# Providing Products for the Environment

[My Info](#)  
[Contact Us](#)

We are a company with a mission, which is to provide the most effective, most reliable, highest value and most owner-friendly wastewater treatment systems in the industry. Relentless research, development and continuous product improvement are the hallmarks of the manufacturers that we represent. Offering Simple, Low Cost, and Robust treatment solutions that are environment-friendly, regulatory-approved for all private, business and government applications, how may we help you?

**BioMicrobics specializes manufacturing efficient environment water solutions.**

# Offer simple, low cost, robust water treatment solutions

## Residential Small Septic Systems

We provide some of the most popular alternatives to conventional septic systems. These systems meet most residential needs for any size single family home from upgrading existing systems to new construction. Click [HERE](#) to find out more!

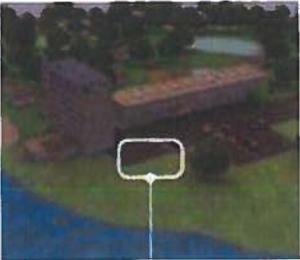

## Residential Clustered and Community Systems

These larger decentralized wastewater treatment systems provide small communities, subdivisions, apartment buildings and other clustered residential developments with innovative, affordable alternatives to a centralized sewage treatment plant.

# High Strength Commercial Systems

High Strength wastewater treatment systems available to offer commercial properties, such as retail or wholesale trade buildings, hotels, restaurants, offices, clinics/hospitals, warehouses, light manufacturing, and other such applications versatile and consistent high performance even on the most seemingly unbuildable lots.

# Other Treatment Products and Systems

BioMicrobics' expanded product offering includes other transfer and treatment devices and components for clustered residential wastewater infrastructure, high-strength commercial applications, nitrogen reduction, wastewater aeration and mixing, stormwater applications, FOG (fats/oils/grease) treatment, and various screening/filtration devices.

# About Adamas Construction...

## Company Profile

***Adamas Construction & Developments Service is a full-service general contractor, construction management firm and official Distributor of BioMicrobics products throughout the State of Montana.***

**Projects include, but are not limited to:**

Wastewater Treatment Systems

- Wastewater Treatment Plant
- Gray Water Treatment System
- Wastewater Treatment Process
- Potable Water Systems
- Water Treatment Technology
- Water Treatment Installation

Our primary focus has been, municipal and or tribal government, water and waste water systems, along with onsite water and waste water solutions. We also do Technical Consulting for those industries as well.

# Products

## BioMicrobics Specializes in Treatment and Transfer Products

With tens of thousands of installations all over the world, the BioMicrobics Fixed Integrated Treatment Technology (FITT®), such as our FAST® and BioBarrier® systems have been used successfully for the global onsite markets.

BioMicrobics serves the following markets with these solutions:

- Residential Wastewater Solutions (<http://biomicrobics.com/solutions/single-family/>)
  - RetroFAST® Septic System Enhancement (<http://biomicrobics.com/products/retrofast-wastewater-treatment-systems/>)
  - RetroFITT®-ee Septic System Enhancement (<http://biomicrobics.com/products/retrofit-ee-wastewater-treatment-systems/>)
  - MicroFAST® Wastewater Treatment Systems (<http://biomicrobics.com/products/microfast-wastewater-treatment-systems/>)
  - MicroFITT®-ee Wastewater Treatment Systems (<http://biomicrobics.com/products/microfitt-wastewater-treatment-systems/>)
  - SeptiTech® STAAR Residential Filter Systems (<http://biomicrobics.com/products/septitech-starr-residential-treatment-system/>)
  - BioBarrier® Membrane BioReactors (MBR) (<http://biomicrobics.com/products/biobarrier-membrane-bioreactor-mbr/>)
- Community Wastewater Solutions (<http://biomicrobics.com/solutions/multi-family/>)
  - MicroFAST® Wastewater Treatment Systems (<http://biomicrobics.com/products/microfast-wastewater-treatment-systems/>)

# Projects

[More Info](#)  
[Contact Us](#)

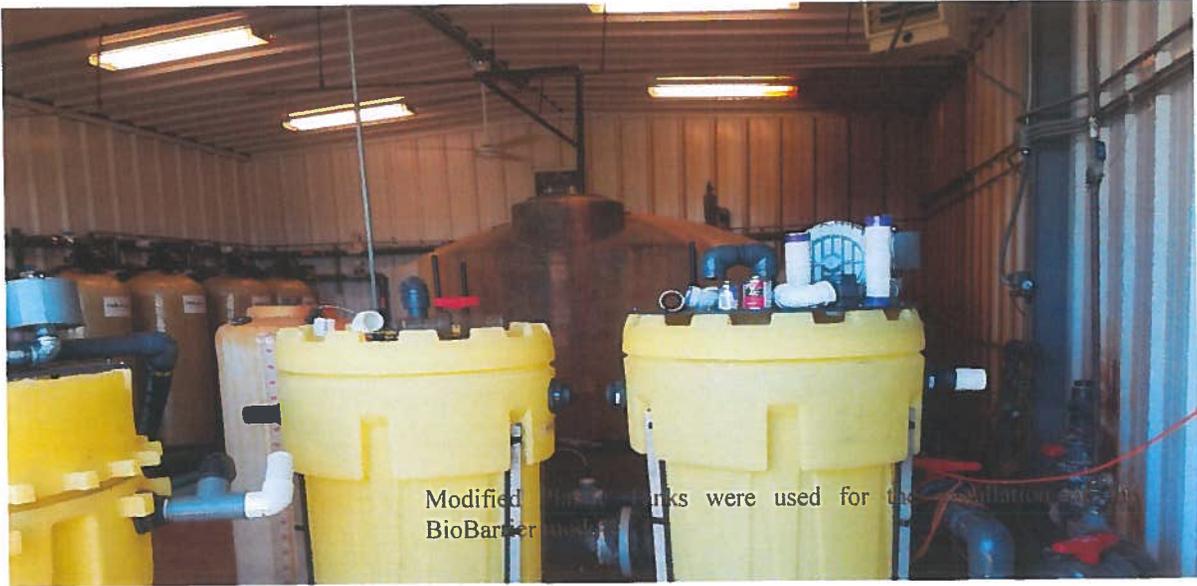

We provide from start to finish onsite water management services; including: permit research and path for plan approval, design of system, installation and maintenance of water recycling systems (such as the FAST® Wastewater Treatment and BioBarrier® MBR Systems), extensive engineering and technical support, on-site field services, and maintenance programs. Below are recent projects with BioMicrobics Advanced Wastewater Treatment Systems (AWTS) in the State of Montana:

## Point-of-Entry water filtration system

ADAMS installed the BioMicrobics prototype of a Point-of-Entry water filtration system. We have partnered with the Northern Cheyenne Tribal Government, Northern Cheyenne Utility Commission, Indian Health Services, EPA, Energy Labs and Montana State University water school Via Energy Labs for this project.

P-o-E Module  
Installation

Modified tanks were used for the BioBarrier

Focused on Environmental Engineering and water recycling, the BioMicrobics Systems, unlike a Septic System, takes up a fraction of the size and provides a *PERMANENT SOLUTION* for:

- **Single-Family Homes**
- **Vacation Homes**
- **Apartment Complexes**
- **Restaurants**
- **Truck Stops/Rest Areas**
- **Business Parks/Strip Malls**
- **Hotels/Motels/Resorts**
- **Subdivisions/Community**
