## INSTRUCTIONS

**NOTE:** Use a separate form for each Formulation.

**Applicant -** keep the second copy for your files and forward the original to EPA or follow the instructions in "C" below.

- A.** The complete chemical composition of each pesticide must be known so it can be evaluated for registration under the Federal Insecticide, Fungicide and Rodenticide Act. This information is also necessary to determine the status of ingredients, both active and inert, under the Pesticide Chemicals Amendment to the Federal Food, Drug and Cosmetic Act.
- B.** This form is designed for reporting the ingredients used in the formulation of a pesticide. Its use will speed the review. It must be completed and submitted with each EPA Form 8570-1, Application For New Registration Of A Pesticide, or with each EPA Form 8570-2, Application For Amended Registration Of A Pesticide, if revision involves a formula change, or with each EPA Form 8570-3, Application For Renewal Registration Of A Pesticide.
- C.** If the complete chemical composition of formulated ingredients, either active or inert, used in this product's formulation is not known to you, send a separate set of these forms for each ingredient to your Basic Supplier. When you do this, it is important that you first fill in items 2 thru 8 so that we may positively identify the supplier's product with your pesticide. The Basic Supplier is then requested to complete items 1, and 9 thru 15, and submit the form to this Division. This statement is treated confidentially. It cannot be used to support a customer's (formulator's) application for subsequent registration without written authorization from the Basic Supplier.

### ITEM No.

1. If more than 1 page is required, number them "1 of 2", "1 of 3", etc.
2. Enter the same date as the Application.
3. Read instruction "B" above.
4. Enter the name and address of your firm.
5. Enter the product name of this pesticide as it will appear on the finished label.
6. Enter the EPA Registration Number or File Symbol if known.
7. Complete if required by instruction "C" above.
8. Complete if required by instruction "C" above.
9. Completed only by Basic Supplier.
10. Completed only by Basic Supplier.
11. List first all active ingredients then the inert ingredients each in the exact order as they will appear on the finished label. When a formulated product is listed in the formula, name its basic manufacturer and give its EPA Registration No., if known, in parenthesis following the name of the product. (Also see instruction "C" above.) The trade name and manufacturer of surfactants and other adjuvants (dyes, emulsifiers, solvents, perfumes) must be listed. The complete chemical composition of emulsifiers and surfactants must be listed. Enclose the manufacturer's name in parenthesis following the product listed by trade name. (Also see instruction "C" above.) If a dye or other coloring is used, state the color.
12. Enter the percentage by weight of each active and inert ingredient beside the ingredient to which it applies. The percentages by weight for the active ingredients must agree with those appearing in the ingredient statement on the label. The sum of all percentages listed must equal 100 percent.
13. Self explanatory.
14. Self explanatory.
15. Self explanatory.

**CERTIFIED MAIL**  
**RETURN RECEIPT REQUESTED**

Miami Products & Chemical  
P.O. Box 486T  
Dayton, Ohio 45401

**NOTICE OF WARNING**

Dear Sir/Madam:

This letter constitutes a warning pursuant to Section 9(c)(3) and Section 14(a)(4) of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (FIFRA), 7 U.S.C. §136g(c)(3). The United States Environmental Protection Agency (U.S. EPA) has reason to believe that you are in violation of Section 7(c)(1) of FIFRA, 7 U.S.C. § 136e(c)(1), and the regulations promulgated at 40 C.F.R. Part 167, Subpart E, by failing to submit the Pesticides Report for Pesticide-Producing Establishments (EPA Form 3540-16) (hereafter referred to as the "Report") for the calendar year 1999, on or before March 1, 2000. Section 12(a)(2)(L) of FIFRA, 7 U.S.C. § 136j(a)(2)(L) states that it is unlawful for any person who is a producer to violate any of the provisions of Section 7.

A pesticide producer operating an actively registered establishment must submit an annual Report to the U.S. EPA Regional Office which serves the area where the establishment's corporate headquarters (or parent office) is located, on or before March 1 of each year.

You are hereby advised by this Notice of Warning to submit the enclosed Report on pesticide production at your registered establishment to:

U.S. EPA - Region 5  
PTES-Report (DT-8J)  
77 West Jackson Boulevard  
Chicago, Illinois 60604-3590

The Report must be submitted to the U.S. EPA, regardless of whether or not pesticides were produced in 1999 and/or will be produced in 2000, and must be received by the Agency within thirty (30) days from receipt of this Notice of Warning.

00117

If you fail to submit the Report on pesticide production within thirty (30) days after receipt of this Notice of Warning, you will be subject to the civil penalty provisions of Section 14(a) of FIFRA, 7 U.S.C. § 136l(a), and your establishment registration may be terminated pursuant to 40 C.F.R. § 167.20(f).

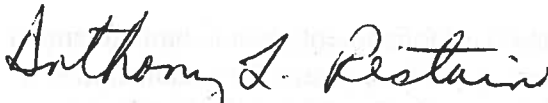

Please be certain that future pesticide production and record keeping are in full compliance with the provisions of Section 7(c) of FIFRA, 7 U.S.C. § 136e(c), and the regulations at 40 C.F.R. Part 167, Subpart E.

Please note that no person shall produce any pesticide subject to FIFRA in any state unless the establishment in which it is produced is registered with the Administrator of the U.S. EPA. The term "produce" is defined by statute and regulation, as to manufacture, prepare, propagate, compound, or process any pesticide, including any pesticide produced pursuant to Section 5 of the Act, any active ingredient or device, or to package, repackage, label, relabel, or otherwise change the container of any pesticide or device.

We have also enclosed an Agency information sheet titled "Information for Small Businesses," which may be helpful to you if your company qualifies as a small business under the Small Business Administration regulations at 13 C.F.R. § 121.201.

If you did submit your Report prior to March 1, 2000, send a copy of the Report and a copy of the certified postal return receipt to the U.S. EPA. All correspondence and any questions you may have regarding this Notice of Warning should be directed to the address above, or telephone the Pesticides and Toxics Enforcement Section at (312) 886-7061.

Sincerely,

Anthony L. Restaino, Chief  
Pesticides and Toxics Enforcement Section

**KEEP OUT OF REACH OF CHILDREN**  
**DANGER**  
**FIRST AID STATEMENT**

**If in Eyes:**

- Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor immediately for treatment advice.

**If on Skin or Clothing:**

- Take off contaminated clothing.
- Rinse skin immediately with water for 15-20 minutes.
- Call a poison control center or doctor immediately for treatment advice.

**If Swallowed:**

- Call a poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

**If Inhaled:**

- Move person to fresh air.
- If person is not breathing, call 9-1-1 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
- Call a poison control center or doctor immediately for treatment advice.

## PRECAUTIONARY STATEMENTS

### HAZARDS TO HUMANS & DOMESTIC ANIMALS

**DANGER:** Corrosive, may cause severe skin and eye irritation or chemical burns to broken skin. Causes eye damage. Wear face shield or goggles and rubber gloves when handling this product. Wash after handling. Avoid breathing vapors. Vacate poorly ventilated areas as soon as possible. DO NOT RETURN until strong odors have dissipated.

### ENVIRONMENTAL HAZARDS:

This pesticide is toxic to fish and aquatic organisms. DO NOT discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or public waters unless this product is specifically identified and addressed in an NPDES permit. DO NOT discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

### PHYSICAL OR CHEMICAL HAZARDS

**STRONG OXIDIZING AGENT:** Mix only with water according to label directions. Mixing this product with chemicals (e.g. ammonia, acids, detergents, etc.) or organic matter (e.g. urine feces, etc.) will release chlorine gas which is irritating to eyes, lungs and mucous membranes.

**NOTE:** This product degrades with age. Use a chlorine test kit and increase dosage, as necessary, to obtain the required level of available chlorine.

**STORAGE AND DISPOSAL:** Store this product in a cool dry area, away from direct sunlight and heat to avoid deterioration. In case of spill, flood areas with large quantities of water. Product or rinsates that cannot be used should be diluted with water before disposal in a sanitary sewer. Do not contaminate food or feed by storage, disposal or cleaning equipment.

DO NOT MIX WITH ACIDS

or other chemicals

UN1791

FOR COMMERCIAL USE ONLY

MANUFACTURED BY MIAMI & CHEMICAL COMPANY  
DAYTON, OHIO 45403

matter inconsistent with its labeling.

**CALCULATION POOL GALLONAGE:** To calculate pool gallonage multiply the total cubic feet of pool water times 7.5. To determine the total cubic feet of water in a square or rectangular pool, multiply the pool length by width by average depth; for a circular or elliptical pool, multiply the length by the width by the average depth by 0.8.

### SWIMMING POOL WATER DISINFECTION:

For a new pool or spring start-up, superchlorinate with 52 to 104 oz. of product for each 10,000 gallons of water to yield 5 to 10 ppm available chlorine by weight. Check the level of available chlorine with a test kit. Adjust and maintain pool water pH to between 7.2 to 7.6 Adjust and maintain the alkalinity of the pool to between 50 to 100 ppm.

To maintain the pool, add manually or by a feeder device 11 oz. of this product for each 10,000 gallons of water to yield an available chlorine residual between 1 to 3 ppm by weight. Stabilized pools should maintain a residual of 1.0 to 3 ppm available chlorine. Test the pH, available chlorine residual and alkalinity of the water frequently with appropriate test kits. Frequency of water treatment will depend upon temperature and number of swimmers.

Every 7 days, or as necessary, superchlorinate the pool with 52 to 104 oz. of product for each 10,000 gallons of water to yield 5 to 10 ppm available chlorine by weight. Check the level of available chlorine with test set. Do not re-enter pool until the chlorine residual is between 1.0 to 3.0 ppm.

At the end of the swimming pool season or when water is to be drained from the pool, chlorine must be allowed to dissipate from treated pool water before discharge. Do not chlorinate the pool within 24 hours prior to discharge.

**WINTERIZING POOLS:** While water is still clear & clean, apply 3 oz. of product per 1000 gallons, while filter is running, to obtain a 3 ppm available chlorine residual, as determined by a suitable test kit. Cover pool, prepare heater, filter, and heater components for winter by following manufacturer's instructions.

### SPAS, HOT-TUBS, IMMERSION TANKS, ETC.:

**SPAS/HOT-TUBS-** Apply 5 oz. of product per 1000 gallons of water to obtain a free available chlorine concentration of 5 ppm, as determined by a suitable chlorine test kit. Adjust and maintain pool water pH to between 7.2 and 7.8. Some oils, lotions, fragrances, cleaners, etc. may cause foaming or cloudy water as well as reduce the efficiency of the product.

To maintain the water, apply 5 oz. of product per 1000 gallons of water over the surface to maintain a chlorine concentration of 5 ppm.

After each use, shock treat with 8 oz. of this product per 500 gallons of water to control odor and algae.

During extended periods of disuse, add 3 oz. of product daily per 500 gallons of water to maintain a 3 ppm chlorine concentration.

**NOTICE: APPLY THIS PRODUCT ONLY AS SPECIFIED ON THIS LABEL**  
Buyer assumes all risk of use of this product used contrary to directions.
