Attention: T. O'Bryan

Dear Sir:

In a supplemental report of October 7, 1985, from Union Carbide Corporation to the Environmental Protection Agency in the matter of the following "FYI" report,

Document Control Number: FYI-OTS-0684-0323;
Chemical: Ethylene Glycol, 1,2-Ethanediol (C₂H₆O₂);
CAS No.: 107-21-1;

We advised that the final report would issue about November 15, 1985, and that it would be forwarded to the Agency when received. Enclosed is a copy of that report, entitled:

"Evaluation of the Teratogenic Potential of Ethylene Glycol Aerosol in the CD Rat and the CD -1 Mouse", Final Project Report No. 48-100, R. W. Tyl, Bushy Run Research Center, November 15, 1985.

This report is complete as submitted, except that, as noted on the final page, Appendices have been not included because of the cost of reproduction and distribution of the Appendices. Please advise if the Agency has need for the basic underlying data as contained in the Appendices, and continue to communicate through my office with any further questions.

Very truly yours,

D. L. Heywood
