CONSENT AGREEMENT

A. PRELIMINARY STATEMENT

1. This is an administrative penalty assessment proceeding brought under Section 113(d) of the Clean Air Act (the "Act"), 42 U.S.C. § 7413(d), and Sections 22.13 and 22.18 of the Consolidated Rules of Practice Governing Administrative Assessment of Civil Penalties and the Revocation/Termination or Suspension of Permits ("Consolidated Rules"), as codified at 40 C.F.R. Part 22.
2. Complainant is the United States Environmental Protection Agency, Region 4 (the "EPA"). The Director of the Air, Pesticides and Toxics Management Division, EPA Region 4, is delegated the authority to settle civil administrative penalty proceedings under Section 113(d) of the Act.
3. Respondent, Lamberti Synthesis USA, Inc., is licensed to do business in the State of Tennessee. Respondent is a "person" as defined in Section 302(e) of the Act, 42 U.S.C. § 7602(e).
4. Complainant and Respondent, having agreed that settlement of this action is in the public interest, consent to the entry of this consent agreement ("Consent Agreement" or "Agreement") and the attached final order ("Final Order" or "Order") without adjudication of any issue of law or fact herein, and Respondent agrees to comply with the terms of this Consent Agreement and Final Order.

B. JURISDICTION

5. This Consent Agreement is entered into under Section 113(d) of the Act, as amended, 42 U.S.C. § 7413(d), and the Consolidated Rules, 40 C.F.R. Part 22. The alleged violations in this Consent Agreement are pursuant to Section 113(a)(3)(A).
6. The EPA and the United States Department of Justice jointly determined that this matter, although it involves alleged violations that occurred more than one year before initiation of this proceeding, is appropriate for an administrative penalty assessment. 42 U.S.C. § 7413(d); 40 C.F.R. § 19.4.

7. On July 10, 2015, the EPA issued to Respondent a notice of potential violation (“NOPV”), providing notice that the EPA found that Respondent potentially committed the alleged violations described in Section E of this Agreement and providing Respondent an opportunity to confer with the EPA. On September 2, 2015, representatives of Respondent and the EPA discussed the July 10, 2015, NOPV.

8. The Regional Judicial Officer is authorized to ratify this Consent Agreement which memorializes settlement between Complainant and Respondent. 40 C.F.R. § 22.4(b) and 22.18(b).

9. The issuance of this Consent Agreement and attached Final Order simultaneously commences and concludes this proceeding. 40 C.F.R. § 22.13(b).

C. GOVERNING LAW

10. Respondent operates a “stationary source” as that term is defined by Section 302(z) of the Act, 42 U.S.C. § 7602(z). The Respondent’s stationary source is located at 4001 North Hawthorne Street, Chattanooga, Tennessee 37407 (stationary source).

11. Section 112(r) of the Act, 42 U.S.C. § 7412(r), addresses the prevention of releases of substances listed pursuant to Section 112(r)(3) of the Act, 42 U.S.C. § 7412(r)(3). The purpose of this section is to prevent the accidental release of extremely hazardous substances and to minimize the consequences of such releases. Pursuant to Section 112(r)(7) of the Act, 42 U.S.C. § 7412(r)(7), the EPA is authorized to promulgate regulations for accidental release prevention.

12. Pursuant to Section 112(r)(3) and 112(r)(7) of the Act, 42 U.S.C. §§ 7412(r)(3) and 7412(r)(7), the EPA promulgated rules codified at 40 C.F.R. Part 68, Chemical Accident Prevention Provisions. These regulations are collectively referred to as the “Risk Management Program” (RMProgram) and apply to an owner or operator of a stationary source that has a threshold quantity of a regulated substance in a process. Pursuant to Sections 112(r)(3) and 112(r)(5) of the Act, 42 U.S.C. §§ 7412(r)(3) and 7412(r)(5), the list of regulated substances and threshold levels are codified at 40 C.F.R. § 68.130.

13. Pursuant to Section 112(r)(7)(B)(iii) of the Act, 42 U.S.C. § 7412(r)(7)(B)(iii), and 40 C.F.R. §§ 68.10 and 68.150, the owner or operator of a stationary source that has a regulated substance in an amount equal to or in excess of the applicable RMProgram threshold in a “process” as defined in 40 C.F.R. § 68.3, must develop an RMProgram accidental release prevention program, and submit and register a single Risk Management Plan (RMPlan) to the EPA.

D. FACTUAL ALLEGATIONS

14. Respondent has submitted and registered an RMPlan to the EPA for its stationary source, and has developed an RMProgram accidental release prevention program for the stationary source.

15. For the purpose of this Agreement:

(a) At its stationary source, the Respondent operates polyhydric alcohol production process.

(b) At its stationary source, the Respondent uses ethylene oxide, propylene oxide, and ethylenediamine in the polyhydric alcohol production process.

(c) At its stationary source, the Respondent has one RMProgram level 3 covered process, polyhydric alcohol production process, which otherwise uses toxic regulated substances (ethylene oxide, propylene oxide, and ethylenediamine) in amounts exceeding their applicable thresholds of 10,000 pounds.

(d) During calendar year 2014, EPA opened an RMProgram compliance monitoring investigation to determine Respondent's compliance with 40 C.F.R. Part 68 at its stationary source. As part of this investigation, the EPA conducted an onsite inspection of RMProgram related records on May 7, 2014. The focus of the onsite inspection was to assess the Respondent's compliance with RMProgram requirements for its covered processes operating at its stationary source. The inspection consisted of an examination of Respondent's relevant accident prevention program documentation as well as a visual inspection of various aspects of facility operations. Respondent's management, health and safety, engineering and maintenance personnel assisted the EPA during the inspection.

(e) At the time of the inspection, Respondent could not provide documentation that process piping complied with the American Institute/American Society of Mechanical Engineers A13.1 Standard which requires that the contents of process pipes be identified.

(f) At the time of the inspection, the Respondent had not provided process operators with refresher training after their initial training.

(g) At the time of the inspection, the Respondent had not provided maintenance training for their employees who maintain the process equipment.

(h) At the time of the inspection, the Respondent could not provide information that the safety sensor had been inspected, based on the facility's quarterly inspection schedule between June 28, 2013, and the date of the inspection, May 7, 2014.

(i) At the time of the inspection, the Respondent could not provide information that the Pump & Rotating Equipment inspections had been conducted after September 1, 2013, as required by the facility's quarterly inspection schedule.

(j) At the time of the inspection, the Respondent provided copies of the most recent compliance audits, which were conducted on March 5, 2007, and June 30, 2012. The audits were performed more than 5 years apart.

(k) Respondent completed an updated Process Hazard Analysis (PHA) in December 2009 after it added the D11.01 reactor. Respondent did not update its RMP after it updated the PHA.

(l) Respondent completed an updated PHA in March 2013 for a new reactor D31.01,

which was installed in February 2014. Respondent did not update its RMP after it updated the PHA.

E. ALLEGED VIOLATIONS OF LAW

16. Based on EPA's compliance monitoring investigation, the EPA alleges that the Respondent violated the codified rules governing the Act's Chemical Accident Prevention Provisions, because Respondent did not adequately implement provisions of 40 C.F.R. Part 68 when it:

Failed to document that equipment complies with recognized and generally accepted good engineering practices as required by 40 C.F.R. § 68.65(d)(2);

Failed to provide refresher training at least every three years to each employee involved in operating a process as required by 40 CFR § 68.71(b);

Failed to train each employee involved in maintaining the on-going integrity of process equipment as required by 40 CFR § 68.73(c);

Failed to have the frequency of inspections and tests of process equipment be consistent with applicable manufacturers' recommendations and good engineering practices, and more frequently if determined to be necessary by prior operating experience as required by 40 CFR § 68.73(d)(3);

Failed to evaluate compliance with the provisions of the prevention program at least every three years as required by 40 CFR § 68.79(a);

Failed to review, update and submit the RMP within six months of a change requiring a revised PHA or hazard review as required by 40 CFR § 68.190(b)(5).
