Subject: [EXTERNAL] Inspection Follow-up Information Request
Attachments: Small Business Resources Information Sheet January 2022.pdf; Receipt_for_Samples_3540-26.pdf

Importance: High

Dear Andrew Stepp:

Pursuant to Section 9(a) of FIFRA, 7 U.S.C. § 136g(a), this email serves as a follow-up records request under the U.S. Environmental Protection Agency's disinfectant-use inspection conducted on March 15, 2023. As agreed at the time of the inspection, EPA would like to request the following records pursuant to FIFRA section 8(b), 7 U.S.C. §135f(b) dating back to March 2, 2021:

- All labels for registered pesticides used at the Adelanto facility and SDSs for those products;
- All images taken by Geo Group's Associate Corporate Council, Andrew Stepp, during the inspection;
- The dilution rate for Halt disinfectant used in the facility;
- Medical complaints and/or internal investigative reports from guards and detainees that may have involved exposure to disinfectants;
- Disinfectant application logs;
- Training Materials/Records;
- Work Agreements that detainees sign; and
- Contact Information for the Adelanto Ice Detention Facility's Medical Staff.

We also have the following follow-up questions, since they were not answered during the inspection due to privacy concerns:

- Have any guards or detainees complained of exposure issues because of Halt or Sani-T-10 Plus or any other disinfectant used in the facility?
- Do the detainees have access to any cleaning materials for use in their housing units and pods?
- Are detainees required to wear PPE when they use said cleaning products?

You have 10 business days from this request to provide the aforementioned documents.

Thank you in advance.

Regards,

Ejan Petrie
