 Washington, D. C. 20460

Dear Mr. Merenda:

Re: EPA DOCUMENT CONTROL NO: 8EHQ-0281-0382

In my May 4, 1981 letter, I provided you with the documentation requested, including summaries of all the toxicological studies enumerated. Complete copies of the final results, including the test protocols and data, are available at the Pesticides Branch of the Environmental Protection Agency for the compounds

dichlorodimethylhydantoin

bromochlorodimethylhydantoin.

These two chemicals have recently been granted Manufacturing Use Registrations Nos. 38906-3 and 38906-4, respectively. These files are, of course, available for your review.

The test results, protocols, and data for dibromodimethylhydantoin are available from Glyco if required for study.

Sincerely yours,

T.A. Girard

Theodore A. Girard
 Senior Vice President
