DEFENSES

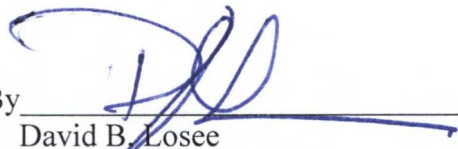

1. The removal of waste from the underground storage tank at the facility on August 29, 2012 was a spill response, not a tank pump-out.

2. At the time the truck left Respondents facility, there was no laboratory data indicating that it contained waste oil containing concentrations of PCBs in excess of 50ppm.
3. At no time from its collection on August 29, 2012 to September 11, 2012 did Respondent relinquish control of the waste oil load.
4. On August 30, 2012, Respondent received laboratory results indicating that the load of waste oil contained concentrations of PCBs of less than 2 ppm, 7 ppm, 11 ppm, and 45 ppm. Only on September 4, 2012, did Respondent receive a laboratory report showing PCB concentrations of 52 ppm.
5. Administrative procedures required by the Connecticut DEEP were followed, met and exceeded.
6. UOR "rejected" ESI's load solely because, prior to the arrival of the load at UOR's site, SSI requested UOR to reject the load and not to receive it.

REQUEST FOR HEARING

1. Respondent requests a Hearing on all material facts alleged in the Amended Administrative Complaint and not Admitted.
