Re: **Cardinal Distributing Company, Inc.**
Baltimore, Maryland
Report Pursuant to TSCA Section 8(e)

To whom it may concern:

This report is being submitted in accordance with Section 8(e) of the Toxic Substances Control Act.

The person reporting this information is Daniel P. Paskiewicz, President of Cardinal Distributing Company, Inc., 6801 Quad Avenue, Baltimore, Maryland 21237, Telephone 410-325-2121.

Chemical substance or mixture being reported: Lead

Studies have shown that the absorption of lead following oral or dermal exposure may cause serious adverse effects and a substantial risk of injury to the health of children. See Section 2 of the Federal Hazardous Substance Act (FHSA)(15 U.S.C. § 1261).

Cardinal Distributing Company, Inc. distributed products containing lead into commerce through vending machines located in various locations throughout the United States. These products have been the subject of voluntary recalls in cooperation with the CPSC on the following dates: April 17, 2007, May 2, 2007, and May 15, 2007. Specifically, 900,000 children's charm bracelets and "sportswear" necklaces were recalled on April 17, 2007. Two hundred children's rings with dice or horse shoes were recalled on May 2, 2007, and 300,000 children's turquoise rings were recalled on May 15, 2007. On July 8, 2004, Cardinal Distributing, in conjunction with three other firms, recalled toy jewelry, some of which contained lead.

Due to the short life span of children's jewelry distributed in vending machines, it is unlikely that more than a very few of these products remain in commerce or in the possession of children. Nevertheless, because these products at the time of distribution presented an ongoing substantial risk of injury, Cardinal Distributing makes this report to the EPA.
