CAREER SUMMARY

PROFESSIONAL EXPERIENCE

**Director Corporate Operations; Engineering and Maintenance, 1986 to Jan. 2003
Retired**

**Manager Corporate Operations; Engineering and Maintenance, May 1983 to 1986
Anheuser-Busch, St. Louis, MO**

This work scope included involvement in capital budget prioritization to insure required return on investment, capital project development/review, packaging facility design, selection of packaging and utility equipment, interface with relevant vendors, liaison between the corporate engineering staff, corporate operation staff, and twelve (12) domestic plants, planning and implementation of an integrated customer serving planned maintenance system, corporate responsibility for the utility operations of the system (steam generation, electrical distribution and ammonia), participation in relevant regulatory issues and resolution of major operational issues as they occurred. All of this was done with an overriding mandate of safety for all personnel and facilities, absolute adherence to optimum product quality, and establishing cost effective operating and maintenance systems.

There have been many accomplishment highlights with a declining maintenance cost over many years (as measured by work hour/unit of production), packaging efficiency increases, and participation in the restart of the Los Angeles plant within 5 days following the 1994 earthquake being particularly notable.

**Project and Maintenance Manager
In a Wet Corn Milling Operation, March 1982-May 1983
A.E. Staley, Decatur, Illinois**

**Pabst Brewing, November 1964-February 1982
Peoria, Illinois**

Progressed from being an assistant project engineer in the malting and corn milling facilities to project engineer, maintenance manager for the three plant system (malt house, dry corn milling, and brewing), and Resident Engineer/Plant engineer for the Pabst Peoria division.

Accomplishment highlights include an approx 40% increase in packaging efficiency and leading the design/ construction/ production implementation teams in providing an on site can manufacturing facility.

State of Illinois, Division of Highways, Field Engineer 1960-1964

CDL Nov. 8, 2007
