REGIONAL HEARING
CLERK

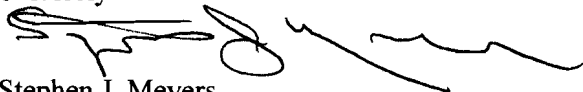

Re: Docket No. FIFRA-02-2009-5201

This is to keep you informed as to our efforts in addressing the complaint and to be certain we are in full compliance.

For the past five years, we have employed an outside environmental consultant and last year we employed a second outside consultant to assist us in addressing the matter of being compliant. We took their advice and made changes to our literature and website based on their counsel. I am very concerned that the advice I was given after paying thousands of dollars was erroneous.

I have now employed the services of Toxel, LLC in Gainesville, Virginia. They were highly recommended after extensive research. Toxel's highly experienced staff includes former senior government scientific and regulatory review managers as well as regulatory affairs directors from the industry. We are working diligently with Mr. Alan Katz, President and J. Michael Kelley, Ph.D., Vice President in order to answer the complaint in a thorough and timely manner. We appreciate the opportunity to file the extension and your acceptance of March 2, 2009 as the date our response must be submitted to you.

Sincerely

Stephen J. Meyers
President
Anabec Inc.
