

***National
Environmental
Achievement Track***

Application Form

Bridgestone/Firestone, Inc. Warren Plant

Name of facility

Bridgestone/Firestone, Inc.

Name of parent company (if any)

725 Bridgestone Drive

Street address

Morrison/ Tennessee/ 37357

City/State/Zip code

Give us information about your contact person for the National Environmental Achievement Track Program.

Name Sean S. Fisher

Title Senior Environmental Engineer

Phone (931) 668-5500, Extension 1033

Fax (931) 668-5681

E-mail seanfisher@bfusa.com

Why do we need this information?

EPA needs background information on your facility to evaluate your application.

What do you need to do?

- Provide background information on your facility.
- Identify your environmental requirements.

Section A

Tell us about your facility.

1 What do you do or make at your facility?

Truck and Bus Radial Tire Manufacturer

2 List the Standard Industrial Classification (SIC) code(s) or North American Industrial Classification System (NAICS) codes that you use to classify business at your facility.

SIC
3011

NAICS
326211

3 Does your company meet the Small Business Administration definition of a small business for your sector?

Yes No

4 How many employees (full-time equivalents) currently work at your facility?

- Fewer than 50
 50-99
 100-499
 500-1,000
 More than 1,000

5 Does your facility have an EPA ID number(s)?

Yes No

If yes, list in the right-hand column.

TND987784386, 000007871738, 000007338756,
37357BRDGSHWY55, TND987776309,
TN0064629, TNR053210

6 Identify the environmental requirements that apply to your facility. Use the Environmental Requirements Checklist, at the back of the instructions, as a reference. List your requirements to the right *or* enclose a completed Checklist with your application.

See enclosed checklist

7 Check the appropriate box in the right-hand column.

I've listed the requirements above.

I've enclosed the Checklist with my application.

8 Optional: Is there anything else you would like to tell us about your facility?

Bridgestone/Firestone, Inc. (BFS) Warren facility obtained our certificate of approval for compliance with ISO 14001:1996 on January 21, 1999. The BFS-Warren facility has also received the following awards from the Tennessee Department of Environment and Conservation:

- 1995 Governor's Award for Excellence in Hazardous Waste Management
- 1998 Tennessee Industrial Pollution Prevention Award
- 1999 Governor's Award for Excellence in Hazardous Waste Management
- 1999 Tennessee Industrial Pollution Prevention Award

Section B

Tell us about your EMS.

Why do we need this information?

Facilities must have an operating Environmental Management System (EMS) that meets certain requirements.

What do you need to do?

- Confirm that your EMS meets the Achievement Track requirements.
- Tell us if you have completed a self-assessment or have had a third-party assessment of your EMS.

1 Check *yes* if your EMS meets the requirements for each element below as defined in the instructions.

- a. Environmental policy Yes
- b. Planning Yes
- c. Implementation and operation Yes
- d. Checking and corrective action Yes
- e. Management review Yes

2 Have you completed at least one EMS cycle (plan-do-check-act)? Yes

3 Did this cycle include both an EMS and a compliance audit? Yes

4 Have you completed an objective self-assessment or third-party assessment of your EMS? Yes

If yes, what method of EMS assessment did you use?

Self-assessment

GEMI Other

CEMP

Third-party assessment

ISO 14001 Certification

Other

Section C

Tell us about your past achievements and future commitments.

Why do we need this information?

Facilities must show that they are committed to improving their environmental performance. This means that you can describe past achievements and will make future commitments.

What do you need to do?

Refer to the Environmental Performance Table in the instructions to answer questions 1 and 2.

- 1 Describe your past achievements for at least two environmental aspects. If you need more space than is provided, attach copies of this page.

Note to small facilities: If you qualify as a small facility as defined in the instructions, you are required to report past achievement for at least one environmental aspect.

First aspect you've selected

What aspect have you selected?	What was the previous level (2 years ago)?		What is the current level?	
	Quantity	Units	Quantity	Units
Hazardous Solid Waste	292	kilograms per year	74	kilograms per year
<p>i. How is the current level an improvement over the previous level?</p> <p>The current level is a 75% reduction from 1998 and is a 97% reduction from 1996. Reducing hazardous waste generation reduces cost, paperwork, safety considerations and liability associated with hazardous waste.</p>				
<p>ii. How did you achieve this improvement?</p> <p>Collect material with hazardous characteristic(s) from existing processes and recycling the material into the source process. The hazardous waste generation rate was reduced from 2,337 kilograms in 1996 to 74 kilograms in 1999. Examples include reusing cement by collecting previously waste cement and using the material in batches of new cement. Paint waste was eliminated by using the "ends" in paint cans in the newly opened paint can. Thinners when used for cleaning are used to thin paint being used for maintenance activity.</p>				

Second aspect you've selected

What aspect have you selected?	What was the previous level (2 years ago)?		What is the current level?	
	Quantity	Units	Quantity	Units
Air Emissions – Open Burning of wood pallets	4100	wood pallets per year	0	wood pallets per year

i. How is the current level an improvement over the previous level?

The current level is a 100% reduction from the previous level. Discontinuation of wood pallet burning reduces air emissions from pallet burning. Also, community concerns from visible smoke at the facility is eliminated.

ii. How did you achieve this improvement?

Preference is given to materials in returnable containers/pallets. Plastic pallets and metal containers are either reused or sent back to the supplier for a credit. Cardboard pallets are baled on-site and recycled off-site. Wooden pallets are rarely used for incoming materials, but the ones received are collected and recycled off-site.

2 Select at least four environmental aspects (no more than two from any one category) from the Environmental Performance Table in the instructions and then tell us about your future commitments. If you need more space than is provided, attach copies of this section.

Note to small facilities: If you are a small facility, you are required to make commitments for at least two environmental aspects in two different categories.

First aspect you've selected

a. What is the aspect?

Air Emissions of Toxics from cements, solvents, paints and inks.

b. Is this aspect identified as significant in your EMS?

Yes No

- c. What is the current level? You may choose to state this as an absolute value or in terms of units of production or output.
- Option A: Absolute value 4.3 tons per year (Quantity/Units)
- Option B: In terms of units of production or output (Quantity/Units)
- d. What is the improvement you are committing to over the next three years? You may choose to state this as an absolute value or in terms of units of production or output.
- Option A: Absolute value <1 ton per year (Quantity/Units)
- Option B: In terms of units of production or output (Quantity/Units)
- e. How will you achieve this improvement?
- Substitute existing cements, solvents, paints and inks that contain hazardous air pollutants (HAPs) with "HAP-free" cements, solvents, paints and inks used in the production of tires. "HAP-free" is defined as less than 1 percent total HAPs by formulation.

Second aspect you've selected

- a. What is the aspect?
- Air Emission of VOCs
- b. Is this aspect identified as significant in your EMS?
- Yes No
- c. What is the current level? You may choose to state this as an absolute value or in terms of units of production or output.
- Option A: Absolute value (Quantity/Units)
- Option B: In terms of units of production or output 45 grams solvent VOC per Tire (Quantity/Units)
- d. What is the improvement you are committing to over the next three years? You may choose to state this as an absolute value or in terms of units of production or output.
- Option A: Absolute value (Quantity/Units)
- Option B: In terms of units of production or output 42 grams solvent VOC per Tire (Quantity/Units)

e. How will you achieve this improvement?

Continual improvement activities to reduce solvent usage in the manufacture of tires.

Third aspect you've selected

a. What is the aspect?

Solid Waste to Landfill

b. Is this aspect identified as significant in your EMS?

Yes No

c. What is the current level? You may choose to state this as an absolute value or in terms of units of production or output.

Option A:
Absolute value
(Quantity/Units)

Option B:
In terms of units of production or output
0.044 cubic yards waste to landfill per M-lbs rubber produced
(Quantity/Units)

d. What is the improvement you are committing to over the next three years? You may choose to state this as an absolute value or in terms of units of production or output.

Option A:
Absolute value
(Quantity/Units)

Option B:
In terms of units of production or output
0.040 cubic yards waste to landfill per M-lbs rubber produced
(Quantity/Units)

e. How will you achieve this improvement?

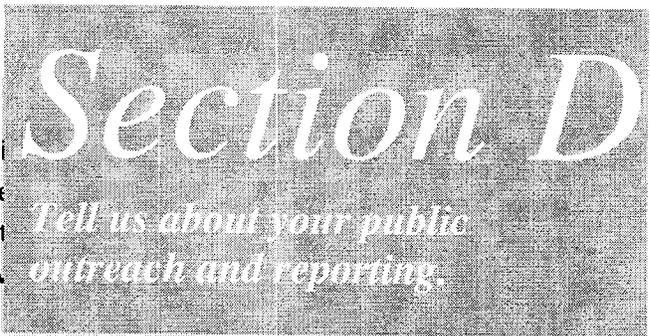

Continual improvement activities to reduce scrap and sending waste to off-site recycling facilities as appropriate.

Fourth aspect you've selected

- a. What is the aspect? Water Use – Scrubber Water Recycle
- b. Is this aspect identified as significant in your EMS? Yes No
- c. What is the current level? You may choose to state this as an absolute value or in terms of units of production or output. Option A: Absolute value 0% recycled water in floor scrubbers (Quantity/Units) Option B: In terms of units of production or output (Quantity/Units)
- d. What is the improvement you are committing to over the next three years? You may choose to state this as an absolute value or in terms of units of production or output. Option A: Absolute value 50% recycled water in floor scrubbers (Quantity/Units) Option B: In terms of units of production or output (Quantity/Units)
- e. How will you achieve this improvement? Design and install floor scrubber water treatment system with the capacity to produce treated water that can be reused in floor scrubbers.

Why do we need this information?

Facilities must demonstrate their commitment to public outreach and performance reporting. You should have appropriate mechanisms in place to identify community concerns, to communicate with the public, and to provide information on your environmental performance.

What do you need to do?

- Describe your approach to public outreach.
- List three references who are familiar with your facility.

1 How do you identify and respond to community concerns?

The Warren plant welcomes community input and we take several active steps to listen and respond to our community. One way we identify community concerns is through our Community Advisory Committee (CAC). The CAC, which meets approximately every six weeks, provides input and review of the plant's objectives, targets and overall performance. The group consists of representatives from business organizations, education, and local government. The group is encouraged to discuss plant-related issues that concern them or their organization.

The Warren plant has a systematic approach for receiving, documenting and addressing community concerns. Calls from the general public regarding environmental issues are routed to our environmental manager. These calls also include a statement of our Safety, Quality and Environmental Policy. We maintain an internal communications program for soliciting employee suggestions and concerns.

The Warren plant is also involved in a broad range of community activities. Our commitment to organizations, such as the Chamber of Commerce, United Way, American Heart Association, March of Dimes and the American Cancer Society, provides

us a unique opportunity to listen to citizen needs and interests. In addition, the plant participates in the local organization, Partners in Education, that supplies needed financial assistance to local schools.

2 How do you inform community members of important matters that affect them?

The Warren plant is committed to keeping the community informed about important matters that affect them. To reach the general community, we will issue press releases as needed or work directly with the local newspaper and radio stations. We also maintain on-going communications with our CAC through meetings, mailing and telephone calls.

In addition, we keep our employees abreast of key issues through internal department communications and periodic mailings. We also maintain a plant-wide web page. Through these efforts, our employees provide current information to their family and friends.

3 How will you make the Achievement Track Annual Performance Report available to the public?

Website www.bfusa.com

Newspaper

Open Houses

Other

4 Are there any ongoing citizen suits against your facility? Yes No

If yes, describe briefly in the right-hand column.

5 List references below

	<i>Organization</i>	<i>Name</i>	<i>Phone number</i>
<i>Representative of a Community/ Citizen Group</i>	Chamber of Commerce	Jim Gray	(931) 473-6611
<i>State/Local Regulator</i>	Tennessee Department of Environment and Conservation	Ernie Blankenship	(615) 741-5262
<i>Other community/local reference</i>	Motlow Community College	Dr. Frank Glass	(931) 393-1682

Section E

Application and Participation Statement

On behalf of Bridgestone/Firestone, Inc. Warren Plant,

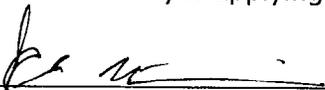

I certify that

- I have read and agree to the terms and conditions, as specified in the *National Environmental Achievement Track Program Description* and in the *Application Instructions*;
- I have personally examined and am familiar with the information contained in this Application (including, if attached, the Environmental Requirements Checklist). The information contained in this Application is, to the best of my knowledge and based on reasonable inquiry, true, accurate, and complete, and I have no reason to believe the facility would not meet all program requirements;
- My facility has an environmental management system (EMS), as defined in the Achievement Track EMS requirements, including systems to maintain compliance with all applicable federal, state, tribal, and local environmental requirements, in place at the facility, and the EMS will be maintained for the duration of the facility's participation in the program;
- My facility has conducted an objective assessment of its compliance with all applicable federal, state, tribal, and local environmental requirements, and the facility has corrected all identified instances of potential or actual noncompliance;
- Based on the foregoing compliance assessment and subsequent corrective actions (if any were necessary), my facility is, to the best of my knowledge and based on reasonable inquiry, currently in compliance with applicable federal, state, tribal, and local environmental requirements.

I agree that EPA's decision whether to accept participants into or remove them from the National Environmental Achievement Track is wholly discretionary, and I waive any right that may exist under any law to challenge EPA's acceptance or removal decision.

I am the senior facility manager and fully authorized to execute this statement on behalf of the corporation or other legal entity whose facility is applying to this program.

Environmental Requirements Checklist

The following Checklist is provided to assist facilities in answering Section A, "Tell us about your facility," Question 6. The Checklist is given to help facilities identify the major federal, state, tribal, and local environmental requirements applicable at their facilities. The Checklist is not intended to be an exhaustive list of all environmental requirements that may be applicable at an individual facility.

If you use this Checklist and choose to submit it with your application, fill in your facility information below and enclose the completed Checklist with your application (see instructions).

Facility Name Bridgestone/Firestone, Inc. Warren Plant
Facility Location: 725 Bridgestone Drive, Morrison, TN 37357
Facility ID Number(s): TND987784386, 000007871738, 000007338756,
