Re: 8EHQ-0498-14170S and
8EHQ-0498-14171S

Dear Sir:

On April 24, 1998, FMC Corporation notified EPA, pursuant to TSCA 8(e), of substantial risk information relative to two toxicity studies (as referenced above) conducted with a FMC generically known as N-amino aryluracil. In that submission, FMC claimed the chemical identity and use as Confidential. Substantiation of those claims were submitted on May 18, 1998.

Quite recently, on July 30, 1998, I received a letter from Richard Hefter requesting "information on uses and other available exposure information" on the above cited chemical. This chemical, as mentioned in our CBI Substantiation letter, is a Research and Development chemical which was synthesized by our . FMC has recently made the decision not to develop this chemical for commercialization. No further studies are intended to be conducted nor is any type of testing scheduled.
