the complaint; to the issuance of any specified compliance or corrective action order and to any conditions specified in the consent agreement; and waives any right to contest the allegations and its right to appeal the proposed final order accompanying the consent agreement.

II. JURISDICTION

- 4. This ACOC is issued by the EPA pursuant to Section 3008(a) of RCRA, 42 U.S.C. § 6928, as amended by the Hazardous and Solid Waste Amendments of 1984 ("HSWA"), and is simultaneously commenced and concluded through the issuance of this ACOC under 40 C.F.R. §§ 22.13(b), 22.18(b)(2) and (3), and 22.37.

In any action by the EPA or the United States to enforce the terms of this ACOC, Respondent agrees not to contest the authority or jurisdiction of the EPA to issue or enforce this ACOC, and agrees not to contest the validity of this ACOC or its terms or conditions.

III. STATEMENT OF PURPOSE

- This ACOC provides for the resolution of EPA Region 6's investigation of Respondent's
 Facility for the applicable time described below.
- 7. In entering into this ACOC, the mutual objectives of Complainant and Respondent are to remedy, and/or prevent the potential endangerment to human health and/or the environment from activities involving solid waste and hazardous waste, and to ensure that the injunctive relief that Respondent will complete as described the Section VI, Compliance Order, is protective of human health and/or the environment.

IV. STATUTORY AND REGULATORY BACKGROUND

- 8. Federal regulation of hazardous waste is primarily based on RCRA, enacted on October 21, 1976 to amend the Solid Waste Disposal Act, and HSWA enacted by Congress in 1984 to further amend the Solid Waste Disposal Act. RCRA establishes a "cradle-to-grave" program to be administered by the Administrator of EPA and authorized states for regulating the generation, transportation, treatment, storage, and disposal of hazardous waste. See 42 U.S.C. § 6901 et seq.
- 9. RCRA's Subchapter III (RCRA §§ 3001-3023, 42 U.S.C. §§ 6921-6940, known as "Subtitle C") required EPA to promulgate regulations establishing performance standards applicable to facilities that generate, transport, treat, store, or dispose of hazardous wastes.

 Together, RCRA Subtitle C and its implementing regulations, set forth at 40 C.F.R. Parts 260 279, comprise EPA's RCRA hazardous waste program.
- 10. Pursuant to its authority under RCRA, EPA has promulgated regulations at 40 C.F.R. Parts 260 through 272 applicable to generators, transporters, and treatment, storage, and disposal facilities. These regulations generally prohibit treatment, storage, and disposal of hazardous waste without a permit or equivalent "interim status." They prohibit land disposal of certain hazardous wastes, and provide detailed requirements governing the activities of those who generate hazardous waste and those who are lawfully permitted to store, treat, and dispose of hazardous waste.
- 11. Pursuant to 40 C.F.R. § 261.2, a "solid waste" is any discarded material that is not otherwise excluded under 40 C.F.R. § 261.4(a), or that is not excluded by variance. A discarded material is any material which is abandoned, recycled, inherently waste-like, or a military munition. Materials are solid waste, as defined in 40 C.F.R. § 261.2, if they are abandoned

- by being: disposed of, burned or incinerated; or accumulated, stored, or treated (but not recycled) before, or in lieu of, being abandoned by being disposed of, burned, or incinerated.
- 12. A solid waste is a hazardous waste if it is not excluded from regulation as a hazardous waste under 40 C.F.R. § 261.4(b), and it exhibits any of the characteristics of hazardous waste identified in 40 C.F.R. Part 261, Subpart C or it is listed in 40 C.F.R. Part 261, Subpart D.
- 13. Characteristic hazardous wastes are assigned "D" codes in 40 C.F.R. Part 261, Subpart C, depending on the specific hazardous characteristic that the waste exhibits.
- 14. An ignitable hazardous waste has a flash point of less than 60 degrees centigrade (140 degrees Fahrenheit) and is assigned the D001 hazardous waste code pursuant to 40 C.F.R. § 261.21.
- 15. Listed wastes are assigned with "F", "K", "P", and "U" codes in 40 C.F.R. Part 261, Subpart D, depending on the specific waste generated from a non-specific source, a specific source, or discarded commercial chemical products, off-specification species, container residues and spill residues therefrom.

- 21. Between March-April 2019, EPA conducted a RCRA investigation and record review ("Investigation") of Respondent's performance as a generator of hazardous waste for the time period between January 2017 to April 2019.
- During the Investigation, Respondent, at a minimum, generated waste exhibiting the characteristics for ignitability (D001) and toxicity for Methyl ethyl ketone (D035).
- During the Investigation, Respondent, at a minimum, generated listed hazardous waste from non-specific sources including those identified with the following waste codes: F003 and F005.
