RE: TSCA 8(E) SUPPLEMENTAL SUBMISSION:
Docket No. 8EHQ-06-16525

Dear Sirs:

3M is submitting this study to supplement its previous submission on July 14, 2006 on isopropylmorpholine. 3M has received preliminary data for a Local Lymph Node Assay (LLNA) in mice conducted on this research and development chemical that 3M purchases from a supplier. This chemical was positive for contact hypersensitivity in the LLNA.

The study was conducted by NOTOX Safety and Environmental Research Laboratory. The stimulation index (SI) was 5.5 at 100% concentration of the test material. The final report containing the details will be forwarded to the EPA when it is received from the test facility.

Please contact Dayna Blomquist (651-736-5413) if you have any questions or if we can provide additional information.

Sincerely,

Katherine E. Reed
Staff Vice President, Environmental Health and Safety Operations
