Lead Safe Homes

Welcome to the Massachusetts Childhood Lead Poisoning Prevention Program's database for lead inspected homes. Lead in residential paint was banned in 1978, and due to the large quantity of pre-1978 homes in Massachusetts, you will find many properties in this database. You can **look up the inspection history of a property** by entering a street name or street name and number. This database will indicate whether a property has ever been inspected for lead, has had any lead hazards or has a letter of compliance. If you can not find your property but believe there has been an inspection, please call us at 1-800-532-9571 so that we can better assist you.

To get a **copy of an inspection report or Letter of Compliance** for a property, contact the inspector who did the inspection or issued the Letter of Compliance. To find an inspector's phone number, click on this link to take you to a list of [licensed lead inspectors](#) in the state of Massachusetts. If the inspector you need to contact is no longer licensed, please call 1-800-532-9571 to get the last known contact information for that inspector.

Please select a City/Town and then type in the street name partially or completely. If you know street number, Please enter.

* Please select a City/Town:

* Please type in StreetName:

Please type in Street Number:

* Indicates required fields.
