use. Repeat application at weekly intervals or when mildew growth appears.

FUNGICIDAL ACTIVITY - At the 2 ounces per gallon dilution Brite San 45 Detergent/Disinfectant is also fungicidal against the pathogenic fungi, *Trichophyton mentagrophytes*.

EFFICACY TESTS HAVE DEMONSTRATED THAT BRITE SAN 45 DETERGENT/DISINFECTANT IS AN EFFECTIVE BACTERICIDE, AND FUNGICIDE IN THE PRESENCE OF ORGANIC SOIL (5% BLOOD SERUM)

VIRUCIDAL ACTIVITY - Brite San 45 Detergent/Disinfectant when used on environmental, inanimate hard surfaces at 2 ounces per gallon of water exhibits effective virucidal activity against Influenza AZ/Japan (representative of the common flu virus), Herpes Simplex Type 1 (causative agent of fever blisters), Adenovirus Type 2 (causative agent of upper respiratory infections), and Vaccinia virus (representative of the pox virus group).

KILLS HIV ON PRE-CLEANED ENVIRONMENTAL SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS

In health care settings (hospitals, Nursing Homes) or other settings in which there is a likelihood of soiling of inanimate surfaces/objects with blood or body fluids, and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of human immunodeficiency virus Type 1 (HIV-1) (associated with AIDS).

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1 OF SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS.

PERSONAL PROTECTION: When handling items soiled with blood or body fluids, use disposable latex gloves, gowns, masks, or eye coverings. **CLEANING PROCEDURES:** Blood and other body fluids must be thoroughly cleaned from surfaces and objects before application of Brite San 45 Detergent/Disinfectant. **CONTACT TIME:** Allow surface to remain wet for 10 minutes. **DISPOSAL OF INFECTIOUS MATERIALS:** Blood and other body fluids should be removed and disposed of according to local regulations for infectious waste disposal.

If the shipment moves between two ports by a carrier by water the law requires that the bill of lading shall state whether it is "carrier's or shipper's weight".

NOTE: Where the rate is dependent on value, shippers are required to state specifically in writing the agreed or declared value of the property.

Subject to Section 7 of conditions, if this shipment is to be delivered to the consignee without recourse on the consignor, the consignor shall sign the following statement:

Freight charges are prepaid unless marked collect.

Shipper's imprint in lieu of stamp: not a part of bill of lading approved by the Interstate Commerce Commission.

The agreed or declared value of the property is hereby specifically stated by the shipper to be not exceeding \$ _____ per _____

The carrier shall not make delivery of this shipment without payment of freight and all other lawful charges.

Check box if charges are collect.

(Signature of Consignor)

If shipment moves between two ports by a carrier by water, law requires that the bill of lading shall state whether it is shipper's or shipper's weight.

NOTE: Where the rate is dependent on value, shippers are required to state specifically in writing the agreed or declared value of the property. The agreed or declared value of the property is hereby specifically stated by the shipper to be not exceeding \$ _____ per _____

Subject to Section 7 of conditions, if this shipment is to be delivered to the consignee without recourse on the consignor, the consignor shall sign the following statement: The carrier shall not make delivery of this shipment without receipt of freight and all other lawful charges.

Freight charges are prepaid unless marked collect. Check box if charges are collect.

(Signature of Consignor)

I hereby certify that the above named materials are properly classified, described, packaged, marked and labeled, and are in proper condition for transportation, according to the applicable regulations of the Department of Transportation.

*If the shipment moves between two ports by a carrier by water the law requires that the bill of lading shall state whether it is "carrier's or shipper's weight".

NOTE: Where the rate is dependent on value, shippers are required to state specifically in writing the agreed or declared value of the property.

The agreed or declared value of the property is hereby specifically stated by the shipper to be not exceeding

Subject to Section 7 of conditions, if this shipment is to be delivered to the consignee without recourse on the consignor, the consignor shall sign the following statement:

The carrier shall not make delivery of this shipment without payment of freight and all other lawful charges.

Freight charges are prepaid unless marked collect.

Check box if charges are collect.

†Shipper's imprint in lieu of stamp: not a part of bill of lading approved by the Interstate Commerce Commission.

Doc. 122105 F4. 7101
M/R 12/21/05

**TRACEABILITY
SHELF LIFE AND PRODUCT CODE IDENTIFICATION**

The Code Stamp is a small price tag like self adhesive sticker applied to a lower corner of the Product label.

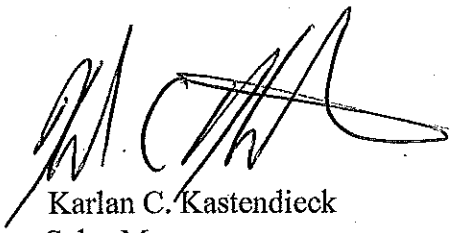

Doc. # 12/21/05
PEI 122105F447101

FRM Chem Inc. P.O. Box 207 Washington, MO. 63090

Per Inspectors Request PEI # 122105F447101

- 1.) Please see attached for explanation of manufacturing code.
- 2.) Samples of FRM Chlor 1250 and Steridine were taken from salable pesticides in inventory and ready for shipment.
- 3.) All other Pesticides listed and not sampled because product is produced to customer order.
- 4.) All containers less than 1 gallon are packaged in child resistant closures. Filling work orders show types of closures used.
- 5.) Paper label not available for FRM Chlor 1250 because product is packaged in silk screened 1 gallon container.

12/21/05
Karlan C. Kastendieck
Sales Manager
FRM Chem Inc.

STATEMENT

I, Karlanc. Kostendick under affirmation say:

I am a sales manager and am responsible for the daily operations for FRM CHEM INC. The company was incorporated in St. Louis in 1969. FRM CHEM is a sister company of Advanced Product Technologies, we are still operating as FRM CHEM INC. We have label agreements with STEPAN and INTERCON of St. Louis. We do not have any EUP permits with EPA. The manufacturing code is product # followed by date and expiration date. Example Product # 2012215 month/day/year. We primarily make soaps and detergents and sanitizers, for industrial use. There are five sales reps and we do not do any advertising, we have a 29,000 sq ft warehouse with @ 5000 sq ft devoted to pesticide. We do not maintain any disposal records. We have our own approved sewer treatment facility that is inspected by DNR. We produce no devices. Anything we produce in less than one gallon has a CRP cap. Production records show it filled with CRP. Quality control samples are kept here for two years. Products sampled today are taken from inventory packed, labeled and sealed for shipment.

I hereby affirm that the above is true to the best of my knowledge.

THIS SIDE UP

USE NO HOOKS

STERIDINE DISINFECTANT

FOR UDDERWASHING; FOR CLEANING, DISINFECTING
AND SANITIZING ANIMAL HOUSING AND EQUIPMENT;
FOR SANITIZING POULTRY DRINKING WATER; FOR USE AS A
SHOE BATH PRIOR TO ENTERING BARN AND POULTRY HOUSES;
AND AS A DEODORANT; FOR SANITIZING FOOD-PROCESSING EQUIPMENT.

STERIDINE DISINFECTANT is TUBERCULOCIDAL at a dilution of 3 ounces of STERIDINE DISINFECTANT in 1 gallon of water. STERIDINE DISINFECTANT destroys hog cholera virus. STERIDINE DISINFECTANT is effective against many other bacteria and viruses. STERIDINE DISINFECTANT has its own built-in deodorant. (When the amber color disappears a fresh solution should be prepared.)

INGREDIENTS:
SODIUM POLYETHYLENEGLYCOL-iodine complex.

Manufactured by: FRM-CHEM, INC., P.O. Box 207, Washington, MO. 63090

EST. NO. 82170-10366 EPA EST. NO. 10366-MO-1 NET CONTENTS: 5.0 LITERS

Keep Out of The Reach of Children
DANGER: CORROSIVE. CAUSES EYE DAMAGE AND SKIN IRRITATION.
See MSDS for handling. Protect eyes and skin when handling. Harmful if swallowed. See MSDS for first aid.

STERI-DINE DISINFECTANT

DIRECTIONS FOR USE:

Udder Washing:

Use a one-half gallon of STERI-DINE DISINFECTANT solution, one-half ounce in 10 quarts (2.25 gal) of warm water (100°F), which provides 25 parts per million of active ingredient.

Sanitizing Buildings and Equipment on the Farm:

To sanitize surfaces of buildings, equipment, or utensils which have previously been thoroughly cleaned, use 1 ounce of STERI-DINE DISINFECTANT in 5 gallons of water. Spray or swab solution on surfaces to be sanitized. Allow to drain dry without rinsing.

Sanitizing Poultry Drinking Water:

Add 1 ounce of STERI-DINE DISINFECTANT to every 10 gallons of drinking water. The regular use in the drinking water also keeps the waterers free of slime and prevent deposits.

Food Plant Sanitization:

Use 1 ounce of STERI-DINE DISINFECTANT in each 5 gallons of water as the final sanitizing step on previously cleaned food-processing equipment and utensils. Do not use for food. When used at this dilution (1:600), STERI-DINE DISINFECTANT does not require a final potable water rinse, as prescribed in Federal Food Additive Regulation 12.257.

Shoe Bath:

To help prevent tracking disease organisms into poultry houses, farrowing houses, and hog barns, place a shoe bath inside the doorway, containing 3 ounces of STERI-DINE DISINFECTANT per gallon of water. After scrubbing shoes outside doorway, stand in shoe bath for 30 seconds prior to entering building interior. Change shoe bath daily.

Deodorant:

STERI-DINE DISINFECTANT destroys many odors as it sanitizes and disinfects. For general deodorant applications (garbage pails, refuse containers, etc.), rub or spray on a solution of 1 ounce of disinfectant per gallon of water.

Cleaning and Disinfecting Buildings and Equipment on the Farm:

BEFORE PROCEEDING AS INDICATED BELOW, remove all animals and feeds from premises, cars, boats, trucks, and other equipment. Remove all litter and manure from floors, walls, and surfaces of barns, pens, stalls, chutes, and other facilities and fixtures occupied or traversed by animals. Empty all troughs, racks, and other feeding and watering appliances, saturating all surfaces with STERI-DINE DISINFECTANT solution. Immerse all harrows, ropes, and other types of equipment used in handling and restraining animals, as well as forks, shovels, and scrapers. Ventilate buildings, cars, boats and other closed spaces. Do not house livestock or employ equipment until treatment has been absorbed, set, or dried. All treated feed racks, mangers, troughs, automatic feeders, fountains, and waterers must be thoroughly rinsed with potable water prior to reuse.

THEN, clean and disinfect in one easy step with STERI-DINE DISINFECTANT. Use 1/2 ounce STERI-DINE DISINFECTANT per gallon water. Scrub surfaces to be cleaned and disinfected with a good brush or with a power sprayer. Start at the highest point of the building or equipment being cleaned, and work down. Let solution drain dry without rinsing.

STORAGE AND DISPOSAL:

Storage: Keep container closed when not in use. Store at 25°F. or above 100°F. for deodorant.

Disposal: Do not contaminate water, food, or feed with large quantity of waste, residue, or solution vessel. Wastes resulting from use of this product should be disposed of on site or at an approved waste disposal site. Do not reuse empty container. Do not dispose of container in a recycling program.

FIRST AID:

In case of contact, immediately flush with plenty of water for at least 15 minutes. Remove and wash contaminated clothing. If swallowed, drink promptly a large quantity of water. If eye contact occurs, flush with water for at least 15 minutes. If swallowed, drink promptly a large quantity of water. If eye contact occurs, flush with water for at least 15 minutes. If swallowed, drink promptly a large quantity of water. If eye contact occurs, flush with water for at least 15 minutes.

NOTE TO PHYSICIAN:

Probable mucosal damage may occur if ingested. Gastric lavage. Measure against respiratory depression, and convulsions.

RINSE EMPTY CONTAINER AND DISPOSE OF WITH WATER AND DISINFECTANT.

DANGER

STATEMENT OF PRACTICAL TREATMENT (FIRST AID)

IF CONTACT WITH EYES OCCURS, flush with water for at least 15 minutes. Get medical attention.

IF CONTACT WITH SKIN OCCURS, wash with plenty of soap and water. IF SWALLOWED, contact a physician or a poison control center for more information. Do not induce vomiting unless instructed by a physician.

*See additional precautions on label panel.

Manufactured by FRIM CHEM, INC.

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS
AND DOMESTIC ANIMALS**

DANGER: Causes eye irritation. Causes skin irritation. Causes respiratory irritation. Causes dizziness. Causes headache. Causes nausea. Causes vomiting. Causes diarrhea. Causes abdominal pain. Causes chest pain. Causes difficulty breathing. Causes coughing. Causes sneezing. Causes watery eyes. Causes runny nose. Causes sore throat. Causes hoarseness. Causes rash. Causes hives. Causes allergic reaction. Causes anaphylaxis. Causes shock. Causes death.

Wash eyes immediately with large amounts of water for at least 15 minutes. Wash hands thoroughly with soap and water. Get medical attention if symptoms persist.

ENVIRONMENTAL HAZARD: This product is toxic to aquatic life. Do not discharge into surface water, groundwater, or the environment. Dispose of in accordance with local, state, and federal regulations.

Do not use in areas where children or animals are present. Do not use in areas where food is prepared or stored. Do not use in areas where food is consumed. Do not use in areas where food is stored.

PHYSICAL AND CHEMICAL HAZARDS:

STRONG OXIDIZING AGENT: May react with water according to label directions. May cause fire or explosion when in contact with organic materials. May cause severe eye irritation. May cause severe skin irritation. May cause severe respiratory irritation. May cause severe dizziness. May cause severe headache. May cause severe nausea. May cause severe vomiting. May cause severe diarrhea. May cause severe abdominal pain. May cause severe chest pain. May cause severe difficulty breathing. May cause severe coughing. May cause severe sneezing. May cause severe watery eyes. May cause severe runny nose. May cause severe sore throat. May cause severe hoarseness. May cause severe rash. May cause severe hives. May cause severe allergic reaction. May cause severe anaphylaxis. May cause severe shock. May cause severe death.

STORAGE AND DISPOSAL: Store in a cool, dry area away from heat and fire. Do not store with large quantities of water. Rinse empty container thoroughly with water. Do not reuse container for any other purpose. Do not use for food or feed. Do not use for drinking water. Do not use for irrigation. Do not use for any other purpose.

PERSONS INTERVIEWED AND INDIVIDUAL RESPONSIBILITIES

On December 21, 2005 at 10:30 AM Paul Bailey, The Bureau of Pesticide Control's Enforcement Coordinator, and I presented credentials and a Notice of Inspection to Karlan C. Kastendieck, Sales Manager of Advanced Products Technology located in Washington, Mo. The inspection was at the request of the EPA Regional office in Kansas City, Kansas and was to be a routine Producer Establishment Inspection. Karlan Kastendieck said he was the person responsible for the daily operations of FRM CHEM INC. He supplied all the information for this report and was the only person interviewed.

HISTORY

Karlan Kastendieck stated that FRM CHEM INC. hereafter referred as FRM CHEM was incorporated in St. Louis in 1969. He said FRM CHEM is a sister company of Advanced Products Technologies (Box 1656 Washington, Mo.) and FRM CHEM still operates under the FRM CHEM name. FRM CHEM is a family owned business dealing primarily with soaps, detergents and sanitizers. Mr. Kastendieck said FRM CHEM subregisters and formulates for Custom Compounders Inc., Steelcote Manufacturing and Industrial Specialties.

Corporate officers are;

President, Ray Kastendieck

Vice President, Kieth Kastendieck

Secretary, Ann Kastendieck

Treasurer, Ann Kastendieck

Legal counsel: The firm does not retain any legal counsel at this time.

LABEL AGREEMENTS AND GUARANTEES

FRM CHEM has supplemental label agreements with Stepan and Intercon of St. Louis. #1839 represents Stepan Co. and #048211 represents Intercon. There are no other label agreements or guarantees.

CONSUMER COMPLAINT FILE

A consumer complaint file is kept at the facility however there have been no complaints concerning efficacy. Mr. Kastendieck said the only complaint has been the size of the letters or wording on the labels.

EXPERIMENTAL USE PERMITS

FRM CHEM does not have any EUP permits with EPA.

MANUFACTURING CODES

Karlan Kastendieck said the manufacturing code is product number followed by date (month, day, year) and expire date. For example #2012215 indicates product #20 December 21, 2005. He also provided me the manufacturing code explanation.

RECORDS INSPECTION

The firm retains records of production. No Devices are produced. Receiving, shipping and inventory records are maintained. No RUP's are produced. The firm uses a two year expiration date. All shipments are within the US. No disposal records are maintained however Mr. Kastendieck said FRM CHEM has their own approved sewer treatment facility that is inspected regularly by DNR and there have been no disposal problems. There are no tests on humans and FRM CHEM is not a registrant. Mr. Kastendieck said some products packed in less than one gallon containers have CRP caps. He said no CRP file is maintained. Samples collected on this day were in one gallon containers and did not have CRP caps.

PROMOTION AND DISTRIBUTION

FRM CHEM products are primarily industrial use and related to the Dairy Industry. There are five sales representatives for 400 products. No advertising is done other than word of mouth.

STORAGE

This site has 20,000 square feet of storage in one warehouse and at this time 500 square feet is pesticide storage. The warehouse was clean and there were no spills or stains.

DISPOSAL

Karlan Kastendieck said they use a vacuum system for mixing and/or production and they do not have any problems with spills. He said in the event of a spill, soda ash would be used to react on the floor and large amounts of water would be used to flush the spill down the drain to their own approved sewer treatment facility that is inspected regularly by DNR.

There are no outdated products or unwanted pesticides on site. No disposal records are maintained.

TOTAL ANNUAL SALES

Total annual sales for the company is approximately \$750,000.00 and pesticide sales assume \$5,000.00 of that total.

PESTICIDE DEVICES

The firm does not produce any pesticide devices.

CHILD RESISTANT PACKAGING

Mr. Kastendieck said only containers less than one gallon have CRP caps and have production records to show they are filled with CRP. Products are primarily for industrial use. Products sampled today do not have CRP.

QUALITY CONTROL SAMPLES

Quality control samples are also taken, maintained on site for two years and eventually reworked.

INSPECTOR'S COMMENTS

Two samples were taken from salable inventory packed, labeled and released for shipment;

Sample #122105F447101-

01-one one gallon STERI-DINE Disinfectant EPA #48211-70-10366

02-one one gallon FRM-CHLOR-1250 EPA#48211-20001-10366

FRM CHEM is also a contract manufacturer for Custom Compounds Inc., Steelcote Manufacturing and Industrial Specialties. Mr. Kastendieck said FRM CHEM formulates for others and puts the other company's label on the product. EPA #'s ending in -009645 indicate Custom Compounds Inc. Finished product is shipped back then distributed by the other company. Mr. Kastendieck mentioned they may drop the Brite San 45 and combine registrations once the company restructures. A PO#357989 was obtained from MDA for 39.80 to purchase samples. Duplicate samples were provided. I left Mr. Kastendieck a USEPA Small Business form.

37 digital photos were taken to document the inspection. I issued Karlan Kastendieck a Receipt for Samples.

I returned to FRM CHEM on December 28, 2005 and once again presented credentials and a Notice of Inspection to Mr. Kastendieck for cover letters and shipping records. I once again issued him a Receipt for Samples.

All samples will be transported to UHL Iowa City for analysis and all chain of custody procedures were followed.

STERI-DINE DISINFECTANT

FOR UDDERWASHING; FOR CLEANING, DISINFECTING, AND SANITIZING ANIMAL HOUSING AND EQUIPMENT; FOR SANITIZING POULTRY DRINKING WATER; FOR USE AS A SHOE BATH PRIOR TO ENTERING BARNS AND POULTRY HOUSES; FOR USE AS A DEODORANT; FOR SANITIZING FOOD-PROCESSING EQUIPMENT.

STERI-DINE DISINFECTANT is TUBERCULOCIDAL at a dilution of 3 ounces of STERI-DINE DISINFECTANT to five gallons of water. STERI-DINE DISINFECTANT destroys hog cholera virus. STERI-DINE DISINFECTANT is not adversely affected by water hardness or low-temperature water. STERI-DINE DISINFECTANT has its own built-in indicator of germicidal activity. (When the amber color disappears a fresh solution should be prepared.)

ACTIVE INGREDIENTS:
Iodine 1.75%
Inert Ingredients 98.25%
*From Nonylphenoxypolyethoxyethanol-iodine complex. Total 100.00%

Manufactured by: **FRM-CHEM, INC.**, P.O. Box 207, Washington, MO. 63090
EPA REG. NO. 48211-70 - 10366
EPA EST. NO. 10366-MO-1

NET CONTENTS: 1 GALLON
Keep Out of The Reach of Children

DANGER: CORROSIVE. CAUSES EYE DAMAGE AND SKIN IRRITATION
Do not get in eyes, on skin, or on clothing. Protect eyes and skin when handling. Harmful if swallowed. See side panel for FIRST AID.

STERI-DINE DISINFECTANT

DIRECTIONS FOR USE:

Udervashing:

Use a clean towel for each cow. Wet in STERI-DINE DISINFECTANT solution, one-half ounce in 10 qts. (2 - 2½ gal.) warm water (100°F.) which provides 25 ppm tetratable iodine.

Sanitizing Buildings and Equipment on the Farm:

To sanitize surfaces of buildings, equipment, or utensils which have previously been thoroughly cleaned, use 1 ounce of STERI-DINE DISINFECTANT in 5 gallons of water. Spray or swab solution on surfaces to be sanitized. Allow to drain dry without rinsing.

Sanitizing Poultry Drinking Water:

Add 1 ounce of STERI-DINE DISINFECTANT to every 10 gallons of drinking water. The regular use in the drinking water also keeps the waterers free of slime and mineral deposits.

Food Plant Sanitization:

Use 1 ounce of STERI-DINE DISINFECTANT in each 5 gallons of water as the final sanitizing rinse on previously cleaned food-processing equipment and utensils. Drain, but do not rinse. When used at this dilution (1:640), STERI-DINE DISINFECTANT does not require a final potable water rinse, as prescribed in Federal Food Additive Regulation 121.2547.

Shoe Bath:

To help prevent tracking disease organisms into poultry houses, farrowing houses, and hog barns, place a shoe bath inside the doorway, containing 3 ounces of STERI-DINE DISINFECTANT per gallon of water. After scraping shoes outside doorway, stand in shoe bath for 30 seconds prior to entering building interior. Change shoe bath daily.

Deodorant:

STERI-DINE DISINFECTANT destroys many odors as it sanitizes and disinfects. For general deodorant applications (garbage pails, refuse containers, etc.), swab or spray on a solution of 1 ounce of disinfectant per gallon of water.

Cleaning and Disinfecting Buildings and Equipment on the Farm:

BEFORE PROCEEDING AS INDICATED BELOW,

remove all animals and feeds from premises, cars, boats, trucks, and other equipment. Remove all litter and manure from floors, walls, and surfaces of barns, pens, stalls, chutes, and other facilities and fixtures occupied or traversed by animals. Empty all troughs, racks, and other feeding and watering appliances, saturating all surfaces with STERI-DINE DISINFECTANT solution. Immerse all halters, ropes, and other types of equipment used in handling and restraining animals, as well as forks, shovels, and restraining buildings, cars, boats and other closed spaces. Ventilate house livestock or employ equipment until treatment has been absorbed, set, or dried. All treated feed racks, managers, troughs, automatic feeders, fountains, and waterers must be thoroughly rinsed with potable water prior to reuse. THEN, clean and disinfect in one easy step with STERI-DINE DISINFECTANT. Use ½ ounce STERI-DINE DISINFECTANT per gallon water. Scrub surfaces to be cleaned and disinfected with a good brush or with a power sprayer. Start at the highest point of the building or equipment being cleaned, and work down. Let solution drain dry without rinsing.

STORAGE AND DISPOSAL

Storage:

Keep container closed when not in use. Do not store below 25°F. or above 100°F. for extended periods.

Disposal:

Do not contaminate water, food, or feed by storage or disposal, or cleaning of equipment. In case of spill, flood area with large quantity of water, washing to sewer or collection vessel. Wastes resulting from use of this product may be disposed of on site or at an approved waste disposal facility. Do not reuse empty container. Triple rinse, puncture, and dispose of container in a sanitary landfill or by incineration.

FIRST AID:

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse. If swallowed, drink promptly a large quantity of milk, egg whites gelatin solution or if these are not available, drink large quantities of water. Call a physician immediately.

NOTE TO PHYSICIAN:

Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression, and convulsions may be needed.

**RINSE EMPTY CONTAINER THOROUGHLY
WITH WATER AND DISCARD IT.**

KEEP OUT OF REACH OF CHILDREN

DANGER

STATEMENT OF PRACTICAL TREATMENT (FIRST AID)

IF CONTACT WITH EYES OCCURS, flush with water for at least 15 minutes. Get prompt medical attention.

IF CONTACT WITH SKIN OCCURS, wash with plenty of soap and water.

IF SWALLOWED, drink large quantities of milk or gelatin solution, if these are not available; drink large quantities of water. DO NOT give vinegar or other acids. DO NOT induce vomiting. Get prompt medical attention.

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Corrosive, may cause severe skin and eye irritation or chemical burns to broken skin. Causes eye damage. Wear safety glasses or goggles and rubber gloves when handling this product. Wash after handling. Avoid breathing vapors. Vacate poorly ventilated areas as soon as possible. Do not return until strong odors have dissipated.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds or public water-ways unless in accordance with a NPDES permit. For guidance, contact the regional office of the U.S. Environmental Protection Agency.

PHYSICAL AND CHEMICAL HAZARDS:

STRONG OXIDIZING AGENT: Mix only with water according to label directions. Mixing this product with chemicals (e.g. ammonia, acids, detergents, etc.) or organic matter (e.g. urine, feces, etc.) will release chlorine gas which is irritating to eyes, lungs and mucous membranes.

STORAGE AND DISPOSAL: Store in a cool, dry area away from direct sunlight. In case of spill, flood area with large quantities of water. Rinse empty container thoroughly with water and discard by placing in trash collection or burying in an approved landfill. Product or rinsate that cannot be used, should be diluted with water and disposed of in a sanitary sewer. Do not contaminate food or feed by storage, disposal or cleaning of equipment.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling. Note: This product degrades with age. Use a chlorine test kit and increase dosage as necessary, to obtain the required level of available chlorine.

SANITATION OF NON-POROUS FOOD CONTACT SURFACES

RINSE METHOD- A solution of 100 ppm available chlorine may be used in the sanitizing solution if a chlorine test kit is available. Solutions containing an initial concentration of 100 ppm available chlorine must be tested and adjusted periodically to insure that the available chlorine does not drop below 50 ppm. Prepare a 100 ppm sanitizing solution by thoroughly mixing 1 oz. of the product with 10 gallons of water. If no test kit is available, prepare a sanitizing solution by thoroughly mixing 2 oz. of this product with 10 gallons of water to provide approximately 200 ppm available chlorine by weight.

Clean equipment surfaces in the normal manner. Prior to use, rinse all surfaces thoroughly with the sanitizing solution, maintaining contact with the sanitizer for at least 2 minutes. If solution contains less than 50 ppm available chlorine, as determined by a suitable test kit, either discard the solution or add sufficient product to reestablish a 200 ppm residual. Do not rinse equipment with water after treatment and do not soak equipment overnight.

Sanitizers used in automated systems may be used for general cleaning but may not be re-used for sanitizing purposes.

CLEAN-IN-PLACE METHOD- Thoroughly clean equipment after use. Prepare a volume of 200 ppm available chlorine sanitizing solution equal to 110% of volume capacity of the equipment by mixing the product in a ratio of 2 oz. product with 10 gallons of water. Pump solution through the system until the full flow is obtained at all extremities, the system is completely filled with the sanitizer and all air is removed from the system. Close drain valves and hold under pressure for at least 10 minutes to insure contact with all internal surfaces. Remove some cleaning solution from drain valve and test with a chlorine test kit. Repeat entire cleaning/sanitizing process if effluent contains less than 50 ppm available chlorine.

FARM PREMISES- Remove all animals, poultry, and feed from premises, vehicles, and enclosures. Remove all litter and manure from floors, walls and surfaces of barns, pens, stalls, chutes and other facilities occupied or transversed by animals or poultry. Empty all troughs, racks and other feeding and watering appliances. Thoroughly clean all surfaces with soap or detergent and rinse with water. To disinfect, saturate all surfaces with a solution of at least 1000 ppm available chlorine for a period of 10 minutes. A 1000 ppm solution can be made by thoroughly mixing 12 1/2 oz. of this product with 10 gallons of water. Immerse all halters, ropes and other types of equipment used in handling and restraining animals or poultry, as well as the cleaned forks, shovels and scrapers used for removing litter and manure. Ventilate building, cars, boats and other closed spaces. Do not house livestock or poultry or employ equipment until chlorine has been dissipated.

FRM-CHLOR

Active Ingredient

Sodium dichloro-s-triazinetrone dihydrate..... 28%
(provides 15.8% available chlorine)

Inert Ingredients 72%

DANGER

KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. May cause severe eye irritation. Do not get in eyes or on skin. Do not breathe dust.

FIRST AID: If swallowed: feed gruel or cooked cereal followed by olive oil or cooking oil. Call physician. In case of personal contact: remove excess material and flush skin or eyes with fresh water for at least 15 minutes. For eyes get medical attention.

Rinse empty container thoroughly with water and discard it. See side panel for use directions.

P.O. Box 207, Washington, MO. 63090

Sold by:

DIRECTIONS
"It is a violation of Federal Law to use this product in a manner inconsistent with its labeling."

FRM-CHLOR WASH SANITIZER is recommended for use in sanitizing dairy equipment, dishes, glasses, food processing equipment and utensils.

Dissolve 1 oz. of FRM-CHLOR WASH SANITIZER per 10 gal. of warm (125° F) water. This provides 100 ppm of available chlorine respectively. Clean and rinse items prior to sanitizing. Then dip the items to be sanitized in solution and hold for 2 or 3 minutes. LET AIR DRY. DO NOT RINSE. The same solution may be used in the feed tank in immersion or spray type machines providing 2 to 5 minutes contact time for sanitizing dishes, glasses, and food processing equipment and utensils.

The sanitizing solution should be used promptly after mixing. If the solution is allowed to stand or is reused and tests show the level of chlorine has not been maintained, additional FRM-CHLOR WASH SANITIZER should be added, to maintain a minimum concentration of 100 ppm available chlorine.

STORAGE AND DISPOSAL:

Storage:
Store in a cool, dry, well ventilated area. Moisture contamination may liberate irritating and hazardous chlorine containing gases. Oxidizing material: Do not mix with other chemicals. Contact with organic matter may cause fire.

Decomposes at 350-475° F with liberation of harmful gases. In case of decomposition, if possible isolate container in open air or well ventilated area. Flood with large volume of water if necessary.

Disposal:
Do not reuse empty container. Rinse empty container thoroughly. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public water. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product as specified on this label.

Net Weight 25 Lbs.

Sales Manager
FRM Chem Inc.

STATEMENT

I, Karlanc. Kastendieck under affirmation say:

I am a sales manager and am responsible for the daily operations for FRM CHEM INC. The company was incorporated in St. Louis in 1969. FRM CHEM is a sister company of Advanced Product Technologies, we are still operating as FRM CHEM INC. We have label agreements with STEPAN and INTERCON of St. Louis. We do not have any EUP permits with EPA. The manufacturing code is product # followed by date and expiration date. Example Product # 2012215 month/day/year. We primarily make soaps and detergents and sanitizers, for industrial use. There are five sales reps and we do not do any advertising, we have a 29,000 sq ft warehouse with @ 500 sq ft devoted to pesticide. We do not maintain any disposal records, we have our own approved sewer treatment facility that is inspected by DNR. We produce no devices anything we produce in less than one gallon has a CRP cap. Production records show it filled with CRP. Quality control samples are kept here for two years. Products sampled today are taken from inventory packed, labeled and released for shipment.

I hereby affirm that the above is true to the best of my knowledge.

Inspection No.: 100808 1844 01

Mr. Keith Kastendieck
Owner
FRM Chem, Inc.
P.O. Box 207
60 Highline Drive
Union, MO 63084

Dear Mr. Kastendieck:

On October 8, 2008, a representative of the Missouri Department of Agriculture inspected your facility. The inspection was conducted under the authority of Section 9 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the report of inspection was forwarded to the U.S. Environmental Protection Agency (EPA) on October 23, 2008. A copy of the inspection report is enclosed for your information (without attachments).

EPA will review the report to determine your facility's compliance with the FIFRA and its implementing regulations. If it is determined that violations exist, EPA reserves all rights it may have to take appropriate enforcement action.

If there are any questions regarding this report or actions that you may want to take, please contact Ms. Barbara Shepard at the above letterhead address, by phone at (913) 551-7759; or by email at shepard.barbara@epa.gov.

Sincerely,

Sandy Wilder

PERSONS INTERVIEWED AND INDIVIDUAL RESPONSIBILITIES

On 10/03/08 I received an EPA request from MDA to conduct a Federal For Cause Producer Establishment inspection at FRM Chem Inc. and associated companies regarding suspected production and distribution of cancelled pesticides. Recent shipping and sales indicated distribution of two cancelled pesticides STERI-DINE EPA #48211-70-10366 and FRM CHLOR EPA # 48211-20001-10366. Information was to be collected concerning each company's connection to the production, holding for sale and distribution of these products. EPA determined these registrations were cancelled 7/19/05 by the registrant, Intercon Chemical Company, St. Louis, Mo. Agreements/contracts,

labels, inventory/production records, shipping documents/invoices and statements were collected to determine how these products were produced and distributed. Accompanying me on the inspection was Walter Roachell, EPA Project Officer for Missouri.

INSPECTION

On October 8, 2008 at 9:16 AM I presented credentials and a Notice of Inspection to Cindy Carey, secretary, Keith Kastendieck, owner and person most responsible, and Ann Kastendieck then explained the purpose of the inspection. I took a statement from Mr. Kastendieck who said Raymond Kastendieck is the primary owner of the businesses located at 50 and 60 Hi-Line Drive Union, Mo. It was explained that all the fore mentioned businesses are located under one roof at this location and a PO Box was used before the physical address for mail delivery. Keith Kastendieck explained FRM Chem has ceased production for two years and the company ceased operation on December 31, 2006. He said Advanced Products Technologies Inc. (APT), Industrial Specialties Inc., Custom Compounds Inc. (CCI), and Synisys all operate from this location. Mr. Kastendieck explained APT sells speciality cleaners while Industrial Specialties sells industrial chemicals/supplies/equipment to industrial companies. CCI sells ultrasonic cleaners and Synisys sells speciality chemicals and cleaners. He explained CCI has a supplemental agreement with STEPAN and Synisys is a contract manufacturer for the product Brite San 75. Mr. Kastendieck said they no longer produce STERI-DINE or FRM CHLOR 1250 and hold no inventory for such. He also said he does not have a supplemental registration agreement from Intercon however provided EPA related documents for their production. He said FRM Chem transferred the registrations to Intercon so they would not have to pay the registration fees. He further said they never received a cancellation for these registrations from Intercon. Mr. Kastendieck said they continued to produce these products until they ran out of the basic to make them. STERI-DINE was said to be last produced April 2006 and FRM CHLOR 1250 December 2006. Mr. Kastendieck said they are no longer producing, labeling, selling or distributing these products.

Keith Kastendieck provided documentation from EPA regarding registration changes from FRM Chem to Intercon Chemical Company and the supplemental agreement from Stepan granted to CCI to produce Brite San 75. He said the Brite San products were produced by FRM Chem until the end of 2006 through a supplemental agreement with Stepan. Six, one gallon Brite San 75 in inventory were said to have been contract manufactured by Synisys for CCI who has a supplemental agreement with Stepan. Ann Kastendieck provided sales invoices for this product. I also collected a certified label as well as photos of inventory and the basic used for production of Brite San 75. Keith Kastendieck provided a cover letter regarding the production of pesticides from FRM Chem and associated companies. Production records and customers for STERI-DINE and FRM CHLOR 1250 were also collected. I requested all shipping records relating to the two cancelled products and told Mr. Kastendieck I would return in one week for any

additional documentation he could provide. He said the businesses do not retain any legal counsel.

Walter Roachell delivered EPA Region VII prepared SSUROs for the two cancelled products to both Keith Kastendieck and Ann Kastendieck.

INSPECTOR'S COMMENTS

There was no inventory of STERI-DINE or FRM CHLOR 1250. Walter Roachell and I toured the warehouse and Mr. Kastendieck pointed out inventory for Brite San 75 and the basic used to produce it. It was noted the basic is registered as STEPAN #1839-63 and did not display net contents. The Brite San 75 final product is registered #1839-152-9645. Mr. Kastendieck said about 100 gallons are produced a year.

On 10/15/08 at 10:30 am I presented credentials and a Notice of Inspection for the purpose of collecting shipping documents for the cancelled pesticides and an additional statement. Mr. Kastendieck said he provided all available shipping documents relating to the two cancelled pesticides. He said he spoke to Intercon regarding a supplemental agreement and said Intercon did not know of any agreement with Frm Chem. He also said Frm Chem did not receive any cancellation for these two registrations. I also collected more digital photographs, a physical sample #100808184401-01 and provided a duplicate of Brite San 75 #1839-152-9645. \$38.50 was billed to MDA PO #377759 for the sample taken. Mr. Kastendieck said the Stepan basic on site is the only one used to manufacture the Brite San 75. I issued Mr. Kastendieck a Receipt for Samples and he was very cooperative. The physical address for all the businesses is 50 or 60 Hi-Line Drive Union, Mo. 63084 located south of Washington, Mo.

Dear Mr. Kastendieck:

On October 8, 2008, a representative of the Missouri Department of Agriculture inspected your facility. The inspection was conducted under the authority of Section 9 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the report of inspection was forwarded to the U.S. Environmental Protection Agency (EPA) on October 23, 2008. A copy of the inspection report is enclosed for your information (without attachments).

EPA will review the report to determine your facility's compliance with the FIFRA and its implementing regulations. If it is determined that violations exist, EPA reserves all rights it may have to take appropriate enforcement action.

If there are any questions regarding this report or actions that you may want to take, please contact Ms. Barbara Shepard at the above letterhead address, by phone at (913) 551-7759, or by email at shepard.barbara@epa.gov.

Sincerely,

Information was to be collected concerning each company's connection to the production, holding for sale and distribution of these products. EPA determined these registrations were cancelled 7/19/05 by the registrant, Intercon Chemical Company, St. Louis, Mo. Agreements/contracts,

labels, inventory/production records, shipping documents/invoices and statements were collected to determine how these products were produced and distributed. Accompanying me on the inspection was Walter Roachell, EPA Project Officer for Missouri.

INSPECTION

On October 8, 2008 at 9:16 AM I presented credentials and a Notice of Inspection to Cindy Carey, secretary, Keith Kastendieck, owner and person most responsible, and Ann Kastendieck then explained the purpose of the inspection. I took a statement from Mr. Kastendieck who said Raymond Kastendieck is the primary owner of the businesses located at 50 and 60 Hi-Line Drive Union, Mo. It was explained that all the fore mentioned businesses are located under one roof at this location and a PO Box was used before the physical address for mail delivery. Keith Kastendieck explained FRM Chem has ceased production for two years and the company ceased operation on December 31, 2006. He said Advanced Products Technologies Inc. (APT), Industrial Specialities Inc., Custom Compounders Inc. (CCI); and Synisys all operate from this location. Mr. Kastendieck explained APT sells speciality cleaners while Industrial Specialities sells industrial chemicals/supplies/equipment to industrial companies. CCI sells ultrasonic cleaners and Synisys sells speciality chemicals and cleaners. He explained CCI has a supplemental agreement with STEPAN and Synisys is a contract manufacturer for the product Brite San 75. Mr. Kastendieck said they no longer produce STERI-DINE or FRM CHLOR 1250 and hold no inventory for such. He also said he does not have a supplemental registration agreement from Intercon however provided EPA related documents for their production. He said FRM Chem transferred the registrations to Intercon so they would not have to pay the registration fees. He further said they never received a cancellation for these registrations from Intercon. Mr. Kastendieck said they continued to produce these products until they ran out of the basic to make them. STERI-DINE was said to be last produced April 2006 and FRM CHLOR 1250 December 2006. Mr. Kastendieck said they are no longer producing, labeling, selling or distributing these products.

Keith Kastendieck provided documentation from EPA regarding registration changes from FRM Chem to Intercon Chemical Company and the supplemental agreement from Stepan granted to CCI to produce Brite San 75. He said the Brite San products were produced by FRM Chem until the end of 2006 through a supplemental agreement with Stepan. Six, one gallon Brite San 75 in inventory were said to have been contract manufactured by Synisys for CCI who has a supplemental agreement with Stepan. Ann Kastendieck provided sales invoices for this product. I also collected a certified label as well as photos of inventory and the basic used for production of Brite San 75. Keith Kastendieck provided a cover letter regarding the production of pesticides from FRM Chem and associated companies. Production records and customers for STERI-DINE and FRM CHLOR 1250 were also collected. I requested all shipping records relating to the two cancelled products and told Mr. Kastendieck I would return in one week for any

additional documentation he could provide. He said the businesses do not retain any legal counsel.

Walter Roachell delivered EPA Region VII prepared SSUROs for the two cancelled products to both Keith Kastendieck and Ann Kastendieck.

INSPECTOR'S COMMENTS

There was no inventory of STERI-DINE or FRM CHLOR 1250. Walter Roachell and I toured the warehouse and Mr. Kastendieck pointed out inventory for Brite San 75 and the basic used to produce it. It was noted the basic is registered as STEPAN #1839-63 and did not display net contents. The Brite San 75 final product is registered #1839-152-9645. Mr. Kastendieck said about 100 gallons are produced a year.

On 10/15/08 at 10:30 am I presented credentials and a Notice of Inspection for the purpose of collecting shipping documents for the cancelled pesticides and an additional statement. Mr. Kastendieck said he provided all available shipping documents relating to the two cancelled pesticides. He said he spoke to Intercon regarding a supplemental agreement and said Intercon did not know of any agreement with Frm Chem. He also said Frm Chem did not receive any cancellation for these two registrations. I also collected more digital photographs, a physical sample #100808184401-01 and provided a duplicate of Brite San 75#1839-152-9645. \$38.50 was billed to MDA PO #377759 for the sample taken. Mr. Kastendieck said the Stepan basic on site is the only one used to manufacturer the Brite San 75. I issued Mr. Kastendieck a Receipt for Samples and he was very cooperative. The physical address for all the businesses is 50 or 60 Hi-Line Drive Union, Mo. 63084 located south of Washington, Mo.
