Subject: TSCA Section 8(e) Submission

8EHQ-96-13743

Dear Sir/Madam:

Elf Atochem North America Inc. (Elf Atochem) has received preliminary results of a micronucleus cytogenetic assay in mice and is submitting the results of this study to the Environmental Protection Agency (EPA) pursuant to Toxic Substances Control Act (TSCA) Section 8(e). This study provides information on di-t-butyl peroxide (CAS Registry Number 110-05-4) and does not involve effects in humans. A copy of the full report will be forwarded to the Agency when it is available.

Nothing in this letter is considered confidential business information of Elf Atochem.

Under the conditions of the study, di-t-butyl peroxide produced a weakly positive response in the micronucleus cytogenetic assay conducted in mice. Results from the study report will be incorporated into the Elf Atochem Material Safety Data Sheet for the material.

Further questions regarding this submission may be directed to me at (215) 415-5890.

Sincerely,

*Debra Randall*
