RE: Submission is for the purpose of providing a correction to the Original TSCA 8(e) Notification dated 17 December 2004, which was filed under Document Control Number 8EHQ-05-15885.
 (When responding, please refer to JAB-06-010).

Dear Sir:

Chemtura Corporation (formerly Great Lakes Chemical Corporation) submits this follow-up letter of substantial risk notification in accordance with Section 8(e) of the Toxic Substances Control Act, 15 USC 2607(e), and the Environmental Protection Agency's "Statement of Interpretation and Enforcement Policy" thereof 43 FR 1110, 35 seq., March 16, 1978. This letter provides a correction to the original TSCA 8(e) notification dated 17 December 2004. The original submission covered a verbal report and draft Summary Data Tables received from the laboratory that performed the OECD 421 Reproduction/Developmental Toxicity Screening Test on isopropylated triphenyl phosphate (common name) [

].

It was brought to our attention that a statement error may be present in our original submission, which we confirmed. The error is within the fourth paragraph of the original notification whereby it states, "No animals were gravid in the control group." Corrected, the statement reads, "All animals were gravid in the control group."

Sincerely,

John A. Biesemeier
 Corporate Senior Toxicologist
 Technical
