In the Matter of:

Freedom Performance, LLC.

Respondent.

Docket No.
CAA-HQ-2019-8362

BUISNESS CONFIDENTIALITY ASSERTED

THIS IS THE REDACTED, PUBLIC COPY OF THE COMPLAINT

Complaint Appendix A contains material claimed to be confidential business information ("CBI") pursuant to 40 C.F.R. § 2.203(b). The material claimed as CBI is located in the sixth column of Appendix A titled "Total Quantity Sold," and consists of Respondent Freedom Performance LLC's total domestic sales of specific products between May 1, 2015, and November 1, 2016. The material claimed as CBI has been deleted from the publicly-available copy of Appendix A. A complete copy of Appendix A containing the material claimed as CBI has been filed with the Hearing Clerk. If you have any questions, please contact Mark Palermo at (202) 564-8894 or palermo.mark@epa.gov.

COMPLAINT

Preliminary Statement

1. This Complaint is filed in this administrative penalty assessment proceeding under section 205(c)(1) of the Clean Air Act (“CAA”), 42 U.S.C. § 7524(c)(1), and the U.S. Environmental Protection Agency’s (“EPA”) “Consolidated Rules of Practice Governing the Administrative Assessment of Civil Penalties and the Revocation/Termination or Suspension of Permits,” 40 C.F.R. Part 22 (“Consolidated Rules”). 40 C.F.R. § 22.13(a)–(c).
2. Phillip A. Brooks, Director, Air Enforcement Division, Office of Civil Enforcement, Office of Enforcement and Compliance Assurance (“Complainant”), is authorized by lawful delegation from the Administrator of the EPA to institute civil administrative penalty assessment proceedings under section 205(c)(1) of the CAA, 42 U.S.C. § 7524(c)(1).
3. Respondent in this matter is Freedom Performance, LLC.
4. Respondent is a closely-held, active limited liability company organized under the laws of Florida with a principal office, registered office, and registered mailing address at 3910 Goodrich Avenue, Unit 1, Sarasota, Florida 34234. Respondent’s managing members are Geoffrey Kemper and Alice Boomer. Geoffrey Kemper is the registered agent.
5. Respondent is a “person” as defined under section 302(e) of the CAA, 42 U.S.C. § 7602(e).

6. The EPA makes the Alleged Violations of Law, below, based on information gathered during an inspection on November 2, 2016, information provided on Respondent's public website, and other information.

Jurisdiction

7. This action is brought under section 205(c)(1) of the CAA, 42 U.S.C. § 7524(c)(1), and the Consolidated Rules.
8. The EPA may administratively assess a civil penalty for violations of section 203(a)(3)(B) of the CAA. CAA § 205(c)(1), 42 U.S.C. § 7524(c)(1).
9. Where violations occurred after November 2, 2015, and a penalty is assessed on or after January 15, 2019, an administrative civil penalty may not exceed \$378,852 against each violator, unless the Administrator of the EPA and the Attorney General jointly determine that a matter involving a larger penalty amount is appropriate for administrative penalty assessment. CAA § 205(c)(1), 42 U.S.C. § 7524(c)(1); 40 C.F.R. § 19.4 tbl. 1; Civil Monetary Penalty Inflation Adjustment Rule, 84 Fed. Reg. 2056, 2059 (Feb. 6, 2019).
10. The Administrator and the Attorney General jointly determined that this matter, although it may involve a penalty amount greater than \$378,852, is appropriate for administrative penalty assessment. CAA § 205(c)(1), 42 U.S.C. § 7524(c)(1); 40 C.F.R. § 19.4
11. An Administrative Law Judge shall serve as Presiding Officer in this proceeding until an initial decision becomes final or is appealed. 40 C.F.R. §§ 22.3(a), 22.4, 22.16(c).

Governing Law

12. In creating the CAA, Congress found that “the increasing use of motor vehicles ... has resulted in mounting dangers to the public health and welfare.” CAA § 101(a)(2); 42 U.S.C. § 7401(a)(2). Congress’ purposes in creating the CAA were “to protect and enhance the quality of the Nation’s air resources so as to promote the public health and welfare and the productive capacity of its population,” and “to initiate and accelerate a national research and development program to achieve the prevention and control of air pollution.” CAA § 101(b)(1)-(2); 42 U.S.C. § 7401(b)(1)-(2).
13. “Motor vehicle” is defined as “any self-propelled vehicle designed for transporting persons or property on a street or highway.” CAA § 216(2), 42 U.S.C. § 7550(2).
14. Motor vehicles are defined by their attributes and not by how they are used. CAA § 216(2), 42 U.S.C. § 7550(2); 40 C.F.R. § 85.1703.
15. Title II of the CAA and the regulations promulgated thereunder establish stringent standards for the emissions of air pollutants from motor vehicles and motor vehicle engines that “cause, or contribute to, air pollution which may reasonably be anticipated to endanger public health or welfare.” CAA § 202(a), 42 U.S.C. § 7521(a). These pollutants include nitrogen oxides (“NO_x”), particulate matter (“PM”), non-methane hydrocarbons (“NMHCs”), and carbon monoxide (“CO”). CAA § 202(a)(3)(A), 42 U.S.C. § 7521(a)(3)(A).
16. NO_x and NMHCs are reactive gasses that contribute to the formation of PM and ozone.
17. PM is a form of air pollution composed of microscopic solids and liquids suspended in air. PM is emitted directly from motor vehicles and is also formed in the atmosphere from the emission of other pollutants, including NO_x and NMHCs emitted from motor vehicles.
18. Ozone is a highly reactive gas that is formed in the atmosphere, in part, from emissions of pollutants from motor vehicles.

19. Exposure to ozone and PM is linked to a number of health effects as well as premature death. Children, older adults, people who are active outdoors (including outdoor workers), and people with heart or lung disease are particularly at risk for health effects related to ozone or PM exposure.
20. CO is a toxic gas emitted from motor vehicles that can cause headaches, dizziness, vomiting, nausea, loss of consciousness, and death. Long-term exposure to CO has been associated with an increased risk of heart disease.
21. Under section 202 of the CAA, 42 U.S.C. § 7521, the EPA promulgated emission standards for PM, NO_x, CO, and NMHC and other pollutants applicable to motor vehicles and motor vehicle engines, including heavy-duty diesel (“HDD”) trucks and truck engines. *See generally* 40 C.F.R. Part 86.

EPA’s Certificate of Conformity Program for New Motor Vehicles and Motor Vehicle Engines

22. Manufacturers of new motor vehicles or motor vehicle engines must apply for and obtain a certificate of conformity (“COC”) from the EPA to sell, offer to sell, or introduce or deliver for introduction into commerce any new motor vehicle or motor vehicle engine in the United States. CAA § 203(a)(1), 42 U.S.C. § 7522(a)(1).
23. To obtain a COC, the original equipment manufacturer (“OEM”) must demonstrate that each motor vehicle or motor vehicle engine will conform to established emissions standards for NO_x, PM, NMHC, CO, and other pollutants during the motor vehicle or motor vehicle engine’s useful life. CAA § 206(a)(2), 42 U.S.C. § 7525(a)(2); *see* 40 C.F.R. §§ 86.004-21, 86.007-30(a)(1)(i), 86.1844-01, 86-1846-01(a)(1).
24. The COC application must describe, among other things, the emissions-related elements of design of the motor vehicle or motor vehicle engine. *See* 40 C.F.R. § 86.094-21(b)(1) (“The application

... shall include the following: ... a description of [the vehicle's] ... emission control system and fuel system components.”); *see also* 40 C.F.R. § 86.1844-01(d)-(e).

25. The EPA issues COCs to OEMs under section 206(a) of the CAA, 42 U.S.C. § 7525(a), to certify that a particular group of motor vehicles conforms to applicable EPA requirements governing motor vehicle emissions.

Emissions-Related Elements of Design

26. An “element of design” is “any control system (i.e., computer software, electronic control system, emission control system, computer logic), and/or control system calibrations, and/or the results of systems interactions, and/or hardware items on a motor vehicle or motor vehicle engine.”

40 C.F.R. §§ 86.094-2 and 86.1803-01.

27. An “emissions control system” is a unique group of emission control devices, auxiliary emission control devices (“AECDs”), engine modifications and strategies, and other elements of design designated by the Administrator [of the EPA] used to control exhaust emissions of a vehicle.

40 C.F.R. § 86.1803-01.

28. AECDs are “any element of design which senses temperature, vehicle speed, engine RPM, transmission gear, manifold vacuum, or any other parameter for the purposes of activating, modulating, delaying, or deactivating the operation of any part of the emissions control system” of a motor vehicle or motor vehicle engine. 40 C.F.R. §§ 86.1803-01, 86.1844-01(d)(11).

29. Under section 202(m) of the CAA, 42 U.S.C. § 7521(m), the EPA promulgated regulations for motor vehicles manufactured after 2007 that require HDD trucks to have numerous devices or elements of design that, working together, can detect problems, such as malfunction or deterioration, with the vehicle’s emissions control systems and elements of design that could cause a vehicle to fail to comply with the CAA emission standards, alert drivers to these problems, and store electronically-generated malfunction information. 40 C.F.R. §§ 86.005-17, 86.007-17,

86.1806-05. These devices or elements of design are referred to as “onboard diagnostic systems” or “OBD” systems.

30. Under the CAA, the term “person” includes individuals, corporations, partnerships, associations, states, municipalities, and political subdivisions of a state. CAA § 302(e), 42 U.S.C. § 7602(e).

Acts Prohibited by Section 203(a)(3)(B) of the Clean Air Act

31. Section 203(a)(3)(B) of the CAA, 42 U.S.C. § 7522(a)(3)(B), makes it a prohibited act for “any person from manufacturing, selling, offering to sell, or installing any part or component intended for use with, or as part of, any motor vehicle or motor vehicle engine, where a principal effect of the part or component is to bypass, defeat, or render inoperative any device or element of design installed on or in a motor vehicle or motor vehicle engine in compliance with Title II of the CAA, and where the person knows or should know that such part or component is being offered for sale or installed for such use or put to such use.” This is generally known as the defeat device prohibition.
32. It is also a violation for any person to cause any of the acts set forth in CAA section 203(a), 42 U.S.C. § 7522(a).
33. Any person violating sections 203(a)(3)(B) of the CAA, 42 U.S.C. § 7522(a)(3)(B), is subject to a civil penalty of up to \$3,750 for each for each violation that occurred on or before November 2, 2015, and up to \$4,735 for each violation that occurred after November 2, 2015, where penalties are assessed on or after January 15, 2019. CAA § 205(a), 42 U.S.C. § 7524(a); 40 C.F.R. § 19.4; Civil Monetary Penalty Inflation Adjustment Rule, 84 Fed. Reg. 2056, 2059 (Feb. 6, 2019).
34. Any such violation with respect to section 203(a)(3)(B) of the CAA, 42 U.S.C. § 7522(a)(3)(B) shall constitute a separate offense with respect to each part or component. CAA § 205(a), 42 U.S.C. § 7524(a).

General Allegations

Motor Vehicle Emissions-Related Elements of Design

35. OEMs install a variety of hardware and software elements of design in motor vehicles and motor vehicle engines to control emissions of pollutants to comply with the CAA and regulations promulgated thereunder and obtain certification, hereinafter referred to as “Emissions-Related Elements of Design.”
36. Motor vehicles are equipped with “electronic control units” or “ECUs” (also known as “engine control module” or “ECM”), which are computers that monitor and control vehicle operations, including the operation of emission control devices and elements of design.
37. OEMs employ certain hardware devices as emissions control systems to manage and treat exhaust to reduce levels of regulated pollutants from being created or emitted into the ambient air. Such devices include exhaust gas recirculation (“EGR”), diesel particulate filters (“DPFs”), diesel oxidation catalysts (“DOC”), nitrogen oxide adsorption catalysts (“NAC”), and selective catalytic reduction (“SCR”).
38. Exhaust Gas Recirculation System: EGR is an Emissions-Related Element of Design in diesel-fueled motor vehicles that reduces NO_x emissions, which are formed at the high temperatures caused during fuel combustion. By recirculating a portion of engine exhaust gas into the cylinders of the engine, EGR reduces engine temperature and the formation of NO_x. As part of this system, the EGR valve and the throttle valve open and close to adjust the addition of fresh intake air to re-circulated exhaust gases. The EGR system consists of all hardware, parts, sensors, subassemblies, software, AECDS, calibrations, and other components that collectively constitute the system for implementing the strategy for adjusting the volume of exhaust gas in the engine cylinders. The EGR system’s EGR valve, EGR cooler, and associated throttle valve are each an Emissions-

Related Element of Design. HDD OEMs generally design and build motor vehicles and motor vehicle engines using EGR systems to meet NO_x standards. *See* 40 C.F.R. §§ 86.004-11, 86.007-11.

39. “Aftertreatment” refers collectively to the Emissions-Related Elements of Design mounted downstream of the exhaust valve whose design function is to reduce emissions in the engine exhaust before it is emitted to the environment. DPFs, DOCs, NACs, and SCRs are all part of Aftertreatment.
40. Aftertreatment Emissions-Related Elements of Design are contained in OEM-installed stock exhaust pipes.
41. Diesel Particulate Filter: DPF is an Emissions-Related Element of Design in diesel-fueled motor vehicles that controls PM emissions by trapping engine exhaust gas particulates in a filter and periodically oxidizing them through thermal regeneration of the filter. Proper operation of the DPF requires periodic regeneration of the filter to prevent accumulated PM from clogging the filter. The DPF system includes all hardware, parts, sensors, subassemblies, software, AECs, calibrations, and other components that collectively implement this emissions reduction strategy. HDD OEMs began designing and building motor vehicles and motor vehicle engines using DPFs in 2007 to meet more stringent PM emission standards. *See* 40 C.F.R. § 86.007-11.
42. Diesel Oxidation Catalyst: DOC is an Emissions-Related Element of Design that reduces CO and NMHC emissions by promoting the conversion of those pollutants into less harmful gases in diesel-fueled motor vehicles. A DOC system consists of a precious-metal coated, flow-through honeycomb structure contained in a stainless-steel housing. As hot diesel exhaust flows through the honeycomb structure, the coating of precious metal causes a catalytic reaction that breaks down pollutants into less harmful components. The DOC includes all hardware, parts, sensors, subassemblies, software and is used to promote reactions that change exhaust pollutants. HDD

OEMs generally employ DOC systems to meet current emission standards for PM, NMHCs, and CO.

43. NO_x Adsorption Catalysts: NAC is an Emissions-Related Element of Design for controlling NO_x emissions by means of a periodic chemical adsorption of NO_x from exhaust gas. The NAC includes all hardware, parts, sensors, subassemblies, software, AECDS, calibrations, and other components that collectively constitute the system for implementing this strategy.
44. Selective Catalytic Reduction: SCR is an Emissions-Related Element of Design that controls NO_x emissions through catalytic reduction using an ammonia-based diesel exhaust fluid (“DEF”), typically containing urea, as the reducing agent that chemically converts exhaust gas into nitrogen and water. The SCR includes all hardware, parts, sensors, subassemblies, software, AECDS, calibrations, and other components that collectively constitute the system for implementing this strategy. DEF must be periodically refilled, which requires sensors in the DEF tank to communicate with the OBD to ensure that SCR is properly controlling NO_x emissions. HDD manufacturers generally design and build motor vehicles and motor vehicle engines using SCR systems to meet applicable NO_x standards. *See* 40 C.F.R. § 86.007-11.
45. In addition to emissions control hardware, fuel mass, fuel injection pressure, and fuel injection timing are among the Emissions-Related Elements of Design incorporated in diesel-fueled motor vehicles and motor vehicle engines that can affect the quantity of regulated pollutants that are created by the diesel engine. As an example, HDD manufacturers generally employ retarded fuel injection timing as an emission control method for NO_x.
46. OEMs set software parameters, also known as calibrations, that control, among other things, engine combustion and Aftertreatment performance (hereinafter referred to as “Certified Stock Calibrations”). 40 C.F.R. § 86.1803-01. OEMs disclose Certified Stock Calibrations to the EPA on their application for a COC for each vehicle model because they are part of a motor vehicle’s

overall emissions control strategy. Certified Stock Calibrations that must be included on the COC application include “fuel pump flow rate, ... fuel pressure, ... EGR exhaust gas flow rate, ... and basic engine timing.” 40 C.F.R. § 86.1844-01(e)(2); *see also* 40 C.F.R. pt. 85 app. VIII (listing vehicle and engine parameters and specifications); 40 C.F.R. pt. 86 app. VI (listing vehicle and engine components). Certified Stock Calibrations are Emissions-Related Elements of Design.

47. The emission control devices of an HDD motor vehicle and motor vehicle engine, such as the DPF, EGR, DOC, NAC, and SCR, work in conjunction with the motor vehicle’s OBD system, which monitors emissions-related systems or components that could cause the vehicle to fail to comply with the CAA’s emission standards. The OBD must detect and report malfunctions of EGRs, oxygen sensors, DPFs, DOCs, NACs, and SCRs and other emissions-related elements of design in motor vehicles by illuminating the malfunction indicator light (“MIL”) on the dashboard and recording a diagnostic trouble code (“DTC”). 40 C.F.R. § 86.1806-05(b)-(e). The OBD stores DTCs that service personnel can read to diagnose and repair a vehicle and government inspectors can download to verify compliance with emission standards. The OBD System is an Emissions-Related Element of Design.
48. The OBD and ECU may also prompt a driver to correct a problem by alerting vehicle performance, such as putting the engine into “limp-home mode.” *See* 40 C.F.R. § 86.010-2. In limp-home mode, the ECU commands the engine to downgrade in performance so that the driver is aware that there is a problem with the emission control system, while permitting the vehicle to be driven (albeit slowly) to a service station. *See, e.g.,* 40 C.F.R. § 86.004-25(b)(6)(ii) (requiring the vehicle performance to deteriorate to a point unacceptable for typical driving when DEF replenishment is required).
49. Motor vehicles have a network of sensors that detect information relating to the functioning of emissions-related elements of design and feed such information to the ECU to provide feedback to

the engine calibration to enable proper operation and the OBD so that malfunctions can be identified, including, but not limited to the following sensors: oxygen sensors that detect/monitor the oxygen concentration of exhaust gas or stoichiometry of combustion, oxygen sensors that monitor catalyst efficiency, EGR temperature and pressure sensors, exhaust gas temperature sensors, air flow sensors, soot/PM sensors, and NO_x sensors. These sensors are Emissions-Related Elements of Design.

50. Ford Motor Company (“Ford”) is the OEM of Model Year 2003-2007 F250-F350 6.0L Powerstroke, Model Year 2008-2010 Ford F250-F350 6.4L Powerstroke, and Model Year 2011-2017 6.7L Powerstroke HDD Trucks and Ford Excursion Diesel Vehicles and their engines.
51. General Motors Company is the OEM of GMC and Chevy (collectively “GMC/Chevy”) Model Year 2004-2017 2500/3500 Sierra and Silverado 6.6L Duramax Model Year HDD Trucks and their engines.
52. FCA US LLC (and its predecessors) (“Dodge”) is the OEM of Dodge Ram Model Year 2004-2005 2500/3500 5.9L Cummins and Model Year 2006-2017 6.7L Cummins HDD Trucks. Cummins, Inc., is the OEM for the engines for such HDD Trucks.
53. The HDD Trucks identified in Paragraphs 50-52 above are each a “motor vehicle,” as that term is defined under section 216(2) of the CAA, 42 U.S.C. § 7550(2), with a “motor vehicle engine.”
54. Ford, Chevy/GMC, Dodge, or Cummins obtained COCs from the EPA for each motor vehicle or motor vehicle engine identified in Paragraphs 50-52.
55. The HDD Trucks and their engines identified in Paragraphs 50-52 above have Emissions-Related Elements of Design in compliance with Title II of the CAA, and in conformance with the relevant EPA-issued COC, including one or more of the following: EGR, DOC, NAC, SCR, DPF, OBD, or fueling strategies.

56. The following HDD Trucks and their engines have the following OEM-installed (“stock”) emission control devices consistent with the COCs for the vehicles:

Motor Vehicle/Engine Model Group	Certified/Stock Emissions Control System
MY 2004-2005 Dodge 2500/3500 5.9L Cummins	DOC and/or EGR
MY 2006 Dodge 2500/3500 6.7L Cummins	EGR, DOC, and DPf
MY 2007-2012 Dodge 2500/3500 6.7L Cummins	EGR, DOC, DPf, and NAC
MY 2013-2017 Dodge 2500/3500 6.7L Cummins	EGR, DOC, DPf, and SCR
MY 2004-2007 Chevy/GMC Silverado 6.6L LLY/LBZ Duramax	EGR and DOC
MY 2008-2010 Chevy/GMC Silverado/Sierra LMM 6.6L Duramax	EGR, DOC, and DPf
MY 2011-2017 Chevy/GMC Sierra LML 6.6L Duramax	EGR, DOC, DPf, and SCR
MY 2003-2007 Ford F250/F350 6.0L Powerstroke	EGR and DOC
MY 2008-2010 Ford F250/F350 6.4L Powerstroke	EGR, DOC, and DPf
MY 2011-2017 Ford F250/F350 6.7L Powerstroke	EGR, DOC, DPf, and SCR

The Types of Aftermarket Products at Issue

57. Third-party manufacturers and distributors, including Respondent, manufacture, sell, and/or offer to sell products that are designed to alter a motor vehicle’s power or fuel economy, or reduce the costs related to maintaining a motor vehicle’s Emissions-Related Elements of Design (hereinafter “Aftermarket Performance Products”).
58. Aftermarket Performance Products enhance a motor vehicle’s power, performance, or fuel economy by altering, bypassing, replacing, or disabling OEM-installed Emissions-Related Elements of Design. The Aftermarket Performance Products relevant to this Complaint fall into two broad categories: Hardware Products and Software Products.

i. Hardware Products

59. Some Aftermarket Performance Products are hardware products that physically interfere with or remove Emissions-Related Elements of Design (hereinafter, “Hardware Products”).
60. Some Hardware Products interfere with or remove the EGR System (e.g., blocker plates,” “EGR valve deletes,” or “EGR cooler deletes”). On certain vehicles, there are also products that force the throttle valve for fresh air to remain fully open, which inhibits EGR flow. These Hardware Products are hereinafter referred to as “EGR Delete Hardware Products.”
61. Some Hardware Products physically alter and/or remove all or part of a motor vehicle’s Aftertreatment System by changing, removing, and/or replacing essential physical elements of DOCs, DPFs, NACs, and SCRs (e.g., “straight pipes” or “race pipes”). These Hardware Products are hereinafter referred to as “Aftertreatment Delete Hardware Products.”

ii. Software Products

62. Other Aftermarket Performance Products consist of electronic software products commonly referred to as “tunes” that are uploaded into a motor vehicle’s ECU and alter or overwrite a motor vehicle’s Certified Stock Calibrations. The tunes may be uploaded from the internet or sold on a handheld device called a “tuner.”
63. The following types of Certified Stock Calibration are changed or overwritten by tunes, which are relevant to this Complaint:
 - a. Certified Stock Calibrations relating to EGR and Aftertreatment systems. For example, a tune can delete or change calibrations affecting operation of the EGR, DPF, DOC, SCR, or NAC and/or sensors, signals, or records related to these systems. Such tunes also are designed to reprogram the ECU to prevent malfunction of the motor vehicle or motor vehicle engine when the EGR or Aftertreatment systems are disabled, removed, or rendered inoperative.

- b. Certified Stock Calibrations related to engine combustion, performance, and operations.
For example, a tune can modify calibrations governing fuel pump flow rate, fuel pressure, EGR exhaust gas flow rate, and basic engine timing and therefore bypass, defeat, or render inoperative engine operation calibrations that are key to a motor vehicle or motor vehicle engine's emission control strategy.
 - c. Certified Stock Calibrations related to the OBD system functions for the purpose of preventing the illumination of MILs, the recording of DTCs, and preventing the OBD system from derating the engine/vehicle due to changes in other Certified Stock Calibrations or removal of EGR/Aftertreatment hardware (e.g., preventing the OBD from limiting vehicle speed to 25 miles per hour because the DPF has been removed).
64. A single tune can change or overwrite multiple Certified Stock Calibrations and types of Certified Stock Calibrations. For example, a tune that deletes EGR functions also typically interferes with OBD functions so that the EGR deletion will not be detected.
65. Multiple tunes and types of tunes are often sold together as a single product.
66. The tunes and tuners relevant to this Complaint are referred to hereinafter as "Subject Tuning Products."

Respondent's Business and Sales of Aftermarket Performance Products

67. Respondent has sold and offered to sell products intended for use in "motor vehicles" as that term is defined by the Act, 42 U.S.C. § 7550(2), and regulations promulgated thereunder at 40 C.F.R. § 85.1703.
68. Many of the products that Respondent has sold and/or offered for sale are Aftermarket Performance Products that have been represented to enhance a motor vehicle's power or performance, modify a motor vehicle's fuel economy, or reduce the costs associated with maintaining a motor vehicle's emission control system.

69. Respondent has sold and offered for sale its Aftermarket Performance Products over the internet through its website, <https://freedomdieselperformance.com/>.
70. Respondent has sold and offered for sale what it has referred to on its website variously as “Delete Packages,” “Delete Pipe Packages,” “EGR Delete Packages,” or “DPF Delete Packages,” which consist of a combination of a Subject Tuning Product and an EGR Delete Hardware Product, an Aftertreatment Delete Hardware Product, or both (hereinafter referred to as “Performance Packages”). Respondent continues to offer for sale these Performance Packages, but some time after receiving in January 2017 a Notice of Violation by the EPA, Respondent changed its website to refer to these Performance Packages as “Competition Racing Packages.”
71. On November 2, 2016, the EPA and its contractor Eastern Research Group, Inc. (“ERG”) inspected the Respondent’s business facility located at 409 Cortez Road West, Bradenton, Florida, 34207, with Respondent’s permission. The inspection included observing the inventory in store, its product list and sales database. During the inspection, the EPA and ERG received a copy of sales records from Respondent’s sales database. The EPA and ERG took photographs, conducted interviews, and obtained tuners sold by Respondent as samples.
72. On January 6, 2017, EPA issued a Notice of Violation (“NOV”) to Freedom Performance setting forth its determination that Freedom Performance had committed 13,995 violations of the Section 203(a)(3)(B) of the CAA by selling “parts or components for motor vehicles and engines that bypass, defeat, or render inoperative elements of design of those engines that were installed by the original equipment manufacturer in order to comply with the CAA emission standards.”
73. In response to the NOV, counsel for Respondent contacted the EPA to discuss resolution of the matter. As part of that discussion, Respondent’s counsel indicated that Respondent would be financially unable to pay a substantial penalty for the violations alleged in the NOV. In an email dated February 16, 2017, counsel for the EPA requested that Respondent provide certain financial

information to support its claim of inability to pay a substantial penalty. After receipt of that email, Respondent's counsel contacted counsel for the EPA in April 2017 indicating that Respondent has declined to provide the requested financial information.

Sample of Descriptions of Products Offered for Sale by Freedom Performance on its Website

74. Respondent has sold and offered for sale a Performance Package it has called "EGR Delete Package for Powerstroke 6.0L 2003-07 | EGR Delete Tuner and EGR Delete Kit with Up Pipe, with Gaskets." Respondent advertised the following statements regarding this Performance Package on its website:

Let Your 6.0L Powerstroke Take a Breather...

*Think your Ford Powerstroke comes from the factory with the best possible tuning? It doesn't. With the Tuner you will be able to see what your truck is truly capable of. The tuner arrives with pre-loaded, dyno-proven tunes to suit your needs. Whether you want more power, better towing or improved mileage, the tuner for Ford Powerstroke has it covered. **The EGR Delete Kit is designed to completely replace the Exhaust Gas Recirculation system (EGR). By eliminating the EGR system your engine will run cleaner and cooler while increasing overall reliability...***

The tuner arrives Pre-Loaded with DYNO Proven tune files that INCREASE HORSEPOWER and TORQUE! Programming your vehicle with a pre-loaded tune files (sic) is easy as 1-2-3. Simply plug the OBDII connector into your vehicles's (sic) OBDII connector into your vehicle's OBDII port, select the pre-loaded tune file using the simple to navigate menu and within minutes the tuner programs your vehicle....

*Easy to install, Easy to Return to Stock...The device backs up your factory PCM program during installation should you ever need to return your vehicle to the stock PCM program. Restoring your vehicle to the stock PCM program is as easy as selecting Return to Stock from the device menu. **Once returned to stock, there is no footprint or trace of the tune in the vehicle's PCM...***

75. Respondent has sold and offered for sale a Performance Package it has called "XRT Pro DPF, CAT, EGR Delete Tuner With EGR Delete Kit with Up Pipe, with Gaskets for Powerstroke 6.0L 2003-07." Respondent has advertised the following statements regarding this Performance Package on its website:

Legendary Tuning for the Modern Diesel.

The XRT Pro is the diesel truck programming solution that can meet almost anyone's budget and needs. This product comes with all of the tuning capability for either off-road or on-road applications. Features...

On-Road and Off-Road (DPF, DEF, CAT and EGR Delete) Tuning...Levels from Stock to +250HP (depending on Model)... Clear Trouble Codes...Enable and Disable many factory features...Updateable via Internet...

Features...Comes preloaded with DPF Present and DPF Removed capable tuning. Allows removal of the DPF system and ALL related sensors (nothing needs to go into the race exhaust or even be plugged in). Precisely tune engine with HP increases of 0-250HP...Read / Clear Trouble Codes...Custom Tunes are FREE to download. Internet updateable w/included Micro SD Memory Card and USB Adapter.

Made in the USA, Engine Saving EGR Delete...This EGR Delete Kit is designed to completely replace the Exhaust Gas Recirculation system (EGR) found on your 6.0L Powerstroke equipped Ford Super Duty. The factory EGR system is prone to many issues such as stuck EGR valves to leaking EGR coolers and even pressurization of the cooling system. By eliminating the EGR system your engine will run cleaner and cooler while increasing overall reliability. Manufactured in the USA from CNC machined billet aluminum and stainless steel for a lifetime of use...NOTE: This part requires the use of a delete capable tuner.

(Emphasis added).

76. Respondent has sold and offered for sale Subject Tuning Products it has called "GearboxZ Performance Economy DPF Delete Tuner for Ford Powerstroke 6.4L 2008-10," and "DPF Delete Performance Fuel Economy Tuner for Ford Powerstroke 6.4L 2008-10." Respondent has advertised the following statements regarding these products on its website:

More Power, More Mileage... GearboxZ Performance Economy Delete Tuner...Deletes CAT, DPF, & EGR Without Trouble Codes...Included +70 HP Tune Offers Power and Increased Mileage...Reads & Clear Trouble Codes...Simple ODB2 Port, Voice Guided Installation... Completely Reversible ...NOTE: Intended for use with the DPF Removed. Use with a DPF in place will cause soot build-up, high EGT's, and possibly fire...

(Emphasis added).

77. Respondent has sold and offered for sale a Subject Tuning Product it has called "PIP DPF/EGR Delete Tuner Powerstroke 6.4L 2008-10 Ford F250 to F550." Respondent has advertised the following statements regarding this product on its website:

*Competition PIP Tuner for Ford 6.4L 2008-10... If you would like to **delete the emissions** on your 6.4L powerstroke, with power level options, and without a huge cost, the PIP-64 is for you!. This handheld tuner provides you with the power levels up to an additional 240 horsepower, with street and towing levels in between. **You have the option of deleting your Diesel Particulate Filter, Catalytic Converter, and EGR on your 6.4L Ford Powerstroke F250 to F550. You can also adjust other parameters to customize the tuner to your truck as well as read / clear trouble codes. Increases your vehicles (sic) Horsepower, Torque, Throttle Response.***

(Emphasis added).

78. Respondent has sold and offered for sale a Performance Package it has called “Performance / Fuel Economy DPF Delete Tuner + CAT/DPF Delete Pipes Package Ford Powerstroke 6.4L 2008-10.”

Respondent has advertised the following statements regarding this Performance Package on its website:

Complete package to delete your DPF & CAT on Ford Powerstroke 6.4L trucks while adding fuel economy and power. The included DPF-R 4.0 plus module is an easy to use solution for disabling regen. It allows you to delete your DPF, CAT, and EGR without throwing any codes. This package also Includes Flo~Pro 4" CAT/DPF delete pipes designed to connect to the factory 3.5" exhaust and replace the DPF/CAT. Application includes F250, F350, F450, F550, and Cab & Chassis trucks. The race pipes provides (sic) maximum flow for increased horsepower, torque and throttle response. The increased air flow also lowers EGT's and helps improve MPG.

(Emphasis added).

79. Respondent has sold and offered for sale a Subject Tuning Product it has called “5 Power Level DPF Delete Tuner Ford Powerstroke 6.4L 2008-10 | Gearbox Z Tachyon Plus.” Respondent has advertised the following statements regarding this product on its website:

The Tachyon plus is a simple module plugs in to your ODB2 port and reprograms your truck for a DPF delete and offers 5 power levels (below stock, stock, 50 horsepower, 100 horsepower, and 120 horsepower). For automatic transmission only. It will disable regen, and allow you to replace the Diesel Particulate Filter with a straight pipe or a full exhaust. The Tachyon plus tuner is extremely easy to use, and takes only about 5 minutes for installation. The EGR will also automatically be disabled, allowing you to block it off or delete it completely. After installing the DPF-R, your truck will not throw any codes related to the DPF, CAT, or EGR...

(Emphasis added).

80. Respondent has sold and offered for sale a Performance Package it has called “DPF/CAT Delete Performance Economy Tuner and Stainless Pipes Package for Powerstroke 6.4L 2008-10.”

Respondent has advertised the following statements regarding this Performance Package on its website:

*More Power, More Mileage...Performance Economy Delete Tuner & 4" Stainless Delete Pipes... **Tuner Deletes CAT, DPF, & EGR Without Trouble Codes...Included +70 HP Tune... Offers Power and Increased Mileage...Read & Clear Trouble Codes & Completely Reversible...4 Inch T-409 Stainless Pipe Replaces CAT & DPF... Uses Factory Mounts and Hangers for Simple Installation...***

(Emphasis added).

81. Respondent has sold and offered for sale an EGR Delete Hardware Product it has called “EGR Delete Kit with High Flow Intake Elbow Powerstroke 6.4L 2008-10.” Respondent has advertised the following statements regarding this product on its website:

Quiting [sic] EGR Now Reduces Serious Risks to Your Health For Your Powerstroke 6.4L

*The road to hell is often paved with good intentions and while Exhaust Gas Recirculation is certainly noble in its intent, in reality it is putting your engine through hell. Whether it's reduced power and fuel efficiency, oil fouled with soot and unburned fuel or gummed up sensors and manifolds, the EGR is driving your truck to an early grave. **The best solution is deletion. This EGR kit has all the required parts to get the job done....***

Use of this kit requires a delete capable tuner...

(Emphasis added).

82. Respondent has sold and offered for sale a Performance Package called “Performance Economy DPF Delete Tuner, Flo~Pro Cat and DPF Delete without Bungs, and EGR Valve & Cooler Delete Kit for Powerstroke 6.4L.” Respondent has advertised the following statements regarding this Performance Package on its website:

This complete delete package includes everything you need to delete your DPF and EGR and is designed to maximize your MPG but not break your budget. It includes a reliable, easy to use GearboxZ Performance Economy Tuner, a high performance Flo~Pro CAT and DPF Delete without Bungs and an EGR Valve and Cooler Delete kit from Flo~Pro.

*An Upgraded Stainless **DPF Delete pipe** and a stylish **Sinister EGR Delete kit** are also available with this package for a small additional cost.*

(Emphasis added).

83. Respondent has sold and offered for sale a Performance Package called “Spartan 64 Phalanx Tuner + Sinister Delete w/ Intake Elbow + aFe 5” Atlas Downpipe Back Exhaust System for Powerstroke 6.4L 2008-10.” Respondent has advertised the following statements regarding this product package on its public website:

A Performance Package for your Ford Powerstroke 6.4L 2008-2010

The Spartan 64 Phalanx Tuner with stock tuning and options from 40-350RWHP offers the unequalled capability to manage power and fuel efficiency. The Sinister EGR Valve and Cooler Delete with Intake Elbow brings quicker turbo spool and lower EGTs while also eliminating exhaust recirculating through your intake manifold for reduced carbon deposits and increased reliability. Finally the monster 5" Atlas Downpipe Back Racing Exhaust allows for low turbulence, increasing horsepower, torque and lowering EGTs while it's (sic) muffler delete-pipe brings an aggressive racing sound.... Note: For racing use only.”

84. Respondent has sold and offered for sale a Performance Package called “Performance / Fuel Economy DPF Delete Tuner + aFe Stainless CAT/DPF Delete Pipes w/Bungs Package Ford Powerstroke 6.4L 2008-10.” Respondent has advertised the following statements regarding this Performance Package on its website:

Complete package to delete your DPF & CAT on Ford Powerstroke 6.4L trucks while keeping stock power settings. The included DPF-R 4.0 module is an easy to use solution for disabling regen. It allows you to delete your DPF, CAT, and EGR without throwing any codes. This package also Includes Flo~Pro 4" CAT/DPF delete pipes designed to connect to the factory 3.5" exhaust and replace the DPF/CAT. Application includes F250, F350, F450, F550, and Cab & Chassis trucks. The race pipes provides maximum flow for increased horsepower, torque and throttle response. The increased air flow also lowers EGT's and helps improve MPG.

(Emphasis added).

85. Respondent has sold and offered for sale an Aftertreatment Delete Hardware Product it has called “4” DPF/CAT Delete Pipe for Cummins 6.7L 2007.5-10 Cab & Chassis.” Respondent has advertised the following statements regarding this product on its website:

Your Cummins Cab & Chassis Works Hard. Let it Breathe.

*The Flo~Pro DPF/CAT Delete Pipe for Cummins 6.7 2007.5-10 **replaces the DPF & CAT portion of the exhaust with a wide open 4” Pipe.** This results in improved exhaust flow, which leads to better mileage, more horsepower, and more torque. When paired with an appropriate tuning module, **you will no longer have regen cycles** which mean less unburned gas flowing through your engine and longer intervals between oil changes.*

IMPORTANT: Use of this pipe requires a tuning module, to clear codes and disable regen. To view our Tuner and Delete Pipe Package Deals click here: http://freedomperformance.com/delete-packages/delete-piep-packages/shopby/cummins_6_7l_2007_5_2009-cummins_6_7l_2010_2012.html.

(Emphasis added).

86. Respondent has sold and offered for sale an EGR Delete Hardware Product it has called “EGR/Cooler Delete Kit with Hose for Powerstroke 6.7L 2011-14.” Respondent has advertised the following statements regarding this product on its website:

Prolong the Life of your Engine, Gain MPG

This EGR Delete kit for the Powerstroke 6.7L 2011-14 engine provides the necessary parts to physically remove the EGR Cooler and Valve from your diesel truck. The included hose will ensure that coolant continues to circulate over the cylinder head. This results in less wasted fuel, less soot in your engine and lower overall engine temperatures all of which means you and your truck will be happier.

IMPORTANT: Use of this kit requires a delete capable tuner. To view our tuners for the Ford 6.7L Powerstroke click here: http://freedomdieselperformance.com/dpf-delete-tuners/shopby/powerstroke_6.7l_2011_15html

87. Respondent has sold and offered for sale an Aftertreatment Delete Hardware Product it has called “DPF/SCR/CAT Delete Pipe for Cummins 6.7L 2013-2015 | 4” Cat & DPF/SCR Delete Pipes, No Bungs.” Respondent has advertised the following statements regarding this product on its website.

Eliminate Your DPF and DEF Headaches

If you are tired of poor mileage, constant regen cycles and refilling the DEF tank, then this delete pipe system from Flo~Pro will help you delete all of it.

(Emphasis added).

88. Respondent has sold and offered for sale an EGR Delete Hardware Product it has called “EGR/Cooler Delete Kit with Hose for Powerstroke 6.7L 2015-16.” Respondent has advertised the following statements regarding this product on its website:

Prolonged Engine Life, Better Performance (sic) and Fuel Economy

This EGR kit is designed to remove the EGR Assembly from your 2015-2016 6.7L Powerstroke. This will remove the EGR Cooler, manifold pipes, coolant lines, and all EGR related electronics from your truck. Comes with all necessary block off plates, plugs, claims, etc.

NOTE: This part requires the use of a delete capable tuner. To view our Tuners, click here: http://freedomdieselperformance.com/dpf-delete-tuners/shopby/powerstroke_6_7l_2011_15.html

(Emphasis added).

89. Respondent has sold and offered for sale a Performance Package it has called “Mini Maxx DPF/CAT/EGR Delete 4" Exhaust Package for Powerstroke 6.4L 2008-10.” Respondent has advertised the following statements regarding this performance package on its website:

Complete Emissions Delete Package For Your Powerstroke 6.4L.

Shift On the Fly Up To An Additional 250 Horsepower! If you are looking for the legendary Mini Maxx Race Tuner, look no further! We have them for immediate shipment. The Mini Maxx will allow you to delete your DPF, CAT, and EGR on the Ford Powerstroke 6.4l trucks. In addition to the deletes, the Mini Maxx will provide you with impressive shift on the fly power levels, gauges, and full monitoring capabilities. This package includes aluminized delete exhaust, the Mini Maxx Tuner, and a physical EGR delete...

Features for Mini Maxx Tuner

Comes preloaded with DPF Present and DPF Removed capable tuning

Allows removal of the DPF system and ALL related sensors (nothing needs to go into the race exhaust or even be plugged in)...

Allows removal of the entire EGR system including cooler with no trouble codes

Turn off the EGR system without removing ANY parts

Read / Clear Diagnostic Trouble Codes...

(Emphasis added).

90. Respondent has sold and offered for sale a Performance Package it has called “Performance Economy DPF Delete Tuner, aFe 4" Down-Pipe Back Exhaust System, and Sinister EGR

Valve/Cooler Delete Kit for Powerstroke 6.4L 2008-10.” Respondent has advertised the following statements regarding this Performance Package on its website:

*This package is **designed to eliminate the DPF, CAT and EGR**, while added (sic) a small power boost and enhance fuel (sic) economy. Featuring a Performance Economy tuner from Gearboxz which gives +70rwhp and extra MPG. The aFe Downpipe back exhaust system eliminate (sic) **the CAT and DPF filter and open design for free-flowing air**. Finally the EGR Valve/Cooler delete Kit from Sinister **allows you to remove the EGR** which improve (sic) performance and will prolong engine life.*

(Emphasis added).

91. Respondent has sold and offered for sale a Performance Package it has called “5 Power Level DPF Delete Tuner + CAT/DPF Delete Pipes Package Ford Powerstroke 6.4L 2008-10.” Respondent has advertised the following statements regarding this Performance Package on its website:

***Complete package to delete your DPF on Ford Powerstroke 6.4L trucks while adding 5 power levels.** The power levels are below stock, stock, 50 horsepower, 100 horsepower, and 120 horsepower. The Tachyon plus module is an easy to use solution for disabling regen. **It allows you to delete your DPF, CAT, and EGR without throwing any codes.** This package also includes the Flo~Pro 4” DPF delete pipe designed to connect to the factory 3.5” exhaust and **replace the DPF**. Application includes the F250, F350, F450, F550, and Cab&Chassis trucks. The race pipes provides (sic) maximum flow for increased horsepower, torque and throttle response. The increased air flow also lowers EGT’s and helps improve MPG.*

*About the Gearbox Z Tachyon Plus 5 Power Level **DPF Delete Module (Powerstroke Only)**...*

*Used as a temporary or permanent solution for **deleting the DPF, CAT & EGR**...*

***Read and clears Diagnostic Trouble Codes**
Plugs in to the OBD2 Port, **Quick Installation**
Disables Regen / Disable EGR system...*

(Emphasis added).

92. Respondent has sold and offered for sale an Aftertreatment Delete Hardware Product it has called “CAT/DPF Delete Stainless Exhaust for Powerstroke 6.4L 2008-10 | aFe MACH Force XP 4” Stainless Steel Exhaust, No Muffler w/Polished Tip.” Respondent advertised the following statements regarding this product on its public website:

Take a Stand in the Fight for Diesel Power.

If you're like me you're fed up with Reduced Power Modes and Regen cycles that send your engine temps through the roof. And if you've ever had to replace a DPF Filter you probably fell over when you heard much it was going to cost. Join the fight for Diesel Power today by purchasing a wide open 4" CAT/DPF Delete exhaust and enjoy the freedom of increased "pull away" type horsepower and torque that will have you pulling loads better than ever. When paired with one of our Delete Capable Tuners to add even more horses, you will have proudly declared your Diesel Independence.

IMPORTANT: Installation and use of this exhaust requires a Delete Capable Tuning Module. To view our Tuner/Delete Exhaust Packages click http://freedomdieselperformance.com/delete-packages/full-exhaust-packages/shopby/powerstroke_6_4l.html

(Emphasis added).

93. Respondent has sold and offered for sale an EGR Delete Hardware Product it has called "Sinister Basic EGR Delete Kit for Powerstroke 6.0L 2003-07." Respondent has advertised the following statements regarding this product on its website:

Add Years to Your Engine Life

*Sinister Basic **EGR Delete Kit** for Powerstroke 6.0L
Superior, Made in the USA, Quality Compared to Foreign Made Deletes.
Blue Powder-Coat & Logo on Visible Parts for an Aggressive Look.
EGR Deletes Lower EGTs & Allow For Faster Turbo Spool which increases performance and extends engine life.*

IMPORTANT: Use of this part requires a delete capable tuner. To view our Discounted Tuner & EGR Delete Packages click here: http://freedomdieselperformance.com/egr-deletes/egr-delete-packages/shopby/powerstroke_6_0l_2003_07.html".

(Emphasis added).

94. Respondent has sold and offered for sale a Performance Package it has called "RaceMe DPF/DEF/CAT Delete Full Exhaust Package for Cummins 6.7L 2013-15 | RaceME Ultra Tuner, aFe 5" Aluminized Exhaust & EGR Delete Kit." Respondent advertised the following statements regarding this Performance Package on its public website:

How Do You Like Me Now

*Have you ever spent a bunch of money on something and then it didn't perform like you expected? If you've bought a diesel truck in the last decade, then we know you have. This package for your Cummins 6.7L 2013-15 pick-up will give that performance back to your truck. **The DPF/DEF/CAT delete exhaust allows for the removal of performance stealing emissions parts and replaced it with a high flow, wide open 5" stainless steel pipe. The included EGR Delete kit allows for the removal of the coolers and valve and the blocking of all inlets. Further, the included hose ensures that coolant can continue to flow over the cylinder head. Finally, the newly released tuner from RaceMe, besides clearing the codes related to the deletes, offers multiple tuning levels that will not only provide increases in power, but significant savings in fuel economy. It is loaded with many other options and monitoring capabilities as well. Click "Add To Cart" and "Add the Life" back to your truck.***

(Emphasis added).

95. Respondent has sold and offered for sale a Performance Package called "Reaper CAT/DPF Delete 4" Exhaust Package for Duramax LMM 6.6L 2007.5-10." Respondent has advertised the following statements regarding this Performance Package on its public website:

EFI Live Delete Tuning On-The-Fly & 4" Exhaust Package

Reaper Autocal with DSP5 Switch & 4" Delete Exhaust

With this full exhaust and tuner package, you will have suffered through your last regen cycle. No longer will your oil be diluted with diesel fuel. You will not need to head on the highway to get the DPF clean. The Reaper Programmer from Punisher Performance deletes your DPF, CAT and EGR. Includes Punisher DSP5 tuning for any engine and transmission combo, and 1 DSP5 switch for changing tunes on the fly. But that's not all, these tuners go beyond. Replacing your existing exhaust with this system from Flo~Pro will have your truck running and sounding like you always imagined it would. Your engine will thank you for the free flowing air by giving back increased horsepower, torque, and mileage...

(Emphasis added).

96. Respondent has sold and offered for sale a Performance Package it has called "DPF & CAT Delete Package for Duramax LMM 6.6L 2007.5-10 Pick-Ups | Reaper Autocal w/ DSP5, CAT and DPF Delete pipes." Respondent advertised the following statements regarding this Performance Package on its public website:

*Duramax LMM Owners **Be Freed of Your CAT and DPF.***

*Freedom Diesel presents and a fully featured **CAT and DPF Delete** tuning package for your Duramax LMM Diesel truck. Featuring an **EFILive** platform tuner from Punisher Performance that will allow you to safely and effectively **delete your CAT and DPF**, while also offering stock and performance level tunes. **The CAT and DPF delete pipes from aFe** are some of the best on the market and will squeeze even more performance and fuel economy out of your truck.*

With the Reaper Autocal from Punisher, you can safely delete your DPF, CAT and EGR without throwing codes or putting your truck into limp mode...

(Emphasis added).

97. Respondent has sold and offered for sale an Aftermarket Delete Hardware Product it has called “Premium DPF,DEF,CAT Delete 4” Stainless Steel Exhaust System for Duramax LML 6.6L 2011-15.” Respondent has made the following statements regarding this product on its website:

*The MACH Force XP DPF-Delete race down-pipe back exhaust system **eliminates the use of the restrictive diesel particulate filter (DPF) for maximum performance and extreme mileage gains.** This free flowing exhaust system outflows the factory exhaust by 67% and is constructed out of durable 4" mandrel bent 409 stainless steel and uses bayonet style hangers and band clamps for a clean installation.*

(Emphasis added).

98. Respondent has sold and offered for sale a Performance Package it has called “CAT, DPF Delete Package for Cummins 6.7L 2010-12 | Anarchy Diesel Mercenary Autocal and 4” CAT/DPF Delete Pipes.” Respondent has advertised the following statements regarding this performance package on its public website:

Unleash the True Potential of Your Dodge Diesel

*Not only does the DPF and Regeneration system on your Cummins 6.7L rob the engine of available horsepower, it shortens the life of vital engine components and increases the frequency of oil changes. **Add an EGR Delete and you can maximize performance while adding tens of thousands of miles to your engine's and it's (sic) components (sic) lifespan.***

(Emphasis added).

99. Respondent has sold and offered for sale an Aftertreatment Delete Hardware Product it has called “CAT/DPF Delete Stainless Exhaust for Cummins 6.7L 2007.5-12 | aFe MACH Force XP 4”

Turbo-Back Stainless Steel Exhaust System.” Respondent has advertised the following statements regarding this product on its public website:

A Race Inspired Solution to Your DPF Nightmares

If you've decided to finally rid your Cummins 6.7 of the DPF, then why not replace the entire exhaust and add years of driveable life to your truck. The MACH Force XP exhaust is engineered to perform in the most extreme environments. This system is constructed from mandrel bent 4" 409 stainless steel tubing for maximum flow, increased horsepower, increased torque and lower EGTs.

(Emphasis added).

100. Respondent has sold and offered for sale a Performance Package it has called “CAT/DPF/EGR Delete 4” Exhaust Package for Duramax 6.6L LMM 2007.5-10 | Reaper Autocal tuner + aFe 4” Mach FORCE XP Stainless Exhaust, Muffler, Tip.” Respondent has advertised the following statements regarding this Performance Package on its public website:

You Know You Want The Sound

*Some call it "Diesel Thunder", that deep roar that comes from a well tuned diesel truck when the accelerator is pressed. This package from Freedom Diesel is designed to bring you not only performance and better mileage, but a sound that will send shivers down the spine of any vehicle you decide to pass. The Reaper Autocal provides customizable tuning and 5 pre-loaded power levels. **It also promises troubles free deletion of the CAT, DPF and EGR.** The 4" exhaust from aFe comes with a muffler that removes the "high notes" and only leaves the sound of the "thunder." And whether you choose the polished or the black powder coated tip, you know your Duramax rig is going to look as good as it sounds.*

(Emphasis added).

101. Respondent has sold and offered for sale a Performance Package it has called “CAT/DPF/DEF Delete Exhaust Package for Cummins 6.7L 2013-14 | PPEI Tuning Module & 4” Aluminized Steel Delete Exhaust.” Respondent has advertised the following statements regarding this Performance Package on its public website:

The best part is that it's painless.

*In fact your truck won't feel a thing...except faster, tougher, and more efficient. This tuner and 4" delete exhaust has the advantage of allowing the hot gases to flow quickly away from your engine. Not only is the 4" pipe slightly larger than the stock exhaust pipes, **but without***

a CAT/DPF and SCR in place your truck no longer has to exhale through a straw. Imagine trying to carry a heavy load and breathing out through a straw. That wouldn't feel very efficient would it? This exhaust opens up that all important airway. You will notice better fuel economy, a boost in horsepower and torque, and fewer oil changes. Your trucks (sic) in pain already, buy this exhaust today and let the healing begin.

(Emphasis added).

102. Respondent has sold and offered for sale a Performance Package called “Complete Stainless DPF/CAT Delete Performance Package for Duramax LLM 6.6L 2007.5-10 | Tuner, 4” Stainless Exhaust, Air Intake & EGR Delete Kit. Respondent has advertised the following statements regarding this performance package on its public website:

All That and a T-Shirt Too

This complete delete and performance package for the Duramax LMM 2007.5-10 will bring your trucks (sic) horsepower to new heights and its fuel economy enormous increases. The DPF and EGR starve your truck of precious air flow causing decreased power and loss of mileage, not to mention shortening the life of vital engine parts. On the intake side, the free flow air intake from aFe offers a 70% increase in air flow over the stock intake. Deleting the EGR ensure (sic) that the fresh cool air is not mixed with sooty exhaust. Once the truck engine enjoys this big, cool breath, the tuner from Punisher make each stroke of the piston provide the desired results. Finally, the 4” straight pipe exhaust ushers the spent air quickly away from the engine so the cycle can start again.

For a Limited Time, A free t-shirt from Punisher Performance is included with the purchase of this package.

(Emphasis added).

103. Respondent has sold and offered for sale a Performance Package called “DPF, CAT, EGR Delete Ultimate Performance Package for Cummins 6.7L 2010-12 | RaceMe Ultra Tuner, 5” Stainless Exhaust, EGR Delete Kit, Cold Air Intake|.” Respondent has advertised the following statements regarding this performance package on its website:

Truly Inspired Performance and Style

This package features only the most premium delete parts we carry. With the RaceMe Ultra Tuner your Cummins will go from stock to track ready in a weekend. Even if you don't plan on racing, the power and mileage gains will bring the pleasure back into your driving. Additionally, the extra air flow and engine cooling achieved will help your engine last years longer than leaving it stock.

(Emphasis added).

104. Respondent has sold and offered for sale a Performance Package it has called “DPF/DEF/EGR Delete Tuner for Cummins 2013-15 6.7L | PPEI Power Performance Autocal.” Respondent has advertised the following statements regarding this Performance Package on its website”

Finally, Delete Tuning for Cummins 2013-15 6.7L

This packages (sic) provides everything you would need to safely and easily delete the DPF/CAT/DEF from your Dodge Cummins 6.7L 2013-15 truck. In addition, the included tuner offers multiple power levels, increased fuel economy and optional transmission tuning (68RFE automatics only).

IMPORTANT Due to firewalls in the factory ECM, you will be REQUIRED to first unlock the ECM. At the present time, the only way to do this is using a Bully Dog GT tuner and the Bully Dog Unlock Cable offered in this package. In doing so, you will merely need to unlock the ECM, but not actually install any tuning from the Bully Dog. Once this is complete, you will be able to use the Bully Dog in a different vehicle, but you can only unlock one vehicle with each tuner. Another option is to use the Bully Dog for digital gauges in the vehicle that the EFILive will be installed into. At the present time, the Bully Dog is NOT COMPATIBLE with 2015 Cummins but there will be a step for you to flash your 2015.

(Emphasis added).

105. Respondent has sold and offered for sale a Performance Package it has called “Performance / Fuel Economy DPF Delete Tuner + DPF Delete Pipes Package Duramax LMM 07-10 Extended Cab Long Box.” Respondent has advertised the following statements regarding this Performance Package on its website:

Complete package to delete your DPF on Duramax LMM 07-10 trucks while adding 70 horsepower and increased fuel economy. The included Duramax DPF-R 4.0 module is an easy to use solution for disabling regen. It allows you to delete your DPF, CAT, and EGR without throwing any codes. This package also Includes Flo~Pro 4" DPF delete pipe (available in aluminized or stainless steel) designed to connect to the factory exhaust and replace the DPF. Application includes Chevrolet Silverado 2500 / 3500 and GMC Sierra 2500 / 3500 Extended Cab Long Box trucks with the Duramax LMM 6.6L engine. The race pipes provides maximum flow for increased horsepower, torque and throttle response. The increased air flow also lowers EGT's and helps improve MPG.

(Emphasis added).

106. Respondent has sold and offered for sale a Performance Package it has called “RaceME Ultra DPF, CAT, EGR Delete Kit for Cummins 6.7L 2007.5-09 | RaceMe Ultra Tuner, 4” Aluminized Exhaust, No Muffler, No Tip + EGR Delete Kit.” Respondent has advertised the following statements regarding this product on its website:

*The RaceMe Ultra features a touch screen, power levels from stock to over 200 horsepower, gauges and monitoring features. OTF (On The Fly) Programming allows you to program the truck on the road to every stage you want, with different adjustments in duration, timing, VGT and rail pressure. Simply by pressing the ""Program"" button the adjustments are instantly available and programmed. **With the CAT/DPF delete exhaust system from Flo~Pro, you're DPF worries are over.** When combined with an appropriate tuning module this exhaust system will have your Cummins Diesel breathing freely and running smoothly. Expect increased mileage, longer intervals between oil changes and an engine that lasts longer. Finally, whether it's reduced power and fuel efficiency, oil fouled with soot and unburned fuel or gummed up sensors and manifolds, the EGR is driving your truck to an early grave. **The best solution is deletion. This EGR kit has all the required parts to get the job done.***

(Emphasis added).

COUNT ONE

Violation for the Sale and/or Offer to Sell EGR Delete Hardware Products

107. The preceding paragraphs are incorporated by reference.
108. Between May 1, 2015, and November 1, 2016, Respondent sold and/or offered for sale at least 3,429 EGR Delete Hardware Products and include but are not limited to those products identified in Appendix A to this Complaint.
109. Respondent’s product name for certain of the EGR Delete Hardware Products it sold and/or offered for sale includes the phrase “EGR Delete.”
110. Respondent’s website has had an entire product category called “EGR Deletes & Related,” stating “Our EGR delete kits are the best approach for the EGR removal process.”
111. The EGR Delete Hardware Products that Respondent sold and/or offered for sale are intended for use with the motor vehicles or motor vehicle engines identified in Appendix A to this Complaint.

112. Respondent's actions that involved the sale and/or offer for sale of EGR Delete Hardware Products were recorded in the sales records it provided to the EPA during the November 2, 2016 inspection, as described and quoted in Appendix A of this Complaint.
113. A principal effect of each EGR Delete Hardware Product that Respondent sold and/or offered for sale as identified in Appendix A of this Complaint is to bypass, defeat, or render inoperative a vehicle's EGR System.
114. An EGR System is a "device or element of design installed on or in a motor vehicle or motor vehicle engine in compliance with [CAA] regulations" within the meaning of Section 203(a)(3)(B) of the CAA, 42 U.S.C. § 7522(a)(3)(B).
115. Respondent knew or should have known that the EGR Delete Hardware Products were being offered for sale or installed for such use or put to such use.
116. Respondent's sale or offering for sale of (or causing thereof with respect to) each EGR Delete Hardware Product constitutes a separate violation of section 203(a)(3)(B) of the CAA, 42 U.S.C. § 7522(a)(3)(B). 42 U.S.C. § 7524(a).

COUNT TWO

Violation for Sale and/or Offer for Sale of Aftertreatment Delete Hardware Products

117. The preceding paragraphs are incorporated by reference.
118. Between May 1, 2015, and November 1, 2016, Respondent sold and/or offered for sale at least 4,366 Aftertreatment Delete Hardware Products and include but are not limited to those products identified in Appendix A to this Complaint.
119. Respondent's product names for certain of the Aftertreatment Delete Hardware Products it sold and/or offered for sale include the phrases "DPF Delete," "DPF/CAT Delete," "DPF/SCR/CAT Delete," and "CAT/DPF/DEF Delete."
120. Respondent's website has had an entire product category called "Delete Exhaust & Pipes."

121. The Aftertreatment Delete Hardware Products that Respondent sold and/or offered for sale are intended for use with the motor vehicles or motor vehicle engines identified in Appendix A to this Complaint.
122. Respondent's actions that involved the sale and/or offer for sale of Aftertreatment Delete Hardware Products were recorded in the sales records it provided to the EPA during the November 2, 2016 inspection, as described and quoted in Appendix A of this Complaint.
123. A principal effect of each Aftertreatment Delete Hardware Product that Respondent sold and/or offered for sale as identified in Appendix A of this Complaint is to bypass, defeat, or render inoperative a vehicle's DOC, DPF, NAC, and/or SCR Systems.
124. DOC, DPF, NAC and SCR Systems are "device[s] or element of design[s] installed on or in a motor vehicle or motor vehicle engine in compliance with [CAA] regulations" within the meaning of Section 203(a)(3)(B) of the CAA, 42 U.S.C. § 7522(a)(3)(B).
125. Respondent knew or should have known that the Aftertreatment Delete Hardware Products were being offered for sale or installed for such use or put to such use.
126. Respondent's sale or offering for sale of (or causing thereof with respect to) each Aftertreatment Delete Hardware Product constitutes a separate violation of section 203(a)(3)(B) of the CAA, 42 U.S.C. § 7522(a)(3)(B). 42 U.S.C. § 7524(a).

COUNT THREE

Violation for Sale and/or Offer for Sale of Subject Tuning Products

127. The preceding paragraphs are incorporated by reference.
128. Between May 1, 2015, and November 1, 2016, Respondent sold and/or offered for sale at least 6,133 Subject Tuning Products and include but are not limited to those products identified in Appendix A to this Complaint.

129. Respondent's website has offered for sale Subject Tuning Products on its website, calling the products "DPF Delete Tuners," and stating "DPF/EGR delete tuners will allow you to remove your Diesel Particulate Filter and Exhaust Gas Recirculation without throwing any codes. Depending upon the tuner, you can add horsepower and fuel economy. Gearbox Z, RaceMe, Spartan, and Reaper tuners are all plug and play, with installation taking usually less than 20 minutes."
130. The Subject Tuning Products that Respondent sold and/or offered for sale are intended for use with the motor vehicles or motor vehicle engines identified in Appendix A to this Complaint.
131. Respondent's actions that involved the sale and/or offer for sale of Subject Tuning Products were recorded in the sales records database it provided to the EPA during the November 2, 2016 inspection, as described and quoted in Appendix A of this Complaint.
132. A principal effect of each Subject Tuning Product that Respondent sold and/or offered for sale as identified in Appendix A of this Complaint is to bypass, defeat, or render inoperative a vehicle's Certified Stock Calibration relating to EGR and/or Aftertreatment Systems.
133. A Subject Tuning Product is a "device or element of design installed on or in a motor vehicle or motor vehicle engine in compliance with [CAA] regulations" within the meaning of Section 203(a)(3)(B) of the CAA, 42 U.S.C. § 7522(a)(3)(B).
134. Respondent knew or should have known that the Subject Tuning Products were being offered for sale or installed for such use or put to such use.
135. Respondent's sale or offering for sale of (or causing thereof with respect to) each Subject Tuning Product constitutes a separate violation of section 203(a)(3)(B) of the CAA, 42 U.S.C. § 7522(a)(3)(B). 42 U.S.C. § 7524(a).

RELIEF SOUGHT: CIVIL PENALTY

136. Complainant seeks an administrative penalty to be assessed against Respondent for 13,928 violations of section 203(a)(3)(B) of the CAA alleged in Count One through Count Three that occurred between May 1, 2015, and November 1, 2016.
137. Complainant makes no specific penalty demand in this Complaint, as authorized by 40 C.F.R. § 22.14(a)(4)(ii).
138. Respondent is subject to a civil penalty of up to \$3,750 for each violation that occurred on or before November 2, 2015, and up to \$4,735 for each violation that occurred after November 2, 2015. CAA § 205(a), 42 U.S.C. § 7524(a); 40 C.F.R. § 19.4 tbl. 1; Civil Monetary Penalty Inflation Adjustment Rule, 84 Fed. Reg. 2056, 2059 (Feb. 6, 2019).
139. Complainant reserves its right to seek the maximum civil penalty authorized by the CAA for each violation.
140. In determining the amount of the civil penalty in this matter, the CAA requires that the EPA take into account certain penalty factors, namely “the gravity of the violation, the economic benefit or savings (if any) resulting from the violation, the size of [Respondent’s] business, [Respondent’s] history of compliance with this subchapter, action taken to remedy the violation, the effect of the penalty on [Respondent’s] ability to continue in business, and such other matters as justice may require.” CAA § 205(c)(2), 42 U.S.C. § 7524(c)(2).
141. Where applicable, Complainant proposes to account for the CAA’s penalty factors by using the EPA’s Clean Air Act Mobile Source Civil Penalty Policy - Vehicle and Engine Certification Requirements (2009) (Penalty Policy), *available at* http://www2.epa.gov/sites/production/files/documents/vehicleengine-penalty-policy_0.pdf (last visited March 13, 2019). This Penalty Policy calculates civil penalties based on the number of

violative engines or products, their horsepower, the egregiousness of the violations, remedial action, and other legal and equitable factors.

Notice of Opportunity to Request a Hearing

To contest any material fact or conclusions of law alleged in this Complaint, Respondent must file a written answer (Answer) within twenty (30) days of service of this Complaint. The Answer should comply with the requirements of 40 C.F.R. § 22.15. The Answer should clearly and directly admit, deny, or explain each of the factual allegations contained in this Complaint of which such Respondent has any knowledge. Where a Respondent has no knowledge of a particular factual allegation, the Answer should so state. The Answer should contain: (1) the circumstances or arguments which are alleged to constitute the grounds of any defense; (2) the facts which such Respondent disputes; (3) the basis for opposing any proposed relief; and (4) a statement of whether a hearing is requested. All material facts not denied in the Answer will be considered to be admitted.

If a Respondent fails to file a written Answer within twenty (30) days of receipt of this Complaint, such failure shall constitute an admission by such Respondent of all facts newly alleged in the Complaint and a waiver by such Respondent of the right to a hearing. Failure to Answer may result in the filing of a Motion for Default Order and the possible issuance of a Default Order imposing penalties against such Respondent without further proceedings.

Any hearing requested and granted will be conducted in accordance with the Consolidated Rules.

Each Respondent's Answer should be sent to the following addresses:

If filing by UPS, FedEx, DHL or other courier, or personal delivery, address to:

U.S. Environmental Protection Agency
Office of Administrative Law Judges
Ronald Reagan Building, Room M1200
1300 Pennsylvania Ave., N.W.
Washington, DC 20460

If filing by the United States Postal Service, address to:

U.S. Environmental Protection Agency
Office of Administrative Law Judges
Mail Code 1900R
1200 Pennsylvania Ave., N.W.
Washington, DC 20460:

In addition, a copy of each Respondent's Answer must be served on Mark J. Palermo, one of the attorneys assigned to represent EPA in this matter, at the following addresses:

If using UPS, FedEx, DHL or other courier, or personal delivery, address to:

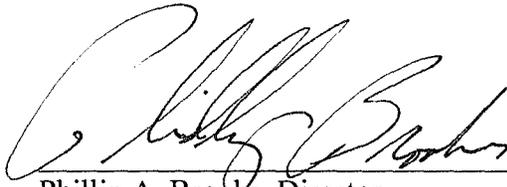

Mark J. Palermo
U.S. EPA, Air Enforcement Division
1200 Pennsylvania Ave., N.W.
William J. Clinton Federal Building, Room South 2117C
Washington, DC 20004

If using the United States Postal Service, address to:

Mark J. Palermo
U.S. EPA, Air Enforcement Division
1200 Pennsylvania Ave., N.W.
Mail Code 2242A
Washington, DC 20460

Respectfully Submitted,
