Docket No.
RCRA-02-2016-7103

Jaf

This administrative proceeding for the assessment of a civil penalty and for compliance was commenced pursuant to Section 3008 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act and the Hazardous and Solid Waste Amendments of 1984, 42 U.S.C. § 6901 *et seq.* (collectively referred to as "RCRA" or the "Act"). Section 3008 of RCRA, 42 U.S.C. § 6928, authorizes the Administrator of the United States Environmental Protection Agency ("EPA" or "Agency"), *inter alia*, to "issue an order assessing a civil penalty for any past or current violation, requiring compliance immediately or within a specified time period, or both...." On September 30, 2016, Complainant in this proceeding, the Director of the Division of Enforcement and Compliance Assistance, EPA, Region 2, issued a Complaint and Notice of Opportunity for Hearing, bearing docket number RCRA-02-2016-7103 ("Complaint"), to Respondent, Caribbean All Metal Recyclers Corp. The Complaint alleges two separate counts against Respondent: (a) the unlawful export of hazardous waste (spent lead acid batteries) in 2015 to China, and (b) the unlawful export of hazardous waste (spent lead acid batteries) in 2015 to South Korea. Respondent timely served its answer on or about December 12, 2016.

This Consent Agreement and Final Order ("CA/FO") is being entered into by the parties pursuant to 40 C.F.R. § 22.18(b) following their February 15, 2017 settlement conference. No formal findings of fact or conclusions of law have been made by an administrative or judicial tribunal. The following constitute EPA's findings of fact and conclusions of law, and Respondent neither admits nor denies such findings or conclusions.

EPA FINDINGS OF FACT

1. Respondent is Caribbean All Metal Recycling Corp., a for-profit Puerto Rico corporation existing since 2008, that engages in commercial recycling activities including scrap metal recycling. As part of Respondent's business operations, it has collected and stored spent

2017 JUN 29 PM 2:35

lead acid batteries for export to foreign countries for reclamation.

2. Respondent has owned and operated a facility located at Carr. 848, Km. 2.9, San Anton Ward, in Carolina, Puerto Rico ("Respondent's facility").

3. Following an inspection by representatives of Puerto Rico's Environmental Quality Board in October 2010, EPA assigned Identification Number PRN008023376 to Respondent's facility for tracking purposes. On or about June 3, 2015, a duly designated representative of EPA conducted an inspection under authority of Section 3007 of RCRA, 42 U.S.C. § 6927, of Respondent's facility to ascertain Respondent's compliance with RCRA and its implementing regulations, with a follow-up inspection conducted on July 10, 2015. At the time EPA conducted its inspections of Respondent's facility, Respondent conducted its business there.

4. EPA, pursuant to the authority granted it under Section 3007 of RCRA, 42 U.S.C. § 6927, sent Respondent on or about May 6, 2016, an information request letter (IRL) to ascertain whether Respondent's exports of spent lead acid batteries complied with applicable RCRA requirements. On or about June 10, 2016, Respondent replied to said IRL.

5. In May and June 2015, Respondent exported through the port of San Juan, Puerto Rico, 23 shipments of spent lead acid batteries to the Republic of Korea (South Korea) for recovery operations (*i.e.* reclamation).

6. South Korea is listed in 40 C.F.R. § 262.58(a)(1) as a designated member of the Organization for Economic Cooperation and Development (OECD).

7. Respondent exported the spent lead acid batteries to South Korea without having provided written notification (or without having a third-party provide such notification on its behalf) to EPA as required by 40 C.F.R. 262.83(b)(1)(i).

8. In June 2015, Respondent exported through the port of San Juan, Puerto Rico, seven shipments of spent lead acid batteries to China for reclamation.

9. China is not a listed member country of the OECD.

10. Respondent's export to China of the spent lead acid batteries occurred without Respondent (or a third-party acting on Respondent's behalf): (a) having provided the written notification required pursuant to 40 C.F.R. §§ 262.52(a) and 266.80, and (b) having a copy of the EPA Acknowledgment of Consent accompany the hazardous waste shipments as required by 40 C.F.R. §§ 262.52(c) and 266.80.

11. Respondent, or a third-party acting on Respondent's behalf, failed to provide notification to EPA prior to exporting the spent lead acid batteries to China as required pursuant to 40 C.F.R. §§ 262.53 and 266.80.

EPA CONCLUSIONS OF LAW

1. Respondent has been since 2008, and continues to be, a "person" within the meaning of Section 1004(15) of RCRA, 42 U.S.C. § 6903(15) and 40 C.F.R. § 260.10.
2. Respondent has been since 2008, and continues to be, the "owner" and "operator" of Respondent's facility within the meaning of 40 C.F.R. § 260.10, and such facility constitutes a "facility" and a "new facility" within the meaning of 40 C.F.R. § 260.10.
3. Section 3008(a)(1) of RCRA, 42 U.S.C. § 6928(a)(1), provides, in relevant part, that "whenever on the basis of any information the Administrator [of EPA] determines that any person has violated or is in violation of any requirement of this subchapter [Subchapter III of the Act, 42 U.S.C. §§ 6921-6939e], the Administrator may issue an order assessing a civil penalty for any past or current violation, requiring compliance immediately or within a specified time period, or both...."
4. A violation of a requirement set forth in any regulation(s) codified at, *inter alia*, 40 C.F.R. Part 262 and/or Part 266 constitutes a "violation of any requirement of this subchapter" within the meaning of Section 3008(a)(1) of the Act, 42 U.S.C. § 6928(a)(1). Jaf
5. The spent lead acid batteries Respondent exported to South Korea and China constitute "solid waste" within the meaning of Section 1004(27) of RCRA, 42 U.S.C. § 6903(27), and 40 C.F.R. § 261.2, and "hazardous waste" within the meaning of Section 1004(5) of RCRA, 42 U.S.C. § 6903(5), and 40 C.F.R. § 261.3.
6. As a consequence of Respondent's export of the spent lead acid batteries to South Korea and China, Respondent is subject to the provisions of item number "6" in the table set forth in 40 C.F.R. § 266.80(a).
7. Pursuant to item number 6 in the table found at 40 C.F.R. § 266.80 (Subpart G of 40 C.F.R. Part 266), a person exporting spent lead acid batteries to one of the OECD countries specified in 40 C.F.R. § 262.58(a)(1) must comply with, *inter alia*, 40 C.F.R. Part 262, subpart H.
8. The regulation codified at 40 C.F.R. § 262.80(a) states, "The requirements of this subpart [Subpart H of 40 C.F.R. Part 262] apply to imports and exports of wastes that are considered hazardous under U.S. national procedures and are destined for recovery operations in the countries listed in [40 C.F.R.] § 262.58(a)(1)." A waste is considered hazardous under U.S. national procedures if it meets the federal definition of hazardous waste under 40 C.F.R. § 261.3 and, *inter alia*, is subject to the export requirements in the spent lead acid battery management standards set forth in 40 C.F.R. Part 266.
9. The notification requirement set forth in 40 C.F.R. § 262.83(b)(1) provides, in relevant part, that "[a]t least forty-five (45) days prior to commencement of each transboundary movement, the exporter must provide written notification in English of the proposed

transboundary movement to [EPA's] Office of Enforcement and Compliance Assurance" in Washington, DC. Respondent was the "exporter" of the spent lead acid batteries exported to South Korea within the meaning of such provision.

10. As a consequence of the Respondent's aforementioned (§ 7 of the "EPA Findings of Fact," above) failure to provide the requisite notification, Respondent's export of the 23 shipments of spent lead acid batteries to South Korea (§ 5 of the "EPA Findings of Fact," above): (a) was prohibited pursuant to 40 C.F.R. § 262.83(b) and 40 C.F.R. § 266.80(a), which incorporates by reference 40 C.F.R. § 262.83, and (b) constitutes a violation of each of 40 C.F.R. § 262.83, and (b) 40 C.F.R. § 266.80, which incorporates by reference 40 C.F.R. § 262.83.

11. Pursuant to item number 6 in the table found at 40 C.F.R. § 266.80 (Subpart G of 40 C.F.R. Part 266), a person exporting spent lead acid batteries to a country that is not a member of the Organization for Economic Cooperation and Development (OECD), *i.e.* that is not listed in 40 C.F.R. § 262.58(a)(1), must comply with the requirements applicable to a primary exporter in 40 C.F.R. § 262.53 and must, in accordance with item number 6 in said table, "[e]xport these batteries only upon consent of the receiving country and in conformance with the EPA Acknowledgement of Consent as defined in subpart E of [40 C.F.R.] part 262 of this chapter; and [] [p]rovide a copy of the EPA Acknowledgment of Consent for the shipment to the transporter transporting the shipment for export."

12. Forty C.F.R. § 262.52 provides, in relevant part, that "[e]xports of hazardous waste are prohibited except in compliance with the applicable requirements of this subpart and [40 C.F.R.] part 263. Exports of hazardous waste are prohibited unless: (a) Notification in accordance with § 262.53 has been provided; (b) The receiving country has consented to accept the hazardous waste; (c) A copy of the EPA Acknowledgement of Consent to the shipment accompanies the hazardous waste shipment and, unless exported by rail, is attached to the manifest... [and] (d) The hazardous waste shipment conforms to the terms of the receiving country's written consent as reflected in the EPA Acknowledgment of Consent."

13. In relevant part, 40 C.F.R. § 262.53(a) provides that "[a] primary exporter of hazardous waste must notify EPA of an intended export before such waste is scheduled to leave the United States. A complete notification should be submitted sixty (60) days before the initial shipment is intended to be shipped off site[.]" and such notification of intent must be submitted to EPA's Office of Enforcement and Compliance Assurance in Washington, DC.

14. Respondent was required to comply with the 40 C.F.R. § 262.53 requirements applicable to a "primary exporter" in order to lawfully export the spent lead acid batteries to China.

15. As a consequence of Respondent's export of spent lead acid batteries to China without the notification as required by 40 C.F.R. §§ 262.52(a) and 266.80 having been provided (as set forth in paragraphs 8 and 10 of the "EPA Findings of Fact," above), Respondent's export of the seven shipments of spent lead acid batteries to China was prohibited pursuant to said provisions, and said failure to provide such notice constitutes a violation of said regulatory provisions.

16. As a consequence of Respondent's export of spent lead acid batteries to China without the EPA Acknowledgment of Consent as required by 40 C.F.R. §§ 262.52(c) and 266.80 having accompanied the shipments (as set forth in paragraph 10 of the "EPA Findings of Fact," above), Respondent's export of the seven shipments of spent lead acid batteries to China was prohibited pursuant to said provisions, and such failure to have included the EPA Acknowledgement of Consent with the shipments constitutes a violation of said regulatory provisions.

17. As a consequence of the Respondent's failure to provide the notification required by 40 C.F.R. §§ 262.53 and 266.80 (as set forth in paragraph 11 of the "EPA Findings of Fact," above), Respondent's export of the seven shipments of spent lead acid batteries to China was prohibited pursuant to: (a) 40 C.F.R. § 262.53, and (b) 40 C.F.R. § 266.80(a), which incorporates the substantive obligations set out in 40 C.F.R. § 262.53, and said failure constitutes a violation of said regulatory provisions.

18. Each of the following constitutes a requirement of Subchapter III of the Act, 42 U.S.C. §§ 6921-6939e: (a) 40 C.F.R. § 262.52(a); (b) 40 C.F.R. § 262.52(c); (c) 40 C.F.R. § 262.53; (d) 40 C.F.R. § 262.83; and (e) 40 C.F.R. § 266.80.
