re: TSCA, Section 8(e)
CAS Number 125997-21-9

Akzo Nobel Functional Chemicals LLC hereby advises the Environmental Protection Agency in accordance with TSCA Section 8(e) and the Statement of Interpretation and Enforcement Policy 43, Federal Regulation 1110 (March 16, 1978) that the chemical substance, CAS Number 125997-21-9, shows EC50 in Daphnia magna between 0.021 and 0.065 mg/liter in a 21-day aquatic reproduction study. There was no effect at 0.021 mg/liter and 100% immobilization at 0.065 mg/liter. The method of analysis, which was used due to the overall decline in the measured concentrations of the centrifuged test media throughout the study, expresses the results in terms of the chemical substance in solution providing the worst case scenario.

Very truly yours,

William F. Gentit
