

4. Pursuant to Section 402 of the CWA, 33 U.S.C. § 1342, EPA authorizes states to issue National Pollutant Discharge Elimination System (“NPDES”) permits that, among other things, prescribe conditions whereby a discharge of pollutants may be authorized and establish design, construction, operation, and maintenance requirements for the permit holder.
5. Section 502(12) of the CWA, 33 U.S.C. § 1362(12), defines the term “discharge of pollutant” to include “any addition of any pollutant to navigable waters from any point source.”
6. “Pollutant” is defined by Section 502(6) of the CWA, 33 U.S.C. § 1362 to include, *inter alia*, biological materials and agricultural waste discharged to water.
7. “Point source” is defined by Section 502(14) of the CWA, 33 U.S.C. § 1362 to include “any discernible, confined and discrete conveyance, including but not limited to any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, [or] concentrated animal feeding operation . . . from which pollutants are or may be discharged.”
8. To implement Section 402 of the CWA, EPA promulgated regulations codified at 40 C.F.R. § 122. Under 40 C.F.R. § 122.23(d)(1), the owner or operator of a CAFO must apply for an NPDES permit if the CAFO discharges or proposes to discharge. A CAFO proposes to discharge if it is designed, constructed, operated, or maintained such that a discharge will occur. 40 C.F.R. § 122.23(d)(1).
9. “Animal feeding operation” or “AFO” is defined by 40 C.F.R. § 122.23(b)(1) as a lot or facility where animals have been, are, or will be stabled or confined and fed or maintained for a total of 45 days or more in any twelve month period, and where crops, vegetation, forage growth, or post-harvest residues are not sustained in the normal growing season over any portion of the lot or facility.
10. “Concentrated animal feeding operation” or “CAFO” is defined by 40 C.F.R. § 122.23(b)(2) as an animal feeding operation that is defined in accordance with 40 C.F.R. § 122.23(b).
11. “Large CAFO” is defined according to 40 C.F.R. § 122.23(b)(4)(iii) as an animal feeding operation that stables or confines “1,000 cattle other than mature dairy cows or veal calves. Cattle includes but is not limited to, heifers, steers, bulls, and cow/calf pairs.”
12. “Medium CAFO” is defined according to 40 C.F.R. § 122.23(b)(6) as an animal feeding operation that stables or confines “300 to 999 cattle other than mature dairy cows or veal calves” and either of the following conditions are met:

- a. Pollutants are discharged into waters of the United States through a man-made ditch, flushing system, or other similar man-made device; or
 - b. Pollutants are discharged directly into waters of the United States which originate outside of and pass over, across, or through the facility or otherwise come into direct contact with the animals confined in the operation.
13. "Waters of the United States" are defined in 40 C.F.R. § 122.2 to include intrastate rivers and streams, and tributaries thereto.
 14. The Iowa Department of Natural Resources ("IDNR") is the agency within the state of Iowa with the authorized authority to administer the federal NPDES Program. EPA maintains concurrent enforcement authority with authorized state NPDES programs for violations of the CWA.

Factual Background and Findings of Violation

15. Respondent owns and operates a feedlot that is located in the southeast ¼ of Section 35 in Township 85 North, Range 42 West, in Monona County, Iowa (the Facility).
16. On March 16, 2011, EPA personnel conducted a compliance evaluation inspection of the Facility. During the inspection, EPA's inspectors observed flow paths and swales that carry process wastewater pollutants from the Facility into Rush Creek during significant rain events. EPA also observed culverts and roadside ditches that facilitate the discharge of process wastewater pollutants into Rush Creek during significant rain events. Based on the size of the Facility, the distance from the Facility to Rush Creek, and the slope and condition of the land across that distance, wastewater containing pollutants from open feeding areas at the Facility has and will continue to discharge into the Rush Creek and its tributaries as a result of significant precipitation events.
17. The roadside ditches and culverts are man-made conveyances pursuant to 40 C.F.R. § 122.23(b)(6).
18. Rush Creek and its tributaries are waters of the United States, as defined in 40 C.F.R. §122.2. The Rush Creek flows into the Soldier River.
19. The Facility confines and feeds or maintains cattle for a total of forty-five (45) days or more in any twelve month period.
20. Crops, vegetation, forage growth, and post harvest residues are not sustained over any portion of the Facility's feeding areas.
21. The Facility is an AFO as defined by 40 C.F.R. §122.23(b)(1).

22. The Facility was confining approximately 1,050 head of beef cattle at the time of the March 16, 2011, EPA inspection.
23. The Facility confines and feeds or maintains greater than 999 head of beef cattle for a total of forty-five (45) days or more in any twelve month period. Therefore, the Facility is a Large CAFO as that term is defined in 40 C.F.R. § 122.23(b)(4)(iii). Respondent's Facility confines between 300 and 999 head of beef cattle for a total of forty-five (45) days or more in any twelve month period and discharges pollutants through man-made ditches and culverts to a water of the United States. Therefore, Respondent's Facility is also a Medium CAFO as that term is defined in 40 C.F.R. §122.23(b)(6).
24. The Facility does not have adequate livestock waste control facilities to prevent the discharge of manure, litter, and process waste water into the Rush Creek and its tributaries.
25. Respondent has not applied for an NPDES permit for the Facility.
26. The intermittent yet ongoing flow of process waste water pollutants from Respondent's Facility through the roadside ditch and culverts and into Rush Creek and its tributaries constitutes unauthorized discharges of pollutants from a point source to waters of the United States. The unauthorized discharges and Respondent's failure to apply for an NPDES permit are violations of Sections 301, 308 and/or 402 of the CWA, 33 U.S.C. §§1311, 1318 and 1342, and implementing regulations.

Order For Compliance

Based on the Findings of Violation set forth in paragraphs 14 through 26 above, and pursuant to Sections 308(a) and 309(a)(3) of the CWA, 33 U.S.C. §§ 1318(a) and 1319(a)(3), Respondent is hereby ORDERED to take the following actions to eliminate its violations of the CWA:

27. Immediately, upon receipt of this Order, Respondent shall cease all discharges of manure, litter or process waste water from the Facility to waters of the United States. If manure, litter or process waste water cannot be managed at the Facility in a manner that prevents unauthorized discharges to waters of the United States, then Respondent shall immediately reduce the number of cattle confined at the Facility below 1,000 head.
28. If unable to cease all discharges, within fifteen (15) days of the effective date of this Order, Respondent shall submit an Interim Measures Plan (Plan) to EPA. The Plan shall describe, in detail, actions that Respondent will take to reduce the discharge of pollutants from Respondent's Facility to waters of the United States until permanent livestock waste controls are in place. The Plan shall also include a schedule for implementation of the

interim measures. The interim measures shall remain in place and operated until Respondent completes construction of the feedlot waste controls as required by IDNR. Respondent shall implement the Plan immediately.

29. Unless Respondent permanently reduces the number of livestock confined at the Facility below regulatory thresholds for a Medium CAFO, because of the presence of a man-made ditch and culvert, Respondent shall apply for an NPDES permit for the Facility within ninety (90) days of the effective date of this Order. Upon issuance of the NPDES Permit, Respondent shall comply with all terms contained therein, including terms related to the design, construction, operation, and maintenance of livestock waste controls.
30. By September 30, 2012, Respondent shall complete construction of feedlot waste controls as required by IDNR pursuant to NPDES and other state issued permits. If construction is not completed by this date, Respondent shall cease operations within areas of the Facility where feedlot runoff cannot be managed to prevent discharges to waters of the United States through the ditches and/or culverts. If Respondent is unable to prevent these discharges by this date then Respondent shall reduce the number of cattle confined at the Facility below regulatory threshold for both Large and Medium CAFOs until the controls are in place and Respondent has received an NPDES permit. Respondent shall not repopulate cattle above these regulatory thresholds at the Facility unless the Facility can be operated in a manner that complies with the CWA.
31. If Respondent intends to apply for an NPDES permit and construct runoff controls to allow the confinement of cattle above regulatory thresholds, then beginning thirty (30) days after receipt of this Order and continuing monthly on the seventh day of each month until Respondent submits a Notice of Construction Completion to EPA, Respondent shall submit written monthly progress reports to EPA. The monthly reports shall describe, in detail, the construction and related activities that occurred at the Facility during the reporting period, construction and related activities anticipated during the upcoming reporting period, and a description of any problems encountered or anticipated and how these problems were/will be addressed.
32. Upon completion of the runoff control structures, Respondent shall submit a Notice of Construction Completion certified by a professional engineer to EPA within thirty (30) days of completion of construction. The notification shall be in writing and shall include as-built drawings of the constructed improvements.

Effect of Order

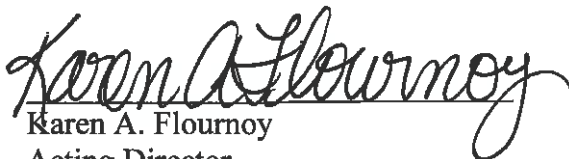

33. This Order shall not constitute a permit under the CWA. Compliance with the terms of this Order shall not relieve Respondent of its responsibility to obtain any required local, state and/or federal permits.

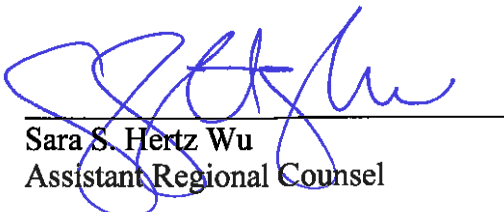

34. Compliance with the terms of this Order shall not relieve Respondent of liability for, or preclude the EPA from initiating an administrative or judicial enforcement action to recover penalties for any violations of the CWA, or seek additional injunctive relief, pursuant to Section 309 of the CWA, 42 U.S.C. § 1319.
35. Nothing in this Order shall limit the EPA's right to obtain access to, and/or inspect Respondent's Facility, and/or to request additional information from Respondent, pursuant to the authority of Section 308 of the CWA, 33 U.S.C. § 1318.
36. EPA may subsequently amend this Order in accordance with the authority of the CWA. For example, EPA may amend this Order to address any non-compliance with the CWA, including, but not limited to, any non-compliance with the requirements of Section 402 of the CWA. In the event of any such subsequent amendment to this Order, all requirements for performance of this Order not affected by the amendment shall remain as specified by this original Order.
37. If any provision or authority of this Order or the application of this Order to Respondent is held by federal judicial authority to be invalid, the application to Respondent of the remainder of this Order shall remain in full force and effect and shall not be affected by such a holding.
38. All submissions to EPA required by this Order shall be sent to:

Lantz Tipton
CAFO Enforcement Program
Water, Wetlands and Pesticides Division
U.S. Environmental Protection Agency, Region 7
901 North 5th Street
Kansas City, Kansas 66101.
39. Pursuant to 40 C.F.R. §§ 2.201-2.311, Respondent may assert a business confidentiality claim covering any portion of the submitted information which is entitled to confidential treatment and which is not effluent data. For any such claim, describe the basis for the claim under the applicable regulation. Any material for which business confidentiality is claimed should be placed in a separate envelope labeled, "Confidential Business Information." Failure to assert a claim in the manner described in 40 C.F.R. § 2.203(b) allows EPA to release the submitted information to the public without further notice. EPA may disclose information subject to the business confidentiality claim only to the extent set forth in the above-cited regulations. Special rules governing information obtained under the CWA appear in 40 C.F.R. § 2.302.

40. Notice is hereby given that violation of, or failure to comply with, any of the provisions of the foregoing Order may subject Respondent to (1) civil penalties of up to \$37,500 per day for each violation, pursuant to Section 309(d) of the CWA, 33 U.S.C. § 1319(d); or (2) civil action in federal court for injunctive relief, pursuant to Section 309(b) of the CWA, 33 U.S.C. § 1319(b).
41. The terms of this Order shall be effective and enforceable against Respondent upon its receipt of the Order.

Karen A. Flournoy
Acting Director
Water, Wetlands and Pesticides Division

Sara S. Hertz Wu
Assistant Regional Counsel

CERTIFICATE OF SERVICE

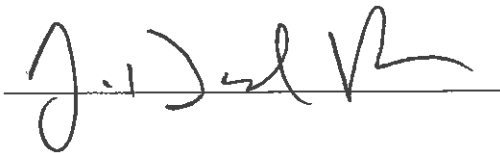

I certify that on the date note below I filed the original and one true and correct copy of the signed original Findings of Violation and Order of Compliance with the Regional Hearing Clerk, Region 7.

I further certify that I sent by certified mail, return receipt requested, a true and correct copy of the signed original Findings of Violation and Order for Compliance together with cover letter and small business assistance information, to the following:

Mr. Norman Petersen
Mr. Joel Bubke
Petersen-Bubke Feedlot
43626 160th Street
Mapleton, Iowa 51034.

I further certify that on the date noted below, I sent by certified mail, return receipt requested, a true and correct copy of the signed original Findings of Violation and Order for Compliance to the following representative of the State of Iowa:

Mr. Ken Hessenius
Iowa Department of Natural Resources
Field Office #3
1900 Grand Avenue
Gateway North Mall, Suite E17
Spencer, Iowa 51301.
