Subject Fluorescent Bulb Sale (IN-PLANT)

09/26/2007 10:58 AM

*CFL's (Compact Fluorescent Lights) typically use 75% less energy and last 10 times longer than incandescent bulbs .

*If you replaced just the 5 most used fixtures in your house with Energy Star qualified CFL's, you'd save as much as \$60 a year in energy costs .

*If every Wisconsin resident changed just one bulb in their household , the annual environmental impact would be the equivalent of removing 22,219 cars from the road .

**What: *60, 75, and 100 Watt Equivalent Twist Bulbs
--Will Be 99 Cents Per Bulb!!!**

Limit 24 Bulbs Per Purchase

***Recessed Can Lights Will Also Be Available For \$2.99**

When: October 18th (6 AM to 4 PM--While Supplies Last)

Where: Main Lunchroom

Payment: Cash Or Check

Print out the attached poster and distribute or post where appropriate

Subject Fluorescent Bulb Sale Facts

10/23/2007 11:04 AM

The sale appeared to be a success! Over 4,000 bulbs were sold to 3M'ers in this one day event. We do realize that there was strong interest in the recessed can lights, but unfortunately our vendor could only secure about 200 of these. If the back-order situation is resolved, there is a potential for another sale in the near future.

If all of these bulbs were installed we'd collectively see:

- Electric savings of 154,924 KWH.
- Financial savings of \$14,578 off our energy bills.
- Preventing 77 tons of coal from being burned to provide electricity.
- Removing 186 tons of carbon dioxide from our atmosphere.
- Removing the equivalent of 25 cars from the road.

Many thanks to all for their participation!

Energy Team
