**Subject: TSCA 8(e) Submission - Correction to data supplied in reference number 8EHQ-06-16347**

Dear Sir/Madam:

This letter replaces a previous TSCA 8(e) submission letter dated March 20, 2006 that contained corrected information previously submitted in the original letter dated January 9, 2006. The letter of March 20, 2006 contained the following typographical error. The test alga, *Pseudokirchneriella subcapitata*, was formerly named *Selenastrum capricornutum*, not *Scenedesmus subspicatus* as the March 20, 2006 letter incorrectly identified.

In the original letter dated January 9, 2006, Parametrix, Inc. submitted unaudited preliminary results from a 72-hour test of the freshwater alga, *Pseudokirchneriella subcapitata* (formerly named *Selenastrum capricornutum*) to the United States Environmental Protection Agency (USEPA) pursuant to Section 8(e) of the Toxic Substances Control Act (TSCA). An audit of the data revealed that the preliminary values submitted for the 72-h EC<sub>50</sub> for the growth rate (3.2 mg/l) and biomass (0.67 mg/L) and the 72-h NOEC (0.33 mg/L) on Tin (II)2-ethylhexanoate (CASRN 301-10-0) were incorrect.

The wrong test material was used for the initial study and the study was repeated. Parametrix, Inc. is now submitting audited final results from the repeated 72-hour test of the freshwater alga, *Pseudokirchneriella subcapitata*. The corrected information is as follows: The reported 72-hour EC<sub>50</sub> (growth rate) is 6.9 mg/L (extrapolated), the 72-h EC<sub>50</sub> (biomass) is 1.0 mg/L, the 72-hour no-observed-effect concentration (NOEC) for biomass is 0.22 mg/L (based on calculated EC<sub>10</sub>), and the 72-h NOEC for growth rate is 0.54 mg/L.

This submission by Parametrix, Inc. is on behalf of the Organotin Environmental Programme (ORTEP) Association member companies producing Tin (II)2-ethylhexanoate in the United States. The managing parties of this international consortium (Arkema Inc., Chemtura Corporation, and Rohm and Haas Co.) assert on behalf of the sponsoring companies that this notice does not involve effects in humans. This notice does not contain confidential business information (CBI).

Further questions regarding this submission may be directed to me at (425) 458-6222.

Best regards,  
PARAMETRIX, INC.
